## Baked Delhi waits to exhale

SAUMYA SHUKLA ■ NEW DELHI

It's raining fire in the national Capital as the city recorded its highest temperature of 46.8 degrees Celsius on Wednesday, surpassing its 79-year-old record of 46.4 degrees Celsius set in 1945. While Mungeshpur logged the highest ever temperature in the city at 52.9 degrees Celsius, 13 degrees above normal, areas like Narela and Najafgarh saw temperatures reaching 49 degrees Celsius. To get relief, heat-stricken residents were seen drinking ORS-laced drinks, using wet towels, and taking multiple baths a day. Delhi broke all previous records in the country as the previous highest temperature in India was recorded in Rajasthan's Phalodi in 2016 at 51 degrees Celsius. It is also just 3.8 degrees behind the highest temperature ever recorded on Earth of 56.7 degrees Celsius at the Greenland Ranch in California's Death Valley, which is now aptly referred to as the Furnace Creek Ranch. The maximum temperature in Delhi was recorded at 46.8 degrees Celsius, which is six degrees above the normal, while the minimum temperature settled at 29.4 degrees Celsius. However, the weather

### Reprieve, heat, repeat

ARCHANA JYOTI ■ NEW DELHI

Northwest and Central India, which have been in the grip of unprecedented heatwave conditions in the last few days, may get some respite gradually from Thursday. However, don't breathe a sigh of relief as unfortunately, after the respite, the region will again witness a higher number of heatwave days in June. "Normally, northwest India

and the adjoining areas record two to three heatwave days in June. But this time, we expect four to six days of heatwave in this region," said IMD chief Mrutyunjay Mohapatra. The IMD has issued a red warning for six States in the region — Rajasthan, Punjab, Haryana, Delhi-NCR, East Uttar Pradesh, and Madhya Pradesh — indicating severe heatwave conditions. It downgraded the red alert to an orange alert over these

States on May 30 but it will persist in Punjab, Haryana, and Delhi-NCR until May 31, as per the IMD. Heatwave to severe heatwave conditions are very likely in most/much parts of Punjab, Haryana-Chandigarh, Delhi, Rajasthan, Uttar Pradesh, Madhya Pradesh on May 29 and gradual reduction thereafter with heatwave conditions in isolated/some parts till June 1, 2024, as per the IMD. **Continued on Page 2**

experienced a sudden change on Wednesday evening as the sky turned cloudy and witnessed light drizzling in some parts, providing short relief to Delhiites. But the short respite was followed by more discomfort due to the humidity caused by light rain. The roasting heat has led to the Delhiites taking several measures to ensure their well being along with trying to stay indoors as much as possible. However, some residents said it is not easy to be indoors all the time as one has to go and earn a livelihood. People were seen flocking air conditioned buses and preferring the metro for their journey while also spending their time inside air-conditioned shopping malls. In Delhi ITO metro station, many, who came to get their passports from the office nearby, were seen taking refuge in the station to beat the heat amid long queues. A 40-year-old woman sitting at the entry passage said it is the best way she could escape the scorching summer heat. With temperatures nearing 50 degrees Celsius in Mungeshpur and Najafgarh in the last few days, residents said they have been constantly falling ill despite taking many measures to beat the heat. **Continued on Page 2**

## SC cold to Kejriwal bail extension plea

RAJESH KUMAR ■ NEW DELHI

In a major setback to AAP Iconvener and Delhi Chief Minister Arvind Kejriwal, the Supreme Court registry on Wednesday refused to list his plea to extend his interim bail by a week to undergo certain medical tests. During their campaign, the BJP questioned Kejriwal for seeking yet another relief from the court. They took a jibe at the AAP leader, stating that he can campaign in the Lok Sabha polls in intense heat but complains of illness when mandated by the judiciary to surrender soon after the campaign ends. The development comes a day after a vacation bench refused to allow the urgent hearing, saying it would be appropriate if the Chief Justice of India takes a call on this. Kejriwal is out on bail in the liquor policy linked money laundering case and the same will expire on June 1. Kejriwal will have to surrender before the Tihar jail authorities on June 2. Kejriwal is currently campaigning in

Punjab which will go to polls on June 1. In a related development, his aide Bibhav Kumar has also moved the Delhi High Court challenging his arrest in connection with the alleged assault on AAP MP Swati Maliwal at the CM's residence earlier this month. Kejriwal has sought extension of his interim bail by seven days to undergo a host of medical tests, including a PET-CT scan, in view of his "sudden and unexplained weight loss coupled with high ketone levels", which are indicative of kidney, serious cardiac ailments and even cancer. The Chief Minister, in his fresh plea filed on May 26, said he will surrender before jail authorities on June 9 instead of June 2, the scheduled date for his return to prison. The top court had on May 10 granted 21-day interim bail to the chief minister, who was arrested in a money laundering case linked to the excise policy 'scam', to enable him to campaign for the Lok Sabha polls. **Continued on Page 2**

## Prajwal books return ticket, date with SIT

PNS ■ BENGALURU/NEW DELHI

Suspended JD(S) leader Prajwal Revanna, who is facing sexual abuse charges, has booked a return flight ticket to Bengaluru from Munich on May 30, official sources said on Wednesday. According to sources in the Special Investigation Team (SIT), the 33-year-old grandson of JD(S) supreme HD Deve Gowda is expected to land in Bengaluru in the small hours of May 31. Revanna on Wednesday moved a Special Court seeking anticipatory bail in the rape case registered against him. His advocate filed an anticipatory bail application in the Special Court for cases involving MPs/MLAs. He reportedly left for Germany on April 27, a day after Hassan LS seat went to polls, and is still at large. The SIT is maintaining vigil at the Kempegowda Airport to arrest him as soon as he lands. The MP, who is seeking re-election as the NDA candidate from Hassan Lok Sabha segment, fled to a foreign country as soon as the news broke out that the Karnataka State Commission for Women requested Chief Minister Siddaramaiah to order an investigation into the huge cache of explicit videos showing several women being sexually assaulted allegedly by him.

Police personnel and civilians near the escort vehicle, part of the convoy of Brij Bhushan Sharan Singh's son and BJP leader Karan Bhushan Singh, that allegedly hit a biker, in Gonda, on Wednesday. At least two people were killed in the accident, according to officials. PTI

## SUV in Brij Bhushan son's convoy mows down two, injures 2

PNS ■ LUCKNOW

In an incident similar to that reported in Lakhimpur Kheri in which Union Minister of State for Home Ajay Mishra Teni's son was crushing farmers, a vehicle of the convoy of the son of Bharatiya Janata Party MP from Kaiserganj in Gonda district, Brij Bhushan Saran Singh, crushed two youths, including a 17-year-old, to death and critically injured an old woman. Soon after the accident, hundreds of local residents gathered at the spot and started raising slogans against the police administration, demanding action against the MP's son. They also blocked the road and tried to burn the Fortuner, leading to heated arguments between the police and the people, who were adamant on not allowing cops to take the bodies of the youths for post-mortem. Seeing the situation becoming violent, police from many police stations, Additional Superintendent of Police, police circle officer, sub-district magistrate, tehsildar and many other officers reached the spot and somehow calmed down the agitated people. After much struggle and persuasion, the police sent the bodies for autopsy. A complaint regarding the incident has been filed in the police station by Chanda Begum, a woman among the family members of one of the deceased youth.

vehicles, crushed two youths - 17-year-old Rehan and 21-year-old Shahzad Khan - who were coming to Karnailganj market on a motorcycle from Nidura village to purchase medicines. The Fortuner later broke the electric pole and also crushed 60-year-old Sita Devi, who was sitting in front of her house, critically injuring her. She has been admitted to hospital. Soon after the accident, hundreds of local residents gathered at the spot and started raising slogans against the police administration, demanding action against the MP's son. They also blocked the road and tried to burn the Fortuner, leading to heated arguments between the police and the people, who were adamant on not allowing cops to take the bodies of the youths for post-mortem. Seeing the situation becoming violent, police from many police stations, Additional Superintendent of Police, police circle officer, sub-district magistrate, tehsildar and many other officers reached the spot and somehow calmed down the agitated people. After much struggle and persuasion, the police sent the bodies for autopsy. A complaint regarding the incident has been filed in the police station by Chanda Begum, a woman among the family members of one of the deceased youth.

## Why can't Modi meditate in private, Oppn seethes

PIONEER NEWS SERVICE ■ NEW DELHI

Opposition parties, including Congress and Trinamool Congress, are to approach the Election Commission to first restrict and secondly prevent media publicity of Prime Minister Narendra Modi's meditation plans at Rock Memorial, a monument built in tribute to Swami Vivekananda, in Kanyakumari following the culmination of the Lok Sabha polls campaign on Thursday. West Bengal Chief Minister Mamata Banerjee said the Trinamool Congress will complain to the Election Commission if Prime Minister meditation in Kanyakumari is televised, claiming that it would be a violation of the election Model Code of Conduct (MCC). The Congress said the Election Commission should not grant permission for the PM's programme, as the model code of conduct was in force. "Such a move was an attempt at 'indirect campaigning' after the end of canvassing of votes," Tamil Nadu Congress chief K Selvaperunthagai alleged. The PM will meditate from

the evening of May 30 to the evening of June 1 at Dhyana Mandapam, the place where Vivekananda — a spiritual icon admired by Modi — is believed to have had a divine vision about 'Bharat Mata', BJP leaders said. The Prime Minister had gone on a similar meditation exercise in a Kedarnath cave after the 2019 poll campaign. "We will complain. He can meditate, but it cannot be aired on television," Mamata said, claiming that this will amount to "violation of the MCC." "Does anyone have to get cameras for doing meditation?" she asked, claiming that it was a way of

canvassing during the silence period between the end of campaign and the poll date. All arrangements, including heavy security, are in place for Modi's 45-hour stay at the Rock Memorial. The district in the country's southernmost tip will see a strong posse of 2,000 police personnel and various security agencies maintaining a tight vigil during the PM's event. Tirunelveli range DIG Praveh Kumar accompanied by superintendent of police E Sundaravathanam had inspected the security arrangements at the rock memorial, boat jetty, helipad and the State guest house in Kanyakumari. Even as the Prime Minister's core security team reached the venue, a trial of helicopter landing had also been conducted at the helipad. As per his tentative schedule, Modi is expected to arrive at Kanyakumari late afternoon on May 30 for the spiritual sojourn. He would later proceed to the memorial.

## Poll drive's heat, dust to simmer down today

RAJESH KUMAR ■ NEW DELHI

The epic campaign for the seven phase 2024 general elections spanning for about two months now amid intense heatwave will come to an end on Thursday evening for the last phase voting on Saturday to seal the fortunes of Prime Minister Narendra Modi in Varanasi, Bollywood actress Kangana Ranaut, Union Minister Anurag Thakur, National Conference leader Omar Abdullah, actor turned politician Ravi Kishan and TMC leader Abhishek Banerjee. The voting schedule period for the 2024 Lok Sabha elections, spread over 44 days, which is the second longest after the first parliamentary elections of 1951-52, which lasted for more than four months but then that time it was through ballot papers and the counting of votes lasted for 4/5 days. Interesting slogans ranged from "God of the Gods" to "Lord Jagannath" and "Mujra", "disco", "Bhangra", "Bharatnatyam" to Minimum Support Price (MSP) to farm loan waiver and Muslim appeasement dominated in

BJP supporters during Prime Minister Narendra Modi's campaign rally for Lok Sabha polls, in Mathurapur, West Bengal, on Wednesday. PTI

this phase that sparked controversy. Besides the Congress's khatakat, khatakat has become the buzz phrase so much so that even Modi used it to attack the Opposition. Khatakat khatakat has also spawned its own family of buzz phrases. Congress leaders, including Priyanka Gandhi, started using khatakat khatakat, a Hindi onomatopoeia that signifies something being done fast in a repeated movement. Everyone immediately took a liking to the buzz phrase khatakat khatakat with an addition of 'Good Bye Tata' a day earlier by Congress' Rahul Gandhi.

The high decibel campaign also saw political engagements on remarks like India racism and redistribution of wealth by then Congress Overseas Incharge Sam Pitroda leading to his removal from the post and the zenith was a sex scandal involving JD(S) leader Prajwal Revanna who is seeking reelection from his Parliamentary constituency Hassan. The seventh phase of polling will be held across 57 parliamentary constituencies, covering eight States and Union Territories on June 1. The stakes are high for the BJP in this phase as it has won 30 seats of the total 57 in 2019. **Continued on Page 2**

## Sop 'Khatakat' draws women to Bengaluru GPO

PTI ■ BENGALURU/NEW DELHI

An otherwise silent General Post Office (GPO) in Bengaluru is witnessing an unprecedented rush of women hurrying to open India Post Payment Bank accounts, anticipating a monthly deposit of Rs 8,500 into their accounts if the INDIA Bloc comes to power at the Centre. The elections are still in the process but women, largely from the minority communities sporting burqas, stood in long queues to open the account. Some of them believed that opening the IPPB account would ensure that they get Rs 8,500 per month. A woman said she stood in queue early in the morning itself. Another said everyone in her neighbourhood was saying that money would start coming from the day the account is opened, so she too came to open an account.

Most of the women PTI spoke to were from Shivajinagar, Chamarajpet and surrounding places in the city. Talking to

reporters, Chief Post Master of GPO Bengaluru H M Manjesh said people have been coming to the office to open IPPB accounts in the belief that the Department of Post would credit Rs 2,000 or Rs 8,500 into their accounts. "Actually it is a rumour. Somebody has spread this rumour. The department will not pay any amount to them. However, this account can be used for any type of online transaction or even Direct Benefit (Transfer) scheme," Manjesh clarified. He said the department has already informed the customers about this. "We have displayed some posters also. In spite of that, customers are requesting that we open IPPB accounts for them." There was such a rush that more counters were opened outside the GPO building, under the open sky, he added. "Earlier we used to open 50 to 60 accounts in a counter. Now we have made separate arrangements. We have brought our postmen for this

purpose and regularly we are opening around 500 to 600 accounts, sometimes even 1,000 accounts in a day," Manjesh said. According to sources in the department, this rush has been witnessed for the past three days. It is learnt that some Congress MLAs spread the rumours, believing that the women made a beeline for the GPO. The MLAs said the women will start getting money after June 4 "when the INDIA Bloc will come to power". The Congress has made a promise to launch the Mahalakshmi scheme under which Rs 8,500 will be directly credited into the account of women heads of families belonging to Below Poverty Line (BPL) category. It is similar to the Gruha Lakshmi guarantee scheme started by the Karnataka government in which Rs 2,000 is paid to women heads of BPL families.

# Pune Porsche hit and run case: Two doctors held for blood sample tampering suspended

T N RAGHUNATHA ■ MUMBAI

Under flak from various quarters, the Eknath Shinde-led MahaYuti government on Wednesday suspended two senior doctors from the state-run Sassoon Hospital who were arrested earlier for "manipulating" a blood sample of minor accused involved in the Pune Porsche hit-and-run case. In a notification issued in the evening the Directorate of Medical Education & Research (DMER), Mumbai, ordered the suspension of Dr. Ajay Taware, Head of the Forensics Department, Dr. Shrihari Halnor the chief medical officer of the hospital, with immediate effect. Simultaneously, the DMER sent the hospital Dean Dr. Vinayak Kale on "compulsory leave" and in his place, a senior doctor has been appointed. The action against the two tainted doctors came a day after a three-member committee - headed by Dr Pallavi Saple, Dean of Sir J. J. Hospital in

Mumbai - was appointed by the Maharashtra government to look into the "administrative lapses" leading to the manipulation of the crucial blood sample.

Dr Taware and Dr Halnor, who have been charged with the alleged "manipulation" of blood samples and destruction of evidence in the case, are currently in police custody. The police have recovered Rs 3 lakh during the raid conducted on the homes of Dr. Halnor and another hospital peon Atul Ghatkamble. The money had allegedly been paid by the family of the accused boy for manipulating the blood sample. The juvenile boy, involved in the mishap, is currently lodged in a Juvenile Correctional Home in Pune, his father Vishal Agarwal is in judicial custody. The boy's grandfather Surendra Kumar Agarwal -- who was arrested on May 25 for allegedly threatening and confining the family driver Gangaram Poojari and forcing him to take the blame for the Porsche

car accident on his head in return for a monetary consideration - is in the police custody in the same case. Poojari is a witness in the case. Incidentally, the suspension of two tainted doctors of the Sassoon Hospital came on a day when the Opposition Congress asked the Eknath Shinde-led MahaYuti government to name the MLA, whose son was accompanying the minor boy when the latter fatally ran over two IT professionals in the small hours of May 19. Talking separately to media persons, leader of the Opposition Vijay Wadettiwar of the Congress and Maharashtra Pradesh Congress Committee chief Nana Patole

charged that an MLA's son had attended the liquor party hosted by the accused minor boy and was accompanying the latter in his Porsche car when the mishap took place. "Right from the beginning, there has been political interference in the case. A serious attempt has been made to protect the boy involved in the hit and run case. Now, we learn that son of an MLA not only drank with the minor boy but he also accompanied the boy in the Porsche car (that killed two techies). We want the state government to come clean and declare the name of the MLA whose son was accompanying the accused boy," Wadettiwar said. Alleging that there was indeed

political interference in the investigations into the Porsche hit-and-run case, Patole said: "Before the minor son of a rich person crushed two people under his car, he had consumed alcohol and at that time, the son of the MLA was with him. We also learn that the MLA's son was also with the accused minor when the mishap took place. That's why we want the Shinde government to reveal the name of the MLA concerned."

"This is a serious matter. Two Deputy Chief Ministers (Devendra Fadnavis and Ajit Pawar) find themselves in the dock. They need to provide us the answer," Patole said. While Fadnavis holds the crucial state home portfolio, Ajit Pawar heads the NCP - to which the MLA whose son had accompanied the minor accused in his car during the May 19 mishap is reportedly affiliated to. The demand by Wadettiwar and Patole should be seen in the light of speculation that soon after the mishap, an MLA

belonging to the ruling NCP (Ajit Pawar faction) had intervened and spoken to the Yerwada police to water down the case and that he had even asked the police to handle the accused boy with kid gloves. Wadettiwar demanded to know as to why Dr. Ajay Taware, Head of the Forensics Department of the Sassoon General Hospital -- who is one of the two doctors arrested for allegedly manipulating the blood sample of the accused minor boy - was not transferred from his position in December 2023, despite the fact that the then Pune Divisional Commissioner Deepak Mhaisekar had made a recommendation to that because of Dr Taware's involvement in a kidney transplant case.

In a related development, the Uddhav Thackeray-led Shiv Sena (UBT) raised concerns over security of Dr.Taware. "Dr Taware is a crucial witness in the Porsche crash case, he knows many things and his safety is important.

## Immense enthusiasm for last phase polls among voters: EC

PIONEER NEWS SERVICE ■ NEW DELHI

The Election Commission (EC) on Wednesday said the last phases of the Lok Sabha elections have seen immense enthusiasm among voters of various sections such as persons with disabilities, senior citizens, transgenders, and members of particularly vulnerable tribal groups. Home voting facility for senior citizens above 85 years of age and persons with disabilities with 40 per cent benchmark disability was extended for the first time on pan-India basis in this parliamentary polls, the EC noted. An EC statement quoting Chief Election Commissioner Rajiv Kumar said, "It has been the deep founded resolve of the Commission to strive for continuous improvement in the electoral processes setting new standards globally." The EC, Kumar said, is determined to make the elections

"truly reflective" of the spirit of plurality and diversity that is the pride of the country. "EC is dedicated to incorporating and deeply integrating the principles and practices of inclusivity and accessibility throughout the entire election process, setting an example before the society for replication everywhere," the CEC said. The optional home voting facility has been made available for the first time in Lok Sabha elections. Any eligible citizen aged 85 and above or with 40 per cent benchmark disability, can avail the provision of home voting facility through postal ballot. This facility has received an enthusiastic response from voters, the poll panel said.

## Varanasi to host USD 9 million Toyota Mobility Foundation Sustainable Cities Challenge

ARCHANA JYOTI ■ NEW DELHI

India's iconic city Varanasi, a spiritual hub on the banks of the River Ganges and Parliamentary constituency of Prime Minister Narendra Modi, along with Detroit, the historic 'Motor City' in the US, and Venice, Italy's iconic canal city, has been selected to host the much-sought after USD 9 million Toyota Mobility Foundation Sustainable Cities Challenge.

Announced early last year, this initiative aims to accelerate sustainable mobility, fostering healthier and safer urban environments in the cities selected for the task. Each city will have USD 3 million to develop innovative, data-driven solutions to enhance accessibility and safety.

Varanasi's Challenge focuses on generating innovative, data-driven solutions incorporating elements of technology and design that will help make crowded areas of Varanasi's old city (Kashi) safer and more accessible for religious tourists and local residents alike including vulnerable members of the population. Known for its ghats and temples such as the Kashi Vishwanath Temple dedicated to Lord Shiva, for education

and learning and art and culture Varanasi draws millions of visitors each year. Akshat Verma, Municipal Commissioner/Chief Executive Officer, Varanasi Municipal Corporation/Varanasi Smart City said, "This initiative offers us a valuable chance to explore technical and design-related avenues for enhancing mobility within our city, benefiting both our residents and the growing influx of tourists. "By collaborating with innovative minds, we aim to bolster Varanasi's reputation as a premier global tourist destination." He said the Varanasi

City Challenge will be kicked off by June-end 2024. Meanwhile, in Detroit, the challenge is focused on Eastern Market food production and distribution centre, reducing fossil fuel use and cutting costs of freight operations "by increasing efficiencies and unlocking opportunities for clean freight technologies". Meanwhile, Venice's issues are around the majority of the population, which lives and works in mainland suburbs such as Mestre and Maghera, and the city is looking for "innovative solutions that shift behaviour,

encouraging an increased use and adoption of existing sustainable transport modes". The Toyota Mobility Foundation, in collaboration with the World Resources Institute and Challenge Works, will work with local organizations to identify urban mobility barriers and create actionable solutions. Global innovators will be invited to access funding and demonstrate their concepts to improve transportation in these cities. Ryan Klem, director of programs at the Toyota Mobility Foundation, said: "Our hope is that the

Sustainable Cities Challenge will provide the great cities of Detroit, Varanasi and Venice with new ideas that can potentially be scaled and replicated around the world, amplifying the impact to transform people's lives."

Ben Welle, director of integrated transport and innovation at WRI Ross Center for Sustainable Cities, said: "Detroit, Varanasi and Venice all have distinct mobility barriers, but they also share the same circumstances and concerns with many other cities around the world."

The cities were chosen from a list of 10 cities shortlisted in November 2023, which was whittled down from more than 150 entrants.

These were Bengaluru, India, Detroit, US, Fortaleza, Brazil, Medellin, Colombia, Mexico City, Mexico, New Orleans, US, Seberang Perai, Malaysia, Varanasi, India, Venice, Italy and York, UK.

Over 150 cities from 46 countries entered the Challenge after the call to cities was first launched in June 2023 and over the last months, the list was narrowed to 10 and now finally 3 cities i.e. Varanasi, Detroit and Venice.

## Pinarayi daughter Veena faces financial impropriety charges

KUMAR CHELLAPAN ■ KOCHI

Pinarayi Vijayan, Kerala Chief Minister, is again in the eye of a stupendous corruption charge, the magnitude of which if found true can put him in real trouble.

Shone George, a whistle blower and BJP leader, charged Vijayan and his daughter Veena Mohammed Riyaz of corruption and financial irregularities worth crores of rupees in their dealings with Cochin Minerals and Rutile Ltd (a Kochi based firm engaged in trading the mineral rich sand from the State's beaches), SNC Lavlin (a Canadian Company) and Price Waterhouse Coopers, a leading financial advisory company.

Addressing reporters at Kochi on Wednesday, Shone George, son of veteran legislator P C George, charged that though CMRL had traded in Rs 40,000 crore worth black sand from 2016 till date, the company has shown in its record that the trade was limited to Rs 700 crore.

"It was Exalogic Solutions, an IT company owned by Veena that facilitated in the trading of the sand and manipulation of accounts. I have collected all details and submitted it to the Ministry of corporate affairs,

serious Fraud Investigation Agency and the Kerala High Court," said Shone. He stated that Exalogic Solutions had an account with Abu Dhabi Commercial Bank where the minimum account maintained by the company during 2016-2019 was Rs 10 crore. "My request to all the central government departments is that the entire financial transactions of Exalogic Solution should be subjected to thorough probe," said Shone. The details of the bank account maintained by Exalogic Solutions should have been furnished to the Income Tax department. If this has not been done, it is a serious crime, according to Shone.

He dared the chief minister to file a defamation case against him of the allegations are found untrue. "There are cases against Price Waterhouse Cooper and SNC Lavlin for their dealings with Pinarayi Vijayan and the Supreme Court is hearing the case in which Kerala State Electricity Board is also a party," said Shone. He said Exalogic-PWC and SNC Lavlin link could throw more light into the goings on in the chief minister's office. He further said that the money flow from PWC to Exalogic was during 1st December 2018 to 30 November 2020, a period in which the contract was operational during the two companies.

## Relieve, heat...

From Page 1

Record-breaking temperatures have been observed across several weather stations in the Northwest region. Notable records were noticed in Churu, Rajasthan, touching a scorching 50.5°C, Agra-Taj, Uttar Pradesh at 48.6°C, and Sirsa, Haryana at 50.3°C. "These extreme conditions can be attributed to a confluence of factors, including the absence of rainfall, strong dry winds, and an anti-cyclonic circulation over southwest Rajasthan and adjoining Gujarat," said the IMD

Further, heatwave to severe heatwave conditions will also

persist in Jammu division and Himachal Pradesh, whereas isolated pockets of Gujarat will experience hot and humid weather.

However, a fresh western disturbance is likely to bring some relief. A temporary, yet gradual reduction in these extreme conditions is expected from May 30, with isolated heat wave conditions persisting in Punjab until June 2.

Isolated light rainfall accompanied by thunderstorms and lightning is expected over Uttarakhand and Himachal Pradesh from May 29 to June 1 and over Jammu-Kashmir-Ladakh-Gilgit-Balistan-Muzaffarabad on May 30 and 31. Additionally, isolated very light rainfall is anticipated over the plains of Northwest India from May 30 to June 2. The oppressive heatwave condition is already taking a toll on the people, including students. For instance, in

Bihar which recorded its all-time high maximum temperature at 47.7 degrees Celsius in Aurangabad on Tuesday, reported a number of students in schools in at least three districts fell unconscious due to extreme heatwave conditions on Wednesday. The State is reeling under sizzling heat as the day temperature crossed 44 degrees Celsius at several places in the State on Wednesday. Meanwhile, the IMD has predicted that heatwave conditions are likely to prevail over the State in another three or four days. In Odisha, too, the IMD has predicted heatwave conditions in several districts. The Bihar government also ordered the closure of all private and government-run schools, coaching institutes and anganwadi centres until June 8 in view of relentless heat wave conditions in various districts.

## SC cold to Kejriwal bail extension plea

From page 1

Taking a dig at Kejriwal, Union Minister Anurag Thakur, criticised him, stating that Kejriwal is capable of participating in a roadshow despite Delhi's scorching 47 degrees temperature, yet he seeks bail citing health concerns. "He is exposed once again. It is visible to everyone that he can do a roadshow in 47 degrees temperature but asks for bail on the pretext of ill health," Thakur said. Another BJP leader MS Sirsa said, "All day he (Kejriwal) campaigned, but when it comes to going to jail, he becomes unwell...". On Wednesday, the Supreme Court registrar, while refusing the plea, said the

Delhi Chief Minister was given permission to move the trial court for regular bail, and hence this petition is "not maintainable". Additionally, it was pointed out that since the judgment on the challenge to the arrest is already reserved, the present extension application has no correlation to the main petition.

On Tuesday, a vacation bench of Justices J K Maheshwari and K V Viswanathan said it would refer his request to list the application for urgent hearing to Chief Justice of India D Y Chandrachud for appropriate orders. On Tuesday, when Kejriwal's request for urgent hearing of

his application was mentioned by senior advocate Abhishek Manu Singhvi, the bench of Justices Maheshwari and Viswanathan sought to know why Kejriwal had not raised the request before Justice Dipankar Datta, one of the judges on the bench that granted him interim bail, while he was holding court until May 24. Singhvi pointed out that the matter in which the court had reserved its order on May 17 was Kejriwal's petition challenging his arrest and had nothing to do with medical grounds. He urged the bench to list it for hearing on Wednesday "or whatever is Your Lordships' convenience".

## Poll...

From Page 1

All seats in Punjab and Himachal Pradesh will go to polls in the seventh phase, along with the remaining seats in Bihar, Jharkhand, Uttar Pradesh, Odisha, Chandigarh and West Bengal. Data shows of the 57 seats, the BJP won 25 in both, the 2014 and the 2019 elections. Meanwhile, the Congress won only three seats in 2014 and eight in 2019. In terms of vote share, the BJP clocked more than 40 per cent in 28 seats and between 30 and 40 per cent in 12 seats. In contrast, Congress received a vote share of less than 10 per cent in 18 seats. Altogether, 24 seats are strongholds of different parties. The Trinamool Congress and the BJP have eight strongholds each. The remaining eight strongholds

belong to the Biju Janata Dal, the Congress, the Janata Dal (United), and the Shiromani Akali Dal. There are 904 candidates are now left in the fray. 328 candidates from Punjab and 144 from Uttar Pradesh are in the fray for 13 seats each, respectively. 134 candidates are contesting on eight seats from Bihar, 66 from Odisha on six seats, 52 from Jharkhand on three seats, 37 from Himachal Pradesh on four seats and 19 from Chandigarh for one seat. Punjab had a maximum of 598 nomination forms from 13 Parliamentary constituencies (PCs), followed by Uttar Pradesh with 495 nominations from 13 PCs before scrutiny and with draws. Constituency wise, 36-Jahanabad Parliamentary Constituency in Bihar received a maximum of 73 nomination forms, followed by 7-Ludhiana seat in Punjab with 70 nomination forms.

## Baked Delhi waits to exhale

From Page 1

The IMD later said there could be an error in sensor data and the data of Mungeshwar site is being examined. The Delhi Government's LNJP Hospital has been seeing a spike in the number of patients affected due to heatwave conditions. "We have seen a high number of

patients affected by the heat this week. Yesterday alone, we received nearly 10 patients who were affected by heat stroke," said Dr Ritu Saxena from Lok Nayak Hospital. Symptoms like fever, headache, vomiting and unconsciousness are common among such patients, she said. Saxena advised that people should avoid stepping out,

especially during peak hours, and keep themselves hydrated. Amit Kumar, a resident of Najafgarh, said his family is struggling due to the heat and said they are trying to avoid stepping out as much as possible. "My brother got sick due to the heat, and now we are taking extra precautions. We're taking traditional

remedies like aam panna (unripe mango juice) and using wet towels to stay cool and prevent fainting. The heat is so severe that we are giving the kids multiple baths during the day to stay cool," Kumar said. Jay Pandit, a resident of Mungeshpur who commutes 30 kilometres for work in Central Delhi, described the challenges of daily travel.

"The hot wind feels like burning the skin, and it's affecting my health. How long can you sit inside? A day or two, maybe three, you can't just stay inside. To live, to survive, you have to step out, but managing this heat is tough. I feel headaches and fever most days while coming back home," Pandit said. Residents of Delhi are

adopting various measures to combat the sweltering conditions, such as taking traditional remedies like aam panna and using wet towels to stay cool. Some are taking baths twice a day and trying to avoid stepping out. On the outskirts of the city in Mungeshpur and Narela, the mercury touched as high as 49.9 degrees Celsius on Tuesday, nine notches above normal. Amit Singh, a contractor, said, "We can't work from 11 am to 5 pm because of the heatwave. Many labourers have left for their native places, and our business has

been affected. We need to work in open areas, which is just not possible these days as the weather is unbearable." To protect themselves, people are taking ORS and keeping themselves hydrated as much as they can. Rakesh Kumar, a resident of Rajiv Vihar in Najafgarh, said the high temperatures and the hot, dry wind are making people in the area fall sick. "I commute to Central Delhi on my bike every day. Despite taking all the precautions, I have developed a high fever and body ache due to heat

stroke," he added. With the heatwave in the National Capital, it is the first time in the history that its power demand has crossed the 8,300-MW mark. Power distribution companies had estimated the demand to peak at 8,200 MW this summer. Further, the Delhi Government on Wednesday announced that a Rs 2,000 fine would be imposed on anyone found to be wasting water - washing cars with a hose, letting their water tanks overflow or using private connections for commercial activity.

## Washing cars with hose, overflowing tanks to now attract ₹2,000 fine

STAFF REPORTER ■ NEW DELHI

The Delhi Government on Wednesday announced that a Rs 2,000 fine would be imposed on anyone found to be wasting water — washing cars with a hose, letting their water tanks overflow or using private connections for commercial activity. The announcement comes as the national Capital faces a water crisis and soaring temperatures. Several neighborhoods in South Delhi will now receive water only once daily instead of twice, as part of a water rationing strategy. Dry and hot westerly winds continued to buffet Delhi on Wednesday, with certain parts of the city reaching nearly 48-49 degrees Celsius on Tuesday, while many areas recorded over 45 degrees Celsius. The move comes amid an “acute shortage” of water faced by Delhi with Water Minister Atishi accusing Haryana of not releasing Delhi’s share of water from the Yamuna River. The fine will be imposed for using hoses to wash cars, overflowing water tanks and use of domestic water for construction and commercial

purposes, Atishi said. “There is an acute heatwave in Delhi and a shortage of water supply since Haryana is not releasing Delhi’s share of water. Under these circumstances, the conservation of water becomes extremely important,” an order signed by the Delhi minister said. The minister directed the Delhi Jal Board (DJB) CEO to immediately deploy 200 teams across the city to implement the measures to check water wastage. These teams will be deployed from 8 am on Thursday and impose fines on anyone found wasting water. The teams will also disconnect any illegal water connections on construction sites or commercial establishments. This comes a day after Atishi accused Haryana of not releasing Delhi’s share of water since May 1 and said the government will be implementing a slew of measures including rationalising supply of water in the national Capital. “Fines will be imposed on anyone washing cars with pipes or with overflowing water tanks. Illegal water

connections at construction sites and at commercial establishments will be disconnected,” the minister posted on X on Wednesday. “These teams shall be deployed from 8 am tomorrow morning (30.05.2024), and shall impose a fine of 22000 on anyone found wasting water; and shall disconnect any illegal water connections on construction sites or commercial establishments,” the directive read. In the Delhi Jal Board’s (DJB) summer bulletin, it was reported that the city’s total water production was at 978 million gallons per day (MGD), with Wazirabad producing 110 MGD against a capacity of 131 MGD. Although there was a slight improvement from Monday’s production of 969.32 MGD, Wazirabad’s issues continue to impact the overall supply. BJP leader Ramvir Singh Bidhuri blamed the severe water shortage on the incompetence of the AAP government, pointing fingers at Chief Minister Arvind Kejriwal and Water Minister Atishi. Bidhuri criticized the government’s failure to manage the water crisis.

## Capital heat: LG directs paid break to labourers from noon to 3 pm

STAFF REPORTER ■ NEW DELHI

Given the severe heat wave conditions in national Capital, Delhi Lt Governor (LG) Vinai Kumar Saxena on Wednesday directed officials to ensure a paid break for labourers from noon to 3 pm, water and coconut milk at construction sites, and water pitchers at bus stands. Saxena observed that despite the unusual severity of the heatwave, no instructions have been issued by the state government to protect labourers as he flagged the “lack of sensitivity” and “seriousness” on the part of Delhi Chief Minister Arvind Kejriwal and the concerned minister. Hitting back, Delhi Health minister Saurabh Bharadwaj said the AAP government was making heatwave preparations even before the LG office became active and urged Saxena to “give up negativity”. Meanwhile, the directions will be implemented across all construction sites in Delhi, including those of government

agencies and private establishments, officials said. Saxena directed that the three-hour break for labourers has been implemented by the Delhi Development Authority since May 20 and will continue across all sites till temperatures come down below 40 degrees Celsius, according to a letter sent to Delhi Chief Secretary Naresh Kumar by the principal secretary to the Lt Governor. It said Delhi is facing an unprecedented heat wave with temperatures hovering around 50 degrees Celsius in some parts for the first time in the city’s history. “Ordinarily, he (Saxena) had expected that the chief minister or the concerned minister would convene a meeting for a heat action plan in the city. The lack of sensitivity and seriousness in dealing with the heat wave is a matter of grave concern for him,” it said. The LG had instructed the Delhi Development Authority (DDA) on May 20 to make adequate arrangements for providing water and

File photo: Ranjan Dimari / The Pioneer

coconut water to labourers at construction sites so that they can stay hydrated, officials said. In the letter, Saxena said the chief secretary may immediately call a meeting of officers from the Public Works Department, Delhi Jal Board, Irrigation and Flood Control Department, Municipal Corporation of Delhi, New Delhi Municipal Council, Power Department, and the Delhi Urban Shelter Improvement Board and issue necessary directions for protecting labourers and supervisory staff from extreme heat conditions. He also directed that earthen

pots with drinking water should be arranged at bus shelters, treated water from STPs be sprinkled on the roads, and water sprinklers installed at high-rise buildings be activated to bring down the ambient air temperature and tackle pollution, they said. The letter said, the plight of the poor labourers, who toil relentlessly in sweltering heat warrants a humane approach of administration. Thousands of homeless people and street vendors who spend their day on the footpaths, sometimes with babies without access to drinking water is a heart-rending sight. The Labour Department of the Delhi government, in an advisory issued on May 27, listed the various measures needed in view of the heatwave conditions prevailing in the national capital. The circular asked establishments to ensure adequate clean drinking water availability at the workplace, availability of coolers/fans at the workplace and proper ventilation.

The circular also said no worker should be allowed to work in direct exposure to sunlight, and advised a change in the shift of work as far as possible to avoid peak hours between 12 noon to 4 pm. Sensitising the workers about precautions to be taken during the heatwave conditions including covering their heads during direct exposure to sunlight, availability of emergency kits having ice packs, oral rehydration solution sachets and other items were prescribed in the advisory. In a post on X, Bharadwaj said the LG office was spreading falsehood and he shared a clip of a news conference that he addressed on Monday wherein he explained the AAP government’s action plan to tackle heatwave in the city. During the press briefing, the minister had said two beds each at 26 hospitals and five at Delhi government-run LNJP hospital were being kept reserved for heat stroke patients.

STAFF REPORTER ■ NEW DELHI

As Delhi witnessed 52 degree Celsius on Wednesday, pushed its peak power demand to an all-time high of 8,302 MW on Wednesday afternoon. It is the first time in the history of the national capital that its power demand has crossed the 8,300-MW mark. Power distribution companies had estimated the power demand to peak at 8,200 MW this summer, the discom officials said. According to the State Load Dispatch Centre, Delhi, the peak power demand of the city was 8,302 MW at 15:36:32 hours. The previous peak power demand was recorded earlier this month, when it touched 8,000 MW on May 22. The city has been braving a prolonged spell of heatwave conditions with the maximum day temperatures in many parts including Najafgarh, Mungeshpur and Narela

## City power demand hits all time high as temperature soars

touching almost 50 degrees Celsius. Moreover, 12 days in a row Delhi’s peak power demand has crossed 7000 MW this year. Before the records of 2024, Delhi’s previous high of 7695 MW was recorded on June 29, 2022. Delhi’s peak power demand last year was 7438 MW. Data shows barring last year, when Delhi’s demand peaked on August, it usually peaks during end June and early July. The power demand can be attributed to weather conditions that led residents to use more air conditioning / coolers, leading to an increase in electricity consumption. It is interesting to know you know, air conditioning can contribute

to 30-50% of a household’s or company’s yearly energy expense. The fact that the Delhi’s power distribution network has been able to sustain this prolonged high demand for power shows its robustness. BRPL and BYPL successfully met the peak power demand in their

predictive checks to identify hot-spots or to pre-determine potential faults and to take remedial measures. This is done through thermal scanning, partial discharge measurement, and health assessment of power and distribution transformers. Online load monitoring system is also in place for tracking the power transformers and 11kV feeder load especially during the summers. Elaborating on the topic, a Tata Power-DDL Spokesperson said, “The persistent heat wave across North India is leading to a sharp demand surge for electricity in the National Capital. The peak power demand in Delhi hit a new record of 8302 MW (as per SLDC). At Tata Power-DDL’s end, we successfully met our highest-ever peak power demand of 2339 MW and have made sufficient arrangements to meet the demand.”

## LG suspends Health Minister Bharadwaj OSD

STAFF REPORTER ■ NEW DELHI

Delhi Lieutenant Governor Vinai Kumar Saxena Wednesday suspended Delhi Health Minister Saurabh Bharadwaj’s Officer on Special Duty (OSD) R N Das with immediate effect in connection with alleged irregularities in the procurement of medical kits. The immediate cause for placing the officer under suspension is on account of reported misconduct with regard to unauthorized and illegal running of Jyoti Nursing Home in Shahdara beyond the valid registration period when he was also Medical Superintendent of Nursing Home Cell. Additionally, Das was issued a show cause notice by the Directorate of Vigilance in April in connection with the alleged irregularities in the procurement of various items like Personal Protective Equipment (PPE) kits, gloves, masks and Rapid Antigen Test (RAT) kits worth around Rs 60 crore during the COVID-19 pandemic in 2021. It also stated that Das has abused his powers during his service. In the order issued on Wednesday, the directorate said, “The Hon’ble Lt. Governor, Delhi, in exercise of the powers conferred by sub-rule (1) of Rule-10 of the CCS (CCA) Rules, 1965, hereby, places the said Dr. R.N. Das, Officer on Special Duty (OSD) to Hon’ble Minister (Health), GNCTD, under suspension with immediate effect.” The order also stated, “The fire incident occurred at Baby Care Centre at Vivek Vihar on May 25 at 11.30 pm is the recent instance of callousness on the part of Nursing Home Cell. Here also Dr. R.N. Das had

allowed the registration of the Nursing Home without bothering to ascertain the pending litigation status as well as undertaking given by the Nursing Home w.r.t. various statutory compliances including fire safety.” The BJP had earlier also alleged Das’s role in the registration process of a children’s hospital in Vivek Vihar where six newborns were killed in a fire incident on Saturday night. Reacting to the suspension, Delhi BJP President Virendra Sachdeva said “This is just the beginning because we will demand the suspension of all officials involved in the corruption from top to bottom. Along with this, we will also demand an investigation into the role of the former Health Minister in 2021 Satyendra Jain and the local AAP MLA.” He said that the suspension of Dr. R.N. Das, who was the OSD of Health Minister Saurabh Bharadwaj and Arvind Kejriwal’s close aide in the Vivek Vihar tragedy, is evidence that the mismanagement and corruption in the health department of the Delhi government is involved in this entire case. The Delhi BJP President said, “Strict action should be taken against every person involved in this crime, for which the BJP will continue to fight. This is just the beginning, we will continue to fight against every person who has been involved in this fire mishap, who has made corruption his source of income and will not sit until action is taken against them. Whether they are officials of the Delhi Fire Service or those who signed on these files, no one will be spared, and our fight against them will continue.”

## 16 cars gutted in MCD parking fire in east Delhi’s Madhu Vihar

STAFF REPORTER ■ NEW DELHI

Sixteen cars were gutted by a fire that broke out at a civic authority-run parking lot in east Delhi’s Madhu Vihar area on Wednesday. No one got injured in the incident that was reported at 1.17 am. Nine fire tenders were pressed into service and they controlled the blaze in four hours, an official from Delhi Fire Service (DFS) said. Police have registered a case and further investigation has been launched. In another incident, five shops were damaged in a fire that broke out in north Delhi’s Chandni Chowk area. The cars belonged to the locals who used to park their vehicles in the parking lot on rent basis, the officials said. Earlier, the officials said that 17 cars were gutted but Madhu Vihar SHO Rajesh Sinha later confirmed that 16 vehicles were damaged in the fire. “Some vehicles were damaged but we managed to save the rest. There were no injuries in the incident,” DFS officer Yashwant Meena said. According to a police officer, it is suspected that the incident could be a result of some fire in

Vehicles owners stand near charred vehicles a day after a fire broke out at a civic authority-run parking lot in Madhu Vihar. Photo: Pankaj Kumar / The Pioneer

the bushes in the area. A case is being registered and further probe is underway. “The parking facility is close to Delhi Jal Board office. Total 16 four wheeler vehicles which were parked in the parking lot, got damaged in the incident. Remaining vehicles were prevented from being damaged,” Deputy Commissioner of Police (east) Apoorva Gupta said. She further said that there is was no loss to the human. So far, the reason for the fire has not been established. “Crime team was called at the spot for inspection. An FIR has been

registered under sections 285 and 336 of the IPC and investigation has been taken up,” said the DCP. More than 100 cars were parked in the facility, but timely action by the police and fire department saved the rest of the vehicles, he said. “Our teams acted promptly after the emergency call. Our priority was to save lives,” the officer said. The fire brigade team also reached the spot and quickly swung into action, he said. “While one tender started sprinkling water on the cars that did not catch fire, the other started dousing the

flames.” MCD officials who inspected the site, observed that 17 cars were affected due to the fire incident that took place at night at around 01:10 am on 29.05.2024. No casualty of life or body has been reported. The fire incident took place at the fog end of parking site which is close to a wide and deep drain. “During the course of the inspection, prima facie it appeared that some passerby on the footpath may have thrown a bud of burning cigarette/bidi into the dry drain which caused fire in the dry leaves and foliage of the drain. Due to scorching heat, the fire reached the boundary of the parking site. As a consequence, fire engulfed the rear portion of a few vehicles which further spread causing damage to nearby vehicles,” the MCD said in a statement. Meanwhile, Delhi BJP spokesperson Praveen Shankar Kapoor in a statement accused the Municipal Corporation of Delhi of negligence in the Madhu Vihar parking lot fire and said the incident occurred because the facility did not have basic firefighting equipment.

## Summer Fiesta begins in National Bal Bhawan

STAFF REPORTER ■ NEW DELHI

The month long annual feature of National Bal Bhawan, Summer Fiesta, kickstarted on Wednesday which was inaugurated by Education Secretary Sanjay Kumar in the presence of Additional Secretary Vipin Kumar and top Ministry of Education officials including NBB Director Mukta Aggarwal. Summer Fiesta is a month-long camp comprising over 30 types of different activities for children aged between 5 to 16 years. Addressing the enthusiastic gathering of children and their parents, Sanjay Kumar emphasized the significance of such interactive and innovative programmes in nurturing young minds. He said that along with academics, these types of extracurricular activities are equally important for children to become successful in the future. Further, he exhorted children to be curious and to explore things around them, which will help in opening their minds. Summer Fiesta 2024, which runs from 29th May to 28th June 2024, promises a myriad of engaging and innovative activities in the fields of Creative and Performing Arts, Science, and more, ensuring

that every child finds something intriguing to explore and learn. During the Summer Fiesta, special workshops and programs will be conducted weekly, including sessions on Odissi dance, Yoga, Calligraphy, Music recitals, Games etc. These workshops are designed to provide children with opportunities to develop and showcase their skills and talents. The event will also feature eminent artists and guests who will participate in these special programmes, sharing their experiences and delivering captivating performances to inspire the children. The initiative has seen an overwhelming response, with over 2500 children already enrolled in the various workshops and programs. To facilitate easy access for all participants, transportation facilities all over Delhi have also been made available by the National Bal Bhawan. The National Bal Bhawan, an autonomous body under the Department of School Education and Literacy, Ministry of Education, was established in 1956. It was founded with the vision of fostering learning through thinking, imagination, creativity, and entertaining activities for children.

## MCD directs electrical load audits in health facilities

STAFF REPORTER ■ NEW DELHI

The Municipal Corporation of Delhi (MCD) issued an advisory directing all health facilities to take up measures like inspection of fire-fighting equipment, electrical load audits and installing automatic sprinklers in ICU to prevent fire incidents following a fire at a private children’s hospital in East Delhi on Saturday night which claimed the lives of six newborns. The in-charges of health facilities have also been asked by the civic body to submit an action taken report by May 31. They are directed to regularly inspect fire-fighting equipment such as extinguishers, hydrants and alarms to ensure all are functional, according to the advisory issued by the MCD. Material used in construction and furnishing must be audited to identify and replace combustible material with those that are fire resistant, it stated. “All in-charges of hospitals and health units in coordination with the engineering

department must follow these instructions to prevent occurrences of fire incidents in hospitals and various other healthcare facilities,” the advisory stated. Health facilities are directed to carry out maintenance and testing of fire safety equipment and also undertake electrical load audits to ensure they meet safety standards without overloading the system according to the National Electrical Code of India-2023, it stated.

They have also been asked to use power management systems to monitor electrical loads and prevent overloading. In areas with oxygen tanks or piped oxygen, implementation of a strict no-smoking policy and control on heat sources has been directed by the MCD. Facilities have been asked to install fire smoke detectors and fire alarms in all areas on their premises, particularly in patient rooms, hallways and common areas. The advisory stated that material used in hospital construction and furnishings should be audited to identify and replace combustible material with those that are non-combustible or fire resistant, particularly in patient care areas. In critical areas of health facilities, including ICUs and operation theatres, installation of automatic sprinkler systems and accessible hose pipes have been ordered by the civic body. The MCD has also directed them to conduct an annual renewal of the fire safety no-objection certificate from the fire department.

# Female candidates in LS polls rise from 7 per cent in 2009 to 9.6 per cent in 2024

PIONEER NEWS SERVICE ■ NEW DELHI

From 7 per cent in 2009 to 9.6 per cent in 2024, the number of female candidates contesting the Lok Sabha elections saw a steady rise in 15 years, according to an analysis by the poll rights body Association of Democratic Reforms (ADR). This year, 797 women are in the fray, constituting 9.6 per cent of the total 8,337 candidates. This marks an increase from previous general assembly elections which recorded female representation of 9 per cent in 2019, 8 per cent in 2014, and 7 per cent in 2009, the analysis by the Association of Democratic Reforms (ADR) showed.

In the 2009 Lok Sabha elections, there were 556 female candidates, making up 7 per cent of the total 7,810 candidates. This number increased to 640 (8 per cent of 8,205) in 2014 and further to 716 (9 per cent of 7,928) in 2019.

This year, the Bharatiya Janata Party (BJP) leads among the major parties with 69 female Lok Sabha nominees out of 440, making up 16 per cent of its total candidates.

The Congress follows with 41 women out of 327 candidates, constituting 13 per cent. Significantly, smaller parties and regional players exhibit higher proportions of female candidates. For instance, the Naam Tamilar Katchi has an equal gender representation with 20 out of 40 candidates being women, translating to 50 per cent. The Lok Janshakti Party (Ram Vilas) and the Nationalist Congress Party each have 40 per cent female candidates, with two out of five being women.

Among prominent parties, the All India Anna Dravida Munnetra Kazhagam (AIADMK) and the All India Forward Bloc have the lowest levels of female representation at 3 per cent.

Some parties with notable female representation in this year's parliamentary

polls include the Jharkhand Mukti Morcha (JMM) and the Biju Janata Dal (BJD), each with 33 per cent, the Rashtriya Janata Dal (RJD) with 29 per cent. The Samajwadi Party (SP) has 20 per cent female representation, and the All India Trinamool Congress (AITC) 25 per cent. Thirteen per cent of the Lok Sabha candidates of the Communist Party of India (Marxist) are women and the figure stands at 8 per cent for the Bahujan Samaj Party. Parties such as the Dravida Munnetra Kazhagam (DMK) and the Communist Party of India (CPI) have female representation at 14 per cent and 7 per cent, respectively. The Janata Dal (United) (JD(U)) and Shiv Sena each have 13 per cent female candidates, while the Jharkhand Mukti Morcha has 33 per cent women nominees. Both candidates of the Apna Dal (Sonela) are women, TDP and BRS each have 6 per cent female candidates, Shiromani Akali Dal and Nationalist Congress Party-Sharadchandra Pawar each have 8 per cent female contestants, while Shiv Sena (UBT) has 10 per cent. Independents, comprising a significant portion of the candidate pool, have 276 women out of 3,903 Lok Sabha nominees, representing a modest 7 per cent. Other parties collectively account for 252 women out of 2,490 candidates, which is about 10 per cent. This is the first election since the passage of the women's reservation bill to reserve one-third of seats in Lok Sabha and state assemblies for women, reviving a bill pending for 27 years for want of consensus among parties. The bill is yet to come into effect. The current figure of 797 female candidates in 2024 represents a 9.6 per cent

share of the total candidate pool of 8,337. Only two candidates from the third gender category are contesting the polls this year, both as independents. During the first phase of the elections held on April 19, out of 1,618 contesting candidates, only 135 were women. This pattern continued in the subsequent phases, with women candidates remaining a small fraction of the total. The second phase held on April 26 saw 1,192 candidates of which 100 were women. The phase 3 polling on May 7 had 1,352 candidates, including 123 women. In phase 4 on May 13, of the 1,710 contestants, 170 were women. Phase 5 on May 20 had the fewest candidates at 695, with 82 women, while the sixth phase 6 had 92 women out of 866 candidates. In the last phase scheduled for June 1, there will be 904 candidates, with only 95 women.

# ADR: 104 per cent rise in number of parties fighting LS polls from 2009 to 2024

PIONEER NEWS SERVICE ■ NEW DELHI

There has been an increase of 104 per cent in the number of political parties contesting Lok Sabha elections from 2009 to 2024, according to an analysis by poll rights body Association of Democratic Reforms (ADR). According to the analysis, 751 political parties are participating in 2024 as compared to 677 who participated in 2019, 464 in 2014, and 368 in 2009. This surge represents a staggering 104 per cent increase from 2009 to 2024.

The ADR and National Election Watch have conducted a comprehensive analysis of the self-sworn affidavits of 8,337 candidates vying for seats in the upcoming Lok Sabha 2024 elections.

Out of the total 8,360 contesting candidates, the breakdown reveals a diverse landscape of political representation: 1,333 from national parties, 532 from state parties, 2,580 from registered unrecognised parties and 3,915 independent candidates.

The analysis also sheds light on the prevalence of criminal cases among candidates. Among national parties, 443 out of 1,333 candidates have declared criminal cases, with 295 facing serious criminal charges. State parties exhibit a higher proportion, with 249 out of 532 candidates facing criminal cases and 169 facing serious charges.

Registered unrecognised parties show comparatively lower figures with 401 out of 2,580 candidates having criminal cases and 316 facing serious charges. Independent candidates fall in between with 550 out of 3,915 candidates facing criminal cases and 411 facing serious charges.

Additionally, the analysis reveals financial assets of the candidates with 2,572 out of all 8,337 candidates being crorepatris or millionaires. Among national parties, 906 out of 1,333 candidates are crorepatris, followed by 421 out of 532 in state parties, 572 out of 2,580 in registered unrecognised parties, and 673 out of 3,915 among independent candidates.

# Unpredictable import, export policies caused losses to farmers: Congress

PIONEER NEWS SERVICE ■ NEW DELHI

The Congress on Wednesday claimed that farmers have suffered huge losses due to "unpredictable" import-export policies of the Modi Government and asserted that under an INDIA Bloc Government such policies would be decided only after consultations with farmers and their organisations.

Congress general secretary Jairam Ramesh said the Congress has given five guarantees to the farmers -- legal guarantee for Minimum Support Prices (MSP), loan waiver, transforming PM Fasal Bima Yojana, new import-export policy and making farmers GST-free.

"On import-export policy, I want to say that we need to put restrictions on imports and encourage exports. We ban exports repeatedly like the ban on export of rice is not in favour of the farmers in Punjab and it is benefitting the farmers of Pakistan," Ramesh said in a video statement on X.

The Congress has given a guar-

antee that the import-export policy will be decided upon only after consultations with farmers and their organisations, the Congress general secretary said, adding imports and exports should be beneficial for farmers not traders. In his post on X along with the video statement, Ramesh said farmers have suffered huge losses due to the "unpredictable" import-export policies of the Modi government. "The Congress has guaranteed

that we will make a concrete law on import and export of agricultural products which will support farmers and farmer organisations and increase their income," he said. The Congress' Lok Sabha polls manifesto has stated that it will formulate and implement a sound import-export policy for agricultural commodities, which will give paramount importance to protecting the interests and concerns of farmers.

**punjab national bank**

# Average increase of 43 per cent in assets of 324 MPs recontesting LS polls in last five years

PIONEER NEWS SERVICE ■ NEW DELHI

There has been an average increase of 43 per cent over the last five years in the assets of 324 MPs who have entered the poll fray again in this Lok Sabha election, according to an analysis by a poll rights body. The average assets of these MPs in 2019 was around Rs 21.55 crore while in the current electoral cycle, the average asset value has increased "significantly" to Rs 30.88 crore, marking an increase of Rs 9.33 crore over the past five years, the Association for Democratic Reforms (ADR) said in a report.

It analysed the financial growth among Members of Parliament (MPs) recontesting in the 2024 general elections. The counting of votes for the seven-phase polls will be taken up on June 4.

The percentage growth in assets for

these 324 MPs between the 2019 and 2024 polls averages at 43 per cent, the ADR said.

The report said a comparative analysis of party-wise average assets between 2019 and 2024 further elucidates this trend. It said among the major parties, the Bharatiya Janata Party saw a 39.18 per cent increase in the average assets of its re-contesting 183 MPs (Rs 18.40 crore to Rs 25.61 crore). It was 48.76 per cent for 36 Congress MPs (Rs 44.13 crore to Rs 65.64 crore).

For re-contesting 10 MPs of the Dravida Munnetra Kazhagam it was 19.96 per cent (Rs 30.93 crore to Rs 37.10 crore), 48.13 per cent for eight Shiv Sena MPs (Rs 19.77 crore to Rs 29.28 crore), 20.53 per cent for five Samajwadi Party MPs (Rs 20.56 crore to Rs 24.78 crore) and 84.13 per cent for eight Yuvajana Sramika Rythu Congress Party MPs (Rs 28.66 crore to Rs 52.78 crore).

Choice between those who constructed Ram Temple and those who opened fire at Ram bhakts: Shah

Union Home Minister Amit Shah on Wednesday asserted that this Lok Sabha election is a contest between those who constructed the Ram Temple in Ayodhya and those who opened fire at Ram bhakts.

Shah took a jibe at the Samajwadi Party and Congress, saying they have decided to blame electronic voting machines for their defeat in the Lok Sabha polls. "The counting is on June 4. In the afternoon the two 'shehzads' (Rahul Gandhi and Akhilesh Yadav) will hold a press conference and say we lost the election because EVM was defective," he said.

Targeting the opposition, he said Congress leaders say that Pakistan has an atom bomb but BJP people are not scared of atom bombs. "Pakistan occupied Kashmir is and will remain part of India and we will take it back," he asserted.

regulations with Ponzi schemes. The group has denied the charges. Seeking to strike a chord with farmers, Shah said, "It is the death anniversary of Chaudhary Charan Singh today. Narendra Modi did the work of giving him Bharat Ratna and gave respect to all the farmers of Uttar Pradesh."

in their home and ended terrorism." The senior BJP leader also spoke on the issue of reservation and accused the opposition parties of trying to end reservation for SC/ST/OBC in order to appease its vote bank.

Rahul lacks experience, not even worth a matchstick before Modi: MP CM

Madhya Pradesh Chief Minister Mohan Yadav has said former Congress president Rahul Gandhi lacks political experience and is not even worth a "matchstick" in front of Prime Minister Narendra Modi.

Yadav slammed Gandhi and RJD chief Lalu Prasad over their claims that the Modi government would be ousted after the ongoing Lok Sabha polls, and said there was no bigger joke than this. He also said Gandhi was dreaming of becoming prime minister but lacked the courage to contest from their stronghold Amethi in Uttar Pradesh.

already given him a befitting reply in six phases and the same will be reflected in the last phase also on June 1." On Rahul Gandhi and Lalu Prasad claiming the BJP-led government will be ousted on June 4, the vote counting day, Yadav said, "I don't consider a bigger joke than this. You mentioned Rahul Gandhi..Before 2014, they were in power with more than 235 MPs of their own. But under his leadership it was reduced to 115, which was an impossible thing at that time."

Demography in Bengal's border areas changing due to infiltration, says Modi

Prime Minister Narendra Modi on Wednesday alleged that demography in the bordering areas of West Bengal is changing because of infiltration while illegal entrants are snatching away the opportunities meant for local youths.

He said, "The demography in the bordering areas of Bengal is being changed. The TMC is against giving citizenship to religiously persecuted minorities. Why are they opposing the CAA so much? Why are these people (TMC leaders) lying about the CAA?"

community members would get Indian citizenship with all the respect that's due to them. The TMC does not want the Hindus and Matuas to stay in Bengal, Modi alleged while addressing his last election rally in the state in this election at Kakkdip.

"To appease a section of the society, the TMC government is openly attacking the Constitution, which has given reservations to Dalits and backward castes. Reservations were looted in West Bengal and false OBC certificates were issued to Muslims," Modi said.

He referred to the May 22 Calcutta High Court order that struck down the Other Backward Classes (OBC) status of several classes in West Bengal granted since 2010, finding such reservations to vacancies in services and posts in the state are illegal.

PAPER WITH PASSION

## Heed caution

All may seem lost in the Israel-Palestine war, but there is still time to save humanity in Gaza

The city of Rafah, which translates into wellbeing or prosperity in Urdu, experienced the trauma of seeing at least 45 people — including children — killed at a refugee camp in its midst following an Israeli airstrike in Gaza. Understandably, the act caused international indignation and further isolated Israel over the war with Palestine, coming only days after the International Court of Justice ordered the Jew nation to cease its operation in Rafah. Although the top UN court ordered Israeli forces last week to stop their operations, they persisted in their assault on the border town, which was long thought to be the last remaining shelter in the territory. Meanwhile, as international solidarity poured in for the Palestinians impacted by the Israeli strikes, the slogan "All Eyes On Rafah" has become popular on social media. The expression alludes to the continuous slaughter occurring in Gaza city, and several famous people have posted condolences along with the hashtag #AllEyesOnRafah. The cry for awareness of the ongoing battle has gained traction with the use of this slogan. Prior to Israel intensifying its military operation on the Gaza side of the border earlier this month and seizing control of the crossing, Rafah served as a primary port of entry for humanitarian aid. Over one million Palestinians have fled the fighting in Rafah; the majority of them were already displaced due to the conflict between Israel and the Hamas. Meanwhile, US President Joe Biden does not seem to be changing his stance on Israel, according to the White House, because the incident "did not cross a red line" that would require adjustments in US support.

This is despite the fact that Israeli tanks have been seen rolling down central Rafah for the first time since the war began on October 7 last year. In another setback to Israel globally and perhaps as part of a larger signal for it to stop bloodying the Gaza Strip with the murder of innocent people — nobody actually minds if only the Hamas terrorists are annihilated — Spain, Norway and Ireland have acknowledged Palestine's independence. The three countries did not recognise the existence of a State; they just acknowledged its potential. As a result of the change, the Palestinian Authority and the three nations will have closer diplomatic ties. Everyone has declared that they will acknowledge Palestine based on its pre-1967 borders, with East Jerusalem serving as its Capital. Already, 143 of the 193 members of the UN General Assembly have recognised Palestine. The latest acknowledgments are the most compelling proof to date that the concept might be gaining support in the economically and diplomatically powerful western European States. The West Bank, which Israel has occupied, and the Gaza Strip, which is under siege and where Israel is conducting a war that has claimed more than 36,000 lives, make up what is left of ancient Palestine. However, it must be recorded to his credit that Israel Prime Minister Benjamin Netanyahu has said the Rafah incident was a "tragic mishap".

# Spiritual institutions under attack in Bengal

PRAFULL GORADIA

The assaults on the Ramakrishna Mission raise serious concerns about the State's political climate and its impact on religious harmony

West Bengal is again in the news and again for the wrong reasons. The premises of the venerable Ramakrishna Mission at Jalpaiguri have been vandalised by the goons of the State's ruling Trinamool Congress (TMC). That hasn't been the only incident of attacking a religious or spiritual centre. The ISKCON temple premises in the State have also been the target of the TMC brigade, as the State's chief minister Mamata Banerjee suspects the organisation's monks of being BJP sympathisers. So too have the premises of the Bharat Sevashram Sangh (BSS) at Beldanga in the district of Murshidabad suffered the ire of the ruling party's rough-necks. One of the BSS monks Kartik Maharaj has drawn Mamata Banerjee's ire as he is thought to be working towards influencing voters in favour of the BJP. Banerjee also believes that the ISKCON is playing a similar role.

The Ramakrishna Mission or RKM, as it is also known, headquartered in Kolkata's Belur Math was founded in 1897, by the great spiritual Ramakrishna Paramahansa's most renowned disciple, Swami Vivekananda. The latter was truly a global icon of modern Hinduism and planted the flag of Sanatana Dharma in the West, beginning with his spiritual conquest in Chicago in 1893 at a conference of the World Parliament of Religions. Though the International Society for Krishna Consciousness (ISKCON) was founded in New York, its founder Bhaktivedanta Swami Prabhupada or Srila Prabhupada was born in Calcutta and ventured to the US only in his old age, at 69, to spread the message of Krishna to America and the rest of the world. To vandalise such highly regarded institutions such as the venerable Ramakrishna Ashram and the internationally respected ISKCON, which has over 160 temples across the globe and that too by some citizens of a country that is predominantly Hindu, is unthinkable and unpardonable. It is possible that the perpetrators of these attacks are not

Hindus but people belonging to another religion. Nevertheless, the message that comes out from these recent episodes of temple vandalism is of the Hindus as a people being religious-suicidal. This is all the more unfortunate for two reasons. The Ramakrishna Mission is world famous since it was Swami Vivekananda who single-handedly informed the world of the wonder that Hinduism is. It is ISKCON that enables so many countries, with its magnificent temples, to worship in the Hindu way of "Hare Rama, Hare Krishna". Secondly, it has been only a few years since the image of Hindu India began to shine, after centuries of suppression. We now have the sordid spectacle of temple and ashram premises being attacked by goons with guns, in West Bengal of all places. It was just over a century ago that Congress leader Gopal Krishna Gokhale had said, "What Bengal thinks today, India thinks tomorrow". It signified the province of Bengal was a leader. Is this what leaders do and that too for winning some seats in four or five constituencies? Just look back at the Renaissance, which in many ways, was comprehensively

ONE COULD GO ON AND ON ABOUT BENGAL'S CONTRIBUTIONS TO THE COUNTRY. MODERN INDIA'S GREATEST POET WAS RABINDRANATH TAGORE, AGAIN A GIFT OF BENGAL. HIS LYRICS ARE TODAY'S NATIONAL ANTHEM

led by Bengal. But before that, let us not forget Chaitanya Mahaprabhu, who is considered by many to have been an avatar of Krishna. Chaitanya saved at least a part of Bengal for Bharat; but for him, the whole of the province would have been swallowed by Pakistan and then ruined. He stood between the conversion of the poorer Bengalis to Islam and saving them so that today they can worship Krishna. Ramakrishna Paramahansa was also a divine gift of Bengal, who himself had a glimpse of the divine. One could go on and on about Bengal's contributions to the country. Modern India's greatest poet was Rabindranath Tagore, again, a gift of Bengal. His lyrics are today are national anthem. One cannot ever forget Bankim Chandra Chattopadhyay and his stirring song Vande Mataram, which became the freedom anthem of India's national movement and inspired countless revolutionaries to armed action for combating the colonial raj, as well as to embrace the gallows in their supremely inspired quest. Bengal is a virtual encyclopaedia of the 19th and 20th-century, greats of India. It would need an entire volume to describe how and when the

saga began to sour. From the climbing of lofty heights of art, culture, literature and industry, Bengal began to slip towards an existence that wouldn't be envied in the least. The late Nirad Chaudhari, one of the finest writers the English language world has seen, gave vent to this angst by saying that the people of his are the "finest virtuosi of factiousness", not a flattering comment, though this writer, having been raised in Bengal and able to speak fluent Bengali, is wont to take a much more positive view. The sense of being Bengali is of course very pronounced, but the unity a common language can foster cannot stand before the pull of religion, as has been the historical experience throughout most significant parts of the world. That the State that led India's renaissance in the 19th century has fallen into this travesty is a sad tale, but Bengal has been known to come back strongly towards nationalism every time it is felt that the province might have gone astray. Perhaps therein lies the silver lining. (The writer is a well-known columnist, an author and a former member of the Rajya Sabha; views are personal)

### LETTERS TO THE EDITOR

#### TAIWAN STAYS STRONG AMID TENSIONS

Madam — Apropos the news story "Taiwan tracks dozens of Chinese warplanes and navy vessels off its coast on the 2nd day of drills," published on May 24, this is my response. It's concerning to witness the escalation of tensions between Taiwan and China. Taiwan's tracking of Chinese military activity showcases their vigilance in the face of increasing pressure from Beijing. Despite the provocative displays from China's People's Liberation Army, Taiwan remains steadfast, with President Lai Ching-te affirming the nation's commitment to freedom and democracy. The ongoing dispute in Taiwan's parliament underscores the internal challenges they face, yet life continues in Taipei uninterrupted. China's aggressive stance, citing the one-China principle, only adds to the volatility of the situation. The international community must closely monitor these developments to ensure stability in the region and uphold Taiwan's sovereignty.

Avani Singhania | Kolkata

#### TACKLING E-WASTE THROUGH ACTION

Madam — Apropos the news story "Mitigating the e-waste crisis," published on May 28, this is my response. As technology advances, our reliance on electronic devices deepens, yet the consequences of our digital age loom large. E-waste, a byproduct of our tech obsession, poses a multifaceted threat to both environment and health. The toxic cocktail of substances found in discarded electronics, if not handled properly, can seep into soil, water and air, wreaking havoc on ecosystems and human well-being alike.

The staggering statistics from the Global E-Waste Monitor 2020 paint a grim picture of our unsustainable habits. However, solutions are within reach. Governments must enforce stringent regulations on e-waste management, while manufacturers bear responsibility for the entire lifecycle of their products.

#### Hospital fire prompts safety overhaul

Apropos the news story "Once burned, Govt orders fire audit of all hospitals," published on May 28, this is my response. Reading about the tragic fire at the neonatal hospital in Delhi, which resulted in the deaths of seven newborns and injuries to five others, is heartbreaking. This incident starkly highlights severe lapses in hospital management and safety protocols. The hospital was operating on an expired license and lacked fire department clearance, which is both shocking and unacceptable.

Investing in innovative recycling technologies and promoting eco-friendly design can mitigate the e-waste crisis. Ultimately, individual action is paramount. From conscientious disposal practices to advocating for systemic change, each of us holds the key to a cleaner, greener future. Let's embrace the challenge of recycling our e-waste and pave the way for a more sustainable tomorrow.

Aryan Malhotra | Chandigarh

#### SCIENCE ARCHIVES DRIVE PROGRESS

Madam — Apropos the news story "Science Archives Preserve Our Scientific Legacy," published on May 28, this is my response. As an ever-evolving discipline, science continually shapes our understanding of the world and our place within it. Reading the newspaper daily, I'm constantly reminded of how each discovery and innovation contributes to our present and builds the foundation for future generations. The COVID-19 pandemic, for instance, highlighted the power of scientific advancements in real-

The prompt action by the Delhi Government to mandate a fire audit for all hospitals by June 8 is a necessary step to prevent such tragedies in the future. However, it's deeply concerning that previous directives for fire preparedness and audits were not enforced rigorously. The revelation that the hospital was refilling oxygen without proper authorisation further underscores the negligence. It's encouraging to see the authorities committing to stringent new safety regulations and inspections, but these measures should have been in place long before this tragedy occurred. The bravery of the nurses and locals who risked their lives to save the babies deserves commendation, but such heroism should not be necessary in a properly regulated and safe environment. This tragic event serves as a grim reminder of the critical importance of strict compliance with safety standards in healthcare facilities.

Anaya Patel | Pune

time, transforming our lives and becoming a part of history. Scientific knowledge is inherently cumulative, with each generation of scientists building upon the work of their predecessors. This continuity drives not only intellectual progress but also economic and societal growth. The significance of preserving scientific archives cannot be overstated, as they store invaluable materials—research notes, experimental data and historical correspondence—that offer insights into the development of scientific thought. In India, initiatives like the Archives at NCBS play a crucial role in preserving our scientific heritage. However, with the risk of losing digital data, systematic conservation efforts are vital. Governments should mandate the periodic submission of research documents to ensure the longevity and impact of scientific work, safeguarding it from becoming lost to time.

## Electric vehicles lead eco-friendly commute

Electric two-wheelers, with their zero tailpipe emissions, are providing an efficient and sustainable transport option for urban mobility

In the 1980s, the introduction of Maruti 800 changed the landscape of the automobile industry in India for decades to come. Cut to 2024 and we are heading towards a similar revolution in the years to come - but with a little twist.

Countries worldwide are addressing climate change by striving to reduce their carbon footprints. The adoption of electric vehicles (EVs), particularly electric two-wheelers (E2Ws), has emerged as a significant step in this effort. Understanding the environmental impact of E2Ws compared to conventional counterparts is crucial. There is compelling evidence supporting their widespread adoption as part of the transition towards sustainable transportation systems.

Traditional internal combustion engine (ICE) motorcycles and scooters contribute to air and noise pollution. E2Ws have zero tailpipe emissions and thus, help in mitigating pollution levels significantly. In urban settings, they help in allevi-

ating noise levels as well. Another advantage is that their powertrain is more efficient when compared to ICE vehicles. Since the conversion of electrical energy into mechanical energy is more effective, E2Ws have minimal energy wastage and a diminished carbon footprint. E2Ws also operate quietly and without vibrations or petrol fumes. There is ongoing innovation to close the performance gap between electric and their conventional fuel-powered counterparts. While ICE engines require warm-up for optimal perfor-

mance in cold weather, E2Ws operate at full capacity instantly. This makes the ride hassle free in any condition. Their advanced features like Android-based instrument clusters and mobile app connectivity further enhance the overall experience. In contrast with conventional ICE vehicles, there is a notable difference in the energy efficiency of E2Ws.

The electric motors are great at converting a larger portion of electrical energy from the grid into power at the wheels. This makes them highly effective in utilising

energy. The heightened efficiency indicates that they require less energy to travel the same distance, thereby reducing their environmental footprint even more. The production and upkeep of electric two-wheelers requires fewer resources and less energy. Their minimal maintenance requirements lead to decreased energy usage and a smaller environmental footprint.

E2Ws are a promising solution for reducing carbon footprints and advancing towards a more sustainable transportation paradigm. There is a need to address certain challenges such as those around infrastructure and accelerating the transition to renewable energy sources. This will help realise the full potential of E2Ws in mitigating environmental impact. With concerted action from policymakers, industry stakeholders and consumers, E2Ws are set to play a significant role in shaping a greener, more sustainable future for transportation.

## MICROMANAGEMENT AND UNDERMANAGEMENT

It is crucial to balance these extremes by ensuring employee empowerment

SAKSHI SETHI

In the realm of leadership and management, micromanagement and under management represent two extreme ends of a spectrum posing significant challenges to organisational success. While micromanagement leads to decreased autonomy, innovation and job satisfaction, under management results in a lack of direction, motivation and accountability. By understanding the impacts of these management styles and implementing strategies that balance oversight with empowerment, organisations can foster a productive, innovative and satisfying work environment. Micromanagement involves excessive control and oversight while under management is characterised by a lack of adequate supervision and support.

In the spectrum of management styles, micromanagement and under management represent two extremes, each with distinct characteristics and consequences for the workplace. In an organisation, if one is micromanaging the team and not giving its employees the freedom to work, will eventually drive away great talent while settling for mediocrity resulting in fostering anxiety and ultimately leading to negative impacts on overall organisational productivity and job satisfaction. Along with this, decreased employee morale, reduced creativity and innovation, lower productivity, increased stress and burnout, high turnover, poor performance and accountability are some of the impacts of both micromanagement and undermanagement that can be detrimental even though they manifest differently. Various research studies have shown that micromanagement stifles creativity and innovation.

It is negatively correlated with job satisfaction and positively correlated with stress and burnout. Employees under micromanagement reported lower engagement and higher intentions to leave their jobs. While on the other hand, the effects of under management found that employees lacking adequate supervision and feedback exhibited lower job satisfaction and performance.

It becomes of utmost importance to strike a balance between the two by adopting management practices that provide appropriate oversight while empowering employees. Balancing between micromanagement and under management involves adopting a management style that provides appropriate oversight while empowering employees. By fostering a culture of trust and empowerment; setting clear goals and expectations; and promoting a results-oriented culture can help the organisation create a positive and productive workplace where both managers and employees thrive. There is no denying the fact that balancing micromanagement and undermanagement is crucial for creating a productive, positive and effective workplace. By finding the middle ground, managers can provide the necessary support and oversight while empowering employees to take initiative and innovate.

Remember, be it micromanagement or undermanagement, both can have far-reaching negative effects on both the employees as well as the organisation. By understanding the causes and impacts and then implementing strategies to promote trust, autonomy and effective communication, organisations can create a more positive and productive work environment. Moving away from micromanagement not only enhances employee satisfaction and performance but also contributes to the long-term success and health of the organisation. Micromanagement and undermanagement, as opposite ends of the management spectrum, both present significant challenges to organisational effectiveness and employee well-being. While micromanagement stifles autonomy and innovation through excessive control, under management leaves employees directionless and unsupported. Both styles can lead to significant issues within an organisation, highlighting the need for a balanced approach to effective leadership.

# Relevant skill sets can combat unemployment

The rapid digital shift necessitates comprehensive strategies to address skill gaps and ensure inclusive growth. Public-private partnerships are essential

DINESH SOOD

The service sector has undeniably been the primary driver of India's growth since 2000. The exceptional performance of certain modern services has unequivocally contributed to the creation of more productive and decent employment. The reliance on services for economic growth unequivocally demands a fully developed job market, enabling a free flow of the workforce. The absence of such mechanisms will undoubtedly lead to rigidity in the services sector, curtailing growth against the backdrop of the increasingly important position of the services sector. The key focus areas include the pivotal role of technology in shaping the services sector and stimulating job growth in other sectors through multiplier effects.

The momentous transformation of the Indian economy is irrefutably being spearheaded by the service sector, which unequivocally contributes more than 50 per cent of the GDP. The sector's expansion is not happening in isolation but is deeply intertwined with global technological advancements. Technological progress has undeniably been a catalyst for efficiency, customer satisfaction, market expansion and data-driven decision-making within firms. It has also undeniably given rise to new service categories, such as e-commerce and other tech-based services like Artificial Intelligence (AI) and the Internet of Things (IoT), revolutionising the sector.

The relationship between the service sector's growth and technological innovation is undeniably mutually beneficial. As the service sector expands, it undeniably fuels further innovation in technology-based solutions. New ventures and their technological needs undeniably push for continuous technological advancements to gain the competitiveness needed to maintain their foothold in the dynamic industry. This competition and need for differentiation undeniably lead to increased investments in research and development (R&D) and open innovations, benefiting both the firms involved and the public.

The introduction of 5G and the ongoing development of 6G technologies have significantly enhanced connectivity, service

THE SERVICE SECTOR UNEQUIVOCALLY OFFERS BOTH ABUNDANT OPPORTUNITIES AND FORMIDABLE CHALLENGES. ADDRESSING CHALLENGES DEMANDS A RESOLUTE, COMPREHENSIVE APPROACH WITH ASTUTE POLICIES AND UNWAVERING IMPLEMENTATION

delivery speed and overall efficiency in India. Efforts to improve digital literacy have further accelerated technology adoption, with 70 per cent of businesses identifying as "Digital Businesses" and the country exhibiting the highest fintech adoption rate at 87 per cent. The application of AI in business operations has markedly improved operational efficiency, customer satisfaction and decision-making, positioning India as a global leader in AI adoption. However, the rapid digital transformation necessitates a balance between creating employment and providing the relevant skill sets for technology-demanding jobs for a new generation is a national need.

The service sector unequivocally offers both abundant opportunities and formidable challenges. Addressing challenges demands a resolute, comprehensive approach with astute policies and unwavering implementation. Public-private partnerships and policies aimed at bridging the skill gaps must be executed with unwavering effectiveness. Educational institutions must urgently revamp their curriculum to directly align with the market's skill demands.

Technological advancement, while propelling economic growth, undeniably necessitates relentless skill development. To fully exploit technological progress, educational institutions must steadfastly ensure their curriculum is consistently updated and in sync with the latest innovations.

**Skill Gap:** In India, the skill gap in the labour force is a significant challenge, with only 51 per cent of the youth deemed employable due to a lack of necessary skills. This issue is exacerbated by the country's diverse socio-economic conditions, particularly affecting those in rural areas and from economically disadvantaged backgrounds, who lack

access to quality education and training. This situation perpetuates cycles of poverty and aggravates wage inequality. Moreover, inadequate emphasis on developing non-technical skills such as communication, critical thinking and leadership, which are increasingly in demand, further compounds the problem. The absence of these skills from the curriculum of most educational institutes compels employers to choose candidates only from a handful of premier institutes. Additionally, there is a significant mismatch between the skills taught and those required by employers, leading to unemployment even among the formally educated.

Efforts to bridge this gap must include public-private partnerships (PPPs), such as the initiative to upgrade Industrial Training Institutes (ITIs) and the National Skill Development Corporation (NSDC) to train 150 million people by 2024. These initiatives are crucial steps toward aligning educational outcomes with market needs, emphasising the vital importance of both technical and non-technical skills development to enhance employability.

**Gender Inequality:** Female employability in India has consistently exceeded male employability from 2020 to 2023, but there was a drop in 2024. Furthermore, it has been higher for seven out of eleven years of the Wheel India Skills Reports. However, there has been a persistent gap between female and male labour force participation, indicating a clear bias against employing women over men. This bias is diminishing as female labour force participation has risen over the years, but substantial improvement is still necessary.

The Indian Government has implemented various initiatives to foster gender-inclusive employment, aim-

ing to bridge the gender gap in the workplace, making employing female labourers more lucrative while also ensuring it does not come at the cost of pay disparity.

One significant legislation is the Equal Remuneration Act of 1976, designed to eliminate the wage gap between genders by ensuring equal pay for equal work. However, the act faces challenges, such as the narrow interpretation of the same work or work of a similar nature and the onus on employees to prove discrimination, which is difficult due to workplace power dynamics and legal complexities.

Additionally, the Government has launched schemes like Mission Shakti and the Deendayal Antyodaya Yojna-National Rural Livelihoods Mission (DAY-NRLM), focusing on women's skill development and employability. These initiatives include exclusive training institutes for women, industry-oriented courses and partnerships with private sector bodies and NGOs. To encourage female participation in skill development, 30 per cent of seats in ITIs and ITCs are reserved for women.

These measures represent a comprehensive and assertive approach to promoting gender equality in employment, highlighting the crucial importance of legislative support, skill development and financial empowerment in achieving a more inclusive workforce. These unwavering steps will guarantee the complete realisation of the Indian economy's potential and the equitable distribution of the benefits of skills development.

(The writer is Co-Founder and MD, of Orane International, a Training Partner with the National Skill Development Corporation (NSDC), Network Member, of India International Skill Centres, an initiative of GoI. Views expressed are personal)

# The dawn of AI: Balancing innovation and prudence

As AI advances, it is essential to strike a balance between harnessing its advantages and addressing its challenges to ensure a sustainable future

Artificial Intelligence (AI) is the ex-novo computer technology that essentially deals with developing machines capable of imitating human behaviour. The Encyclopedia Britannica defines AI as the "ability of a computer or robot to perform tasks commonly associated with intelligent beings such as perception, critical thinking and decision-making". As far as the human mind is concerned, first, it processes the information, analyses the processed information from various angles and finally arrives at a logical conclusion. On the contrary, AI is a software programme that solely relies on pre-fed computer data to answer a query. In the entire process, the computer system behaves like

M J WARSI

a human mind. AI is the order of the day and admittedly, holds the potential to bring about revolutionary changes in communications, defence, healthcare and agriculture. In fact, till recently, the task that was considered impossible even for a machine to perform now AI has turned into a reality. AI has considerably brought computers very close to imitating the human mind, thus, diminishing the gap

between man and machine. Today AI has found its application in a variety of fields such as education, finance, defence, agriculture and healthcare. Leading medical research institutions use AI for experiment, diagnosis, treatment and monitoring of deadly diseases. AI facilitates high-quality tissue sample analysis that paves the way for precise prognosis. In this day and age pharmaceutical companies are using AI for drug discovery and chemical analysis. With the help of AI doctors and healthcare professionals can precisely diagnose serious medical conditions such as cancer and stroke. In the education sector too, AI plays an important role. AI has proved to be an extremely handy tool to develop study material, student

evaluation, grading and monitoring. Thus, teachers save their precious time which they can utilise in productive academic pursuits as well as engage in meaningful discussions with students. AI-powered virtual educator robots substantially improve teaching and learning outcomes.

Now let us see some of the imminent dangers of AI. The picture is not as rosy as it appears for the AI. Widespread indignation use of AI in almost every sphere of human activity is bound to raise some serious concerns concerning privacy, data security and transparency. Psychological well-being and social issues warrant our immediate attention. Companies are gradually replacing humans with AI-powered robots to perform

specific tasks at the workplace. This causes anxiety among employees and adversely affects their mental and emotional well-being. The technical dexterity of computers also is a major challenge for humans in the workplace. Of late AI-driven Deepfake videos and online Bots have spread at an alarming pace. Deepfake videos and online Bots are capable of orchestrating a fabricated consensus and manipulating public opinion. Fake news spreads like wildfire disturbing peace and leading to social unrest. Another disadvantage of AI is that it makes it extremely tough to distinguish between the original and the fake. AI-induced human rights violations should be stopped at the earliest. AI-powered changing

technology landscape has jeopardised data security, privacy, dignity, employment, equality, political rights and secrecy. Experts and sociologists have expressed reservations regarding the detrimental impacts of over-reliance on AI and human robots in important sectors like healthcare, law, marketing, accounting, education, management, technology and workplaces. AI's technological diligence, incredible analysis power and the ability to perform repetitive tasks may lead to huge layoffs. Consequently, this gives rise to a disproportionately high unemployment rate. Employees and the labourers may be subjected to discrimination and disparities and their professional and social security may be at stake. To

check the AI misuse a well-defined and comprehensive technological-labour policy is the need of the hour. Some of the measures that help workers survive in the AI-driven landscape are regular up-gradation of employee skills through appropriate training, honing up of technical skills and developing Soft skills. Lo and behold! Let's not lose sight of the fact that AI is completely devoid of human temperament, comprehension and creativity. The human mind is blessed with infinite creative power and Higher Order Thinking Skills (HOTS). These supreme attributes propel human beings to an elevated plane and place them on a higher pedestal than machines. On the contrary, AI is data-driven and follows a defined tra-

jectory, thus, fails to capture human emotions, perception and the ability to perform tasks by adapting to a given environment. Since AI is in its nascent stage, therefore, it is too soon to assume that AI can take over humans shortly as humans continue to be the *fons et origo* of originality and innovation.

Another threat that scares us is that if ever in the future technologically advanced machines take Man as their enemy then the entire human race may face existential crises. Pre-empting these dangers the US and the European countries have taken a locus standi to oppose AI and have taken stringent legal measures to curb AI's capricious use.

# Three Israeli soldiers killed in booby trap explosion in Rafah

AP ■ JERUSALEM

Three soldiers have been killed in Rafah, the Israeli military said Wednesday. Israeli media reported that the soldiers were killed when a booby trap exploded Tuesday, and three other soldiers were wounded. The military says at least 290 soldiers have been killed since the ground operation in Gaza began in October. Israel says it is carrying out limited operations in eastern Rafah along the Gaza-Egypt border. Palestinians in Rafah reported heavy fighting Wednesday as Israeli forces pressed their assault on the border town once seen as the territory's last refuge. The United States and other allies of Israel have warned against a full-fledged offensive in the city. Israeli leaders say their forces must enter Rafah to dismantle Hamas and return hostages taken in the October 7 attack that triggered the war. Fighting in Rafah has caused more than 1 million Palestinians to flee, most of whom had already been displaced in the war between Israel and Hamas. They now seek refuge in squalid tent camps and other war-ravaged areas, where they lack shelter, food, water and other essentials

for survival, the UN says. Israeli bombardments and ground offensives in Gaza have killed more than 36,000 Palestinians, according to the Health Ministry, which doesn't distinguish between combatants and civilians. Israel launched its war in Gaza after Hamas' October 7 attack in which militants stormed into southern Israel, killed some 1,200 people — mostly civilians — and abducted about 250. Israel says around 100 hostages are still captive in Gaza, along with the bodies of around 30 more. **IFRC JOINS GROWING CALLS FOR A CEASE-FIRE:** The International Federation of Red Cross and Red Crescent Societies joined growing calls Wednesday for a cease-fire and humanitarian aid access to the Gaza Strip, saying these were critically needed to ease the horrific suffering of civilians trapped in the seven-month conflict. "It's absolutely imperative," IFRC President Kate Forbes told The Associated Press in an interview in the Philippine capital, Manila, where she was to hold a series of meetings. "First, we have to have a government solution to get a cease-fire so that we can get access and then, we will give aid to both sides."

## US condemns loss of life, says no policy changes

AP ■ WASHINGTON

The White House on Tuesday condemned the loss of life of dozens of civilians as a result of an Israeli airstrike in Rafah, but said it is not planning any policy changes as a result of the Israeli actions. National Security Council spokesman John Kirby told reporters that Israel had not violated Biden's "red line" for withholding future offensive arms transfers because it has not, and it appears to the US that it will not, launch a full-scale ground invasion into the city. "Everything that we can see tells us that they are not moving into a major ground operation in population centres in the centre of Rafah," Kirby said. Kirby called the loss of life "heart-breaking" and "horrific," and said the US was monitoring the results of an Israeli investigation into the strike, which suggested the civilian deaths were the result of a secondary explosion after a successful strike on two Hamas operatives. "We understand that this strike did kill two senior Hamas heads who are directly responsible for attacks," Kirby said. "We've also said many times Israel must take every precaution possible to do more to protect innocent life." Asked whether the strike would result in any US policy changes, Kirby said, "I have no policy changes to speak to."

Some areas need "psychosocial support and in some, it's going to be absolute aid," said Forbes, who rose to the presidency of the world's largest humanitarian network in December. "I've said this is both a sprint and a marathon. We need to get aid

immediately in Gaza for people who have malnutrition, there's not adequate sanitation," she said. "But it's going to be a marathon in that there's going to be aid that's going to be needed for decades to repair Gaza and the people there."

## US officials in Ukraine to discuss seizing Russian assets

AP ■ WASHINGTON

A senior US Treasury official is in Kyiv this week to talk with government officials about US financial support for Ukraine, efforts to tighten sanctions on Russia and plans to use immobilized Russian sovereign assets for the benefit of Ukraine as it fends off Russian forces. Deputy Secretary Wally Adeyemo's trip comes as Russia gains territory on the battlefield after an especially lengthy delay in US military aid left Ukraine at the mercy of Russia's bigger army and as the outlook for Ukraine's state finances is on shakier ground. Adeyemo is set to meet with officials in Ukraine's finance ministry and president's office. He's also planning a stop at the Kyiv School of Economics to speak with faculty and civil society groups working on sanctions policy and ways to make sanctions on Russia more effective. President Joe Biden signed legislation in April that allows the administration to seize the roughly USD5 billion in Russian state assets located in the US. However, a majority of the USD 260 billion in frozen Russian assets are in Europe, and US officials are hoping for a consensus from their European allies on how to spend that money. US Treasury Secretary Janet Yellen met in Stresa, Italy, with her counterparts from the Group of Seven nations last week to discuss how to squeeze money out of the frozen Russian assets to support Kyiv's war effort. She said loaning Ukraine USD 50 billion from the assets "has been mentioned as a possible number that could be achieved," but that the specific approach was still under discussion.

Major Radhika Sen of India stands near the Gandhi Statue at UN HQ. Sen will receive the prestigious '2023 United Nations Military Gender Advocate of the Year Award' from UN Secretary General Antonio Guterres during a ceremony at the world body's headquarters on May 30, 2024 to mark International Day of UN Peacekeepers. ## Police search European Parliament over suspected Russian interference

AP ■ BRUSSELS

Belgium's federal prosecutor's office said on Wednesday that police carried out searches at the residence of an employee of the European Parliament and at his office in the Parliament's building in Brussels over suspected Russian interference. Prosecutors said in statement that the suspect's office in Strasbourg, where the EU Parliament's headquarters are located in France, was also searched in partnership with the EU's judicial cooperation agency, Eurojust, and French judicial authorities. The raids took place less than

two weeks before Europe-wide polls on June 6-9 to elect a new EU parliament. The investigation was announced last month by Belgian Prime Minister Alexander De Croo, who said his country's intelligence service has confirmed the existence of a network trying to undermine support for Ukraine. "The searches are part of a case of interference, passive corruption and membership of a criminal organization and relates to indications of Russian interference, whereby Members of the European Parliament were approached and paid to promote Russian propaganda

via the Voice of Europe news website," prosecutors said. Prosecutors said they believe the employee played "a significant role in this." De Croo said last month that the probe showed that members of the European Parliament were approached and offered money to promote Russian propaganda. "According to our intelligence service, the objectives of Moscow are very clear. The objective is to help elect more pro-Russian candidates to the European Parliament and to reinforce a certain pro-Russian narrative in that institution," he said.

## Algeria proposes SC resolution seeking Israel halt Rafah

AP ■ UNITED NATIONS

Algeria is circulating a proposed UN Security Council resolution that would demand an immediate cease-fire in Gaza and order Israel to halt its military offensive in the southern city of Rafah immediately. The draft resolution, obtained on Wednesday evening by The Associated Press, also demands that the cease-fire be respected by all parties. It also calls for the immediate release of all hostages taken during Hamas' attack in southern Israel on October 7. Some diplomats said they hoped for a quick vote, even as early as Wednesday. "It is our hope that it can be done as quickly as possible because life is in the balance," Chinese Ambassador Fu Cong told reporters. US Ambassador Linda Thomas-

Greenfield said: "We're waiting to see it and then we'll react to it." The United States has vetoed multiple resolutions demanding a cease-fire in Gaza. The draft demands compliance with previous Security Council resolutions that call for the opening of all border crossings and humanitarian access to Gaza's 2.3 million people who desperately need food and other aid. The proposed resolution says that "the catastrophic situation in the Gaza Strip constitutes a threat to regional and international peace and security". It expresses grave concern at "famine spreading throughout the Gaza Strip" and the suffering of Palestinians who took refuge in Rafah. The resolution would demand that Israel "immediately halt its military offensive, and any other action in Rafah". The draft condemns what it calls "the indiscriminate target-

ing of civilians, including women and children, and civilian infrastructure" and reiterates the council's demand for all parties to comply with international law requiring the protection of civilians. Algeria's UN ambassador, Amar Bendjama, who is also the Arab representative on the Security Council, told reporters after emergency closed council consultations Tuesday that he would be sending the draft resolution to the 15-member council later in the evening. Algeria called the emergency council meeting as Israel pushed ahead with its military operation in Rafah, where over a million Palestinians had sought refuge. It followed Sunday night's Israeli airstrikes that triggered a fire engulfing tents in a camp for displaced Palestinians west of Rafah, killing 45 people and injured over 100 others.

## Sweden assures USD 1.23b aid to Ukraine

AP ■ COPENHAGEN

The Swedish government said on Wednesday that it will donate military aid to Ukraine worth 13 billion kronor (USD 1.23 billion) in the largest help package Sweden has so far donated. "It consists of equipment that is at the top of Ukraine's priority list," Deputy Prime Minister Ebba Busch said. It included air defense, artillery ammunition and armoured vehicles. Sweden's Defense Minister Pål Jonsson reiterated that the country has ruled out for now sending any Swedish-built JAS 39 Gripen jets to Ukraine, saying the focus on the Ukrainian side is on implementing the F-16 program. Several countries have said they want to donate F-16 fighter jets. On Tuesday, Belgium pledged 30 F-16 jets to Ukraine. Jonsson said Sweden "is still working on possibly being able to contribute with the Gripen system later."

## N Korea flies trash balloons over South

AP ■ SEOUL

North Korea flew hundreds of trash-carrying balloons toward South Korea in one of its most bizarre provocations against its rival in years, prompting the South's military to mobilise chemical and explosive response teams to recover objects and debris in different parts of the country. The ballooning campaign came as North Korean leader Kim Jong Un urged his military scientists to overcome a failed satellite launch and continue developing space-based reconnaissance capabil-

ities, which he described as crucial for countering US and South Korean military activities, state media said Wednesday. In his first public comments about the launch failure, Kim also warned of unspecified "stern" action against South Korea over an exercise involving 20 fighter jets near the inter-Korean border hours before North Korea's failed launch on Monday. In a speech Tuesday, Kim called the South Korean response "hysterical insanity" and "a very dangerous provocation that cannot be ignored," the North's official Korean

Central News Agency said Wednesday. In another sign of tensions between the war-divided rivals, South Korea's Joint Chiefs of Staff said North Korea also has been flying large numbers of balloons carrying trash toward the South since Tuesday night, in an apparent retaliation against South Korean activists for flying anti-Pyongyang propaganda leaflets across the border. The South's military said about 260 North Korean balloons were found dropped in various parts of the country as of Wednesday afternoon and were being recovered by mili-

tary rapid response and explosive clearance teams. It advised civilians not to touch the objects flown from North Korea and to report to military or police after discovering them. Photos released by the military showed trash scattered across highways and roads in different parts of the country. In the capital, Seoul, military officials found what appeared to be a timer that was likely designed to pop the bags of trash midair. In the central South Chungcheong province, two huge balloons carrying an un-popped plastic bag filled with dirt-like substances were seen at a road.

## Two more held in Lanka for ISIS links

PTI ■ COLOMBO

Sri Lankan police have arrested two more suspects allegedly linked to the Islamic State (ISIS) from the country's north-western region, officials said on Wednesday. The development comes days after the Gujarat Anti-Terrorist Squad arrested four Sri Lankans with links to ISIS at the airport in Ahmedabad. The four men had taken an Indigo flight out of Colombo to Chennai on May 19. Sri Lankan security forces suspect that a 46-year-old man - identified as Osmand Gerrard - acted as their handler and facilitated their movement from Lanka to India. Sri Lanka Police recently announced a cash award of Rs. 2 million for any credible information on the whereabouts of the wanted suspect. The CID has arrested two peo-

ple in Bangadeniya, Chilaw for their alleged links with ISIS members, officials said. Investigations conducted so far have not confirmed that the two are ISIS members, they added. Meanwhile, the Colombo magistrate's court on Wednesday granted bail to a university lecturer who had stated to the media that four individuals who had been arrested in India were part of a list in the presidential commission report which said that they must be put through a programme of de-radicalisation. He was arrested on Tuesday to record a statement to verify his claim, the police said. Despite his television statement, he denied any knowledge of such a thing when quizzed by the police, the police said. The exchange of information between Sri Lanka and India

has commenced concerning the Sri Lankans arrested in India. This collaborative effort involves both the Sri Lanka Army Intelligence Division and the Police Terrorist Investigations Division, the local media said on Tuesday. Among the arrested individuals, Mohammed Nusrat is a businessman involved in importing telecommunication devices and electrical equipment from countries such as Singapore, Malaysia, and Dubai, the news portal said. Nusrat operated within Colombo, where he sold these imported goods. Mohammad Nafran, 27, who was also arrested, has been identified as the son of the first wife of Niyas Nauerf aka 'Potta Nauerf' the notorious underworld criminal who was sentenced to death for the killing of High Court Judge Sarath

Ambepitiya. The other two Sri Lankans are 35-year-old Mohammad Faris from Maligawatte, Colombo and 43-year-old Mohammad Rashdeen from Colombo 13. Mohammad Faris had worked as a 'Nattami' or cart puller in Pettah, and was arrested by the Colombo Crimes Division on March 11, 2023, and November 1 of the same year. On May 21, his close associate Hameed Amir was arrested by the Terrorist Investigations Division. Mohammad Faris left for Chennai, India on May 19. The other suspect is Mohammad Rashdeen, a three-wheeler driver. Security forces suspect that he is linked to trafficking crystal meth or ICE. Last week, the Sri Lankan authorities launched a high-powered operation to investigate the four Sri Lankans arrested in Gujarat.

## Sherpa concerned about garbage on higher camps of Mt Everest

AP ■ KATHMANDU

One of the greatest Mount Everest guides on Wednesday expressed concerns about the peak's growing piles of garbage, as he was honoured by his government to mark Everest Day. Sherpa guide Kami Rita, who has scaled Mount Everest a record 30 times, was honoured by Nepal's Prime Minister Pushpa Kamal Dahal in Kathmandu on the anniversary of the first successful summit by New Zealander Edmund Hillary and Nepali Sherpa Tenzing Norgay in 1953. Kami Rita said he was deeply worried by the accumulation of garbage that's been surfacing as ice and snow melt from the

peak. "It is very necessary to immediately direct our attention to this," he said, adding that Everest Day should really be celebrated by government funding campaigns to clean up the camps near the summit. There have been clean up campaigns on the mountain almost every year. A team of Nepali soldiers were still on the mountain picking up trash left behind by previous expeditions. "At the moment, not enough garbage has been taken out from Camp 3 or 4," Kami Rita said. "There had been cleanup campaigns but all of that have been for either Camp 2 or below." Kami Rita also said Sherpa

guides working on the mountain should have better conditions and benefits. "There needs to be increased amount of insurance up to 6,000,000 rupees (USD 45,000) and there should be a provident fund," he said. The 54-year-old guide had scaled the 8,849-meter (29,032-foot) peak twice this month, breaking his own record for the most successful climbs. His closest competitor is fellow Sherpa guide Pasang Dawa, who has 27 successful ascents. Kami Rita first climbed Everest in 1994 and has been making the trip nearly every year since. He is one of many Sherpa guides whose expertise and skills are vital to the safety and success each year of foreign

climbers aspiring to stand on top of the world. His father was among the first Sherpa mountain guides. In addition to his Everest climbs, Kami Rita has scaled several other peaks that are among the world's highest, including K2, Cho Oyu, Manaslu and Lhotse. Several climbers and people in the community were honoured alongside Kami Rita. Kaamya Karthikeyan, the youngest Indian Mount Everest summitter, was also felicitated by Nepal Prime Minister Pushpa Kamal Dahal 'Prachanda' at a special function here on the International Everest Day along with other veteran international summitters.

## Melinda French Gates to donate USD 1 billion over next 2 years in support of women's rights

AP ■ WASHINGTON

Melinda French Gates says she will be donating USD 1 billion over the next two years to individuals and organisations working on behalf of women and families globally, including on reproductive rights in the United States. It's the second billion-dollar commitment French Gates has personally made in the past five years. In 2019, she pledged over ten years to expand women's power and influence. Earlier this month, French Gates announced she would step down from the Bill and Melinda Gates Foundation, and vowed to focus on women and families. As a part of leaving the Gates Foundation, French Gates received USD 12 billion from Bill Gates for her philanthropy going forward. French Gates, one of the biggest philanthropic supporters of gender equity in the US, said on Tuesday in a guest essay for The New York Times that she's been frus-

trated over the years by people who say it's not the right time to talk about gender equality. "Decades of research on economics, well-being and governance make it clear that investing in women and girls benefits everyone," she wrote. French Gates said over the last few weeks she's started directing what will total USD 200 million in new grants through her organisation, Pivotal Ventures, to groups working in the US to protect women's rights and advance their power and influence. The grants are for general operating support, meaning they are not earmarked for specific projects. The groups include the National Women's Law Centre, the National Domestic Workers Alliance and the Centre for Reproductive Rights. Teresa Younger, the president and CEO of the Ms. Foundation for Women, who also received a grant, has long called on donors to give unrestricted, multi-year funding to organizations. She praised French Gates'

new commitment as a part of a larger trend of major women donors giving generously to nonprofits. "If philanthropy took lessons from the way that women are moving money, we would see more money in the field having greater impact," Younger said. Her organisation learned of the grant, which is the first they've received from Pivotal Ventures within the last week, and Younger said there was no application process. She declined to disclose the amount of the grant but said it would help expand their work with organisations in the South and Midwest. The nonprofit MomsRising Education Fund also received a grant that will extend to the end of 2026, with Kristin Rowe-Finkbeiner, its executive director and CEO, saying, "We're deeply honored and enormously grateful that Melinda French Gates is stepping up for women and families in a time when the rights of our daughters may be significantly less than of ourselves or our own mothers."

French Gates also pledged to give 12 individuals USD 20 million each to distribute to nonprofit organisations of their choice before the end of 2026. Those funds will be managed by the National Philanthropic Trust, one of the largest public charities that offers donor-advised funds, a spokesperson for Pivotal Ventures said. In total, French Gates announced \$690 million in commitments out of the promised USD 1 billion, which also include an "open call" for applications that the organisation Lever for Change will administer this fall. French Gates said USD 250 million will be awarded to fund organisations working to improve women's mental and physical health globally. French Gates' Pivotal Ventures is a limited liability company that also manages investments in for-profit ventures, so there is little public information about its grant-making or the assets it manages. Pivotal Ventures has focused on a number of avenues to increase women's economic and political participation and power, like

closing the wage gap, compensating care work often done by women, and encouraging women to run for political office. Pivotal Ventures said it has committed USD 875 million of the USD 1 billion that French Gates pledged in 2019 to a mixture of venture and philanthropic funding. Additionally, the Gates Foundation has funded research and interventions to improve maternal mortality and women's health more broadly for years. In 2020, it hired its first president for its gender quality division and in 2021, the foundation pledged USD 2.1 billion to gender equity efforts convened by UN Women. In her essay Tuesday, French Gates touched upon the high maternal mortality rates in the US, noting that Black and Native American mothers are at the highest risk. "Women in 14 states have lost the right to terminate a pregnancy under almost any circumstances. We remain the only advanced economy without any form of national paid family leave. And the number of teenage girls experiencing suicidal

thoughts and persistent feelings of sadness and hopelessness is at a decade high," she said. French Gates will be leaving the Bill and Melinda Gates Foundation next week. She helped co-found the organisation nearly 25 years ago. The Associated Press receives financial support for news coverage in Africa from the Bill and Melinda Gates Foundation and for news coverage of women in the workforce and state governments from Pivotal Ventures. The Bill and Melinda Gates Foundation will change its name to the Gates Foundation. It is one of the largest philanthropic organisations in the world. As of December 2023, its endowment was USD 75.2 billion, thanks to donations from Gates and the billionaire investor Warren Buffett. While it works across many issues, global health remains its largest area of work, and most of its funding is meant to address issues internationally rather than in the US.

# Georgian parliament overrides presidential veto

AP ■ TBILISI (GEORGIA)

The Georgian parliament on Tuesday overrode a presidential veto of the "foreign agents" bill that has prompted weeks of massive protests by critics who say it will restrict media freedom and obstruct Georgia's chances of joining the European Union. The legislature, controlled by the ruling Georgian Dream party, dismissed the veto of President Salome Zourabichvili, an independent. The president now has five days to endorse the bill. If she doesn't do so, the parliament speaker will sign it into law. The bill that was approved by the parliament earlier this month requires media, non-governmental organizations and other nonprofit groups to register as "pursuing the interests of a foreign power" if they receive more than 20 per cent of their funding from abroad. Zourabichvili, who is increasingly at odds with the governing party, vetoed the bill on May 18. She has accused the

governing party of jeopardizing the country's future and "hindering the path toward becoming a full member of the free and democratic world."

The veto was rejected by an 84-4 vote in a contentious parliamentary session, during which a Georgian Dream deputy doused the leader of an opposition party with water while he spoke from the rostrum.

Opponents of the bill thronged outside the parliament building and some shouted "Slaves!" as the vote was announced. The crowd swelled in the evening and a lengthy procession of protesters marched past Georgian Dream headquarters. "We have realized that our government is ready to throw this country off a cliff. The feeling, when I talk to my friends and people here, is that in the 21st century, our country is once again going under Soviet occupation," said demonstrator Giorgi Natroshvili. The government says the bill is needed to stem what it deems to be harmful foreign actors

## FOREIGN INFLUENCE BILL

trying to destabilize the South Caucasus nation of 3.7 million, but many Georgian journalists and activists argue that the bill's true goal is to stigmatize them and restrict debate ahead of parliamentary elections scheduled for October.

Opponents denounce the legislation as "the Russian law" because it resembles measures pushed through by the Kremlin to crack down on independent news media, nonprofits and activists. Critics say the measure may have been driven by Moscow to thwart Georgia's chances of further integrating with the West. Prime Minister Irakli Kobakhidze, however, contended the law will aid that integration. "The law on transparency will create better grounds for ensuring the membership of Georgia in the EU," he told a news conference after the vote, adding that the law

would strengthen Georgia's sovereignty.

But opposition parliament member Khatia Dekanoidze said: "Now we have an absolutely new reality ... Probably, the window for integration into European Union will be closed." The bill is nearly identical to one that the ruling party was pressured to withdraw last year after massive street protests. Renewed demonstrations again gripped Georgia as the bill made its way through parliament. Demonstrators scuffled with police, who used tear gas and water cannons to disperse them. The European Union's foreign policy arm has said that adoption of the law "negatively impacts Georgia's progress on the EU path." Last week, US Secretary of State Antony Blinken announced that travel sanctions would be imposed on

Georgian officials "who are responsible for or complicit in undermining democracy in Georgia." He noted that "it remains our hope that Georgia's leaders will reconsider the draft law and take steps to move forward with their nation's democratic and Euro-Atlantic aspirations."

The EU offered Georgia candidate status last December, while making it clear that Tbilisi needs to implement key policy recommendations for its membership bid to progress. The opposition United National Movement has described the bill as part of efforts by Georgian Dream to drag the country into Russia's sphere of influence — claims it vehemently denies. Georgian Dream was founded by Bidzina Ivanishvili, a former prime minister and billionaire who made his fortune in Russia. Zuka Elbakidze, a student who was among protesters rallying in Tbilisi ahead of Tuesday's vote, said "this day will determine the fate of our country," adding that "we are making a

choice between Europe and Russia, and all the people gathered here, except the policemen, want Europe and the West." "We are physically witnessing, literally witnessing, how Georgian citizens, how members of the Georgian Parliament are selling out our country," said another protester, Mariam Geguchadze. Russia-Georgia relations have often been rocky since Georgia became independent after the 1991 collapse of the Soviet Union. In 2008, Russia fought a brief war with Georgia, which had made a botched attempt to regain control over the breakaway province of South Ossetia. Moscow then recognized South Ossetia and another separatist province, Abkhazia, as independent states and strengthened its military presence there. Most of the world considers both regions to be parts of Georgia. Tbilisi cut diplomatic ties with Moscow, and the regions' status remains a key irritant even as Russia-Georgia relations have improved in recent years.

# Missing Kashmiri poet traced to PoK police custody

PTI ■ ISLAMABAD

A missing Kashmiri poet has been traced to be in the custody of police in the Pakistan-occupied Kashmir (PoK), the Islamabad High Court was informed on Wednesday, two weeks after he disappeared from Rawalpindi. Ahmad Farhad's wife had filed a petition in the Islamabad High Court (IHC) claiming that he had been abducted from his home.

When neither police nor any intelligence agency claimed responsibility for his custody, Justice Mohsin Akhtar Kayani, who was hearing the case, on May 24 issued an eight-page written order, summoning Law Minister Azam Tarar along with the sector commanders of the Inter-Services Intelligence (ISI), Military Intelligence (MI) and director of Intelligence Bureau (IB) as well as the defence and interior secretaries in person before the court on May 29.

On Wednesday, the officials of intelligence agencies did not appear but Attorney General Mansoor Usman Awan told the court that Farhad was currently in the custody of Kashmir police. Awan also presented a police report from Dhirkot police station in PoK, which had reg-

istered a case against him. The Islamabad police chief told the court that since the poet was in the custody of Kashmir police, the area was out of the jurisdiction of the Islamabad police.

During the hearing, Justice Kayani ordered the Attorney General to ensure that "no one gets picked up from Islamabad."

"If a person is not recovered, it will be a failure of the state," the judge said. The judge also observed that he would dispose of the case if Farhad's family was satisfied but the case about the missing persons would continue. "I will send the file for the formation of a larger bench on the missing person's issue," Justice Kayani remarked before adjourning the hearing. In conversation with journalists outside the IHC, Law Minister Tarar said the police are investigating the Kashmiri poet's case. "Ahmad Farhad is in PoK, I assisted on constitutional matters as a judicial assistant," he said, explaining his presence at the court. Farhad, known for his defiant poetry, was allegedly abducted and his location was not shared with the court until the judge showed his mettle to summon the powerful intelligence agencies.

# Former Thai PM faces indictment for royal defamation: Prosecutors

AP ■ BANGKOK

Thai prosecutors said Wednesday former Prime Minister Thaksin Shinawatra will be indicted for defaming the monarchy, three months after he was freed on parole on other charges.

Thaksin will not yet be indicted because he had filed a request to postpone his original appointment on Wednesday with proof that he has COVID-19, Prayuth Jebraguna, a spokesperson for the Office of the Attorney General, said at a news conference.

The attorney general's office scheduled a new appointment for Thaksin's indictment on June 18, Prayuth said, adding that Thaksin will also be indicted for violating the Computer Crime Act.

The law on defaming the monarchy, an offense known as lese majeste, is punishable by three to 15 years in prison. It is controversial not only because critics consider it harsh, but also because they charge it is used for political purposes to punish government critics.

Thaksin was ousted by a military coup in 2006. His opponents then had accused him of disrespecting King Bhumibol Adulyadej, who died in 2016. Thaksin's ouster set off years of struggle between his supporters and his opponents, who were generally staunch royalists. The political polarization led to unprecedented public debate about the monarchy's role, which sharpened when student-led protests for greater democracy took the streets in 2020.

Thaksin had been in self-imposed exile since 2008, but returned to Thailand in August last year to begin serving an eight-year sentence on charges related to corruption and abuse of power. He was released on parole in February from the hospital in Bangkok where he spent six months serving time for corruption-related offenses. On his return, he was moved almost immediately from prison to the hospital on grounds of ill health, and about a week after that King Maha Vajiralongkorn reduced his sentence to a single year. Thaksin was granted parole

because of his age - he is 74 - and ill health, leaving him free for the remainder of his one-year sentence.

Thaksin's return was interpreted as part of a political bargain between the Pheu Thai Party, the latest in a string of parties that he has supported, and their longstanding rivals in the conservative establishment to stop the progressive Move Forward Party from forming a government after its victory in last year's general election.

But shortly after his return, the attorney general's office said it had revived an investigation into whether Thaksin almost nine years ago violated the law against defaming the monarch.

Thaksin was originally charged in 2016 with violating the law for remarks he made to journalists when he was in Seoul, South Korea, a year before that, but the investigation could proceed only after he was presented with the charge in person in the hospital in January, officials said. Thaksin had denied the charges and submitted a statement defending himself.

# Europe's cybersecurity chief says disruptive attacks have doubled

AP ■ ATHENS (GREECE)

Disruptive digital attacks, many of which have been traced to Russia-backed groups, have doubled in the European Union in recent months and are also targeting election-related services, according to the EU's top cybersecurity official.

Juhan Lepassaar, head of the European Union Agency for Cybersecurity, or ENISA, told The Associated Press in an interview that attacks with geopolitical motives have steadily risen since Russia's full-scale invasion of Ukraine on Feb. 24, 2022.

"The number of hacktivist attacks (against) European infrastructure — threat actors whose main aim is to cause disruption — has doubled from the fourth quarter of 2023 to the first quarter of 2024," Lepassaar said late Tuesday at the agency's headquarters in Athens.

"It's quite a significant increase," he said. Citizens from the EU's 27 member states will vote June 6-9 for lawmakers in the

European Parliament in an election that will also shape the EU's executive branch, the European Commission. Elections, also due in the United States, Britain and multiple other countries, have alerted security agencies to the threat of disruption campaigns funded by adversaries.

ENISA has led exercises and intense consultations to harden the resilience of election-related agencies in the EU for the past seven months. In an annual report for 2023, the agency noted a surge in ransomware attacks and incidents targeting public institutions. Lepassaar said that attack methods — while mostly unsuccessful — were often tried out in Ukraine before being expanded to EU countries. "This is part of the Russian war of aggression, which they fight physically in Ukraine, but digitally also across Europe," he said.

Experts warn that artificial intelligence tools are also being used to target Western voters at accelerating speed and scale with misleading or false information, including hyperrealis-

tic video and audio clips known as deepfakes.

"It's been emphasized, also by member states' cybersecurity agencies, that AI-enabled disinformation and information manipulation is a big threat," Lepassaar said.

His comments echo a warning made this month by US Director of National Intelligence Avril Haines that technological progress will make more nations and groups able to launch effective disinformation campaigns.

US and European experts are helping security agencies to try and anticipate emerging digital threats and vulnerabilities over this decade, with ENISA identifying food production, satellite management and self-driving vehicles as areas requiring attention. Cybersecurity, Lepassaar argues, will inevitably need to become second nature to designers and consumers. "I do believe that we have a societal challenge ahead of us to understand digital security in the same way that we understand, security in the everyday traffic environment," he said.

# Bushra Bibi's ex-husband assaulted by Imran's lawyers outside court

PTI ■ ISLAMABAD

The ex-husband of Imran Khan's third wife Bushra Bibi was attacked by one of the lawyers of the former Pakistan prime minister outside a court here as he appeared for a hearing on appeals against the couple's conviction in the un-Islamic marriage case.

Khan, 71, and Bibi, 49, were sentenced to seven years in prison each on February 3 by a trial court for contracting the marriage during iddat, a mandatory period for a woman in Islam to wait before a second marriage after the death of her husband or divorce.

The case was filed by Bushra's ex-husband Khawar Maneka against the couple in November

2023, alleging that they married without Bushra observing the mandatory waiting period of iddat. He asked the court to declare the marriage null and void.

The court, on May 23, reserved the verdict on the appeals which was to be announced on Wednesday. During the hearing of appeals filed by Bushra and her husband and Pakistan Tehreek-e-Insaf (PTI) founder Khan against conviction in the case, Islamabad District and Sessions Judge Shahrukh Arjumand went into his chamber without announcing the verdict.

Following the development, PTI lawyers hurled bottles in the courtroom which prompt-

# 28 killed in Pak bus mishap

PTI ■ KARACHI

At least 28 people, including women and children, were killed on Wednesday in Pakistan after a speeding passenger bus veered off the road and fell into a ravine in the remote Balochistan province, according to media reports.

The bus, heading from Turbat to Quetta, fell into the ravine near Washuk town, around 700 kilometres from Quetta, the capital of Balochistan province. The accident was a result of speeding, according to the report, which said that women and children were among the deceased. The accident took place after the tyre of the passenger bus burst, Geo News reported quoting rescue officials. About 22 people sustained injuries in the accident.

# S Africans begin voting in crucial elections

AP ■ JOHANNESBURG

South Africans began voting Wednesday at schools, community centers and in large white tents set up in open fields in an election seen as their country's most important in 30 years. It could put the young democracy in unknown territory.

At stake is the three-decade dominance of the African National Congress (ANC) party, which led South Africa out of apartheid's brutal white minority rule in 1994. It is now the target of a new generation of discontent in a country of 62 million people — half of whom are estimated to be living in poverty. Africa's most advanced economy has some of the world's deepest socioeconomic problems, including one of the worst unemployment rates at 32 per cent. The lingering inequality, with poverty and joblessness disproportionately affecting the Black majority, threatens to unseat

the party that promised to end it by bringing down apartheid under the slogan of a better life for all. "I take voting as something serious because as communities, it is difficult to complain about services when you have not voted," said Samuel Ratshalingwa, who was near the front of the queue at a school in the Johannesburg township of Soweto, where President Cyril Ramaphosa was expected to vote. "Our main issue here in our community is the lack of jobs. We have to use the vote to make our voices heard about this problem," said Ratshalingwa.

After winning six successive national elections, several polls have the ANC's support at less than 50 per cent ahead of this one, an unprecedented drop. It might lose its majority in Parliament for the first time, although it's widely expected to hold the most seats. The ANC won 57.5 per cent of the vote in the last national

election in 2019, its worst result to date and down from a high of nearly 70 per cent of the vote 20 years ago.

Ramaphosa, the leader of the ANC, has promised to "do better." The ANC has asked for more time and patience. Any change in the ANC's hold on power could be monumental for South Africa. If it does lose its majority, the ANC will likely face the prospect of having to form a coalition with others to stay in government and keep Ramaphosa as president for a second term. The ANC having to co-govern has never happened before. South Africans vote for parties, not directly for their president. The parties then get seats in the Parliament according to their share of the vote and those lawmakers elect the president after the election. The ANC has always had a majority in Parliament since 1994. The election will be held on one day across South Africa's nine provinces, with nearly 28 mil-

lion people registered to vote at more than 23,000 polling stations. Final results are expected by Sunday.

The opposition to the ANC in this election is fierce, but fragmented. The two biggest opposition parties, the Democratic Alliance and the Economic Freedom Fighters, are not predicted to increase their vote by anything near enough to overtake the ANC. The DA is part of an agreement with other smaller parties to combine their vote in an effort to remove the ANC completely, but that's not seen as likely. Disgruntled South Africans are moving to an array of opposition parties; more than 50 will contest the national election, many of them new. One is led by South Africa's former President Jacob Zuma, who has turned against his former ANC allies. Zuma was disqualified from standing as a candidate for Parliament but his MK Party is still contesting and is the wild card.

The ANC says it is confident of retaining its majority and analysts have not ruled that out, given the party's decades of experience in government and its unmatched grassroots campaigning machine. It still has wide support, especially among older voters and those in more rural areas.

"I woke up at 4 am this morning, took a bath and made my way," said 68-year-old Velaphi Banda, adding he has voted for the ANC since 1994 and would do so again. "I was never undecided about which party I will vote for. I have always known." Ramaphosa has pointed out how South Africa is a far better country now than under apartheid, when Black people were barred from voting, weren't allowed to move around freely, had to live in certain areas and were oppressed in every way. This election is only South Africa's seventh national vote in which people of all races are allowed to take part.

# IMF upgrades forecast for China's economy

AP ■ NEW YORK

The International Monetary Fund has upgraded its forecast for China's economy, while warning that consumer-friendly reforms are needed to sustain strong, high-quality growth.

The IMF's report, issued late Tuesday, said the world's second-largest economy will likely expand at a 5% annual rate this year, based on its growth in the first quarter and recent moves to support the property sector. But it warned that attaining sustained growth requires building stronger social safety nets and increasing workers' incomes to enable Chinese consumers to spend more. The IMF also said Beijing should scale back subsidies and other "distortive" policies that support manufacturing at the expense of other industries such as services.

The ruling Communist Party has set its annual growth target at "around 5%," and the economy grew at a faster-than-expected 5.3% in the first quarter of the year, boosting the global economy. The IMF said its upgraded forecast also reflects recent moves to boost growth, including fresh help for the property industry such as lower interest rates and smaller down-payment requirements on home loans. But it said risks remained, with growth in 2025 forecast to be 4.5%. The IMF praised the Chinese government's focus on what it calls "high quality" growth, including increased investment in clean energy and advanced technology and improved regulation of financial industries. But it added that "a more comprehensive and balanced policy approach would help China navigate the headwinds facing the

economy." Job losses, especially during the pandemic, and falling housing prices have hit the finances of many Chinese. The report echoes opinions of many economists who say more must be done to provide a social safety net and increase incomes for workers so that Chinese families can afford to save less and spend more. The IMF report's longer-term assessment was less optimistic. It said it expected China's annual economic growth to fall to 3.3% by 2029 due to the rapid aging of its population and slower growth in productivity as well as the protracted difficulties in the housing sector. Use of industrial policies to support various industries such as automaking and computer chip development may waste resources and affect China's trading partners, it said, alluding to a key point of contention between Washington and Beijing.

# Stock markets fall for fourth day on profit taking

## Sensex down 667 points

PTI ■ MUMBAI

Benchmark equity indices Sensex and Nifty declined nearly 1 per cent on Wednesday, falling for the fourth day running amid profit-taking by cautious investors ahead of the results of the Lok Sabha polls.

The 30-share BSE Sensex declined 667.55 points or 0.89 per cent to settle at 74,502.90. It went below the 75,000 mark to hit the day's low of 74,454.55, plunging 715.9 points or 0.95 per cent. The BSE benchmark hit its all-time peak of 76,009.68 on May 27.

The NSE Nifty dropped 183.45 points or 0.80 per cent to 22,704.70. The 50-share barometer hit its lifetime high of 23,110.80 on Monday. From the Sensex pack, Tech Mahindra, ICICI Bank, Bajaj Finserv, HDFC Bank, UltraTech Cement, Axis Bank, Reliance Industries and Infosys were the biggest laggards.

Power Grid, Sun Pharma, Nestle, ITC and Bharti Airtel were the gainers. "Weak global cues prompted investors to take profits ahead of the US core PCE data, a key gauge of inflation that is anticipated to rise," Vinod Nair, Head of Research, Geojit Financial Services said.

In Asian markets, Seoul, Tokyo and Hong Kong settled lower while Shanghai ended with gains. European markets were trading lower. US markets ended on a mixed note on Tuesday. The last phase of polling is scheduled for June 1. The results of the ongoing general elections will be declared on June 4.

Global oil benchmark Brent crude climbed 0.88 per cent to USD 84.94 a barrel. Foreign Institutional Investors (FIIs) bought equities worth Rs 65.57 crore on Tuesday, according to exchange data.

After gyrating between gains and losses during the day on Tuesday, the BSE benchmark finally ended 220.05 points or 0.29 per cent lower at 75,170.45. The NSE Nifty dropped 44.30 points or 0.19 per cent to settle at 22,888.15.

Giving thumbs up to the economic management of the Modi government, S&P Global Ratings after a gap of 14 years upgraded India's sovereign rating outlook to positive from stable on robust growth, improved quality of public spending in last 5 years and expectation of broad continuity in reforms and fiscal policies.

S&P, however, retained India's sovereign rating at the lowest investment grade of 'BBB-'. He emphasised that ARCs' potential for resolving stressed assets within the system can only be realised with sound governance and adherence to ethical practices by responsible ownership and professional management.

# Adopt regulation plus approach; comply with regulation in letter and spirit: RBI DG to ARCs

PTI ■ MUMBAI

Reserve Bank Deputy Governor Swaminathan J has expressed concern over the increasing regulatory violations and warned Asset Reconstruction Companies (ARCs) to ensure compliance without needing the regulator to point out the issues to them. Addressing a conference attended by top management of ARCs in the country on May 17, he said, "I would urge you all to adopt a regulation plus approach where you not only comply with the letter of the regulation but also its spirit."

Very often, he said, "We get representations to our observations stating this is industry practice or clarifications are pending from the RBI. Sometimes there are incorrect or intelligent interpretations of the circulars." These are not acceptable excuses for failing to do the right thing, he said, adding that the boards of ARCs should ensure that they do the right thing without needing the regulator to point it out to them.

He emphasised that ARCs' potential for resolving stressed assets within the system can only be realised with sound governance and adherence to ethical practices by responsible ownership and professional management.

Some ARCs, while enjoying the full benefits of the special position granted to them under the law and the regulations, have been found to be using innovative ways to structure transactions in a manner to circumvent regulations, he said. During the course of onsite examinations, he said, "We have come across instances where ARCs have been used or allowed themselves to be used, if I may say so, as a conduit to evergreen distressed assets."

In many cases, there is a lack of transparency and consistency in the issuance and periodical valuation of Security Receipts (SRs), he said.

It is also observed that a few entities find new ways of achieving their designs once a particular practice has been called out as a violation or deviation, he said. Swaminathan emphasised that setting the right tone from the top is crucial in fostering a culture of integrity and ethical conduct. Deputy Governor also said boards should accord due importance to assurance functions, namely, risk

management, compliance and internal audit. These functions play a critical role in identifying and mitigating risks, ensuring compliance with laws and regulations as well as safeguarding the organisation's reputation. Another area that is receiving closer scrutiny and attention of supervisors is the process followed for the disposal of assets. At times, the proposals are not even placed before the independent advisory committee, contrary to regulatory instructions, he said. Assets are sold to group entities without following the arms-length principle and without subjecting them to scrutiny under related party transactions, he said.

Another surprising behaviour is the 'Swiss challenge', which often goes unchallenged! This has become a routine affair giving rise to a suspicion that there may be some implicit understanding among the various participants, he said. It will not be out of place to mention that such happenings are necessitating the supervisors to lift the veil and examine the transactions more closely, he added.

# S&P upgrades India's rating outlook to positive on growth, improved Government spending

PTI ■ NEW DELHI

S&P Global Ratings on Wednesday upgraded India's sovereign rating outlook to positive from stable while retaining the rating at 'BBB-' on robust growth and improved quality of government expenditure. S&P said it could upgrade India's sovereign rating in the next 2 years if the country adopts a cautious fiscal and monetary policy that diminishes the government's elevated debt and interest

burden while bolstering economic resilience. "The positive outlook reflects our view that continued policy stability, deepening economic reforms, and high infrastructure investment will sustain long-term growth prospects," S&P said.

S&P revised outlook on India to positive from stable. At the same time, it affirmed BBB-long-term and 'A-3' short-term unsolicited foreign and local currency sovereign credit ratings, it said. BBB is the lowest investment

grade rating. The agency had last upgraded the rating outlook to stable from negative in 2010. The US-

based agency said it may raise the ratings if India's fiscal deficit narrows meaningfully such that the general government debt falls below 7 per cent of GDP on a structural basis.

"The protracted rise in public investment in infrastructure will lift economic growth dynamism that, combined with fiscal adjustments, could alleviate India's weak public finances. We may also raise the ratings if we observe a sustained and substantial improvement in

the central bank's monetary policy effectiveness and credibility, such that inflation is managed at a durably lower rate over time," S&P said.

All three major global rating agencies — S&P, Fitch and Moody's — have accorded the lowest investment grade rating to India. However, Fitch and Moody's still have stable outlook on their ratings. The ratings are looked at by investors as a barometer of the country's creditworthiness and has impact on borrowing costs.

# Design, analytics, programming top skills for entry level roles: LinkedIn

PTI ■ NEW DELHI

For fresh graduates looking to enter the job market, skills like design, analytics and programming can open up a wealth of career opportunities, according to the leading professional network LinkedIn.

Software Engineer, System Engineer and Programming Analyst are the top jobs for bachelor's degree holders, as per LinkedIn data. Utilities is the fastest-growing industry for young professionals with a bachelor's degree, as per LinkedIn's Career Starter 2024 report. Other top industries hiring fresh graduates include Oil, Gas and Mining, Real Estate, Equipment Rental Services, and Consumer Services.

Regardless of educational background, various job functions are experiencing rapid growth. Ample opportunities are available for bachelor's degree holders in fields like Community and Social Services, Legal, Marketing and Media and Communication, it said.

"Entering a tight job market can be tough, especially at the start of a career journey. Staying updated on industry trends and in-demand jobs, and exploring roles that might not seem obvious at first, can widen options," says Nirajita Banerjee, LinkedIn Career Expert

& India Senior Managing Editor. Moreover, many skills are transferable across industries, and the rise of AI is creating more tech-related roles across various fields, leading companies to seek professionals with diverse educational backgrounds, Banerjee added.

"To expand their horizons, job seekers must keep strengthening their skills and networking with professionals," Banerjee noted. According to LinkedIn, the trend towards more flexible working arrangements is growing significantly. Solely on-site roles are declining by 15 per cent and hybrid positions are surging by 52 per cent for entry-level roles year-over-year.

To compile this report, data scientists on LinkedIn's Economic Graph team analysed millions of member profiles and job postings.

# Power Mech Projects bags order worth ₹563 crore to construct nuclear power plant from BHEL

PTI ■ NEW DELHI

Power Mech Projects on Wednesday said it has bagged an order worth Rs 563 crore from state-owned BHEL to construct a nuclear power plant.

The Power Mech Projects Ltd (PMPL) has secured its first construction project in the critical nuclear power sector, the company said in a regulatory filing.

According to the filing, the company has been awarded a significant order valued at Rs 563.23 crore from BHEL-Power Sector Southern Region for Civil, Structural, and Architectural works of turbine island package of 2x700 MWe, PHWR (pressurized heavy-water reactor), Kaiga Atomic Power Project (units 5 and 6) in Uttar Karnataka district, Karnataka.

The scope of work includes a number of segments covering civil, electrical, and structural works, including TG (turbine generator) building, foundation for all equipment, chemical lab, storage tanks, peripheral drains, and sewage network. The duration of the contract is 32 months, plus 12 months of guarantee period. This order represents Power Mech's expansion of its existing industrial civil works capability into the nuclear power projects sector. "In securing this project, another door opens for PMPL to further its establishment in the nuclear power sector and contribute to the nation's growing sustainable energy needs," Sajja Kishore Babu, PMPL Chairman and

Managing Director, said in a statement. While nuclear power currently contributes a modest 3 per cent to the national grid, the government's bold vision is to triple the capacity to 22,480 MW by 2031, making it nearly 9 per cent of electricity generation by 2047, Babu noted. It would translate into a 10-fold increase in nuclear power's contribution, he added.

Power Mech Projects Ltd (PMPL) is among the leading companies in project & infrastructure-construction.

# Inox Wind Energy raises ₹900 crore through stake sale to trim debt

PTI ■ NEW DELHI

Inox Wind Energy has raised Rs 900 crore through equity share sale of Inox Wind Ltd, a subsidiary of the INOXGFL Group.

It is a significant step towards completely deleveraging external debt in Inox Wind Ltd, according to a regulatory filing.

Inox Wind is India's leading wind energy solutions provider, while Inox Wind Energy Ltd (IWEL) is one of the promoters of Inox Wind Ltd. The funds raised will be used to pare down debt of Inox Wind and augment the working capital needs of the company thereby, strengthening its balance sheet further.

"The transaction was executed via block deals on the stock exchanges and witnessed participation by several marquee institutional investors," IWEL said in the filing on Tuesday evening.

As of March 31, 2024, Inox Wind's net external interest debt stood at Rs 655 crore. On Tuesday, Inox Wind Energy divested a 4.6 per cent stake in its subsidiary company Inox Wind Ltd for Rs 904 crore through open market transactions. INOXGFL Group is operating across two key verticals -- chemicals and renewable energy. It has four listed entities namely Gujarat Fluorochemicals Ltd, Inox Wind Ltd, Inox Green Energy Services and Inox Wind Energy Ltd. Earlier in May, Inox Wind Ltd reported a consolidated profit of Rs 36.72 crore for the March quarter, mainly due to increased income. It had posted a net loss of Rs 119.04 crore in the January-March period of the preceding fiscal. During the fourth quarter of FY24, the company's total income surged to Rs 563.07 crore from Rs 193.83 crore a year ago.

## BUSINESS BRIEF

### PFC RECEIVES CSR CHAMPION AWARD

Gurugram: Power Finance Corporation Ltd (PFC) has been honoured with the prestigious CSR award in the NF (Non-Fossil Fuel) business category at the Outlook Planet Sustainability Summit & Awards 2024 held in Goa. Parminder Chopra, Chairman & Managing Director, PFC, received the Award from V Srinivas, secretary, DARPG, Government of India in presence of dignitaries from DPE, IIT Goa and Outlook.

### NMDC'S STEELY PERFORMANCE IN FY24

Hyderabad: India's largest iron ore mining company, NMDC declared its FY24 results on Monday. Delivering unprecedented volumes, the company produced 45.02 million tonnes and sold 44.48 million tonnes of iron ore in FY24. Realising a 10% growth in production and 16% growth in sales compared to FY23 volumes, NMDC is now the first mining company in India to cross the 45 Mnt milestone in iron ore production.

### REC WINS SUSTAINABILITY CHAMPION AWARD

Gurugram: REC Limited, a Maharatna CPSE under the Ministry of Power and a leading NBFC, has been honoured with the 'Sustainability Champion - Editor's Choice Award' at the Outlook Planet Sustainability Summit & Awards 2024. The Award ceremony was organised by Outlook Group, in collaboration with IIT Goa. Saraswathi, Senior General Manager, REC's Mumbai Office, received the award at an event held in Goa. This award recognises REC's commitment to sustainability initiatives and its efforts in driving progress towards a greener future.

# Rupee falls 21 paise to close at 83.39 against US dollar

PTI ■ MUMBAI

The rupee settled 21 paise lower at 83.39 (provisional) against the US dollar on Wednesday, tracking a negative trend in domestic equities and elevated crude oil prices. Forex traders said dollar demand from importers and oil marketing companies (OMCs) also weighed on the rupee.

However, foreign inflows in the bond markets ahead of inclusion on India's government bonds in global bond index cushioned the downside. At the interbank foreign exchange market, the local unit opened at 83.22 and finally settled for the day at 83.39 (provisional), down 21 paise from its previous close.

On Tuesday, the rupee pared initial gains to settle 5 paise lower at 83.18 against the US dollar.

"We expect the rupee to trade with a slight negative bias on month-end dollar demand from OMCs and importers to

meet their obligations. Risk aversion in global markets and a strong US dollar may further depress the rupee," said Anuj Choudhary, Research Analyst at Sharekhan by BNP Paribas. However, fresh foreign inflows in FPIs and bond markets may support the rupee at lower levels. Traders may take cues from Richmond manufacturing index and speeches from US Fed officials. Investors may remain cautious ahead of core PCE price index data later this week, Choudhary added.

# Brewers Association of India launched

PNS ■ NEW DELHI

India's largest beer-makers, United Breweries (a Heineken company), AB-InBev, and Carlsberg today jointly announced the launch of Brewers Association of India ("BAI"), a new industry body focused on growing the beer category in India, and drive innovation, moderation, and sustainability in the Indian beer market. BAI is being established in partnership with the World Brewing Alliance (WBA), the global industry body consisting of brewers and brewing trade associations from Australia, Canada, the UK, the USA, Europe, Japan, Korea, Latin America, Brazil, New Zealand, Nigeria and now India. The goal of WBA is to exchange knowledge and best practices among brewers and other stakeholders. It is the global, unified voice of the industry to various audiences and stakeholders.

# Cost of living does not influence salaries; Pune among safest cities for talent: KPMG survey

PTI ■ MUMBAI

Cost of living in a particular city does not influence the compensation packages for talent, a survey of recruitment leaders undertaken by a consultancy firm revealed. Around 95 per cent of human resources leaders and talent acquisition heads from 40 companies across 10 sectors said "cost-of-living differences across Indian cities do not affect compensation decisions", as per the survey by KPMG in February and March.

Earlier, there used to be a city compensatory allowance to compensate for a higher cost of living in metros or tier-I cities, but HR heads say very few employers are offering it now, it said, adding the compensation range is more or less the same for the same roles across the country. Employees consider residential rent, property indices, local purchasing

power, and overall cost of essentials like goods, utilities, and transportation when evaluating the cost of living, it said. The survey found Pune among the cities to be excelling on the safety aspect. "Chennai, Navi Mumbai and Pune excel in safety, attracting those seeking secure environments," the survey said.

Apart from safety, key factors which influence the quality of living include connectivity, commute time, healthcare, and air quality, the survey

said. Navi Mumbai, Hyderabad, and Chennai lead the cities with competitive commercial leasing prices, it said. The survey report also said that companies tapping into talent pool in satellite cities like Gurugram, Navi Mumbai and Noida are highly satisfied, and added that the attrition rates are low in such cities. It said tactical and transformational work takes place in tier-I and satellite cities, while the tier-II cities have to contend with transactional roles.

# Praggnanandhaa loses to World Champion Liren

PTI ■ STAVANGER (NORWAY)

Indian Grandmaster R Praggnanandhaa lost to World Champion Ding Liren in the Armageddon tie-breaker after the two played out a draw under normal time control in the second round of the Norway Chess tournament here. The second round of the prestigious event saw all three classical games ending up in a draw once again. Magnus Carlsen, Alireza Firouzja and Liren won with white in the subsequent Armageddon games to grab 1.5 points each. India's prodigy Praggnanandhaa, who went with a 2-0 head-to-head lead against Liren, played out his first classical draw in the main event. But the Chinese GM then emerged victorious in the Armageddon tie-breaker. In the highly anticipated pairing of the day, Carlsen and Hikaru Nakamura played out a closely contested classical game that ended in a draw. Carlsen, demonstrating his exceptional skill under pressure, managed to secure a crucial victory, adding to his impressive Armageddon record and taking the lead of 3 points in tournament standings. Meanwhile, Firouzja and Fabiano Caruana also drew their classical

game after a complex struggle. Firouzja's abilities in speed chess shone through in the Armageddon game as he bagged crucial 1.5 points. In the women's section R Vaishali defeated fellow Indian Koneru Humpy to register her first classical win in the tournament.

Despite Humpy's slight advantage in the opening, a critical blunder under time pressure allowed Vaishali to claim victory, and claimed her first ever win against India's number one female player. With the win, Vaishali became India's number two female player on the live

rating list. The other two classical matches between Lei Tingjie and Pia Cramling along with Ju Wenjun and Anna Muzychuk ended up in hard-fought draws. The Chinese duo of Wenjun and Tingjie emerged victorious in their respective Armageddon games.

## Vaishali beats Humpy to move into sole lead at Norway chess

PTI ■ STAVANGER (NORWAY)

India's R Vaishali came up with a stupendous effort to beat compatriot Koneru Humpy and jump into sole lead in the women's section of the Norway chess tournament here. With each victory under classical time control worth three points, Vaishali got an early advantage moving to four points after the second round and her first-round loss against Wenjun Ju of China under faster time control does not matter so much right now. India's third and latest Grandmaster among women, Vaishali with four points is at the helm followed by the Chinese duo of Tingjie Lei and Ju, Anna Muzychuk of Ukraine and Pia Cramling of Sweden share the fourth spot in the six-players double round robin event, while Humpy currently is languishing at the bottom on 1.5 points. In the men's section, World number one Magnus Carlsen emerged as the sole leader on another day that had only Armageddon to decide the winners. The Norway Chess features a distinctive format where drawn classical games lead to Armageddon tiebreakers to ensure a winner after every round. While 10 minutes are provided to white, black gets 7 minutes to determine the winner of the contest. Black pieces win if the game ends in a draw. Carlsen proved superior than Hikaru Nakamura of United States in the Armageddon. It is no secret anymore that the world's best player and five times world champion does not enjoy Classical chess as much as before. Carlsen drew in the Classical for the second day in the running and then romped home in the faster time control over Nakamura. The lone Indian aspirant Praggnanandhaa had a tough day in office as he lost to reigning World champion Ding Liren of China in the tiebreaker. After drawing the first game confidently, Pragg somehow could not resist the perseverance of Liren who was like a man on a mission.

Later this year, Ding Liren is set to play a match against D Gukesh of India for the world championship crown. Carlsen took his tally to three points in all and came across as the sole leader after the second round thanks to all results going his way. India's Praggnanandhaa lost to Liren in the faster game, which left him with 2.5 points out of the opening round. Having Carlsen in front on three points, Praggnanandhaa is close behind on 2.5 along side Firouzja Alireza of France, Nakamura, and Liren. Fabiano Caruana is currently at the bottom on two points. Firouzja and Caruana also drew their classical game after a complex struggle but the former's abilities in speed chess shone through in the Armageddon game as he bagged crucial 1.5 points. The highlight of the day was Vaishali's fine victory over Humpy in an actual game. Humpy is known to be the queen of Indian chess for over a decade now and she was also ranked number two in the women's candidate that finished recently. Playing the white side of an Italian opening, Vaishali did not get much with her first move advantage and cashed in when the strongest ever Indian woman player made an error to find her queen entrapped. Vaishali also became the first player to score a victory in either section. The other two classical matches between Lei Tingjie and Pia Cramling along with Ju Wenjun and Anna Muzychuk ended up in hard-fought draws. The Chinese duo of Wenjun and Tingjie emerged victorious in their respective Armageddon games. Results men: Magnus Carlsen (Nor, 3) beat Hikaru Nakamura (USA, 2.5) 1.5-1; Ding Liren (Chn, 2.5) beat R Praggnanandhaa (2) 1.5-1; Firouzja Alireza (Fra, 2.5) beat Fabiano Caruana (Usa, 2) 1.5-1. Women: R Vaishali (Ind, 4) beat K Humpy (Ind, 1.5); Tingjie Lei (Chn, 3) beat Pia Cramling (Swe, 2); Wenjun JU (Chn, 3) beat Anna Muzychuk (UKR, 2).

## Arundhati advances to pre quarters, Narender bows out of Olympic qualifiers

PTI ■ BANGKOK

Reigning national champion Arundhati Choudhary registered a convincing victory to move to the 66kg pre-quarterfinals while Asian Games bronze medalist Narender Berwal (+92kg) bowed out of the second Boxing World Olympic Qualifiers here on Wednesday. While Choudhary won by a 5-0 unanimous decision against Stephanie Pieniheiro of Puerto Rico, Berwal went down 2-3 to

Ecuador's Gerlon Gilmar Congo Chala. Choudhary began her campaign with a clinical round 1 against her opponent. She was slightly conservative in Round 2, consolidating her position before again dominating the next round to get a unanimous verdict in her favour. Later, Berwal put up a strong fight but it was not enough to advance to the next round. The 2022 Asian Games bronze winner started slow in round 1 and was then forced to catch

up. He did well to impress three of the five judges with his punches in the second and third round of the round of 32 bout. However, his efforts were not enough to overturn the overall deficit. In the evening session, Ankushita Boro, will face Rimma Volossenko of Kazakhstan in 60kg pre-quarters while Nishant Dev (71kg) will be up against Thailand's Peerapat Yeasungnoen to earn a spot in the quarterfinals.

## Olympic boxing medalists in Paris promised cash prizes by rogue governing body

AP ■ GENEVA

The boxing governing body declared rogue by the International Olympic Committee said Wednesday it will pay \$50,000 in prize money to each gold medalist at the Paris Games. The cash promise is doubly confrontational for the IOC, which has severed ties with the International Boxing Association and does not approve of governing bodies paying prize money to Olympic medalists. The IBA said it has a \$3.1 million prize money fund for each male and female boxer who reaches the quarterfinals in 13 total weight classes, plus their coaches and national teams. The coach and national team of each Olympic boxing champion will both get \$25,000, and the scale of payments goes down to \$10,000 in total for each quarterfinalist.

The source of the money is unclear but the IBA led by its Russian president Umar Kremlev has been supported by the country's state energy firm Gazprom. The IBA promised \$200,000 for gold medalists at its 2023 world championships and committed to future increases. "As IBA president, I will always fight for our athletes' well-being, and this step is consistent in terms of the existing commitments we have already taken," Kremlev said in a statement. The Olympic body did not support a pledge in April by World Athletics to pay \$50,000 prize money to each of the 48 gold medalists in track and field in Paris. It has promised also to pay silver and bronze medalists in 2028 at the Los Angeles Olympics. The IOC has de-recognized the IBA, which will not be involved in

organizing bouts in Paris for the second straight Summer Games. The IOC cited its concerns about the boxing body's governance, reliance on funding from Gazprom, and the integrity of judges and bouts at the 2016 Rio de Janeiro Olympics. Those games were organized when the boxing body was led by a longtime IOC member, C. K. Wu. Paris medalists are set to be rewarded at "a special awards ceremony," IBA said, after "successful passing of respective anti-doping procedures." The IOC was contacted for comment. Prize money to Olympic medalists has traditionally been paid by state governments and national teams though not directly from money sourced to the IOC, which prefers governing bodies invest in developing their sport below the elite level. World Athletics said its \$2.4

million prize fund for champions in Paris would come from its share of the IOC's revenues. Track's \$39.5 million payment for the Tokyo Olympics held in 2021 was the largest amount of a \$540 million fund allocated by the IOC. Boxing's share of Olympic revenues from Tokyo was due to be more than \$17 million but was held back by the IOC, which had to oversee running the qualifying and finals tournament bouts. The IBA also will not get money from the IOC's Paris revenues and a rival organization of national federations, called World Boxing, is being established to become the recognized governing body of Olympic boxing. "We are setting a clear example for many," the IBA's chief executive Chris Roberts said, "on how international federations should be treating their champions."

## Djokovic begins his bid for a 25th Grand Slam title with a first-round French Open win

AP ■ PARIS

Ignore the straight-set score: Novak Djokovic was not quite at his impervious best in the first round of the French Open, and his 6-4, 7-6 (3), 6-4 win over Pierre-Hugues Herbert was not enough to alter the defending champion's "low expectations" at this tournament. "I don't want to get too excited," Djokovic said. "I thought it was a good performance for me. Solid. Of course, I could have done better, I think, on return games, but also credit to him for serving very well, for changing things up." It's been a rougher-than-usual season so far for Djokovic, and while there were some signs of breaking out of his 2024 funk during the course of the contest at Court Philippe Chatrier, he still has room for improvement as he attempts to become the first player in tennis history to claim 25 Grand Slam singles trophies. There's no doubt he cares about such things. "Grand Slams are the ones that are basically getting me up from the bed every day. Knowing that I have to hit the practice courts, I always think about what I can do in Grand Slams," he said. "So here I am. Hopefully I can have another deep run." That's what Herbert expected to see. "I knew, from the beginning," Herbert said, "that I'm going to have in front of me the Novak of the Grand Slams. ... It's just the intensity of concentration." Djokovic is a three-time title winner at Roland Garros who needs to return to the final to retain his No. 1 ranking. But he arrived in Paris without having done that at any tournament this year. He is 0-3 in semifinals - including a loss last week at the lower-tier Geneva Open on red clay -

and this victory across 2 1/2 hours only served to make his overall record 15-6. So when he spoke at a news conference on Sunday, Djokovic described his mindset heading into the French Open this way: "Low expectations and high hopes." Then he pointed out, "Anything but a title, for me, is not satisfactory," which is understandable given his remarkable resume. "In the moments when it mattered, I think I delivered. Played a great tiebreak. Stayed focused," Djokovic said about Tuesday's performance. "I'm glad that I started the way I started, the way I felt on the court. Comparing to the previous weeks of tournaments I played, I felt good. Better. So I'm moving in a positive direction. Yeah, it's just the beginning." He seemed a bit edgy at moments against Herbert, a 33-year-old Frenchman who owns a career Grand Slam in doubles but never has been past the third round at any

major in singles and is currently ranked 142nd. The home crowd tried to push Herbert, repeatedly calling out his name, even imploring him in English at one point by chanting, "Let's go, Pierre-Hugues! Let's go!" They jeered Djokovic late in the third set when he went to the sideline to towel off after he slipped, stumbled and tumbled onto the clay chasing a ball. A day after sitting in the Chatrier stands to watch rival Rafael Nadal's first-round loss against Alexander Zverev, Djokovic was competing in the chill of a 60-degree evening (15 Celsius), and he did not always look happy. He rolled his head back after one miss while making four groundstroke mistakes to get broken early in the second set. He repeatedly gestured to ballkids to give him tennis balls so he could prepare to serve. Although Herbert's game did not demand a maximum expenditure of energy from

Djokovic, there certainly was enough to keep things interesting. And by the end, the winner totals were 37 for Herbert, 29 for Djokovic. There were some strokes of brilliance from Djokovic, to be sure, and he covered the court well when sprinting after the drop shots Herbert kept trying. The highlight for Djokovic was probably the closed-stance sliding backhand winner that earned him a match point - which was converted when Herbert double-faulted to end it. Still, the statistic that truly mattered was the one that shows Djokovic is now 69-0 in opening matches at Slam events since starting his career with a 3-2 mark in first-rounders. Djokovic's second-round opponent will be 63rd-ranked Roberto Carballés Baena of Spain. The first round closed on a day during which rain delayed play for several hours early in the day on all but the two principal courts, which are outfitted with retractable roofs. Other winners Tuesday included the man Djokovic beat in last year's French Open final, Casper Ruud, and past major champions Aryna Sabalenka and Elena Rybakina. Ruud, who also was the runner-up to Nadal in Paris in 2022 and leads the ATP with 36 wins in 2024, beat Felipe Meligeni Alves 6-3, 6-4, 6-3. Two-time Australian Open champion Aryna Sabalenka overpowered Erika Andreeva 6-1, 6-2, and 2022 Wimbledon winner Elena Rybakina beat Greet Minnen 6-2, 6-3. Sabalenka is trying to become the first woman since Serena Williams in 2015 to win the Australian Open and Roland Garros in the same season and get halfway to a calendar-year Grand Slam.

## India bids to host Gukesh-Liren World Chess Championship match

PTI ■ NEW DELHI

India has submitted its bid to host the much-anticipated World Chess Championship clash between teen sensation D Gukesh and defending champion Ding Liren of China in November-December this year. The 17-year-old Gukesh became the youngest ever challenger for the world title by winning the Candidates Tournament last month. He will face Liren between November 20 to December 15 in Chennai if the country gets the hosting rights. The bid has been submitted by the Tamil Nadu government. "We have received the bid from India," Chess' global governing body FIDE CEO Emil Sutovsky told PTI. As of now, FIDE hasn't received any other bids but the deadline to enter the race is May 31. It is learnt that Singapore is expected to compete with India but has not yet officially submitted the bid documents. "As of now no other country has bid for it but the deadline is till end of this week. Post that we will have a FIDE Council meeting next week. And after that due procedure will be followed and we will decide about the hosting rights," Sutovsky added. If AICF wins the bid, it will have to shell out close to Rs 71 crore. The basic criteria outlined by FIDE for a prospective bidder for the 2024 edition is a budget of Rs 8.5 million (Rs 71 crore approx) and a facilitation fee of USD 1.1 million (Rs 9 crore) for the global body. The duration of the tournament is 25 days and approval of regulations will be completed by July 1. The total prize money awarded by FIDE would be

around USD 2.5 million (Rs 20 crore plus) after the fund was increased from the USD two million (Rs 17 crore) in 2023. Gukesh's historic achievement at the Candidates has spurred a renewed wave of interest in chess. The Chennai-based teen, who has been mentored by five-time world champion Viswanathan Anand, bettered Russian legend Garry Kasparov's 40-year-old record to become the youngest Candidates champion. The Russian great was 20 when he qualified in 1984 to clash with compatriot Anatoly Karpov. India has hosted the prestigious showpiece in 2000 and 2013. In the 2000 edition, Viswanathan Anand claimed the first of his five world titles by winning the event played in a tournament format with 100 players. Anand defeated Alexei Shirov in the final. In 2013, Anand lost to Norwegian challenger Magnus Carlsen.

# FINAL CHANCE FOR KOHLI, ROHIT TO GIVE INDIA ICC TROPHY AFTER 13 YEARS

PTI ■ BENGALURU

It's tough to find two cricketers who are so different from each other yet so closely intertwined by the same thread of fate as Virat Kohli and Rohit Sharma. Rohit's initiation into top-flight cricket came at the idyllic Belfast in 2007 and Kohli's a year later at the more conventional Dambulla. Another intriguing chapter of this journey together will potentially come to an end next month in the stunning Caribbean Isles. The next T20 World Cup is in 2026, to be jointly hosted by India and Sri Lanka, but Rohit would be touching 40 then and Kohli would be 38. The 50-over version is a further one year away. It's hard to see them playing in any of those, considering the increasingly strike-rate oriented nature of the game. So, both Rohit and Kohli will want to leave the stage with the winner's medal around their neck next month. Should they achieve that, it would be their second each after the 2007 T20 World Cup (Rohit) and the 2011 50-over showpiece (Kohli). And it will be a perfect send off for two players who have had an immeasurable impact on India's white-ball fortunes in the last 17 years.

However, the Kohli-Rohit story is not one of bromance. It's based more on mutual respect and the awareness that they should not step into each other's space. Kohli has talked about the admiration he has had for Rohit since the very beginning of their careers. "I was filled with curiosity about a player. People kept on saying - 'This is one player who is rising rapidly'. I used to wonder that even though I am a young player, no one talks about me, then who is this player." "But when he (Rohit) stepped out to bat, I was all quiet. It was amazing to watch him play. In fact, I haven't seen a player time the ball better than him," Kohli had said in 'Breakfast With Champions'. Contrasting in nature, their batting has been high art for the masses to which they added a dash of modernity later. Of the two, Kohli is the more all-format batter, who has adapted more fluently with the changing face of the game. He has scored in every corner of the cricketing world in a show of consistency that was rarely witnessed after the halcyon days of Sachin Tendulkar. While Rohit built his own edifices in white-ball formats, the Mumbai-man remained a

reluctant visitor in Test cricket's elite corridors for the better part of his career. A move up to the opener's role helped Rohit unshackle himself a bit in Tests in the later part of his career. But for now, Kohli and Rohit will have to lean on their vast experience in T20 cricket to fuel India's run in the World Cup. Rohit will certainly open and if his approach in last year's World Cup and in the just-concluded IPL can be taken as a sign, the skipper will continue his selfless, aggressive approach. Herein, Rohit has an inherent advantage. His natural big-hitting abilities will help him pursue his batsmanship without many improvisations. That one-legged pull of his is a cosy meeting point between elegance and malevolence. But Kohli's game is slightly different. He can pull off those occasional big hits - a swat-flick six or a flat-bat smash over bowler's head. A quick rewind to his pick-up shot off Pakistan pacer Haris Rauf during the 2022 T20 World Cup will vouch for that. Still, there is a sore point. Kohli has often struggled to score off spin, especially against the left-arm variety. His career strike-rate against slow bowlers hovers around mid-120s in T20s.

Several times, it has impeded his progress in the middle innings but during this year's IPL, he seemed to have found a solution. He brought out the slog-sweep against spinners, and it had a healthy influence on his strike-rate as Kohli made 260 runs from 188 balls and struck 15 sixes against them. His strike-rate against spin touched 139, a marked improvement from his overall IPL strike-rate of 124. "It was me mentally putting myself in that situation. I did not practice that at all," he explained. "I know I can hit it because I have played that shot a lot in the past. So, I just felt like I needed to take a bit more risk," Kohli said of his new approach against spin. This might come in handy for him in the T20 World Cup where the pitches are expected to become progressively slow, increasingly bringing spinners into the game. Beyond the realm of cricket, the two veterans' final charge at an ICC trophy - personally and for the team - would be a captivating sight. For the fans, this World Cup would be about drinking it in as much as they can because once this duo leaves the stage, there will be an immense emptiness.

## Only Bumrah is executing yorkers consistently: Lee

PTI ■ NEW DELHI

Legendary Australia speedster Brett Lee feels Lapart from Jasprit Bumrah, pacers are failing to nail yorkers effectively in the death overs and he wants them to master the pivotal delivery. Bumrah is one of the most complete bowlers in world cricket at the moment. He can bowl wicket-taking deliveries without leaking runs but the most lethal weapon in his armoury is his toe-crushing yorker, which he, more often than not, executes perfectly in the death overs. "On a general rule, other than Bumrah, we haven't seen enough fast bowlers nailing their yorkers recently. "I want to see fast bowlers bowl more yorkers. I still don't reckon they execute enough yorkers at the death," Lee said at the launch of the Legends Intercontinental T20 league recently. With the recently concluded IPL featuring scores in excess of 200 regularly, Lee believes the fast bowlers would be more economical had they nailed yorkers. "If you look back at 17 years of Indian Premier League, on average a yorker goes for a strike rate of less than 100. Which tells me that one run or less per bowler that's executed. "Now, when you bowl a yorker and you've got guys who can go down and scoop you over the head, well that puts pressure on you as a bowler. "You've got to set in the right field and put two men back, third man fine and back and then bowl," Lee added. As T20 cricket progresses, the game is tilting more and more towards the batters. With the 'Impact Player Rule' and flat decks, bowlers struggled in the IPL. Lee, like several other former players, called for a balance between bat and ball. "I'm all for batters smacking the ball all over, but there has got to be something for the bowlers too. I'm not asking for a green top, where teams bowled out for 110, because that's not good for cricket either. "You want a good total, I think. Anywhere around that 185 mark to 230 is a good score. We've seen scores now of 265, 270, 277. "It's really hard because most bowlers now are going for 45 to 50 off their four overs," he said. **WARNER HAS EARNED THE RIGHT TO GO ON HIS OWN TERMS:** Australia's charismatic young batter Jake Fraser-McGurk set the stage ablaze in his debut IPL season with many calling for his inclusion in Australia's T20 World Cup squad.

However, the selectors decided to go with veteran opener David Warner, who is set to retire after the tournament, Travis Head and Mitchell Marsh in the top-order. McGurk, who is a top order batter and Warner's Delhi Capitals teammate, though has been named as a travelling reserve. "David Warner has earned that right to go out on his own terms. And if things don't happen for whatever reason, then he's (McGurk) definitely there to take part," Lee said. Although Warner did not have a particularly great IPL as he missed several matches due to an injury, the Southpaw has scored 834 runs in T20 cricket since 2021 at a strike rate of around 150. He was woefully out of form ahead of the 2021 T20 World Cup but ended up being the player of the tournament, playing a vital role in Australia's maiden World Cup win in the shortest format. On the other hand, 22-year-old McGurk, who was called in as a replacement for Lungi Ngidi at Delhi Capitals, gave an excellent display of explosive batsmanship, smashing four half-centuries in nine games at an astronomical strike rate exceeding 234. "I think if you go over there as a reserve batsman, you definitely have a chance to get an opportunity. "That happened this year with the Delhi Capitals, he wasn't even picked in the squad. "Ricky Ponting rang him up late night and said come in and had a few injuries. So right time, right place. "But the advice to him, and he articulated it beautifully to say that he's only 22 years of age (araam se aaram se). He's got time. There's no point rushing it," Lee said.

## ABD laments racial quota chatter around SA T20 World Cup squad

PTI ■ NEW DELHI

As de Villiers is not surprised that just days before South Africa renews its quest for an elusive World Cup, the talk back home is all about racial quota in the team. It's a rinse-and-repeat sort of situation and de Villiers, who retired in 2018, is glad that he is a mere spectator to the situation now. "...It's a shame going into a tournament to have the focus on that. I mean it's nothing new, it's just a shame," lamented one of the greats of South African cricket. "Luckily this time around, I've had nothing to do with anything over there. I'm just a spectator," the 40-year-old said in an interaction with PTI facilitated by 'Jio Cinema'. The cause of outrage is the presence of just one black player in the squad for the T20 showpiece that will take place

in the Americas from June 1. Considered the perennial bridesmaids, who tend to choke in crunch situations, South Africa somehow are always in the pre-tournament favourites bracket without actually living up to the tag. And having a deeply divisive topic take centre-stage just days before they begin their campaign is a far-from-ideal build-up for a country that has a troubled past when it comes to race relations. The Proteas will start off against the Netherlands in New York on June 8. Over the course of a season, six players of colour are required to be in the South African playing eleven including two from the black African community as per the policy introduced in 2016. With Kagiso Rabada being the only black African in the T20 World Cup squad, the national team is set to miss its target.

Another black-African, Lungi Ngidi, is part of the travelling reserves. The other players of colour include Reeza Hendricks, Bjorn Fortuin, Keshav Maharaj, Tabraiz Shamsi and Ottiel Baartman. "There are controversial moments back home as per usual with the South African squad just before a World Cup," de Villiers said. "I think it's a good team. It's a shame about Lungi... (he) lost a

bit of pressure as a selection panel and as a coach and a captain," de Villiers said. "From what I remember is with the quota system, it's an average team, an average number over the season and they don't really look at every series, but as journalists sometimes enjoy steaming up things a bit," he tried to put things in context. Following the selection of the squad earlier this month, former Sports Minister Fikile Mbalula and former CSA and ICC president Ray Mali questioned the composition of the side. "Only one African player selected in the Proteas Team for the upcoming T20 World Cup 2024 Team. Definitely a reserval (reversal) of the gains of transformation and doesn't reflect fair representation of all South Africans in the national cricket tea," Mbalula wrote on X.

PTI ■ PORT OF SPAIN

Short of players, a nine-man Australia needed as many as four support staff members on the field, including chief selector and head coach, in their T20 World Cup warm-up against Namibia but that did not change the expected outcome of the game. Australia won the game by seven wickets with impressive performances from David Warner (54 not out off 21 balls), fit again Josh Hazlewood (2/5) and leg-spinner Adam Zampa (3/25). They chased down Namibia's 119 with 10 overs to spare. With the likes of Pat Cummins, Travis Head, Mitchell Starc, Cameron Green, Marcus Stoinis and Glenn Maxwell given extra time at home following the two-month long IPL, chief selector and former captain George Bailey and head coach Andrew McDonald were among

## Selector, head coach take field for nine men Australia in T20 World Cup warm up

the support staff who were forced to take the field. 46-year-old fielding coach Andre Borovec also took the field alongside Bailey when skipper Mitchell Marsh opted to bowl against Namibia. When Marsh and Hazlewood went back to the dressing room, McDonald and 49-year-old batting coach Brad Hodge had to step on the field. Hazlewood, playing his first game in three months, looked in good rhythm. "Obviously, we didn't have a full quota of players but the guys who played, probably a few of us needed to coming off a big layoff," Hazlewood told

cricket.Com.Au after the game on Tuesday. "I know a number of the bowlers were coming off a long break which is pretty unusual in our system, but it's good to get out there, playing is always different to training. "The wicket looked a little bit tough early, a little bit slow, which is probably what we're going to encounter here in the West Indies. "So a nice hit out, got the result and we move onto the West Indies in a few days." Australia Test and ODI skipper Cummins, Head and Starc were part of the IPL final played in Chennai on Sunday.

## India getting used to cooler temperatures, playing white ball games in morning

PTI ■ NEW YORK

After two months of intense competitive cricket under night lights, the Indian cricket team, sans Virat Kohli, began its preparations for the T20 World Cup with a morning training session here, keeping in mind the 10.30am starts for all its preliminary games. Kohli took a break for personal work after RCB's IPL ouster and in all likelihood, he will join the squad by Friday. But it is not clear if he would be able to take part in the only warm-up game against Bangladesh on Saturday after a long flight. Having played 90 per cent of the matches under lights in the scorching Indian summer, the idea would be to adjust to

pleasant mornings where temperatures will hover between 25 to 27 degree celsius with very less humidity. A white kookaburra in slightly windy mornings could be a challenge and to be prepared for that, the severely jet-lagged bodies need to get used to morning conditions. And this is why the support staff, before initiating the skills training (net sessions) on the practice pitches at a ground on the outskirts of the city, have decided to help the players acclimatise with the conditions. With 14 players checking in, there was light jogging, routine shuttle runs, and a bit of foot volley to get into the groove. "They have been away two and half months from us and

getting to know where they stand and what needs to be done before the World Cup is the goal. The (first) goal is to spend 45 minutes in the heat to get going," Strength and Conditioning coach Soham Desai told bcci.tv. "We came in the day before yesterday and we just eased into our routines here, the players are just getting used to the time zone. Today we are having our first ground session," he added. As far as the players are concerned, there is an element of curiosity about playing cricket in New York. The Indian teams, over the years, have played primarily in Florida at the Fort Lauderdale ground during their tours of the West Indies.

"First time we are going to play cricket in New York, it's going to be fun," all-rounder Ravindra Jadeja said. "We have not yet played cricket, came here for a team activity today. Hopefully, it will be good. The weather is really good, so we are looking forward to it." Skipper Rohit Sharma's deputy Hardik Pandya seemed excited with the "bright sunshine" and "good vibes" while Suryakumar Yadav wanted to know more about the diaspora's cricket interests. "I heard cricket is growing here in the US. So we are really excited and the first day here was amazing, so very excited for the few days coming up," Surya stated. India, the 2007 T20 World Cup

champions, will start their campaign here on June 5 against Ireland, followed by the big game against arch-rivals Pakistan on June 9. They take on hosts USA on June 12 before the cricket caravan moves to familiar Lauderdale in Florida for the game against Canada on June 15. India are supposed to be clubbed A1 irrespective of where they finish in the group and will then proceed to the Caribbean islands for the Super 8 phase of the tournament where they would meet Australia, New Zealand and Sri Lanka. None of the Indian main squad players featured in the IPL finals held on May 26 in Chennai.
