SHAMI'S ABSENCE BIG LOSS FOR INDIA, BUT WON'T UNDERESTIMATE RESERVE PACERS: MCDONALD

Yamuna froths, Delhi's taps run dry

RAJESH KUMAR ■ NEW DELHI

More than half of the population in Delhi is currently facing disruption in the drinking water supply by the Delhi Jal Board (DJB) and New Delhi Municipal Council (NDMC) due to presence of high level of ammonia and froth in Yamuna and curtailing of raw water supply from the upper Ganga canal. This disruption of water supply will continue till November 1. It is estimated that there has been a reduction of 200-225 Million Gallon per Day (MGD) due to

ammonia levels at the Chandrawal, Sonia Vihar and Bhagirathi Water Treatment Plants. While officially, only Sonia Vihar WTP is working at 15 percent below its daily capacity of 140 MGD. DJB's overall average water production capacity is 990-1,000 million gallons per day (MGD), including from tubewells. Toxic foam accumulation in the Yamuna has forced the shutdown of the Sonia Vihar Water Treatment Plant, impacting potable water availability in south, north and east Delhi and New Delhi's Lutyens areas

including Jor Bagh, Lodhi Colony, Golf Links, Pandara Road, the High Court vicinity, East and West Kidwai Nagar, Tughlaq Crescent, Ravinder Nagar, Khan Market, Lodhi Estate, Akbar Road, Amrita Shergill Marg, Dr. APJ Abdul Kalam Road, Prithvi Raj Road, and Tees January Road, among others. The high ammonia levels, exceeding 1.5 ppm (parts per million), present a substantial treatment challenge, leading to a reduction in operational capacity by up to 30 per cent. The increasing ammonia level in the Yamuna has been a persistent

problem for Delhiites. Every winter season, people in Delhi have to endure scarcity of drinking water due to the elevated level of ammonia in the Yamuna. Normally, the Bhagirathi and Sonia Vihar water treatment plants, which have a combined capacity of 250 million gallons per day (MGD) - 140 MGD from Sonia Vihar and 110 MGD from Bhagirathi - get their water from the Ganga. However, due to the annual maintenance and repair works being carried out by the UP Irrigation Department and UP Jal Nigam,

the Ganga water supply has been halted from October 21 onwards. Subsequently, Ganga water supply to these WTPs has been stopped. Due to high ammonia content i.e. above 1.5 ppm in raw water at River Yamuna, it is difficult to treat the Yamuna raw water. Hence, the production at Bhagirathi and Sonia Vihar has been curtailed up to 30 percent of the capacity. Further, the production would depend entirely upon the quality of Raw water at River Yamuna and production from these plants shall vary accordingly.

There is no such thing as 'digital arrests': PM

PIONEER NEWS SERVICE ■ NEW DELHI

Prime Minister Narendra Modi on Sunday cautioned citizens about fraudsters indulging in the cyber crime of so-called 'digital arrests'. He urged people to adopt the mantra of 'stop, think and take action' when faced with such a scam, asserting that these steps will provide digital security to them. In his monthly 'Mann ki Baat' broadcast, he said probe agencies are working with states to deal with the issue but added that awareness is essential in protecting oneself from this crime. During his broadcast, he also shared a conversation between a victim and a fraudster to highlight the cyber crime. "The fraudsters of digital arrest phone calls, at times, impersonate police, CBI, Narcotics; at times RBI... Using such various labels, they converse as fake officers with a lot of confidence. Many

listeners of 'Mann Ki Baat' have wished that we must discuss that," the PM said. "Let me tell you how these fraud gangs work. What is this dangerous game? It is very important for you to understand this," he said. Explaining the modus operandi of such fraudsters, he said they collect personal information as their first

move and then in their second move create an atmosphere of fear. "You went to Goa last month, didn't you? Your daughter studies in Delhi, right? They collect so much information about you that you will be surprised. The second move - create an atmosphere of fear... Uniform, Government office set-up, legal sections. They will scare you so much on the phone. In the midst of the conversation you will not be able to even think," the PM said. He added that the third move of such fraudsters is the pressure of time. "You have to decide now or else you will be arrested... These people create so much psychological pressure on the victim that one gets scared. People from every class and age group fall victim to digital arrest," he said, adding that people have lost lakhs of rupees earned through their hard work, out of sheer fear.

Bandra Terminus stampede leaves 10 injured

T N RAGHUNATHA ■ MUMBAI

At least 10 passengers were injured, two of whom severely, in a stampede that took place when scores of passengers rushed to board an unreserved compartment of the Gorakhpur-bound Antyodaya Express platform number-one of Bandra Terminus (BDTS) Railway Station in the small hours of Sunday. The incident took place at around 2.45 am, when the 22921 Antyodaya Express was slowly moving onto platform no 1 from the yard to head to Gorakhpur. A large number of passengers made headway into one of the unreserved compartments, leading to utter chaos and consequent stampede. "On 27.10.2024 at about 02.45 hrs, passenger train number 22921 Antyodaya Express was slowly being placed on platform number 01 from the BDTS yard, when some passengers present on the platform tried to board the moving train and 02 passengers fell and got injured," the Western Railway said in a statement issued here.

Police personnel, passengers and others at Bandra railway station after a stampede, in Mumbai, Sunday

Of the ten injured passengers, two severely passengers - identified as Noor Shaikh Mohammed (18) and Indrajit Sahani (19), who were initially rushed to the nearby Bhabha Hospital, have been shifted to the Brihanmumbai Municipal Corporation (BMC)-run KEM Hospital. "Both of them have suffered multiple injuries. Noor Mohammed is on Oxygen support. His condition is critical,"

an official from the BMC's disaster control room said. The authorities identified the remaining eight injured passengers as Shabir Abdul Rehman (40), Parmeshwar Sukhdar Gupta (28), Ravindra Harihar Chuma (30), Ramevak Ravindra Prasad Prajapati (29), Sanjay Tilakram Kangay (27), Divyanshu Yogendra Yadav (18), Mohammad Shareef Shaikh (25)

and Sameer Shaikh (22) Of them, five are undergoing treatment at the Bhabha Hospital, while three have been discharged from the hospital after treatment. A 51-second video clip shot minutes before the stampede showed a huge crowd of passengers waiting platform number one to board the train at the Bandra railway platform. As the train was moving onto the platform passengers surged and jostled with one another to board an unreserved compartment. What followed was a stampede. Some videos circulating on social media showed people running helter skelter and shouting. One of the videos showed a man with blood oozing out of his wounds, while another injured passenger lay next to him. One video showed a Railway Protection Force (RPF) constable carrying an injured passenger on his shoulder, while another personnel was seen taking a passenger to the hospital in a make-shift cloth stretcher.

Over 350 hoax bomb threat calls, only two arrests? Begging for a smartphone? Professionals are at it already!

PIONEER NEWS SERVICE ■ NEW DELHI

Hoax bomb callers have continued to target commercial flights and premium hotels across the country, causing significant financial losses and delays. At least 50 flights belonging to Akasa Air, IndiGo, and Vistara received bomb threats on Sunday. So far, more than 350 flights have received hoax bomb threats in the last 14 days.

In some cases, the threats were issued to flights that had already been operated for the day or were not scheduled to operate. Besides, dozens of premium hotels in four states- West Bengal, Uttar Pradesh, Gujarat, and Andhra Pradesh have also received threat messages in the past three days, prompting the security agencies to launch search operations. Most of the threats were issued through social media.

In the backdrop of worrying trends of hoax threat messages to airlines, the government is taking support from international agencies, law enforcement wings and the Intelligence

FILE PHOTO/PTI

Bureau to prevent these fake threats. Intelligence sources said there is an attempt to hit the economy via the aviation sector and the hospitality sector during the festive season. Meanwhile, airlines and passengers remain in a state of uncertainty due to these hoax call messages. According to sources, IndiGo received threats for 18 flights and Vistara for 17 flights. Akasa Air received threats for 15 flights. At least two IndiGo flights were diverted

following threats. Its flight 6E 133 (Pune to Jodhpur) was diverted to Ahmedabad and 6E 87 (Kozhikode to Dammam) was diverted to Mumbai. According to an IndiGo statement, the flights that received security-related alerts include 6E 11 (Delhi-Istanbul), 6E 92 (Jeddah-Mumbai), 6E 112 (Goa-Ahmedabad), 6E 125 (Bengaluru-Jharsuguda), 6E 127 (Amritsar-Ahmedabad) and 6E 135 (Kolkata-Pune). Among others flights targeted were 6E 149 (Hyderabad to

Bagdogra), 6E 173 (Delhi to Bengaluru), 6E 175 (Bengaluru to Delhi), 6E 197 (Raipur to Hyderabad), 6E 248 (Mumbai to Kolkata), 6E 277 (Ahmedabad-Lucknow), 6E 312 (Bengaluru to Kolkata), 6E 235 (Kolkata-Bengaluru) and 6E 74 (Riyadh-Mumbai). Akasa Air issued a statement, confirming in a brief that its Emergency Response Team is actively monitoring the situation and is in contact with security and regulatory authorities. "We are following all safety and security

procedures in coordination with local authorities, and the Akasa Air teams on ground are prepared to assist passengers to ensure their safety and comfort," read Akasa Air's statement posted on X. This has created a panic among air passengers amid the ongoing festive season.

According to Akasa Air, on Sunday, a bomb threat was reported on a flight enroute from Bengaluru to Delhi via Gorakhpur, which was found to be a hoax after inspection. During a thorough inspection at the Gorakhpur airport, no suspicious item was found, Gorakhpur Airport director RK Parasher said. The flight landed in Gorakhpur at 1.33 pm and the door opened at 1.50 pm. The aircraft was carrying 174 passengers and three infants. The inspection of the aircraft and the passengers continued till 2.42 pm and the flight took off at 3.43 pm for Delhi, Parasher said. Ahead of the plane's arrival, the airport saw a high-security response, with police, Indian Air Force, Bomb Detection and Disposal Squad, fire brigade, and medical teams arriving on the site.

BISWAJEET BANERJEE ■ LUCKNOW

In a surprising discovery, a recent survey by the District Urban Development Authority (DUDA), the Municipal Corporation, and the Social Welfare Department has revealed that many beggars in Lucknow are financially better off than several professionals. Some even possess smartphones and PAN cards, challenging common perceptions about the economic conditions of the city's beggars. The survey found a total of 5,312 beggars in the city, including individuals whose monthly earnings can reach up to ₹80,000-90,000 - especially pregnant women. The survey is part of a broader campaign to identify beggars and connect them with government welfare schemes. Authorities are documenting their details and registering them for Aadhaar cards to help integrate them into mainstream society. The data collected has brought several startling facts to light.

Initiated under the direction of Divisional Commissioner Roshan Jacob, the survey aims to understand the backgrounds and living conditions of beggars with a focus on rehabilitation. Findings reveal that many of these individuals originate from nearby districts such as Barabanki, Sitapur, Hardoi, Rae Bareilly, Unnao, and Bahraich. Despite owning homes in their villages, many choose to live on the streets of Lucknow, adopting begging as a way of life. Women earn more from begging The survey found that women, particularly those who are pregnant or accompanied by young children, tend to earn the most from begging. Their

daily income can reach up to ₹3,000, while elderly people and children typically earn between ₹900 to ₹2,000 daily. Besides cash, these individuals often receive food, clothes, and other essentials from well-wishers. Reports suggest that certain groups encourage women to have multiple children, believing that pregnancy attracts more donations from the public. As a result, many female beggars have as many as eight or nine children. Based on these findings, officials estimate that with an average daily earning of ₹1,200 per beggar, residents of Lucknow collectively distribute over ₹63 lakh in alms each day.

Fumes, crowds, blaring horns, Diwali shopping is now a challenge

Lajpat Nagar and Sarojini Nagar get a footfall of thousands each day during the festive season

BY SAUMYA SHUKLA

Shoppers splurging on clothes, gifts and other items ahead of Diwali, have been making a beeline to markets across the National Capital, the most popular ones include Lajpat Nagar and Sarojini Nagar in south Delhi. Lakhs arrive here as soon as the market opens around 11 am, and the footfalls continue till the closing time of 9 pm. Their cars, motorcycles, auto rickshaws, and taxis add a heavy load on the already busy roads leading to massive jams at all hours. There is also a possible threat to life in case a stampede like situation arises. The markets of Sarojini Nagar and Lajpat Nagar are bustling with shoppers coming to buy for the festivities ahead. However, with vehicles including cars, motorcycles and autos the spaces become cramped leaving restricted movement. It also leads to a potential threat to

lives with stampede-like situations arising. Meanwhile, the Delhi Police has amped up their security for the festivities and also in light of a blast near a Central Reserves Police Forces (CRPF) public school in Rohini Sector 14. In Lajpat Nagar, one can see that there is no free flow of traffic as vehicles are parked on both sides of the road creating massive inconvenience to the public, despite a Delhi police booth right outside the market and heightened police patrolling. People also fear that in a case of emergency, ambulances wouldn't be available on time due to the jams and very limited space for the movement of vehicles. A frustrated shopper said, "Whole Lajpat Nagar is facing huge traffic. People have parked their cars and vehicles here and there on the roads which are completely filled leaving little space for any movement. Why is

Ranjan Dimri/Pioneer

the Delhi Police not taking any action? What if there is any emergency, how can even an ambulance reach?" Another resident of the area claimed that selective restriction won't work in the area while she blamed the mismanagement of traffic as a reason for such congestion near the market area. "Restriction on all sorts of vehicular movements shall be a solution, not selective ones. As a person who has lived in Lajpat Nagar, I can vouch for the fact that this situation stems from unscientific parking and poor traffic management," she stated. Similar situations also exist in Sarojini Nagar even as several auto-rickshaws create a menace on the road. "There is a traffic jam created by autos at Sarojini Nagar market entry opposite to the post office in Vinay nagar. Delhi Police, please send some traffic personnel who can manage the situation. If such a situation persists at

the peak season, it can inevitably result in a scenario where people find it hard to move out despite an emergency," a commuter said. However, the Delhi Police told The Pioneer that the police have heightened its security and encroachments are also removed to make more space for the free flow of traffic as well as the shoppers to avoid any stampede like situation in the market. In Sarojini Nagar, a police officer said there 30 local police personnel, 24 paramilitary officers and five machans in light of the security situation ahead of festivities. "We have carried out anti-encroachment drives as well to provide more spaces on the road and police officers are stationed on all the five entry and exit points in the market. In case of a medical emergency, there is a fire tender and ambulance stationed as well," he added.

From spouses to candidates: 'Political Wives' take centrestage in elections

PNS : JAMSHEDPUR

The assembly elections 2024 have highlighted a significant issue: family connections and political favoritism, with several major parties nominating candidates tied by blood or marriage to established leaders. As multiple parties prioritize family legacies over long-standing party loyalty, questions are being raised about fairness, party morale, and the integrity of democratic values.

Political insiders and the public alike have noted that numerous new candidates owe their nominations more to familial influence than to their individual contributions. In a striking trend, candidates with close ties to senior leaders now find themselves vying for assembly seats, sparking concerns over the sidelining of dedicated party workers

who have labored in the field for years.

Among these candidates, the Jharkhand Mukti Morcha (JMM) has fielded Kalpana Soren from Gandey, a candidate with by-election success already in her favor. Meanwhile, the Bharatiya Janata Party (BJP) nominated Meera Munda, wife of former Chief Minister Arjun Munda, for Potka, and Geeta Koda, wife of ex-Chief Minister Madhu Koda, for Singhbhum. Observers suggest that these nominations may capitalize on name recognition and family reputation rather than merit or experience.

A notable phenomenon in these elections is the rise of "political wives" — spouses of prominent leaders who are making their entry into politics largely due to family connections. This includes JMM's Sabita Mahto, widow of former Deputy Chief Minister

Sudhir Mahto, who is contesting from Ichagarh; Baby Devi, widow of the late Education Minister Jagarnath Mahto, contesting from Dumri. BJP has nominated Seeta Soren, wife of Hemant Soren's elder brother Durga Soren, from Jamtara. For many longtime party workers, these choices

underscore a feeling of being sidelined in favor of family dynasties, a sentiment echoed across the state.

"The influence of family favoritism, especially in favor of candidates new to the political arena, may come at a cost. Political observers warn that relying on familial recog-

nition could risk the credibility of the parties in the long run, while veteran party workers feel their loyalty is being undercut.

This election season may

well be remembered as one that places legacy over dedication, as parties grapple

with balancing political clout with democratic ideals. For voters, the 2024 Assembly Elections are a litmus test of whether merit, commitment, and the voice of loyal party workers can still play a decisive role amid rising family influence. As the election progresses, all eyes are on whether these choices will meet the public's call for a merit-based selection of candidates or continue a trend of family-driven politics.

"As the election season continues, the public is left to wonder whether merit, experience, and dedication will ever take precedence over lineage and status. Jharkhand's voters and party workers alike are watching closely, hoping for an electoral process that reflects the principles of democracy rather than the sway of family legacies," said a young voter.

Man held for raping minor girl in Garhwa

NITYANAND DUBEY : GARHWA

An youth from Aurangabad, Bihar has raped a minor girl in a scorio jeep near Gulriya Dorha forest under Ranka police station area on Saturday.

The minor is also said to be from Bihar, who studies in Ranka. The accused was caught red-handed by his relatives while raping the minor and handed over to the police. After this, the Ranka police lodged an FIR against the accused and his driver under the POCSO Act and sent them to judicial custody. The accused is Mo Shahrulk Ansari, son of Kalamuddin Ansari, resident of village Kutumba of Aurangabad district, Bihar and his driver is Tauqeer Ansari alias Farhan, son of Reyasat Ansari, resident of Hariharganj of Palamu district.

The police have recovered the Scorio vehicle (JH01-FG 5004) used in the incident.

Police station in-charge Praveen Kumar said that the minor studies while living at her maternal grandfather's house. She was already in contact with the youths living in Kutumba. On Saturday

morning at around six o'clock, both the youths reached Ranka in a black Scorio and called the minor girl on the main road. After the minor reached there, they took her to Gulriya Dhonda forest on National Highway-343. They parked the Scorio on the roadside and raped the minor girl.

The maternal grandfather and maternal uncle searched for her and then they found out. When the minor girl was not found at home, her maternal grandfather and maternal uncle started searching for her. When they could not find her, both of them started going towards Garhwa on a bike. On reaching Gulriya Dhonda, they got suspicious after seeing a Scorio parked

Youth held with country made pistols

Garhwa Police have arrested one youth from Achala Navadih village of Garhwa police station area and recovered two country-made pistols and two live cartridges. ASP Campaign Rahul Dev Baraik gave this information at Garhwa police station.

Arrested youth has identified as Rahul Kumar Dhar Dubey, son of late Kamlesh Dhar Dubey, resident of Achala Navadih under Garhwa Police Station area.

ASP told that on Friday, Superintendent of Police Deepak Kumar Pandey had received information that an youth in Achala Navadih village was roaming around with illegal weapons. Later SP formed a police team led by SDPO Neeraj Kumar. When police team reached near Rahul's house on saw that he was roaming around the house. After this, the police ran and caught Rahul while he was running. He told that he has thrown the weapon in the paddy field.

On his indication, two 8 mm country-made pistols and two live bullets were recovered from the paddy field. Woman, lover jumps into

well

An incident happened in Khardiha village of Ranka police station of Garhwa district which is being discussed in the whole area. According to the information, Anil Yadav of the village used to work outside and returned to the village a few days ago after earning money. On coming to the village, the neighbors told that his wife Lalita Devi is having an affair with his younger brother Sunil Yadav. Both of them love each other. The neighbors also taunted Lalita for this. Anil Yadav questioned his wife about this and the dispute between the husband and wife increased on this matter. Lalita Devi jumped into a nearby well in anger. When brother-in-law and lover Sunil Yadav got the information about Bhabhi jumping into the well, he also jumped into the well. By the time the villagers took both of them out of the well, both had died.

This incident has spread mourning in the village. Lalita Devi's three small children also became helpless.

Ranka police is investigating the matter. Police also says that the matter seems to be related to a love affair.

Dr. Ajoy questions capabilities of Purnima Das

PNS : JAMSHEDPUR

Congress candidate Dr. Ajoy Kumar and Congress Party District President Anand Bihari Dubey, along with senior leader Ramashray Prasad, addressed the media to discuss concerns about the conduct of BJP candidate Purnima Das's family and its potential impact on public safety.

In a press conference held in Sidhgora on Sunday, Dr. Ajoy Kumar raised doubts over Purnima Das's ability to ensure security for Jamshepur East residents, given the alleged misdeeds of her husband Lalit Das, son of former Chief Minister Raghubar Das and current Odisha Governor. Dr. Kumar highlighted an incident from July 7, in which Lalit Das allegedly assaulted a Raj Bhavan official, Baikunth Pradhan, for not sending a luxury vehicle to pick him up from Puri railway station. Pradhan, an Air Force veteran, was reportedly assaulted within the Raj Bhavan premises in Puri, sparking backlash from the Congress, who called for action against Lalit

Das. "The issue isn't just about one incident," Dr. Ajoy remarked. "When Raghubar Das's family members are involved in such controversies, how can the public be assured of their commitment to safety?" He added that the Odisha Congress has appealed to the Human Rights Commission for a swift investigation.

Dr. Kumar further alleged that other family members of Raghubar Das have been involved in similar incidents. He cited a case from 2023 involving BJP leader Kamlesh Sahu, Raghubar Das's nephew, accused of forcibly

entering a home to seize documents. In another incident, Raghubar's brother Moolchand Sahu was implicated in a 2017 assault of a Sikh boy at a police station. "There's a clear pattern here, and it's for the people of Jamshepur to decide if they want leaders linked to such conduct," Dr. Ajoy stated. In response, Congress President Anand Bihari Dubey emphasized that Dr. Ajoy Kumar's victory would be a win for the Congress party's values and Jamshepur East's commitment to integrity, transparency, and public safety.

FREE HIP AND KNEE PAIN CONSULTATION CAMP

PNS : JAMSHEDPUR

Renowned orthopedic surgeon Dr. Sandeep Singh, MBBS, MS (Ortho), MRCS (Glasgow & UK), and FRCS in Primary and Revision Joint Replacement (London), organized a Free Hip and Knee Pain Consultation Camp at Jasant Singh Mango, Gurudwara. Dr. Singh, an esteemed orthopedic specialist from CARE Hospitals, Bhubaneswar, has successfully performed over 10,000 knee and hip replacements. His visit to Jamshepur exemplifies his dedication to patient care and his commitment to extending orthopedic support to the community.

During this one-day camp, Dr. Singh offered free consultations to individuals struggling with hip and knee pain. With extensive experience in treating sports injuries and joint-related ailments, he provided insights into the causes, prevention, and treatment of joint pain, along with comprehensive solutions tailored to each patient's needs. This initiative marked an opportunity for patients to consult with a seasoned specialist who has transformed lives with his innovative approach to orthopedic care.

During the camp, Dr. Singh discussed the increasing prevalence of hip and knee problems and shared effective preventive and therapeutic solutions.

Campaign for AJSU candidate gains momentum

PNS : LOHARDAGA

This election is important for the identity and future of Jharkhand. NDA is committed to take the state on the path of development with its unity. AJSU Party's Central Secretary cum election in-charge of Lohardaga assembly constituency Jitendra Kumar Singh said these things while addressing the journalists in a press conference on Sunday. He said that we will together complete the blueprint for the development of Lohardaga which was prepared by late Kamal Kishore Bhagat. We have a road map for rapid development of Lohardaga and Jharkhand. Mr. Singh said that Prime Minister Narendra Modi and Union Home Minister Amit Shah will come to the Lohardaga election campaign as star campaigners to ensure the victory of NDA candidate AJSU's Neeru Shanti Bhagat on the Lohardaga assembly seat. Other leaders of NDA constituents will also come. After the withdrawal of names of the candidates, the list of star

campaigners will be released after discussion under the leadership of supreme Sudesh Mahato. Jitendra Singh said that Neeru Shanti Bhagat will win the election this time by 75000 thousand votes. Since the last elections, he has worked hard along with the party workers and has remained close to the people. This time AJSU has even made Chulha Pramukh. We will get votes from all sections of people.

AJSU's 21-member convener group has worked with full dedication. Whichever leader or star campaigner of the NDA constituents will come to campaign in Lohardaga will present the

road map for the development of Lohardaga and Jharkhand in front of the public. Said that Hemant Soren's government brought Mainiyam Samman Yojana in the last period of its tenure to mislead the public. The nine resolutions of AJSU include respect and thinking towards women and youth, which the public will see once the NDA government comes to power. Migration is a big issue in Lohardaga. Neeru Shanti Bhagat will work to improve employment, roads and electricity systems. Go to Silli and see that there is employment in every house.

After victory, we will work on the road map that we have at a fast pace, which has not

been done till date. While giving information about the padyatra starting from 28th, Assembly in-charge Jitendra Kumar Singh told the media that AJSU Party leader Neha Mahato along with Lohardaga candidate Niru Shanti Bhagat will reach every house of the assembly constituency and will fulfill the dreams of late Kamal Kishore Bhagat. To do this, even the head of the stove of every house of Lohardaga will have to live. At the same time, with BJP's Panch Pran and AJSU's nine resolutions, work will be done to illuminate Lohardaga and every house in the state. On the occasion, NDA candidate Niru Shanti Bhagat, AJSU Party Central Secretary Suraj Aggarwal, Lal Guddu Nath Shahdev, Central Spokesperson Anju Devi, District President Omprakash Bharti, Women District President Anita Sahu, Minority President Shahid Ansari, Election co-in-charge Lakhman Prasad Sahu, Mahendra Mahato, Chairman of the convener group, Kanwaljeet Singh etc. were present.

VHP celebrates Durga Puja with enthusiasm

PNS : BOKARO

The Durga Puja celebrations organized by the Vishwa Hindu Parishad (VHP) Bokaro Mahanagar concluded with great enthusiasm at the Jagannath Temple grounds. The event began with floral offerings to Bharat Mata's portrait and featured a special initiative titled "A Lamp for Daughters," symbolizing respect and a commitment to empowering daughters. VHP

organizing committees from Bokaro for their dedication to preserving cultural and religious practices. In his keynote address, Raipat emphasized the VHP's role as the world's largest Hindu organization and the importance of Hindu unity and global awareness of Sanatan values.

The program was presided over by Bokaro District President Rajendra Vishwakarma and coordinated by District Secretary Sanjeev Kumar. The State President presented saffron scarves to key district leaders and Bajrang Dal members, including district convener Ajit Pandey, Anil Singh, Lalesh Sinha, Asha Ji, Rajesh Kumar, Prashant Dwivedi, Rahul Modi, Deepak Pathak, Sitesh Azad, Chandan Monu, Ravi Mishra, Kunal Chakravarty, and Rakesh Modak, recognizing their dedication and service to the organization and the community.

Prominent attendees included VHP State President Chandrakant Raipat, Bajrang Dal State Convener Ranganath Mahto, and senior RSS officials. They collectively honored 50 Durga Puja

Vishal-Shekhar to perform at Ensemble-Valhalla festival

PNS : JAMSHEDPUR

The much-awaited Ensemble-Valhalla festival at XLRI Jamshedpur is set to kick off on November 23, marking its 25th year with an exhilarating lineup of cultural, sports, and management events. The highlight of the event will be a live performance by Bollywood's renowned music duo, Vishal and Shekhar, who will take the stage on the final day, November 25, for an unforgettable concert.

Organizers are gearing up for an event that promises "Waves of Euphoria," this year's theme, with more than 40 events and competitions that will see participation from over 1,200 colleges and top business schools nationwide. The prize pool for participants stands at an impressive ₹10 lakh.

The festival's lineup includes over 30 major cultural, sports, and management-related events. Activities will be accessible in both offline and online formats, making it easy for thousands of students to participate. This year, food and beverage brands such as Lassi

Corner, Pentola, Delhi Darbar, Boba Cheers, The Shout House, Bombay Brio Cafe, Baba Tea Stall, and Paw Wow will showcase their business models to B-school students, offering an inside look into successful entrepreneurial ventures.

PM Modi gifts Sohrai painting to Russian Prez Putin

PNS : RANCHI

Prime Minister Narendra Modi showcased Maharashtra's handcrafted works to the leaders of Iran and Uzbekistan and Jharkhand's art to Russian President Vladimir Putin during the recent BRICS Summit, according to officials.

Modi gifted a Mother of Pearl (MOP) sea-shell vase to Iran's President Masoud Pezeshkian. Putin was presented with a Sohrai painting from Jharkhand's Hazaribagh district. Sohrai Paintings are recognised as an ODOP (One District One Product) item. They are known for their use of natural pigments and simple tools.

Jharkhand is well known for its vibrant tribal art forms. This Sohrai painting from Hazaribagh district, Jharkhand, is a beautiful representation of the region's indigenous artistic traditions. Sohrai Paintings are recognized as an ODOP (One District One Product) item.

Sohrai paintings are known for their

use of natural pigments and simple tools. Artists often use brushes made from twigs, rice straw, or even fingers to create intricate designs. They are known for their simple, yet expressive, storytelling. The depiction of animals, birds, and nature is a reflection of the agrarian lifestyle and the reverence for wildlife in tribal culture.

Sohrai paintings are traditionally created by women, especially during festivals and harvest seasons. The art is a form of gratitude for the harvest and is believed to bring good fortune for the coming year. Sohrai paintings often draw inspiration from nature, which is evident here with the use of leaves, plants, and animals. The peacock is depicted as interacting with surrounding elements, and its posture suggests a graceful dance, adding life to the image. It symbolizes abundance, beauty, and prosperity, which aligns with the harvest themes. The surrounding natural elements, like vines and leaves, further reinforce the connection to fertility and the earth.

The Sohrai paintings reflect the deep connection between indigenous communities and nature, showcasing their artistic expression and cultural heritage. Through simple lines, bold patterns, and natural pigments, the painting conveys a sense of harmony and respect for the natural world.

PM Modi, Shah rallies in State after Diwali

BJP has prepared a proposal to hold six election rallies of the Prime Minister along with rallies of other star campaigners

PNS : RANCHI

The political atmosphere is hot in Jharkhand with the assembly elections. Jharkhand BJP has started preparations. BJP has prepared a proposal to hold six election rallies of the Prime Minister. The party has sought time from star campaigners including Prime Minister Narendra Modi between November 1 and November 10 for the election rally. In such a situation, the election rallies of BJP's star campaigners Prime Minister Narendra Modi, Union Home Minister Amit Shah, BJP National President JP Nadda will be held after Diwali. PM Modi and Amit Shah can corner the government on many issues like unemployment, corruption and Bangladeshi

infiltration during this time. Apart from this, the issue of paper leak will also become an election issue. Meanwhile, BJP State President Babul Marandi said that Prime Minister Narendra Modi has told many things in his 'Mann Ki Baat'. In this sequence, two great men have been mentioned. The 150th birth anniversary of both the great men is starting. One of them is Sardar Vallabhbhai Patel and the other is Bhagwan Birsa Munda. Sardar Vallabhbhai Patel's birth anniversary is celebrated as National Unity Day. Diwali is also on that day. This time Sardar Patel's birth anniversary has to be celebrated with more pomp. 15th November is the birth anniversary of Bhagwan Birsa Munda. His 150th birth

anniversary is also starting. It also has to be celebrated with pomp and show in the whole country. The need of the hour in Jharkhand is to form a government under the leadership of Bharatiya Janata Party, so that we can all save Jharkhand. Today Jharkhand is trapped in the hands of the brokers and middlemen in whose hands it is. These people are engaged in looting everything. This election is to save Jharkhand from the looters, brokers, middlemen. We appeal to all the people of Jharkhand, request them to vote for Bharatiya Janata Party to save Jharkhand. The hands of the country's Prime Minister Narendra Modi have to be strengthened. It has become absolutely clear that Hemant Soren is

helpless and constrained. He can stoop to any level for votes. The party may be different but Sita Soren is his sister-in-law. She is the wife of his agitating brother Durga Soren. She is also a woman from Jharkhand. Jamtara MLA Irfan Ansari uses this cheap word about Sita Soren. We cannot use that word. If Hemant Soren has even a little self-respect in his heart, then he should remove Irfan Ansari from the cabinet. Even after this, Hemant Soren is silent. If he is not removed from the cabinet, then he can think how can he protect the mothers and sisters of Jharkhand. The people of Jharkhand, the mothers and sisters of Jharkhand are seeing this very well. Hemant Soren should at least wake up now.

Political Crossroads: Opportunities vs. Rebellion for JMM and BJP Youth

SWAMI DIVYAGYAN

At this crucial juncture of the Jharkhand Assembly elections, both the Jharkhand Mukti Morcha (JMM) and the Bharatiya Janata Party (BJP) are facing a wave of discontent among their young leaders, whose dissatisfaction could adversely impact their electoral prospects. However, this situation is also a lesson for these young leaders: instead of opting for rebellion, if they align themselves with the party's principles, they will find countless opportunities and a promising future.

As BJP's veteran leader Bhupen Sahu, a true symbol of sacrifice, states, "The party is like a mother; we must have reverence for it, not a spirit of dissent."

Senior BJP leader Raj Paliwar, dissatisfied with not receiving a ticket, has decided to contest as an independent candidate from Madhupur, posing a significant challenge to BJP's Ganga Narayan Singh. Similarly, Niranjan Rai is preparing to run as an independent from Rajdhanwar, which could threaten the position of state president Babul Marandi. In Gumla, Sudarshan Bhagat faces potential risk due to the discontent of Misir Kujur, while in Kanke, Dr. Jeetu Charan Ram may see weakened support due to Kamlesh Ram's opposition. Furthermore, in the Ranchi Assembly, dissent from leaders like Munchoon Rai and Sandeep Verma could create difficulties for the BJP candidate Singh.

JMM's Youth Shake-Up
In the Jharkhand Mukti Morcha, discontent has arisen due to the denial of a ticket to Dinesh William Marandi, son of Stephen Marandi. Dinesh has chosen to contest as an independent candidate, potentially challenging JMM's organizational stability. Several JMM workers and supporters stand with Dinesh, feeling that the party overlooked a promising young leader. This dissatisfaction raises questions about JMM's commitment to organizational unity and its approach to prioritizing family over potential leaders for the future.

BJP's Youth Dilemma

Within BJP, discontent has deepened among young leaders like Kamlesh Ram, Misir Kujur, Munchoon Rai, and Sandeep Verma. All these leaders are associated with the Rashtriya Swayamsevak Sangh (RSS) and have held important roles within the organization. BJP hoped that this team of young leaders would strengthen the party, but dissatisfaction over ticket distribution has created

leaders to uphold these ideals and secure future prospects within the party by remaining loyal to the organization. Eventually they can withdraw their nominations. **Loyalty Over Rebellion**
Sacrifice and dedication are paramount in politics. All parties are fundamentally built on loyalty and the principle of sacrifice. For any leader, rebelling against the top leadership challenges the organization's discipline and core values of loyalty. Despite the current dissatisfaction, if these young leaders choose to uphold the values of sacrifice and loyalty, their paths to higher positions within the organization remain open.

Rebellion in the Ranks: Paliwar and Rai

Dissatisfaction within BJP has escalated to the extent that even senior and experienced leaders are choosing the path of rebellion. Former Minister Raj Paliwar, dissatisfied with not receiving a ticket, is contesting as an independent from Madhupur, posing a serious threat to BJP candidate Ganga Narayan Singh. Similarly, Niranjan Rai is preparing to contest independently from Rajdhanwar, which could jeopardize the prospects of BJP's state president Babul Marandi.

The rebellion of Raj Paliwar and Niranjan Rai not only affects BJP's electoral chances but also raises questions about the principles of discipline and loyalty within the party. Their decision serves as a warning for BJP, highlighting that internal discord and lack of communication have weakened the unity of the organization. **Building Stronger Foundations**

For both BJP and JMM, this is a time to reinforce the values of sacrifice, loyalty, and discipline. In this electoral season, commitment to the organization and dedication to these values offer a long-term path to success for leaders. The current discontent threatens to undermine the unity and discipline within both organizations. BJP and JMM should engage in constructive dialogue with their discontented leaders, reminding them of the organization's core principles and the opportunities that lie ahead.

Young leaders need to recognize that sacrifice and dedication are essential in politics, and loyalty to the organization will ultimately strengthen their political journey. By adhering to the values of sacrifice and loyalty, these young leaders will not only reinforce the organization but also brighten their own prospects for the future.

MummyPapaVoteDo campaign starts today

PNS : RANCHI

Chief Electoral Officer Shri K Ravi Kumar has said that for creating voting awareness among people in upcoming assembly elections, children of class 6-12 of all middle and higher schools of the state will write letters to their parents on Monday to vote. The letter writing program in schools will be held on October 28 between 11 am to 12 noon. All concerned have been instructed to implement this unique idea of voter awareness.

He said that before the children write the letters, the headmaster and teachers of the school will ensure to orient all the children on the need and importance of voting. After writing the letters within the stipulated time limit, all the children will take their letters home and hand them over to their parents and will also request them to vote on the day of voting.

Additional Chief Electoral Officer Dr. Neha Arora said that to make this message reach as many voters as possible, a hashtag #MummyPapaVoteDo campaign will be run on social media on Monday. She has appealed to everyone to join this campaign and make this voter awareness program a success.

Many efforts are being made continuously by the Chief Electoral Officer's office to maximize the voting percentage of the state in the Assembly elections 2024. In the same sequence, as an innovative effort, a campaign is to be run by school children in coordination with the Education Department tomorrow, Monday, 28 October.

Chief Electoral Officer Shri Kumar said that most of today's youth are active on social media. Social media is the easiest and simplest medium to reach any campaign to the people. Therefore, tomorrow, i.e. on Monday, October 28, between 5:00 pm and 7:00 pm, children, parents and common people will post their posts from their social media handles with the hashtag #MummyPapaVoteDo, and also tag the social media handles of the Election Commission of India and the Chief Electoral Officer. He has also appealed to the social media influencers of the state to participate in the said campaign.

Shivraj dares Hemant Soren to take action against Irfan

PNS : RANCHI

BJP is aggressive over the controversial statement of Congress leader and minister Irfan Ansari on Sita Soren. On Sunday, Union Minister Shivraj Singh Chouhan said that sister Sita Soren has been insulted in Jharkhand. Targeting the Jharkhand government and minister Irfan Ansari, he said that this statement shows the anti-women mentality of the government. He further said that respected Sita Soren is a respected leader of the BJP, and her insult exposes the anti-women attitude of the JMM government.

Targeting the coalition government, Shivraj Singh Chouhan said that Sita Soren ji is the wife of late Durga Soren, daughter-in-law of Shibu Soren and sister-in-law of Hemant Soren. But the surprising thing is that a minister of the same government whose head is Hemant Soren is insulting his sister-in-law.

He said that in Indian tradition, sister-in-law has been given the status of mother. Giving the example of Ramayana, he said that when Sita ji was kidnapped, Laxman ji was asked what mother Sita was wearing. On this, Laxman ji had said that

he had never seen mother Sita's face except her feet. He said that the people here are well aware of Indian traditions. When Sita ji was insulted, Lanka was burnt and Ravana was killed. But Sita is being insulted every day in Jharkhand. Chouhan further said that the people of Jharkhand know who Ravana is and what is the law and order here. He said that mothers, sisters and daughters are being insulted every day in the state. So far 7,400 rape cases have been reported in the state, including incidents with girls like Rubika and Ankita. He targeted and said that Hemant government minister Irfan Ansari has insulted Sita Soren ji by using abusive lan-

guage against her, if Hemant Soren has even a little shame, he should resign immediately. But Hemant Soren is sitting silent. If he cannot protect the honor of his Bhabhi Maa, then how will he protect the mother, sister and daughters of Jharkhand? Such a person has no right to remain in office.

Shivraj Singh Chouhan said about the Mann Ki Baat program that Prime Minister Narendra Modi presented facts against cyber crime so that the public can avoid cyber crime. Many times innocent people get cheated. See the concern in the heart of the Prime Minister that he himself is giving information about this through Mann Ki Baat. Stop, think and then take action.

Now, Cong too files case against Sita Soren

PNS : RANCHI

The case of viral video of Congress MLA Irfan Ansari is gaining momentum. Now Jamtara's working district president Vijay Kumar Dubey has filed a case against Sita Soren in Nagar Thama of Jamtara.

It has been said in the case filed that the statement of MLA Irfan Ansari has been presented in a distorted manner. The video has been edited. An attempt is being made to tarnish the image deliberately for political gain. At the same time, BJP candidate from Jamtara, Sita Soren said that Irfan Ansari is not a child who does not know how to speak. I will file a case against him.

An FIR has been filed against Irfan Ansari in Jamtara police station for the controversial statement given against BJP candidate from Jamtara, Sita Soren. This case has been filed in violation of the Model Code of Conduct.

The National Commission for Scheduled Tribes has asked the Chief Secretary, DGP, Home Secretary and Jamtara SP and DC of the state to investigate the matter

and submit a report within three days. The Commission has also said that if the reply is not received within three days, a 'summons' can be issued to appear before the Commission personally or through a representative.

Meanwhile, BJP State President Babul Marandi has taken a dig at Congress MLA Dr Irfan Ansari and said that have you seen a person who has grown up with time, but his intellect has remained that of infancy, yes, you read it absolutely right, but I am not talking about Rahul Gandhi but about an MLA born from his Mohabbat Ki Dukan whose name is Irfan Ansari. This is the same MLA who has constantly shown his intellect and ability through his speech, sometimes he called Dheeraj Sahu his guardian, sometimes he justified those who indulge in corruption, sometimes he used caste-specific abuses against mothers and sisters and sometimes he questioned their character.

"The path of corruption passes through the love shop of Indi alliance

Babul further wrote on the social media post that there is no doubt that the path of love shop of Indi alliance passes through corruption. But have you thought that Dheeraj Sahu is the guardian of the Congress party and its MLAs who have been involved in corruption. There can never be any debate on this subject, because it is well known that the Congress party has always chosen corruption as its successor, and then nurtured and raised it. Irfan Ansari ji comes from the same society that nurtured the Indi alliance," Marandi said.

The BJP state president said that Irfan Ansari became

a minister, but his speech has not yet grown as per the post nor is he capable, so in the name of speaking, he keeps spewing out whatever his mind says, like vomit. Many people have also made him understand this vomit from time to time by closing their nose, but nothing has affected his infantile mind. "The MLA who made the mistake of considering himself a respected speaker has once again spewed venom with his bitter words, such venom that it is affecting all the youth and women of the state. He came into politics by deceit on the strength of his father, he said.

Marandi said that Irfan Ansari said that there was no paper leak in JSSC CGL, no one has the courage and capability to stop the result. "Now how can anyone tell these fools that the matter has gone to the court, those who doubt the courage and capability of the court should ask their political masters once, perhaps the confusion will be cleared. There is no place for corruption and those who leak papers here, but if you want to harbor misconceptions, then do so comfortably," he said.

Attempt to kidnap Hemant Soren's proposer Murmu Mandal: JMM

PNS : RANCHI

Jharkhand Mukti Morcha (JMM) general secretary Supriyo Bhattacharya has made a big allegation on the officials engaged in the election in a press conference on Sunday. He has said that an attempt was made to kidnap proposer Mandal Murmu from Barhet of Chief Minister Hemant Soren.

In this regard, Bhattacharya has accused Chief Election Officer (CEO) Ravi Kumar, IPS, Sanjay Anand Latkar and IPS, Amol Venkunt Homkar on behalf of JMM and has demanded the removal of all three officials from election work.

The JMM general secretary has accused high-ranking officers of the Indian Administrative Service and Indian Police Service posted in the state of Jharkhand of misusing their position. He has said that these officers violated the code of conduct in favor of a particular political party (BJP) by interfering in the electoral process.

Bhattacharya said that a complaint has been made to the Chief Election Commissioner, Election Commission by writing a letter on behalf of JMM. Supriyo said that on Sunday at around 1 pm, a vehicle was stopped by Giridih police during vehicle checking. "Mandal Murmu, who is also the pro-

poser of Hemant Soren, the candidate from Barhet ST of Sahebganj district, was stopped along with several persons. He was asked about his destination. When the passengers in the vehicle did not give any answer, the vehicle was stopped by Giridih police," he said.

The JMM general secretary said that the state CEO, Latkar and Homkar misused their position. "Unnecessary pressure was put on the Giridih district administration and police administration. After the spread of this news, all the passengers were released in a hurry under the protection of Giridih police," he said. Bhattacharya further said that this is a very worrying and serious matter. The work of these officials should be reviewed by investigating all the facts impartially and thoroughly. He said that he should be removed from the election process with immediate effect. He said that at present Hemant Soren is the Chief Minister of the state and is also the star campaigner of our party. He said, the way his proposer Mandal Murmu was influenced to influence Soren's nomination, it is a criminal conspiracy as well as a violation of the model code of conduct.

Bhattacharya has demanded the Election Commissioner to take necessary action in this regard.

PM Modi envisions India as global animation powerhouse

PIONEER NEWS SERVICE ■ NEW DELHI

Citing the popularity of Indian animated series such as 'Chhota Bheem', 'Hanuman' and 'Motu-Patlu', Prime Minister Narendra Modi on Sunday said India is on the way to ushering in a new revolution in the world of animation and urged the people to take the resolve of making the country a global animation powerhouse.

In his monthly Mann Ki Baat radio broadcast, he said India's animation characters and movies, on account of content and creativity, are being loved all over the world.

"You must remember the days when 'Chhota Bheem' started airing on TV. Children can never forget that; there was so much excitement about 'Chhota Bheem'! You would be surprised that today 'Dholakpur ka Dhol' attracts children not only in India but also in other countries. Similarly, our other animated series such as 'Krishna', 'Hanuman', 'Motu-Patlu' also have a fan-following all over the world," the prime minister said.

"You might have noticed that from the smartphone to the cinema screen, gaming console to virtual reality, animation is omnipresent. India is on the way to ushering in a new revolution in the world of animation," Modi asserted.

He also pointed out that the gaming space of India is also expanding rapidly and Indian games are also gaining popularity all over the world.

and understand the amazing creativity and quality of Indian games. Indeed, in the country, there's a constant wave of creative energy," he said.

In the world of animation, 'Made in India' and 'Made by Indians' can be noticed everywhere, Modi said.

"You will be happy to know that today India's talent is also a significant part of foreign productions. Be it the present day Spider-Man or Transformers, in both these movies, Harinarayan Rajeev's contribution has been highly appreciated by people," he said.

Animation studios of India, are working with world famous production companies such as Disney and Warner Brothers, Modi noted.

"Today our youth are creating original Indian content, which reflects glimpses of our culture. These are being watched all over the world," he said.

Modi stressed that today, the animation sector has donned the form of an industry that

achieve great success," he said.

Noting that the 'World Animation Day' will be celebrated on October 28, he called on the people to take the resolve of making India a global animation powerhouse.

Recalling Swami Vivekananda's mantra of success - 'Take an idea, Make that one idea your life', Modi said the Atmanirbhar Bharat Abhiyan is also riding on this mantra of success, and noted this campaign has become a part of our collective consciousness.

"It has become our inspiration at every step. Self-reliance has become not only our policy, but our passion as well. Not that long ago... Just 10 years ago, if someone had said then, that some complex technology was to develop in India, many people would not believe it and many would ridicule it - but today the same people are amazed to see the success of the country," Modi said.

Becoming self-reliant, India is doing wonders in every sector, he asserted. "Just think, India, which used to import mobile phones once upon a time, is the world's second largest manufacturer today. India, which once was the biggest buyer of defence equipment in the world, is now also exporting to 85 countries. Today, in space technology, India has become the first country to reach the South Pole of the Moon," he said.

He said this campaign of self-reliance is no longer just a government campaign now and the Atmanirbhar Bharat Abhiyan is becoming a people's campaign with success in every field, the

prime minister said. "Just as this month, we inaugurated Asia's largest 'Imaging Telescope MACE' in Hanle, Ladakh. It is situated at a height of 4300 metres. Do you know what is special about it as well? It is 'Made in India'. Imagine, the place where the cold dips to minus 30 degrees, where there is a shortage of even oxygen, it is there that our scientists have achieved something that no other nation in Asia has done," he said.

Even though the Hanle Telescope is watching a distant world, it is also showing us something more - the capabilities of self-reliant India, Modi said.

He urged people to share as many examples of India becoming self-reliant as possible. "What new innovation have you noticed in your neighbourhood? Which Local Start-up has impressed you the most? Along with hashtag **A t m a n i r b h a r** Innovation, write down this information on social media and celebrate Atmanirbhar Bharat," Modi said.

In this festive season, Modi urged people to strengthen this campaign of Atmanirbhar Bharat and asked them to do their shopping with the mantra of 'Vocal for Local'. "This is the new India where the impossible is just a challenge... Where Make in India has now turned into Make for the world, where every citizen is an innovator, where every challenge is an opportunity," Modi said.

"We not only have to make India self-reliant, but also strengthen our country as a global powerhouse of innovation," he said.

SC seeks Uttarakhand government's response on plea for Madhumita Shukla murder convict

PTI ■ NEW DELHI

The Supreme Court has sought the Uttarakhand government's response on a plea seeking the premature release of one of the convicts in the 2003 murder case of 26-year-old poet Madhumita Shukla.

A bench of Justices Abhay S Oka and Augustine George Masih issued notice to the Uttarakhand government on a plea by Rohit Chaturvedi seeking direction to a competent authority for ordering his premature release.

Additional Advocate General Garima Prasad, appearing for the Uttar Pradesh government referred to earlier judgements of the apex court passed in the Bilkis Bano case on January 8 and May 13, 2022 and said that the competent authority in this case will be the Uttarakhand government.

She submitted that this court has held on January 8 that the state in which trial of a criminal case has taken place will be the competent authority to deal with a premature release of convicts as per state's policy.

"Since the case was transferred to Uttarakhand from Uttar Pradesh on the orders of this court, in this case the competent authority will be the Uttarakhand government," Prasad submitted.

The bench agreed to issue a fresh notice to the Uttarakhand government and posted the matter for further hearing on November 14.

Earlier, the Uttar Pradesh government moved the top court seeking a recall of an order that has asked it to consider a premature release of Chaturvedi.

The UP government has contended that in view of the second Bilkis Bano judgement of January 8 this year, the state has sought a recall or modification of the December 15, 2023 order passed in the case of Chaturvedi.

On January 8, the top court quashed the Gujarat government's remission granted to 11 convicts in a case involving the gangrape of Bilkis Bano and murder of her seven family members during the 2002 Godhra riots.

It had said the Gujarat government was not the appropriate authority to pass the remission order and clarified that the state in which an offender is tried and sentenced is competent to decide a remission plea of the convict.

The convicts in the Bilkis Bano case were tried in Maharashtra.

In the process, the bench had nullified a May 13, 2022 judgement of another apex court bench that had directed the Gujarat government to consider the remission applications of the 11 convicts, saying it was obtained by "playing fraud on court".

On May 13, 2022, a bench comprising Justices Ajay Rastogi (now retired) and Vikram Nath asked the Gujarat government to consider the plea of convict Radheshyam Shah for a premature release in terms of its remission policy of July 9, 1992, holding that the government of the state where the offence had taken place has the jurisdiction to decide the application.

In the present case, on December 15, 2023, a bench of Justices Aniruddha Bose (now retired) and Masih, relying on the May 13, 2022 judgment, asked the Uttar Pradesh government to consider the remission plea of Chaturvedi, who was tried for murder in a court in Uttarakhand.

"We, accordingly, direct that the remission plea which was filed by the petitioner-convict (Chaturvedi) be sent to the home secretary, state of Uttar Pradesh by the state of Uttarakhand.

This shall be done within a period of three weeks from date.

Thereafter, the state of Uttar Pradesh shall examine the question and take a decision in that regard within a further period of eight weeks," it had directed on December 15, 2023.

The UP government has sought a recall of the order that has asked it to decide the convict's remission plea on the ground that the apex court, in the subsequent judgment in the Bilkis Bano case, has held that the state where the convicts were tried is the requisite authority to decide such a plea for premature release.

Shukla was shot dead on May 9, 2003 in Lucknow's Paper Mill Colony while she was pregnant.

Former UP minister Amarmani Tripathi was arrested in September 2003 in connection with the killing of the poet with whom he was allegedly in a relationship. Subsequently, other accused were also arrested in connection with a conspiracy to kill Shukla.

On October 24, 2007, a trial court in Uttarakhand convicted Amarmani Tripathi, his wife Madhumita Tripathi, nephew Rohit Chaturvedi and associate Santosh Kumar Rai for Shukla's murder and sentenced them to life imprisonment.

Amarmani Tripathi, who was elected from the Nautanwa constituency, was a minister in the BJP government in Uttar Pradesh in 2001 and also in the BSP government formed in 2002. He has also been associated with the Samajwadi Party.

On June 17, 2003, the probe was transferred to the Central Bureau of Investigation (CBI). The trial was shifted from Uttar Pradesh to Uttarakhand by the Supreme Court on February 8, 2007.

On July 16, 2012, the Uttarakhand High Court upheld their conviction and sentence. The order was upheld by the apex court on November 19, 2013.

On August 24, 2023, the Uttar Pradesh prisons department issued an order for a premature release of Amarmani Tripathi and his wife Madhumita Tripathi, citing the state's 2018 policy on remission and also the fact that they had completed 16 years of their sentences.

Chaturvedi, who was convicted for criminal conspiracy and murder, had applied for a premature release to the Uttarakhand government but his plea was rejected.

Thereafter, citing the first Bilkis Bano case judgement on remission (of May 13, 2022), he sought a direction from the apex court to the Uttar Pradesh government for his premature release.

Addressing an event here last year, Vice President Jagdeep Thakkar had lamented that retired judges have kept the arbitral system of the country in a tight fist grip, denying chance to other qualified minds. He said India is known for its rich human resources, but they are not picked up to adjudicate arbitral process.

Successive governments have been pushing to make India a hub of international arbitration on the lines of London and Singapore, with limited success.

Satcom industry urges Government to protect key frequency bands for satellite communication

PIONEER NEWS SERVICE ■ NEW DELHI

The satellite-communication industry has urged the government to protect the key frequency bands used by them, particularly the Ka and Ku bands, from being allocated to terrestrial services.

The Satcom Industry Association of India has also asked the government to reserve the 27.5-28.5 GHz band exclusively for satellite services, instead of transferring it to IMT (International Mobile Telecommunications) for flexible use, in line with global practices.

"Any reduction in satellite bandwidth will not only double the gateway requirements but also increase operational costs for satellite operators, ultimately affecting end-users. We must prioritise the preservation of these frequency bands for satellite-communication services to avoid unnecessary financial burdens," Subba Rao Pavuluri, president, SIA-India, said in a statement.

The industry body has also proposed specific frequency ranges in the Ku and Ka bands for the NSGO-based Fixed Satellite Services (FSS). SIA-India represents major

satellite providers, including Inmarsat, Viasat, SES, Intelsat, Telesat, Omnispace, Amazon, AsiaSat and Hughes Communications.

The association has also called for clear guidelines on the authorisation process for instances, such as when a single satellite operator seeks to provide both a gateway earth station and user terminal services.

"Establishing these guidelines is essential to ensure a streamlined and efficient framework that supports the growth and reliability of satellite communication services," Anil Prakash, director general, SIA-India, said.

The association has also advocated for long-term spectrum assignments and proposed a maximum assignment period of 20 years with renewal rights, as seen in several international regimes. Such an approach will provide satellite operators with the necessary confidence to invest in their infrastructure and services over an extended timeframe, they have said.

Additionally, SIA-India has also suggested that a single licence should suffice for multiple antennas located at one site to streamline operations.

PM Modi to inaugurate C-295 aircraft at Vadodara

PIONEER NEWS SERVICE ■ NEW DELHI

Ahead of the inauguration of a manufacturing facility for C-295 planes in Vadodara, officials sources on Sunday said of the 40 aircraft to be made in India, the first C-295 is likely to roll out of the plant in September 2026.

Prime Minister Modi and his Spanish counterpart Pedro Sanchez

counterpart will inaugurate the Final Assembly Line plant of C-295 aircraft at Vadodara on Monday, the first private sector final assembly line for military aircraft in India, the Prime Minister's Office (PMO) had said in a statement on Saturday.

Prime Minister Narendra Modi had laid the foundation stone of the Final Assembly Line (FAL) plant of C-295 aircraft in Vadodara in October 2022.

The Ministry of Defence in September 2021 signed a Rs 21,935-crore contract with Airbus Defense and Space SA, Spain for supply of 56 aircraft. Of these 56 aircraft, a total of 16 will be brought in flyaway condition directly from Spain, and 40 will be built in India by

Tata Advanced Systems Ltd (TASL). First C-295 medium tactical transport aircraft was delivered in September 2023.

As on date, the IAF has "already inducted six C-295 aircraft" in its Vadodara-based 11 Squadron. The last of the 16 flyaway aircraft will be delivered by August 2025, an official source said.

Spanish Prime Minister Pedro Sanchez is scheduled to visit India from October 28-30, during which he will visit the Vadodara facility on Monday.

"Of the 40 aircraft to be made in India, the first C-295 will roll out of the Vadodara facility in September 2026 and the remaining 39 aircraft by August 2031," the source added.

Government seeks public input on draft arbitration and conciliation

PIONEER NEWS SERVICE ■ NEW DELHI

Seeking to provide "further boost" to institutional arbitration and reduce court intervention in such cases, the government has come out with a draft bill seeking views on the proposed amendments.

The Department of Legal Affairs in the law ministry has invited comments on the draft Arbitration and Conciliation (Amendment) Bill, 2024, saying "the aim and purpose is to provide further boost to institutional arbitration,

reduce court intervention in arbitrations and ensuring timely conclusion of arbitration proceedings". The draft bill comes months after an expert committee

headed by former law secretary and former Lok Sabha secretary general T K Vishwanathan submitted its report on proposed reforms in the arbitration sector to the law ministry.

The draft bill proposes the concept of 'emergency arbitration'. The proposed amendment says arbitral institutions may, for the purpose of grant of interim measures, provide for appointment of 'emergency arbitrator' prior to the constitution of an arbitral tribunal.

The emergency arbitrator appointed will conduct proceedings in the manner as may be specified by the (arbitration) council.

At the same time, the draft bill also omits some of the clauses of the present law.

One of the clauses omitted relates to laying of notifications proposed issued, in both Houses of Parliament when it is in session. The omitted clause read: "A copy of every notification proposed to be issued... Shall be laid in draft before each House of Parliament, while it

is in session, for a total period of 30 days which may be comprised in one session or in two or more successive sessions, and if, before the expiry of the session immediately following the session or the successive sessions aforesaid, both Houses agree in disapproving the issue of the notification or both Houses agree in making any modification in the notification, the notification shall not be issued or, as the case may be, shall be issued only in such modified form as may be agreed upon by the

both Houses of Parliament". Addressing an event here last year, Vice President Jagdeep Thakkar had lamented that retired judges have kept the arbitral system of the country in a tight fist grip, denying chance to other qualified minds. He said India is known for its rich human resources, but they are not picked up to adjudicate arbitral process.

Cyber criminals take advantage of user's lack of technical knowledge: CERT-In

PTI ■ NEW DELHI

Indian cyber-security agency CERT-In on Sunday shared a list that talks about more than a dozen ways in which online scams are being perpetrated by fraudsters in the country, including "digital arrest" to dupe people by stealing their money and private data.

The public advisory has been accessed by PTI and it came on a day when Prime Minister Narendra Modi too cautioned people against such frauds in his monthly "Mann ki Baat" radio broadcast.

The Computer Emergency Response Team of India (CERT-In) advisory said "digital arrest" is an online scam as "government agencies do not use platforms like WhatsApp or Skype for official communication". "Verify their identity by directly contacting the relevant agency," it

recommended. The advisory said in a case of "digital arrest", victims receive a phone call, e-mail or message claiming that they are under investigation for illegal activities, such as

identity theft or money laundering. The scammer threatens the victim with arrest or legal consequences unless he takes immediate action. They often create a sense of

panic to prevent rational thinking, the advisory said. Under the guise of "clearing their name", "assisting with the investigation" or "refundable security deposit/escrow account", individuals are coerced into transferring large sums of money to specified bank accounts or UPI IDs, it added.

The advisory asked people, who get contacted by such cyber criminals, to "not panic as scammers use fear and urgency to manipulate victims".

"Take a moment to assess the situation calmly before responding. Avoid sharing personal information and never disclose sensitive personal or financial details over the phone or video calls, especially to unknown numbers," the CERT-In said.

It stressed that people should not transfer money "under pressure" as legitimate law-

enforcement agencies "will never pressure you into sending money immediately".

"If someone demands money over the phone or online, it's most likely a scam," it said. The advisory said staying "vigilant and informed" is crucial to protect oneself from this "emerging cyber threat".

The advisory also spoke about other online cons like "phishing scams", in which scammers create e-mails or messages that appear legitimate, often using logos and branding from trusted organisations; "lottery and prize scams" where victims receive notifications claiming that they have won a huge amount of money and to claim the prize, they are asked to pay a processing fee or taxes.

It said scammers exploit "hope and greed" to carry out lottery scams. "Emotional manipulation

scams" are perpetrated online dating communication apps where scammers build emotional connections and then solicit money for emergencies like medical treatment and request that funds be sent via crypto currency.

"Job scams" are meant to con fresh graduates by posting about fake work listings on legitimate hiring portals or social media. As part of "tech support scams", cyber criminals take advantage of a user's lack of technical knowledge and stealthily gain access to his computer by warning about a virus and then steal sensitive personal data.

"Investment scams" cash on a person's desire to earn quick money as they promise "unrealistic" returns via Ponzi or pyramid schemes and in "cash-on-delivery scams", criminals set up fake online stores accepting CoD orders.

When the product is delivered, it is either counterfeit or completely different from what was advertised.

To con people using "fake charity appeal scams", scammers create convincing websites or social media profiles asking for donations for fake causes like disaster relief or health initiatives and use such images or stories that provoke sympathy or urgency.

"Mistaken money-transfer scams" are those in which fraudsters contact a victim via e-mail or social media, claiming that money has been mistakenly sent to his account as they use fake transaction receipts to ask the person to return the funds immediately to avoid legal issues.

"Phone scams" are those where victims receive calls or messages under the fake name of a telecom regulatory body, saying

there is an "issue" in their service as they urgently seek one-time passwords (OTPs) and banking information for identity verification.

"Parcel scams" are like "digital arrest" where victims are informed over a call or message that they are under probe as their drugs-laden parcel has been seized and they will be arrested or may have to face legal consequences if they do not pay a fine.

As part of the "loan or cards scam", fraudsters offer loans with low interest rates, coupled with quick approval, and "disappear" after the victims transfers an upfront fee for securing the loan. The advisory suggested a host of best practices and counter-measures to stay vigilant against such crimes and not give into the "pressure tactics" deployed by cyber criminals, who seek quick action by creating "a sense of urgency".

BJP delegation urges Punjab Governor to address paddy procurement issues

PIONEER NEWS SERVICE ■ CHANDIGARH

A delegation of Punjab BJP leaders on Sunday met Governor Gulab Chand Kataria and submitted a memorandum alleging inefficiency on part of the AAP government in the state for "tardy" paddy lifting. The delegation urged the governor to intervene and ensure the complete lifting of paddy from mandis as a "gift" to the farmers of the state so that they can "celebrate Diwali and Bandi Chhor Divas with their families".

The memorandum said, "Due to inefficiency on the part of the Punjab government, even after 26 days of official commencement of paddy procurement, the Punjab government has failed to lift most of the paddy from the mandis across the state."

Paddy procurement for Kharif Marketing Season 2024-25 commenced in Punjab from October one, according to the BJP delegation that included Avinash Rai Khanna, Preet Kaur, Harjit Singh Grewal, Rana Gurmeet Singh Sodhi, Vijay Sampla, Vineet Joshi and Fateh Jang Bajwa.

"Before the commencement of the season, in the last week of September, Punjab government got Rs 44,000

crore for the purchase of paddy on MSP from the central government," the memorandum said.

The BJP's memorandum further alleged that the Punjab government has miserably failed to make all the necessary arrangements on time to ensure the smooth purchase of paddy: be it the purchase of gunny bags, tarpaulin or notification of custom milling policy or notification of FRK (fortified rice kernels) milling policy or awarding of labour contracts or transportation contracts, etc.

The state government has also failed to ensure proper

drinking water, toilet facilities, and compulsory medical facilities at mandis, the memorandum said.

The biggest failure of the government is its inability to enter into an agreement with 5,500 rice millers for the indefinite period to protest the "tardy" paddy procurement and lifting and other issues.

Protests were held at Badarukhan on Sangrur-Bathinda highway in Sangrur, Dagra on Moga-Ferozpur highway in Moga, Satiali Phul on Gurdasour-Tanda highway in Gurdaspur and Batala railway station, farmers said.

great inconvenience to the people of Punjab during the festive season," it said.

Notably, farmers under the banner of Kisan Mazdoor Morcha on Saturday held road blockades at a few places in Punjab for an indefinite period to protest the "tardy" paddy procurement and lifting and other issues.

Protests were held at Badarukhan on Sangrur-Bathinda highway in Sangrur, Dagra on Moga-Ferozpur highway in Moga, Satiali Phul on Gurdasour-Tanda highway in Gurdaspur and Batala railway station, farmers said.

Seeking the governor's intervention to end the "tardy" paddy procurement, the BJP delegation's memorandum said, "We request your good self to intervene and ensure the complete lifting of paddy from mandis and gift farmers of Punjab happiness to celebrate the Diwali and Bandi Chhor Divas with their families."

The BJP urged the governor to ask the Punjab government to take all steps to ensure proper supply of DAP and urea for the next sowing season "as this is the next impending disaster Punjab will face".

Notably, paddy lifting from mandis (wholesale markets) in Punjab has been hit after the state rice millers refused to mill the paddy till their demands were met.

Rice millers have expressed concern over the out-turn ratio (post-milling yield) of the PR-126 variety and other hybrid varieties, claiming that it will cause them huge losses.

BJP leader and former Punjab chief minister Amarinder Singh had on Friday lashed out at Chief Minister Bhagwant Mann over the "tardy" paddy procurement in the state, alleging the latter "turned his back on the farmers" facing hardships in the mandis.

Karhal by-election: intense rivalry between political kin

BISWAJEET BANERJEE ■ LUCKNOW

The Karhal assembly seat in Mainpuri, known for its complex political dynamics, is witnessing a fierce contest this by-election season. The battle has garnered significant attention, as the sons-in-law of two political stalwarts are going head-to-head in this high-stakes election.

The Samajwadi Party (SP) has fielded Tej Pratap Yadav, the son-in-law of former Bihar Chief Minister Lalu Prasad Yadav. In response, the Bharatiya Janata Party (BJP) has chosen Anuj Yadav, the son-in-law of the late Mulayam Singh Yadav, SP founder and former Chief Minister of Uttar Pradesh, as its candidate. This adds a unique twist to the by-election, as both candidates have close familial ties to the legacy of the SP.

Since the formation of the Samajwadi Party, Karhal has remained a stronghold for the party, except for a brief period in 2002 when Sobran Singh Yadav won the seat as a BJP candidate. He later joined the SP and successfully represented Karhal three times in subsequent elections.

In the 2022 assembly elections, SP President Akhilesh Yadav chose to contest from Karhal, securing a victory over BJP candidate and Union Minister Dr. S.P. Singh Baghel. After Akhilesh's victory in the 2024 Lok Sabha elections from Kannauj, he vacated the Karhal seat, necessitating the

acknowledged the family ties during his campaign visit to Barnahal on October 25. Referring to Anuj's BJP candidacy, Akhilesh remarked, "When BJP couldn't find any other strategy, they fielded our relative."

The political narrative is further complicated by past family tensions. After Anuj Yadav joined the BJP in 2019, his brother-in-law, MP Dharmendra Yadav, severed ties with him, publicly stating that he would not maintain relations with any BJP leader. However, Akhilesh's recent acceptance of Anuj as a relative has added a twist to the dynamics.

The relationship between the two candidates goes beyond mere rivalry. Anuj Yadav's wife, Bharatya Yadav, is Tej Pratap Yadav's aunt, making Anuj and Tej Pratap nephew and uncle. Yet, despite these familial ties, both candidates have emphasized that party loyalty supersedes family connections in this electoral contest.

The Karhal by-election has become a battle not just for political victory but also for the legacy and prestige of two powerful political families. The result will have significant implications for both the SP and BJP, influencing their strategies in the region and potentially impacting the political landscape of Uttar Pradesh. With the entire state watching closely, this contest promises to be one of the most intriguing by-elections in recent times.

Hina Shahab and son rejoin RJD ahead of bihar assembly polls

PTI ■ PATNA

Delhi's Tihar jail where she was serving a life sentence. Hina unsuccessfully contested the Siwan seat on RJD tickets several times. She contested elections on an RJD ticket in 2019 for the last time and after that, her relations with the party soured.

It was widely believed that she was being given a wide berth by Yadav who was keen on giving an image makeover to the party which had faced accusations of patronising "babubalis".

Yadav is understood to have been forced to do a rethink after the recent Lok Sabha polls, in which the RJD performed below par, winning only four seats, despite his spirited campaign that saw the young leader addressing over 200 rallies.

Moreover, in Siwan, Hina finished runner-up, losing to JD(U)'s Vijay Lakshmi Kushwaha by less than one lakh votes, while RJD candidate Awadh Bihari Chaudhary, a former assembly Speaker, finished a distant third, barely avoiding forfeiture of deposit.

The move also underscores RJD's "anxieties", ahead of the Bihar assembly polls due next year, with its junior allies like the Congress and the Left having notched up much better strike rates in the Lok Sabha elections, a political analyst said.

Former RJD MP Mohd Shahabuddin's wife Hina Shahab, who had contested the recent Lok Sabha polls as an Independent candidate from Bihar's Siwan, on Sunday joined the party along with her son Osama Shahab.

Party supremo Lalu Prasad's heir apparent Tejashwi Yadav welcomed them and described Shahabuddin as "a founding member" of the RJD.

Yadav claimed that induction of the late leader's family members will "help us in our fight against communal forces represented by BJP and RSS".

Both, Hina and her son, joined the RJD at 10 Circular Road, the official residence of former Bihar CM Rabri Devi, in the state capital.

Lalu Prasad, Yadav and several other senior leaders of the party were present on the occasion. Prasad said, "Late Shahabuddin's family was always part of the RJD. They have come closer and will further strengthen the party." Arguably, the most dreaded gangster-turned-politician of Bihar, Shahabuddin, had remained unbeaten in his stronghold of Siwan until his conviction in a murder case in 2007, which led to his disqualification. Shahabuddin died in 2021 in

Ayodhya's grand Deepotsav festival begins tomorrow

BISWAJEET BANERJEE ■ LUCKNOW

Uttarakhand alongside performances by artists from six countries, including Myanmar, Nepal, Thailand, Malaysia, Cambodia, and Indonesia, celebrating the global resonance of the Ramayana.

The festival will also include a mesmerizing Hanuman Chalisa dance drama, performed on the main stage, offering a spiritual experience for the attendees.

The lineup at Ramkatha Park on October 30 features performances by Ranjana Nev from Saharanpur, who will present a dance-based narrative of the Ramayana, and Preeti Singh from Agra, known as "Preeti Ke Parindey", who will bring her unique Hanuman Chalisa

dance drama to life. Delhi-based team will present "Shri Ramcharitmanas Nari Maitreya Pahari and his

Shakti," celebrating the strength of women in Ramayanic tales. Additionally, Aparna Yadav from Lucknow will sing devotional bhajans, adding a melodic touch to the Deepotsav celebrations. These cultural events will begin at 7 pm, blending devotion and artistic expression.

From October 28 to 30, a grand Shobha Yatra procession will take place, led by 11 Ramilila groups under the Culture Department's guidance, featuring the Shri Maruti Nandan Hanuman Adarsh Ramilila Mandal and other prominent troupes. Folk artist groups will also participate, showcasing unique performances, including Awadhi folk, Mayur dance from Mathura, and Vantangiya dance from Gorakhpur.

The Yogi government has prepared 10 major stages across Ayodhya to host this cultural spectacle, with venues including Guptar Ghat, Badi Devkali, Rama Ghat, Bharatkund, and Ram Katha Park. Performances will run from 5 pm to 9 pm daily, ensuring that each corner of Ayodhya resonates with the spirit of the festival. The Agnihotri brothers, famous for their devotional performances, will take the stage at Ram Ghat, while artists from every district of Uttar Pradesh will contribute to making this Deepotsav a truly statewide celebration.

Cyclone Dana affects 35.95 lakh in Odisha

PTI ■ BHUBANESWAR

A total of 35.95 lakh people in Odisha have been impacted by cyclone Dana and subsequent flooding in 14 districts, the state's Revenue and Disaster Management Minister Suresh Pujari said on Sunday.

Pujari also said as many as 8,10,896 people were evacuated to 6,210 cyclone relief centres.

The worst-hit districts include Kendrapara, Balasore and Bhadrak, while the human casualty "still stands at zero", he told reporters here.

"By 10.30 am of Sunday, evacuated people were sheltered in 1,178 cyclone relief centres and they are being provided cooked food and other essential items," the minister said.

Polythene sheets are being given to people who lost their houses in the calamity. He said cyclone Dana, which

prone areas of the state. Pujari also said there has been "huge crop loss" in the aftermath of the cyclone, which hit the eastern coast early on Friday, triggering torrential rain and high-speed winds. Referring to the swollen Budhabalang river, which has mostly affected Balasore district, he said the water level in the river has remained static and below the danger level, "but above the warning sign".

"As the rainfall has reduced in the region and the upper catchment area, the water level in Budhabalang will not increase further. We hope the situation will improve by this evening," Pujari said.

The minister said river Kansabansa in Balasore district is also in spate and affected some villages under the Soro block.

A central team is likely to visit Odisha to assess the damages, he said.

struck early Friday, has affected people in 1,671 gram panchayats under 108 blocks spread over 14 districts. According to preliminary reports, around 5,840 houses have been fully or partially damaged due to the cyclone and subsequent flooding, Pujari said.

"Whenever there is a disaster, people lose their houses and get compensation. This time, we want to bring a permanent solution to the problem and provide pucca houses to them in a phased manner," he said.

The Odisha government was also planning to undertake a survey of kutcha houses located in cyclone and flood-

prone areas of the state. Pujari also said there has been "huge crop loss" in the aftermath of the cyclone, which hit the eastern coast early on Friday, triggering torrential rain and high-speed winds. Referring to the swollen Budhabalang river, which has mostly affected Balasore district, he said the water level in the river has remained static and below the danger level, "but above the warning sign".

"As the rainfall has reduced in the region and the upper catchment area, the water level in Budhabalang will not increase further. We hope the situation will improve by this evening," Pujari said.

The minister said river Kansabansa in Balasore district is also in spate and affected some villages under the Soro block.

A central team is likely to visit Odisha to assess the damages, he said.

Tripura to extend successful rubber mission

PTI ■ AGARTALA

Buoyed by the successful implementation of the "Chief Minister's Rubber Mission" in Tripura, the state government is contemplating extending the programme for another five years, an official said on Sunday.

The livelihood generation initiative, launched in 2021-22, is set to be completed by 2025-25.

A total of 56,400 families have been brought under the programme, while rubber plantation was carried out across 46,086 hectares of land during the first four years of the mission, he said.

The Automated Tyre Manufacturers' Association (ATMA) supplied saplings to the selected beneficiaries free of cost, and the Tripura Welfare Department extended additional assistance such as encompassing fencing and providing fertiliser, the official said. Under the programme, the Rubber Board ensured quality supply of plants, pre-plantation and post-plantation training in different districts, he said.

"The mission has become very popular among the tribals living in hilly regions," Director of Tribal Welfare, Subhashish Das, told PTI.

The department is mulling extending the programme for another five years in view of its financial viability and popularity, he said.

"We are planning to bring another 60,000 hectares of land under rubber plantation for 60,000 families once the first phase of the mission is completed. It has been seen that even militants who have surrendered are keen on rubber plantation because it is a promising livelihood option," Das said.

Steps have been taken for construction of integrated rubber processing centres of varying size for supporting the production of high-grade rubber latex, he said.

Initiatives have also been taken to conduct skill development programmes in rubber tapping for ensuring quality in latex collection, the official added.

Tripura is the second-largest rubber producer in India.

Udhayanidhi Stalin breaks DMK tradition with deepavali greetings

PTI ■ CHENNAI

In a rare departure from the DMK's traditions, party leader and Tamil Nadu Deputy Chief Minister Udhayanidhi Stalin has extended his Deepavali greetings to those "who have faith", remarks that drew sarcastic response from opposition BJP.

The BJP has been targeting the DMK for not wishing people on Hindu festivals, including Deepavali and Vinayaka Chaturthi.

DMK leaders including its late president and former Chief Minister M Karunanidhi have not greeted people on Deepavali, in line

with their rational beliefs. However, at a party event here on Saturday, while extending his greetings to supporters for the party's platinum jubilee celebrations, Udhayanidhi also greeted people for "Deepa oli thirunaa" much to the surprise of many.

"I extend my greetings on our (DMK) platinum jubilee celebrations; Deepa oli thirunaa greetings to those having belief and celebrating it," he said.

Deepa oli thirunaa roughly translates to the Day of the Light of lamp.

While Deepavali in the north signifies the return of Lord Rama and Sita Devi to Ayodhya from exile, in south the festival marks the victory of Lord Krishna and his consort Sathyabhama over the demon king Narakasura.

TN BJP leader Narayanan Thirupathi took a swipe at Udhayanidhi.

In a cryptic post on 'X,' he referred to the deputy CM's comments and said, "for those who don't have belief, greetings to live like Narakasura."

Further, in a veiled attack on Tamil Nadu Governor R N Ravi, Udhayanidhi said he is "allergic" to the very word "Dravidam," and thinks it can be finished off by not taking its name. The Governor also had a problem with the name Tamil Nadu, he claimed.

"Nobody can even touch Dravidam. Tamil Nadu will remain Tamil Nadu. As long as our black and red (DMK) flag and the DMK workers are there, none can even touch Tamil Nadu and Dravidam," the deputy CM asserted.

Cocaine seized in police raid on BRS leader's brother-in-law farmhouse

PIONEER NEWS SERVICE ■ HYDERABAD

Police raided a farmhouse allegedly belonging to a senior BRS leader's brother-in-law and booked one person, who tested positive for cocaine at the party organised there. Leaders of the ruling Congress in Telangana on Sunday said the farmhouse was held at the farmhouse of Raj Pakala, brother-in-law of the BRS leader, and demanded a thorough investigation over the matter.

Union Minister of State for Home Affairs Bandi Sanjay Kumar alleged that the

Congress Government in Telangana is just "pretending" to enforce the law but is actually "protecting the BRS bigwigs". According to police, following input that a party was going on at the farmhouse in Janwada, with "drugs and liquor unauthorisedly", a team of Cyberabad Police and Excise officials raided the place on the intervening night of October 26 and 27 and found 21 men and 14 women participants.

All the male participants were subjected to drug tests and one person in the gathering tested positive for cocaine and a case under relevant sections

of the NDPS Act was registered, said police officials. During the raid, police found foreign liquor beyond the permitted quantity and that no permission was taken for the event. Pakala hosted the event and since he did not obtain an Excise license, a case was registered against him under relevant sections of the Excise Act by the Excise Task Force besides another case was booked against him under the Telangana Gaming Act, police said. Asked about ownership of the farmhouse, they said it appears that it belongs to him (Raj Pakala) but the ownership details have to be

verified, the official said. An Excise official told the media that the party was organised without event permission and foreign liquor was also found. Seven foreign and 10 Indian liquor bottles were found besides other gaming related items, police said, adding further investigation was on.

BJP leader Sanjay Kumar in a post on 'X' said "The raid at Janwada farmhouse is merely tip of the iceberg. Congress govt should not dilute the case - by giving a predictable statements. It's becoming obvious that Congress and BRS are playing a 'give and take' game, protecting each other's interests."

PAPER WITH PASSION

Clouds of doom

As the US push for de-escalation, the risk of a multi-front war looms large, threatening to destabilise West Asia

The recent Israeli airstrikes on Iran and the subsequent retaliatory measures have intensified the long-standing conflict between the two nations, raising fears of a broader war in West Asia. The airstrikes, which targeted Iranian military installations and reportedly resulted in the deaths of four Iranian soldiers, were framed as a response to Iranian aggression. Iran's ally, Hezbollah, quickly reacted with rocket salvos targeting residential areas in northern Israel, signalling the potential for the conflict to spread. The current episode of hostilities began after Israeli warplanes allegedly used Iraqi airspace to conduct strikes on military and radar installations in Tehran. These actions were framed by Israel as necessary measures to neutralise threats posed by Iran and its regional proxies, including Hezbollah in Lebanon. Iran has condemned the strikes as a violation of its sovereignty, insisting on its right to retaliate. As expected the United States has firmly backed Israel, reiterating its "ironclad" support and cautioning Iran against further retaliation. Meanwhile, UN Secretary-General Antonio Guterres has called for an immediate cessation of hostilities, expressing concern about the potential for the violence to escalate uncontrollably.

The conflict's spillover into Lebanon, where Hezbollah's rocket attacks targeted northern Israel, highlights the interconnected nature of West Asia politics. Hezbollah, a powerful militia with close ties to Tehran, represents Iran's most prominent proxy in the region. Its involvement indicates that the conflict could easily escalate beyond a bilateral confrontation between Israel and Iran, drawing in other state and non-state actors. The conflict's potential to involve additional countries is significant. Lebanon, already grappling with a fragile political and economic situation, could become a battlefield, destabilising the broader Levant. Similarly, Iraq's alleged involvement in providing airspace for Israeli operations could trigger responses from Shia militias in the country. Besides, Iran's network of proxies, including militias in Iraq, Syria, and Yemen, could engage in coordinated retaliatory strikes against Israel or the US interests in the region. This would complicate efforts to contain the conflict and could lead to an asymmetric, multi-front war. It goes without saying that diplomatic efforts are urgently needed to prevent the situation from deteriorating further. One country that could convince Israel for ceasefire is the US. It could leverage its influence over Israel and its regional allies to push for restraint, while simultaneously deterring Iranian retaliation through diplomatic channels. In fact even the US does not want the war to spill over. Direct communication between Washington and Tehran could prevent misunderstandings that might trigger further escalation. Besides, international neutral actors such as India, Russia, or regional mediators like Oman could facilitate backchannel negotiations aimed at establishing a ceasefire. The war must be stopped at any cost now else it could be a free-for-all, making it precursor to the World War III.

Every year, an estimated 4.2 million deaths are linked to ambient air pollution worldwide, as nearly 91 per cent of the global population resides in areas where air quality exceeds the safe limits set by the World Health Organisation (WHO). In Asia's largest metropolitan regions, rapid urbanisation, unchecked industrialisation, population growth, and the surge in automobiles and construction activities have exacerbated air pollution levels, posing severe health risks. Delhi, one of the most polluted cities in the world, exemplifies this crisis, with its air quality frequently plummeting to hazardous levels, especially during the winter months, making it a focal point in the battle against air pollution in the region. On the morning of October 19, 2024, the Air Quality Index (AQI) reached concerning levels in various parts of the Capital City, particularly in Anand Vihar and Akshardham, where it climbed to 334, placing it in the "very poor" category. The worsening air quality in Delhi can be attributed to several key factors. First, as easterly winds set in, dust pollution across the National Capital Region (NCR) has become a primary cause of the declining AQI. The Graded Response Action Plan (GRAP), a series of measures aimed at addressing Delhi's air pollution, was implemented on October 15 as the situation began to worsen. These measures include frequent cleaning of roads and restrictions on diesel generators. However, despite these efforts, the problem continues to escalate. One of the most significant contributors to Delhi's declining air quality is stubble burning in neighbouring states, primarily Punjab and Haryana. The Early Warning System (EWS) for Delhi predicts that the contribution of stubble burning to the city's pollution levels is expected to increase significantly over a few weeks. The seasonal practice of burning crop residue adds large amounts of particulate matter (PM2.5) to the air, exacerbating the already poor conditions in the city. As air quality continues to worsen, there are reports of residents

Come winter, Delhi chokes again

Despite the implementation of the Graded Response Action Plan, including stricter dust control and bans on open burning, smog continues to blanket the city

RAJDEEP PATHAK

complaining of increasing health issues. Many are experiencing respiratory problems, including difficulty breathing, coughing, and throat irritation. According to media reports, the smog and particulate matter have caused inflammation of the airways and irritation in the eyes. These symptoms are consistent with high levels of pollution, which contribute to various respiratory illnesses to the extent that doctors have been receiving patients with skin issues too. Moreover, ENT specialists have noted a surge in cases involving nasal irritation, throat inflammation, and persistent dry coughs. These symptoms are affecting children and adults too with complaints of inflammation, and gastrointestinal problems, such as Irritable Bowel Syndrome (IBS) and dyspepsia, which have also been linked to pollution. In this regard, 'climate change' is another factor worsening this situation in Delhi. With changing weather patterns, temperature inversions at regular intervals, and extreme weather conditions even during summer and winter, in this season, pollutants become trapped near the ground, creating a layer of smog. Delhi's minimum temperature of 19.2 degrees Celsius, slightly above the sea-

THE WORSENING AIR QUALITY IN DELHI CAN BE ATTRIBUTED TO SEVERAL KEY FACTORS. FIRST, AS EASTERLY WINDS SET IN, DUST POLLUTION ACROSS THE NATIONAL CAPITAL REGION HAS BECOME A PRIMARY CAUSE OF THE DECLINING AQI

sonal average, contributes to these conditions. Moreover, climate change also aggravates the effects of vehicular emissions by reducing the frequency of rainfall, which would otherwise help to clear particulate matter from the air. The government has taken several measures to curb the rising pollution, including implementing the Graded Response Action Plan (GRAP) restrictions - which include different stages I-IV - besides imposing fines for open burning. Additionally, authorities have been tasked with identifying local sources contributing to the worsening air quality. To tackle the immediate crises that have engulfed the Capital City, the Commission for Air Quality Management (CAQM) has implemented Stage 1 of the Graded Response Action Plan across Delhi, Uttar Pradesh, Haryana, and Rajasthan, in response to air quality data and weather forecasts provided by the India Meteorological Department (IMD) and the Indian Institute of Tropical Meteorology (IITM), with a series of stringent measures, aimed at mitigating air pollution. Key restrictions include enhanced dust control protocols at construction sites, improved waste management practices, and rigorous checks

on polluting vehicles and industrial emissions, particularly from power plants and brick kilns. Additionally, open waste burning and the use of diesel generators are prohibited, along with a ban on coal and firewood in eateries. Construction and demolition activities exceeding 500 square meters face severe limitations, and diesel/petrol vehicles older than 10-15 years, as well as the use of firecrackers, are banned until January 1, 2025. Not only this, traffic management is also prioritised, with increased deployment of police in congested areas to reduce vehicular idling, while visibly polluting vehicles face strict penalties and possible impoundment. These measures form part of a broader strategy to curtail air pollution and improve public health. The situation is also a stark reminder of the need for collective action to address the underlying causes of air pollution, including vehicular emissions, waste burning, and industrial activities, in addition to climate mitigation efforts. What authorities must also look at is the underutilisation of the 'smog tower', which was introduced as a major intervention. (The writer is programme executive, Gandhi Smriti and Darshan Samiti; views are personal)

LETTERS TO THE EDITOR

BRICS PRIORITISES DEVELOPMENT

Madam — The power of diplomacy is writ large in the recently concluded bilateral meeting between India and China on the sidelines of the BRICS Summit in Russia. It also broke some ice ever since the deadly clash in 2020. However, notwithstanding a new deal settled on the disengagement of troops, both remain deeply suspicious of each other. That BRICS has a greater relevance in a multipolar and multidimensional context at a time when the world faces multiple challenges like the ongoing wars, economic uncertainty, climate change, terrorism, east-west and north-south divide as the forum reflects the Global South's deeper concerns, with many more countries queuing up to join or partner with the grouping. The first ever attendance of new member countries like the UAE, Egypt, Ethiopia and Iran opposing the unilateral sanctions by the west on other nations underscores their challenges confronting them and encourages them to unite for a fairer international order. Another case in point is the creation of the New Development Bank, which has emerged as a significant platform for the needs of such countries. Greater use of local currency finds mention in the Kazan declaration rather than supporting a yuan anchored BRICS against the U.S. dollar. India favours greater use of local currencies for cross border payment system. Increasing use of UPI, which has been adopted by many countries including the UAE acts as a bulwark against the west. The development of the global south remains the top priority of the BRICS Summit in contrast to portraying the grouping as only a gang up against the US-led west. Other initiatives include start-up forums, workforce skilling initiatives, and digital public infrastructure providing low-cost solutions for developing countries. Vijay Singh Adhikari | Nainital

IMPROVE RURAL HEALTHCARE

Madam — There should be the government's special focus on public health, particularly in tribal areas in this season. The

Glaciers are melting fast

The rapid melting of all 900 glaciers in Uttarakhand, along with 9,575 others across the Himalayas, has reached a critical level due to global warming. Alarming factors like deforestation, black carbon deposits, and greenhouse gas emissions are accelerating this decline, leading to water scarcity, impacting hydropower generation,

and threatening the extinction of many aquatic species. To protect our nation and environment from these apocalyptic consequences, immediate and decisive action is essential. According to the Global Forest Watch report, "From 2001-2023, Uttarakhand lost 20.7 thousand hectares of tree cover, representing 0.89% of the global total." This tree loss is unacceptable, and measures like afforestation, preserving green areas around glaciers, and strengthening forest protection are crucial. Furthermore, it is imperative to establish research and development projects to study and preserve glaciers and to limit black carbon emissions. Acting now is essential to safeguarding our natural resources and the future of our environment. Jakir Hussain | Kanpur

KIWIS WINS PUNE TEST

Madam — Kudos to the Kiwis for their marvellous victory at the Pune Test and a series win since 1955 on Indian soil for the first time. Bowlers winning matches has been proven again when Kiwis Mitchell Santner put India off the backfoot in the Pune test. Chasing a target of 359 to win the test, the only batter who played with intent was Jaiswal and, in the end, there was some resistance from Ravindra Jadeja, but it was not good enough. The Indian top order can't rest on the old laurels of Rohit Sharma and Virat Kohli, and both of them failed to deliver. Full credit goes to Washington Sundar and Ashwin for fighting despite the fact that this was the most humiliating defeat for India while beaten in our own backyard very convincingly by the Kiwis. It's high time for the head coach Gautam Gambhir to realise that this team calls for a revamp and to bring in those who are hungry for runs and wickets. AP Thiruvadi | Chennai

Leveraging folklores to educate the new generation

The ancient art of storytelling remains a vital medium for teaching values and fostering cultural understanding

BIJU DHARAMAPALAN

Folklores, the traditional stories, myths, and legends passed down through generations, have long been a source of fascination, serving as much more than mere entertainment. Folklores often centre on ordinary people who face adversity yet find ways to overcome it, reflecting everyday life's common struggles and aspirations. This relatability comforts those who feel isolated in their struggles, showing that they are not alone and that their challenges are shared across time and place. One of folklore's most significant aspects is its inherent simplicity, which makes it a powerful tool for education across generations. Folklores are often crafted to be relatable, encapsulating moral lessons or practical wisdom in a format accessible to children and adults alike. This accessibility makes folklore an effective educational medium, especially in regions where formal education might be limited. Through memorable characters, narratives, and

moral lessons, and social norms. Folklores are often crafted to be relatable, encapsulating moral lessons or practical wisdom in a format accessible to children and adults alike. This accessibility makes folklore an effective educational medium, especially in regions where formal education might be limited. Through memorable characters, narratives, and

Panchatantra and Jataka Tales have transcended regions, becoming staples of Indian storytelling that educate on universal values while highlighting India's unique cultural tapestry. Indian folklore frequently addresses social issues, challenging established norms and encouraging reflection on societal practices. For instance, the folktales of Tenali Rama, the witty advisor in the Vijayanagara Empire, often question the elite's excesses and promote justice for the common man. Similarly, Birbal, a wise minister in the Mughal court, features in numerous tales that promote intellectual equality. These stories teach Indians to value wit, intelligence, and fairness, subtly questioning the authority of those in power. By embedding reformist ideas within entertaining narratives, Indian folklores provide a soft yet powerful critique of societal hierarchies, encouraging progressive thinking. Many Indian folklore emphasize the bond between humans and

nature, imparting lessons on environmental stewardship that resonate with India's agrarian roots. Stories about sacred rivers, protective spirits, or revered animals highlight the belief that natural entities are to be respected and cared for. These tales often highlight shared human experiences, bridging cultural gaps and fostering a sense of collective identity. Folklore serves as a reservoir of collective wisdom, transcending time and geography to educate and reform society. Its remarkable ability to touch hearts, prompt reflection, and inspire action makes it indispensable in both formal and informal education. In an era dominated by digital technology, folklore may seem antiquated, yet its relevance has only deepened. Modern storytellers, educators, and social reformers can adapt folklore for contemporary audiences, harnessing its emotive power to foster empathy and awareness. UNLOCKING THE DIVINE ENERGIE

According to yogic traditions, each day is linked to a specific shakti and Diwali happens to be a special day

ASHWININI GURUJI

The universe operates under the influence of various *shaktis* (divine energies). As one advances in yogic practice (*sadhana*), these energies can be experienced directly. Each of the 365 days is associated with a specific shakti, which is why maintaining discipline and consistent daily practice in yoga is crucial. Missing even a single day can disrupt the connection with that day's *shakti*, potentially setting back the entire year's *sadhana*. In the cosmos, every element is interconnected, so when one aspect is neglected, it affects everything—our body, the Earth, and even other planets and stars. Each *shakti* is associated with a day, but accessing these energies does not require rituals. In yogic and tantric traditions, *sadhana* alone is the key to connecting with shakti. Understanding the form (*swarup*) of each *shakti* is essential. While every form has a specific name, names are revealed only after the body is prepared through particular *sadhanas*. At a basic level, when you meditate (*dhyana*) with your guru, you may see different forms manifesting in them, such as the sun or the moon. Have you ever wondered what these forms signify?

Many practitioners have reported seeing the sun during meditation. What makes the sun so significant? If you observe the sun at sunrise or sunset while focusing on the Manipura chakra (navel centre) and chanting the mantra "Ram," you will notice a glow emerging in your body. Within a month, you may begin to look noticeably different. However, a word of caution—any yogic practice should be undertaken under the guidance of a *guru* who can adapt it to your capacity. Similarly, the moon is a fascinating energy source. It merely reflects the sun's light, yet it can influence tides and even the Earth's surface during a full moon. Have

you ever considered what makes the moon special? On full moon nights, animals may behave aggressively, and incidents of accidents and conflicts tend to rise. These are just basic observations that hint at something deeper about these celestial forms. Understanding their true nature requires direct experience, which is attainable through the proper practice of *Sanatan Kriya*. The moon may appear calm and peaceful, but it is actually more volatile than the sun. When you observe the moon under a *guru's* guidance, you can perceive the mantras embedded within its form. Some *shaktis* are not directly visible and can only be accessed through other *shaktis*. These experiences form the foundation of yoga. Without direct experience, yoga remains incomplete. Nature, with all its wonders—from flowers of various colors to the sky above—contains the hidden forms of *shaktis*. If you observe these elements without blinking, under the guidance of a *guru*, you may find that your physical and mental imbalances begin to dissipate. However, discipline (*niyam*) is essential. The practice must be continuous, and disruptions will occur if one lacks the capacity for the *shakti* or does not have a *guru* to guide them. Everything around us contains the essence of *shakti*, and these energies are easily accessible. When one becomes steady and focused on a particular *shakti*, it starts to follow them, empowering their life. The nine days leading up to Diwali hold special significance because of the congregation of specific *shaktis* during this period. Our ancestors advised observing celibacy (*brahmacharya*) during these days to strengthen the body and prepare it to receive these energies. During this time, keep your mind centred within yourself, as the *sadhana* performed during these nine days is equivalent to months of practice. As Diwali approaches, especially on *Amavasya* (the new moon night), when we light *diyas*, it is an opportune time for *shakti sadhana*. Even a layperson who is not an experienced practitioner can perceive the swarup of shakti by sitting with closed eyes in meditation. With a pure heart, one can experience these divine energies without any elaborate rituals. Let this Diwali be a time to connect with the powerful *shaktis*, embracing their presence to enrich your spiritual journey.

Rising import reliance amid regulatory challenge

UTTAM GUPTA

Despite Government efforts to boost domestic production, policy constraints and pricing caps continue to stifle the energy sector's growth

According to the Petroleum Planning and Analysis Cell under the Ministry of Petroleum and Natural Gas (MPNG), during the first six months of the current financial year (FY) September 2024, India's consumption of natural gas (NG) increased by almost 12 per cent to 36.850 billion metric standard cubic meters (bmscm) over the corresponding period last FY. However, the import of NG (it is imported in a liquefied form commonly known as LNG) increased by 23 per cent to 18.975 bmscm during this period. Taken as a proportion of consumption, imports were 51.5 per cent during April-September 2024 up from 46.8 per cent during April-September 2023.

The country's production of NG registered a marginal increase of around 2 per cent during April-September 2024. The State-owned major Oil and Natural Gas Corporation or ONGC (it contributes about 84 per cent of total domestic output) produced 9.407 bmscm of NG during this period, which was 4 per cent less than during the same period of last FY. However, Oil India Limited (it has 8 per cent share) produced 4 per cent more NG at 1.577 bmscm during this period. The share of production in consumption was 48.5 per cent. Delivering the 75th Independence Day address on 15th August 2021, Prime Minister Narendra Modi vowed to achieve self-reliance in energy production by boosting the gas-based economy. He had then wished the share of NG in the total energy mix to go up from subsisting around 6 per cent to 15 per cent. Pertinently, even to comply with the 6 per cent share, India had to import more than 50 per cent of its NG requirement.

The position hasn't changed even today. Increasing the share of NG in the total energy mix to 15 per cent would require its consumption to increase from its current annual of 73.689 bmscm to 184.222 bmscm (73.689x2.5). The current consumption includes domestic production of 35.739 bmscm. If domestic production stagnates at the current level (in sync with the trend of the last few years) then, to achieve the 15 per cent target, the import of LNG will have to be 148.483 bmscm (184.222-35.739) which means India's import dependence will have to increase to over 80 per cent. The above calculation assumes no

THERE IS AN URGENT NEED FOR A 'PREDICTABLE' AND 'ATTRACTIVE' POLICY ENVIRONMENT TO GIVE A FILLIP TO THE EXPLORATION AND PRODUCTION OF NG

increase in total energy consumption. But, it is increasing at a rapid pace. The country's power demand alone is projected to grow at a compound annual rate of 7 per cent during the next five years (as per an estimate by the Central Electricity Authority or CEA).

In that scenario, compliance with the 15 per cent target for NG would mean still higher reliance on imports. What is coming in the way of increasing production? Natural resource endowment is not a problem. India has 26 sedimentary basins (SBs) covering an area of 3.4 million sq km that could be searched for hydrocarbon resources. However, only six of the SBs are under commercial exploitation; these too are sub-optimally utilised. Hydrocarbon exploration is a highly capital-intensive and technology-intensive business involving a long gestation period. It is risky, especially when drilling in deep/ultra-deep and high-pressure/high-temperature (D/UD/HP/HT) fields in offshore areas such as the Krishna-Godavari (KG) basin.

However, these areas offer maximum promise in terms of reserves. Multinational companies (MNCs) such as ExxonMobil, Chevron, Total etc. which have the technology and resources can be enthused to take long-term bets in the Indian hydrocarbon sector provided the government offers them an opportunity to earn an attractive return on their investment in a 'sustained' basis.

This, in turn, requires that their efforts in the discovery and development of NG fields don't face regulatory hurdles and that they can sell the gas 'freely' at a 'remunerative' price. Modi - The government has made a lot of efforts to remove regulatory hurdles. Until recently, of 1.73 million sq km SB area lying offshore, 0.69 million sq km was a 'No go' area, courtesy of security reasons.

The Centre has released almost all of this for exploration and produc-

tion (E&P) activity. Now, it is granting lease rights over the entire economic life of the allotted fields (this could extend up to 30 years, even beyond depending on the available reserves) instead of the extant system of short tenure with extensions.

It has also made amendments to the Forest (Conservation) Act to enable prompt access to forest areas for exploration of hydrocarbon resources. Under the Hydrocarbon Exploration and Licensing Policy (HELP), also known as the Open Acreage Licensing Policy (OALP) launched in 2017, E&P firms are allowed to pick up a block of their choice unlike the earlier New Exploration and Licensing Policy (NELP) (launched in 1999) wherein they had to accept what the government offered. Besides, under OALP, an operator gets a composite license to search for hydrocarbon in whatever form viz NG, 'shale gas', CBM (coal bed methane) etc. For long, E&P efforts were hamstrung by cumbersome procedures, multiple approvals and bureaucratic red tape. Approvals were needed at every stage.

As many as 37 procedures were required to be followed by a firm-awarded block under NELP. Team Modi has substantially liberalised and de-bureaucratized approvals by providing for self-certification of documents and pre-approved clearance of blocks. While the above helps, without freedom of marketing and the ability to secure a good price, E&P firms won't get enthused. Of the domestic gas, on around two-thirds of supplies (mostly from so-called 'legacy fields' given on nomination to ONGC and OIL and from fields given under NELP), the Centre has full control over 'to whom' the supplies will be made and at 'what price'. From April 1, 2023, based on the recommendations of the Kirit Parikh committee, this price expressed on a per million British thermal units (Btu) basis is arrived at by taking 10 per cent

of the monthly average of the Indian crude basket in the preceding month and notified every month. The price thus calculated is subject to a ceiling of US\$ 6.50 per mBtu which makes the formula redundant.

Now, the bureaucrats have come up with a 20 per cent premium on supplies by ONGC and OIL only from the so-called 'new wells' or 'well interventions'.

If their intent is to give a good price why put a cap in the first place? Moreover, which fields get the benefit of 'new wells' or 'interventions', will also be solely at their discretion. Even the pricing of the remaining one-third of domestic NG supplied from the so-called deep/ultra-deep and high-pressure/high-temperature fields (KG-D6 operated by Reliance Industries and neighbouring KG-DWN-98/2 operated by ONGC in Krishna-Godavari basin off the Andhra Pradesh coast fall in this category) isn't free from 'control' discretion and 'arbitrariness'. Technically though, the firms can go for competitive bidding to determine the price for such supplies (referred to as a 'premium' price), this too is subject to a ceiling linked to the prices of alternate fuels including fuel oil, naphtha, and LNG. There is an urgent need for a 'predictable' and 'attractive' policy environment to give a fillip to the exploration and production of NG. The Kirit Parikh committee was conscious of this when it recommended de-regulating difficult gas fields' prices by January 1, 2026, and the price on supplies from legacy fields by January 1, 2027. The government should implement these recommendations. Meanwhile, it should prepare the ground for giving subsidies directly to major users such as fertilizers, power, CNG, PNG etc instead of creating distortions in the supply chain by controlling the price of basic inputs such as NG.

Ayurveda Day 2024: Celebrating innovations for global health and wellness

This year's celebration aims to highlight the transformative potential of Ayurveda in addressing modern health challenges

Over the last decade, the Ayush sector has undergone a significant transformation, largely due to the initiatives led by Prime Minister Narendra Modi. This revolution in traditional Indian medicine has created new opportunities for various stakeholders, including industry professionals, traders, and healthcare practitioners. Since its establishment in 2014, the Ministry of Ayush has successfully integrated Ayush into mainstream healthcare, driving innovation, research, and gaining global recognition. The ministry's strategic focus encompasses public health, technology, education, globalisation, and quality control, ensuring that Ayush products and services are safe and of high quality.

RAJESH KOTECHEA

This comprehensive approach aligns with the goals of universal health coverage and sustainability, contributing to the sector's growth, increased public awareness, and a rising demand for Ayush healthcare systems worldwide.

Ayurveda Day is celebrated on the occasion of Dhanteras to honor Lord Dhanvantari, the deity revered as the physician

of the gods and the God of Ayurveda. This year, Ayurveda Day will be observed on October 29, 2024, with a renewed focus on the theme "Ayurveda Innovations for Global Health." Since the Ministry of Ayush initiated Ayurveda Day in 2016, the event has expanded into a global celebration. The emphasis this year is on showcasing Ayurveda's potential to improve global health through innovative practices and natural treatment methods.

Ayurveda's core strength lies in its holistic approach to health, which emphasizes prevention, health promotion, and natural healing. With the growing global demand for integrative healthcare solutions, Ayurveda is gaining recognition as a viable and sustainable alterna-

tive. Recent advancements, supported by scientific research, have increased the global reach and acceptance of Ayurvedic practices. One of the most notable contributions of Ayurveda to modern healthcare is the innovative use of herbal medicine. It is reported that over 95% of Ayurvedic interventions are based on herbal treatments, utilizing the healing properties of nature. As scientific research continues to validate the effectiveness of Ayurvedic herbs and therapies, the demand for these natural solutions is rapidly increasing worldwide. The rise of non-communicable diseases (NCDs) such as diabetes, cardiovascular disorders, and cancer has highlighted the need for natural, preventive healthcare solutions.

Ayurveda, with its focus on holistic well-being, offers a unique approach to managing these conditions. Additionally, the growing problem of antimicrobial resistance requires alternative treatment methods, and Ayurvedic remedies, rooted in herbal medicine, present sustainable options. As climate change exacerbates health risks,

Ayurveda's emphasis on lifestyle management, mental health, and care for the elderly provides resilient solutions for vulnerable populations. Moreover, as societies face challenges like nutritional disorders and mental health crises, Ayurveda's approach to balancing the body and mind becomes increasingly relevant. Ayurveda is not a static system; it evolves continually through ongoing research and innovation. Recent advancements in fields such as genome sequencing and nanotechnology have revealed parallels with traditional Ayurvedic concepts like Prakriti (body constitution) and Bhasma (herbal-mineral formulations). These modern innovations help bridge the gap between traditional practices and contemporary

healthcare, making Ayurvedic treatments more accessible and scientifically validated. Ayurveda as a proactive health strategy that can boost immunity, mental clarity, and overall well-being. The alignment of Ayurvedic innovations with the SDGs and Universal Health Coverage (UHC) underscores its potential to provide accessible, affordable, and inclusive healthcare. The 2024 Ayurveda Day will mark several important milestones that reflect the growth and integration of Ayurveda into mainstream healthcare. The Ministry of Ayush is accelerating this progress through the construction of Phase II of the All India Institute of Ayurveda in New Delhi and the establishment of six new Centers of Excellence to promote innova-

tion and research in traditional medicine. Plans to develop the Central Research Institute of Yoga and Naturopathy (CRIYN) in Odisha, Chhattisgarh, and Andhra Pradesh aim to enhance the promotion of holistic health practices. The celebrations for Ayurveda Day 2024 will include a variety of engaging activities, such as creative exhibitions, Ayurveda quizzes, medical camps, and Prakriti Parikshan (body constitution analysis). Initiatives like "Ayurveda in My Kitchen" and "Ayurveda in My Vatika" will emphasise the practical application of Ayurvedic principles in daily life.

Apparent truck attack on bus stop near Mossad HQ in Israel wounds dozens

AP TEL AVIV
A truck rammed into a bus stop near the Israeli city of Tel Aviv, wounding 35 people, according to first responders. Israeli police described it as an attack and said the assailant was an Arab citizen of Israel. The ramming occurred near the headquarters of Israel's Mossad spy agency. In the city of Ramat Hasharon, northeast of Tel Aviv, the truck slammed into a bus at a stop as Israelis were returning to work after a weeklong holiday, leaving some people stuck under the vehicles. In addition to being near the Mossad headquarters and a military base, the bus stop is also close to a central highway junction. Israel's Magen David Adom rescue service said six of the wounded were in serious condition. Asi Aharoni, an Israeli police spokesperson, told reporters that the attacker had been "neutralised," without saying if the assailant was dead. Hamas and the smaller Islamic Jihad militant group praised the suspected attack but did not claim it.

'Israeli strikes kill 22 in northern Gaza'

AP DEIR-AL-BALAH
Israeli strikes on northern Gaza have killed at least 22 people, mostly women and children, Palestinian officials said Sunday, as its offensive in the hard-hit and isolated north entered a third week and aid groups described a humanitarian catastrophe. In a separate development, a truck rammed into a bus stop near Tel Aviv, injuring dozens of people, according to Israel's Magen David Adom rescue service. The circumstances were not immediately clear, but Palestinians have carried out dozens of vehicle-ramming attacks over the years. The Gaza Health Ministry's emergency service said that 11 women and two children were among those killed in the strikes late Saturday on several homes and buildings in the northern town of Beit Lahiya. It said another 15 people were wounded and that the death toll could rise. It listed the names of those killed, who mostly came from three families. The Israeli military said it carried out a precise strike on militants in a structure in Beit Lahiya and took steps to avoid harming civilians. It disputed what it said were "numbers published by the media," without elaborating or providing evidence for its own account. Israel is still carrying out daily strikes across Gaza, even as it wages an air and ground war with the Hezbollah militant group in Lebanon. Two people were wounded after an explosive drone launched from Lebanon slammed into a building in an industrial area of northern Israel, authorities said. An Israeli airstrike on a southern neighbourhood of Beirut set flames and smoke climbing into the air. On Saturday, Israeli warplanes attacked military targets in Iran — which backs both the Hamas and Hezbollah — in response to an Iranian ballistic missile attack earlier this month. Iran's supreme leader, Ayatollah Ali Khamenei, said Sunday that Israel's attack "should not be exaggerated nor downplayed," while stopping short of calling for retaliation. His remarks are the latest suggesting Iran is carefully weighing its response to the attack. "It is up to the authorities to determine how to convey the power and will of the Iranian people to the Israeli regime and to take actions that serve the interests of this nation and country," said Khamenei, who has the final say over all major decisions in Iran. The cascading conflicts have raised fears of an all-out regional war pitting Israel and the United States against Iran and its militant proxies, which also include the Houthi rebels in Yemen and armed groups in Syria and Iraq. Red Cross describes 'horrific circumstances' in northern Gaza Israel has been waging a massive air and ground offensive in northern Gaza since October 6, after saying that Hamas militants had regrouped there. Hundreds of people have been killed and tens of thousands of Palestinians have fled to Gaza City in the latest wave of displacement in the yearlong war. Israel says its strikes on Gaza only target militants, and it blames Hamas for civilian casualties because the militants fight in densely populated areas. The military rarely comments on individual strikes, which often kill women and children. Aid groups have warned of a catastrophic situation in northern Gaza, which was the first target of Israel's ground offensive and had already suffered the heaviest destruction of the war. Israel has severely limited the entry of basic humanitarian aid in recent weeks, and the three remaining hospitals in the north — one of which was raided over the weekend — say they have been overwhelmed by waves of wounded people. The International Committee of the Red Cross on Saturday said that ongoing Israeli evacuation orders and restrictions on the entry of essential supplies to the north had left the civilian population in "horrific circumstances." "Many civilians are currently unable to move, trapped by fighting, destruction or physical constraint and now lack access to even basic medical care," it said. Hospitals reeled after Israeli raid detains dozens of medics Israeli troops raided the Kamal Adwan Hospital in the north on Friday, detaining dozens of medical staff and causing heavy damage, according to the Health Ministry. Footage circulated online showing the courtyard bulldozed and the wards ransacked. Israeli troops withdrew on Saturday. The head of the World Health Organisation said 44 male staff members were detained at the hospital. Tedros Adhanom Ghebreyesus said only female staff, the hospital director and one male doctor were left to care for almost 200 patients. Among those detained and taken away was Dr. Mohamed Obeid, head of the orthopedics department at nearby Al-Awda Hospital, according to Al-Awda Hospital. His whereabouts are unknown. Throughout the yearlong Israel-Hamas war, Israeli forces have stormed and bombed a number of hospitals including the strip's largest medical facility, Shifa Hospital. Israel accuses Hamas of using medical facilities across Gaza for military purposes, allegations denied by hospital staff, who say the raids have recklessly endangered sick and wounded civilians. The war began when Hamas-led militants blew holes in Israel's border wall and stormed into southern Israel in a surprise attack on October 7, 2023.

EAST BOUND FESTIVAL SPECIAL TRAINS-2024

In order to clear extra rush of passengers during Deepawali and Chhath Puja Festivals, Northern Railway has planned to run the following East Bound Festival Special Trains from 28.10.2024 to 30.10.2024 in addition to normal regular trains as per schedule given below:-

Table with columns: Spl. Train No., Station From, Dept. Time, Station to, Arr. Time, Accomodation, Stoppages. Contains train schedules for Monday, 28.10.2024.

EAST BOUND TRAINS FROM DELHI AREA TERMINALS ON 29.10.2024 (TUESDAY)

Table with columns: Spl. Train No., Station From, Dept. Time, Station to, Arr. Time, Accomodation, Stoppages. Contains train schedules for Tuesday, 29.10.2024.

EAST BOUND TRAINS FROM DELHI AREA TERMINALS ON 30.10.2024 (WEDNESDAY)

Table with columns: Spl. Train No., Station From, Dept. Time, Station to, Arr. Time, Accomodation, Stoppages. Contains train schedules for Wednesday, 30.10.2024.

During the Rail journey never travel with inflammable objects like Crackers, Petrol, Kerosene, Gas Cylinder etc. For any kind of information, such as seat availability and time-table etc., passengers are requested to contact RailMadad Helpline No. 139 or may visit Indian Railways website https://enquiry.indianrail.gov.in or NTES App.

NORTHERN RAILWAY logo and website information: www.nr.indianrailways.gov.in

LOST & FOUND

LOST ALLOTMENT LETTER OF FLAT NO. 1505, TOWER 6, EMAAR PALM GARDEN, SECTOR-83, GURGAON-122004. Lost Dated: 16.06.2024. Report Dated: 02.10.2024. With LR No.: 2170674 / 2024.

PUBLIC NOTICE. Notice is hereby given to the General Public on behalf of our client that Mr. Vinod Kumar is claiming to be owner of Residential Property bearing No. 24, area measuring 56 sq. yds. out of Rect. No. 38, Killa No. 13, situated at abadi Sarojini Park, Shastri Nagar, in the area of Village Kuruki Khos, Tilga Shabdara, Delhi-110031 vide G.P.A. ATS & Will dated 26.08.1996, executed by Mr. Khushal Chand. All persons are hereby informed that above mentioned owner wants to sell the property to a person who wants to obtain a loan from our client against the said property. If any body has any objection/s upon the ownership of above owner over the said property, its sale/mortgage/liquidation & any other objections, kindly inform the undersigned in writing on the below mentioned address within 7 days of the present.

PUBLIC NOTICE. This Notice is hereby given to general public that Mrs. Kumaree Dhanamti who claimed to be owners and in possession of the Plot on area measuring 299 Sq. Yds. Khirsa no.487, Situated Vill-Chhokra, Merikha, Patarganj, & Toshi Dadi Distt Gautam Budh Nagar (U.P.) by virtue of Sale Deed Dated 17/09/2024, Doc No 49408. Now Mrs. Kumaree Dhanamti is Selling said property to Amit Kumar and same approached to Bank of India for financial assistance and therefore shall be mortgaged with the said Bank. We give this public notice that if any person having any claim/objection regarding ownership and/or creating mortgage of the said property or any part of the said property in favour of Bandhan Bank Ltd is/are hereby requested to notify the same in writing to undersigned with supporting documentary evidence at the address mention below within 7 days from the date of publication of this notice, failing which any claim, if any, of such persons will be considered to have been waived and/or, abandoned and our client shall proceed with the disbursement of loan to the said property and subsequent creation of Mortgage in respect thereof. For Juris NextGen Law Offices E-66, LGF Greater Kailash Enclave Part-I, New Delhi-48

PUBLIC NOTICE. This is to inform the Public at large that Smt. Ramesh Jhingon W/o. Late Sh. P.N. Jhingon (Alias Pran Nath Jhingon) is the Title Holder in the undivided share of the property known as Freehold Property Bearing Flat No. A-52, Retreat Co-operative Group Housing Society Ltd., Plot No. 20, I.P. Extension, Patarganj, New Delhi-110092 measuring 83.60 sq. mtrs, herenafter referred to as 'Schedule Property' vide Conveyance Deed dated 7th March, 2018 duly registered as Regn. No.2814, Book No. 1, Vol. No. 6951, pp. 111-113 on 07.03.2018 in the Office of the Sub Registrar-VII, Vikas Sadan, New Delhi (Smt. Ramesh Jhingon is described as a Mutatee therein). The Schedule Property was originally allotted by the Society to Sh. P.N. Jhingon and consequent to his death on 13.08.2010, on the basis of submission of original Relinquishment Deed dated 29.08.2017 (Regn. No. 4305), the Delhi Development Authority mutated the Schedule Property in favour of Smt. Ramesh Jhingon. That Late Sh. P.N. Jhingon did not leave behind any other Legal Heirs except Smt. Ramesh Jhingon (Wife), Sh. Somesh Nath Jhingon (Son), Smt. Shikha Jhingon (Daughter) and Sh. Shalinder Jhingon (Son). Further, the original documents w.r.t. the Schedule Property i.e. (i) Confirmation of Draw of Lots Letter, (ii) Physical Possession Letter dated 21.03.1992 and (iii) Mutation Letter issued by D.D.A. in the name of Smt. Ramesh Jhingon have all been lost/misplaced and are untraceable as on date, in lieu of which Information Report dated 27.10.2024 bearing LR No. 2248541/ 2024 has been filed with Delhi Police. This notice is thus issued to the Public at large, i.e. any Person(s), Company(ies), Authority(ies), Society(ies), Organisation(s), Financial Institution(s), Bank(s), HUF(s) etc. having any knowledge, custody or possession of the above mentioned lost/misplaced/untraceable original documents or otherwise having any claims, rights, title, interests, possession etc. in the Schedule Property, by way of Ownership, Succession, Inheritance, Sale, Mortgage, Exchange, Charge, Lien, Gift, Trust, Encumbrance etc., may come forward with supporting documents, to be delivered to the undersigned within 30 days from the date of this Publication, post expiration of which, any claim(s) or objection(s), if raised or received, shall be treated as null & void and as waived and the Title Holder shall continue to sell the Schedule Property, as is currently intended. Joti Kashyap, Advocate Address-Chamber No. 6, Block-E, Karkardooma Court, New Delhi-110032, Contact No. +91 99176 26467

Immigration: A key issue in US election campaign

PTI ATLANTA
With just nine days left for Election Day, immigration remained one of the contentious issues in the US presidential campaign, with many immigrants, including from India and other South Asian nations, fearing a backlash if Republican hopeful Donald Trump wins the poll. In his campaign speeches, Trump promised a radical shift to tighten Washington's immigration policy and vowed to carry out the "largest" domestic deportation operation in American history of undocumented immigrants and review the existing refugee programmes if he is re-elected. The Republican leader has even vowed to end birthright citizenship for the children of immigrants living in the US illegally, triggering concerns among various diaspora communities, including from Bangladesh, India and Pakistan. Various pro-immigration advocacy groups have criticised Trump over his rhetoric on immigration, saying the discontinuation of birthright citizenship is legally questionable as it is enshrined in the 14th Amendment of the US Constitution. On her part, Vice President Kamala Harris has underlined the need for curtailing illegal immigration and that the US immigration system is broken and requires legislative measures to fix it. At a recent campaign rally, Trump accused Harris of bringing in "migrant gangs and illegal alien criminals" into the US, adding that "her policy of importing migrant gangs is a crime against our country." "This is a very sensitive issue and we are worried about the possible fallout of Trump's victory," said Mohammad Iqbal, a Bangladesh-origin green card holder living in Atlanta for over a decade. "Trump's policy is creating panic among various migrant societies and that is why they are supporting Vice President Kamala Harris," he noted. Vasudev Patel, general secretary of the Federation of Indian-Americans in Georgia, said the Republican leader is looking at welcoming "educated" and "peaceful" people to the US. A survey report by Pew Research has found that the supporters of Trump and Harris differ on mass deportations but favour border security. Nearly nine-in-ten Trump supporters (88 per cent) favour mass deportations of immigrants living in the country illegally, it said. In contrast, only 27 per cent of Harris supporters favour mass deportations while 72 per cent oppose it, the survey found. More than a third of Trump supporters (37 per cent) favour allowing undocumented immigrants to live and work in the US if they are married to an American citizen, compared with 80 per cent of Harris supporters who say the same, Pew Research found. About half of Trump supporters (49 per cent) support admitting more civilian refugees who are escaping war or violence, but a majority of Harris supporters (85 per cent) say the same, it said. Latanya, a student from Michigan, said immigration is a major issue in the election and she was upset with Trump over his policy on the matter. "I think, Harris is a much better choice than Trump in the election," she added. The US presidential race remained very tight with both Harris and Trump locked in a dead heat for the popular votes in most swing states. The final nationwide CNN poll found this week that 47 per cent of likely voters support Harris and an equal 47 would endorse Trump in the elections. In the final New York Times/Siena College national poll from October 20 to 23, the two aspirants are tied at 48 per cent. The remaining four per cent are yet to decide on their preference. A separate poll conducted by the Financial Times and the University of Michigan's Ross School of Business showed that 44 per cent of respondents trust Trump to handle the economy as opposed to 43 per cent for Harris.

Georgia's pro-Western opposition disputes election result that could decide EU path

AP ■ TBILISI

Georgia's pro-Western opposition disputed the results of the parliamentary election after officials declared Sunday the ruling party led the crucial vote that could decide whether the country remains on the path to joining the European Union or comes under Russian sway. The Central Election Commission said Georgian Dream won 54.8 per cent of Saturday's vote with almost 100 per cent of ballots counted. Following a divisive pre-election campaign, initial figures suggested turnout is the highest since the ruling party was first elected in 2012. Georgian electoral observers, who stationed thousands across the country to monitor the vote, reported multiple violations and said the results "do not correspond to the will of the Georgian people." Georgian Dream has become increasingly authoritarian, adopting laws similar to those used by Russia to crack down on freedom of speech. Brussels suspended Georgia's EU membership process indefinitely because of a "Russian law," passed in June. Bidzina Ivanishvili, the billionaire founder of Georgian Dream who made his fortune in Russia, claimed victory almost immediately after polls closed and said, "It is rare in the world for the same party to achieve such success in such a difficult situation." He had vowed ahead of the election to ban opposition parties should his party win. Tina Bokuchava, the chair of the United National Movement opposition party accused the election commission of carrying out Ivanishvili's "dirty order" and said he "stole the victory from the Georgian people and thereby stole the European future." She indicated the opposition would not recognise the results and "will fight like never before to reclaim our European future." The UNM party said its headquarters were attacked on Saturday while Georgian media reported two people were hospitalised after being attacked outside polling stations. The pre-election campaign in the South Caucasus nation of 3.7 million people, which borders Russia, was dominated by foreign policy and marked by a bitter fight for votes and allegations of a smear campaign. Some Georgians complained of intimidation and being pressured to vote for the governing party. Georgian Dream scored its highest share of the vote — polling almost 90 per cent — in the Javakheti region of southern Georgia, 135 kilometres west of the capital Tbilisi where it failed to get more than 44 per cent of the vote in any district. Before the election, The Associated Press travelled to the region where many people are ethnic Armenians who speak Armenian, Russian and limited Georgian. Some voters suggested they were instructed how to vote by local officials while several questioned why Georgia needed a relationship with Europe and suggested it would be better off allied with Moscow. Around 80 per cent of Georgians favour joining the EU, according to polls, and the country's constitution obliges its leaders to pursue membership in that bloc and NATO. Many fear that Georgian Dream is dragging the country toward authoritarianism and killing off hopes of becoming an EU member.

Satellite reveals damage from Israeli attack at 2 bases in Iran

AP ■ DUBAI

An Israeli attack on Iran damaged facilities at a secretive military base southeast of the Iranian capital that experts in the past have linked to Tehran's onetime nuclear weapons programme and at another base tied to its ballistic missile programme, satellite photos analysed Sunday by The Associated Press show. Some of the buildings damaged sat in Iran's Parchin military base, where the International Atomic Energy Agency suspects Iran in the past conducted tests of high explosives that could trigger a nuclear weapon. Iran long has insisted its nuclear programme is peaceful, though the IAEA, Western intelligence agencies and others say Tehran had an active weapons programme up until 2003. The other damage could be seen at the nearby Khojir military base, which analysts believe hides an underground tunnel system and missile production sites. Iran's military has not acknowledged damage at either Khojir or Parchin from Israel's attack early Saturday, though it has said the assault killed four Iranian soldiers working in the country's air defence systems. Iran's mission to the United Nations did not immediately respond to a request for comment, nor did the Israeli military. However, Iranian Supreme Leader Ayatollah Ali Khamenei on Sunday told an audience that the Israeli attack "should not be exaggerated nor downplayed," while stopping short of calling for an immediate retaliatory strike. Israeli Prime Minister Benjamin Netanyahu separately said Sunday that Israel's strikes "severely harmed" Iran and that the barrage "achieved all its goals." It remains unclear how many sites in total were targeted in the Israeli attack. There have been no images of damage so far released by Iran's military. Iranian officials have identified affected areas as being in Ilam, Khuzestan and Tehran provinces. Burned facilities could be seen in satellite images from Planet Labs PBC around Iran's Tange Bijar natural gas production site in Ilam province on Saturday, though it wasn't immediately clear if it was related to the attack. Ilam province sits on the Iran-Iraq border in western Iran. The most telling damage could be seen in Planet Labs images of Parchin, some 40 kilometres southeast of downtown Tehran near the Mamalu Dam. There, one structure appeared to be totally destroyed while others looked damaged in the attack. At Khojir, some 20 kilometres away from downtown Tehran, damage could be seen on at least two structures in satellite images.

Indian Overseas Bank		RO : NHPC Complex, Sector-33, 1st & 2nd Floor, Faridabad-121003, Telephone : 0129-2259544-50

For details please contact the service provider portal <https://bapi.in>
4. Bids in the prescribed formats shall be submitted "online" through the portal <https://bapi.in> along with the detail of EMD & scanned copy of KYC documents including photo, PAN Card & address proof to the service provider and to the Authorised Officer before 05.00 P.M on 14.11.2024 otherwise shall not be eligible for consideration.
5. The EMD and other deposits shall be remitted through EFT / NEFT / RTGS to the Bank account as specified above and the amount of EMD paid by the interested bidder shall carry no interest. The amount of EMD paid by the successful bidder shall be adjusted towards the sale price.
6. Bids without EMD shall be rejected summarily.
7. Online auction sale will start automatically on and at the time as mentioned above. Auction / bidding will initially be for a period of 120 minutes with auto extension time of 10 minutes each till the sale is concluded.
8. The property shall be sold to the successful bidder. The successful bidder (purchaser) as declared by the Authorised Officer shall deposit 25% of the sale price (inclusive of the EMD) immediately on the same day and not later than the next working day. The balance amount of sale price shall be paid within 15 days from the date of confirmation of auction sale. Failure to remit the entire amount of sale price within the stipulated period will result in forfeiture of deposit of 25% of the bid price to the secured creditor and forfeiture of all claims over the property by the purchaser and the property will be resold.
9. The sale certificate will be issued in the name of the purchaser only, after payment of the entire sale price amount and other taxes/charges, if any.
10. The purchaser shall bear the charges/ fee payable for conveyance such as registration fee, stamp duty, etc., as applicable as per law.
11. The Authorised Officer has the absolute right to accept or reject any bid or postpone or cancel the sale, as the case may be without assigning any reason whatsoever.
12. The property is being sold on "As is Where is", "As is What is", and "Whatever there is" basis. The Bank has disclosed only the known encumbrances, statutory liabilities, if any, as above. However, the intending bidders should make their own independent inquiries at their own costs with concerned co-operative housing societies/SRO as well as the Revenue Records regarding the title, nature, description, condition, encumbrance, lien, charge, statutory dues, etc of properties put on auction and claims/rights/dues affecting to the properties, prior to submitting their bid. The properties are being sold with all the existing and future encumbrances whether known or unknown to the bank. The Authorized Officer/Secured Creditor shall not be responsible in any way for any third party claims/rights/dues.
13. Sale is subject to confirmation by the secured creditor.
14. EMD of unsuccessful bidders will be returned through EFT / NEFT / RTGS to the bank account details provided by them in the bid form and intimated via their e-mail id.
15. For detailed terms and conditions of the sale, please refer to the link provided on Indian Overseas Bank's website i.e. www.ioib.in [https://www.ioib.in/TenderDetails.aspx?Tendertype=E_Auction] or <https://bapi.in>

Mcap of nine top-10 most valued firms drops as markets tumble

PTI ■ NEW DELHI
Nine of the top-10 most valued firms together lost a whopping Rs 2,09,952.26 crore from market valuation last week, in line with weak trends in equities, with Hindustan Unilever and Reliance Industries Limited taking the biggest hit. Last week, the BSE benchmark tanked 1,822.46 points or 2.24 per cent. The dismal Q2 earnings so far have aggravated the investors' woes while persistent FII selling continued to create havoc in the market," said Prashanth Tapse, Senior VP (Research), Mehta Equities Ltd. From the top-10 pack, HDFC Bank emerged as the only winner. The market valuation of

Hindustan Unilever eroded by Rs 44,195.81 crore to Rs 5,93,870.94 crore. Reliance Industries' valuation tumbled Rs 41,994.54 crore to Rs 17,96,726.60 crore. State Bank of India's market valuation plummeted by Rs 23,137.67 crore to Rs 14,68,183.73 crore. The valuation of Life Insurance Corporation of India (LIC) diminished by Rs 19,797.24 crore to Rs 5,71,621.67 crore, and that of Infosys declined by Rs 10,629.49 crore to Rs 7,69,496.61 crore. ITC's mcap fell by Rs 5,690.96 crore to Rs 6,02,991.33 crore, and that of ICICI Bank went lower by Rs 5,280.11 crore to Rs 8,84,911.27 crore. However, the mcap of HDFC Bank jumped Rs 46,891.13 crore to Rs 13,29,739.43 crore. Reliance Industries retained the title of the most valued firm, followed by TCS, HDFC Bank, Bharti Airtel, ICICI Bank, Infosys, State Bank of India, ITC, Hindustan Unilever and LIC.

Government plans to issue ALMM to push India's green energy transition

PTI ■ NEW DELHI

The government is planning to introduce an Approved List of Models and Manufacturers (ALMM) for solar cells on the lines of module manufacturing to boost India's transition towards green energy. The government is aiming to make the second list (List II) under the ALMM for solar PV cells effective April 1, 2026. The government introduced the ALMM order (List I) in 2019 for solar modules to boost the manufacturing and usage of made-in-India solar panels. It was made mandatory to source PV modules from models and manufacturers included in the ALMM List I. According to an office memorandum of the Ministry of New and Renewable Energy, the ALMM order dated January 2, 2019,

specified models and manufacturers of solar PV modules, whereas List-II will identify and include models and manufacturers of solar PV cells. However, to date, List II of solar PV cells has not been issued because the installed capacity of solar PV cells in the country was lower than the demand, the government document said. "With installed capacity of solar PV cells in the country expected to increase

substantially in the next two years, it has been proposed to issue List-II of solar PV cells under ALMM, which shall be effective from April 1, 2026," according to the draft amendment to ALMM order for implementation of ALMM for Solar PV cells. The draft paper also proposed that the solar PV modules -- which are presently enlisted in ALMM List-I (for solar PV modules) with an expiry date beyond March 31, 2026 -- will also have to use solar PV cells included in ALMM List-II (for solar PV cells) from April 1, 2026, onwards. If the modules don't have the cells included in List-II, they will be liable to be delisted from ALMM List-I, as per the draft. "All projects where the last date of bid submission is before the issuance of this order shall stand exempted from the mandatory requirement of using solar PV cells from ALMM List-II," the draft said. Sustainable Projects and Developers Association (SDPA) President Vineet Mittal said the introduction of an ALMM mechanism for solar cells will boost domestic manufacturing by ensuring that only approved, high-quality, and reliable products are used in government-backed projects. This will promote self-reliance in the sector and significantly reduce dependency on imports, which is crucial for achieving India's long-term renewable energy goals, he added. Yogesh Dua, co-founder of UTL Solar, said, "We welcome the efforts being taken by the government to make the industry more sustainable. It will not only push the vision of 500 GW but also meet our goals. The move will also benefit consumers with efficient solar projects."

Festive sales: Buoyed by online offers, appliance makers expect growth

PTI ■ NEW DELHI

The appliance & consumer electronics industry expects around 30 per cent growth in the festive season sales this year after a double-digit booster from online sale events of leading e-tailers Flipkart and Amazon and an expected final thrust from offline channels during Dhanteras week. This festive season, premiumisation is the flavour, where consumers are willing to pay extra for features such as energy efficiency, higher capacity and larger size and even showing interest in the high-end AI & IOT Technology-driven products, industry leaders said. Companies such as LG Electronics, Panasonic, Sony, Godrej Appliances and Haier started festive sales with a good kick start from the Onam festival and expect to continue the momentum till the remaining week of the nearly 45-day festive period, which concludes after Diwali. To make the premium range as large screen TV panels above 51" screen size, higher load capacity washing machines and French door refrigerators (with two side-by-side doors), the manufacturers are incentivising with attractive

financing schemes, investing in branding and promotion on digital and traditional mediums. "There is good growth across all categories, especially in premium products like large-capacity washing machines and refrigerators. We are witnessing good demand for products featuring AI & IOT technology," said LG Electronics India, Senior VP-Home Appliances Sanjay Chitkara. He added that this festive season, demand for premium products has also increased even from the smaller tier II & III markets, which is encouraging. "Upcoming week is significant for festive sales as generally during Dhanteras there will be a high sell-out across India," said Chitkara. Moreover, this year's festive season sale also coincides with a strong wedding season this winter. "There were not many wedding dates in summer this year therefore wedding purchases are complimenting festival sellout," he said. Godrej Appliances Business Head and EVP Kamal Nandi said helped by a good monsoon markets have picked up this festive season. The premium leading the charge this season, though

mass product segments also have shown significant growth. "At Godrej Appliances, we have seen a growth of close to 40 per cent since the start of Onam in September compared to last year. October, driven by a combination of Durga Puja /Navratri and the upcoming Diwali celebrations has delivered close to 45 per cent surge so far," he said. Over the festive season sales on e-commerce platforms such as Amazon and Flipkart, Nandi said Godrej Appliances has overall "achieved an impressive 70 per cent-plus growth compared to last year". Panasonic India's e-commerce continued to grow in double digits and during Navratri, it witnessed over 20 per cent growth and hopes to

continue momentum till Diwali. "Consumption remains bullish for premium appliances. Whether it is offline or, online consumers are opting for higher ASP (Average Selling Price) products" said Panasonic Marketing India Managing Director Fumiyasu Fujimori. Sony India is also witnessing a surge in demand for large screen televisions especially 55" and above, with 75" and 85" screen sizes gaining significant traction, said its Managing Director Sunil Nayyar. "We are offering lucrative bank offers and easy finance schemes to make the purchase easier for our customers both in the offline and online space," he said. Industry body CEAMA (Consumer Electronics and

Appliances Manufacturers Association) projects around 20 growth this festive season. Both e-commerce platforms and brick-and-mortar stores are witnessing this positive trend, underscoring the significance of the consumer electronics segment during the festive season, said its President Sunil Vachani. "During this festive season, both online and offline sales have seen a remarkable boost, where we have witnessed online marketplaces alone achieving high sales figures within a week-a 26% rise from 2023," he said. There has been a particularly strong demand for LED TVs, air conditioners, large refrigerators, microwaves, and washing machines, driven by the launch of new models and attractive offers, Vachani added. Haier India President Satish NS said its premium products are doing "extremely well" led by LED panels above 51-inch screen size and high-load washing machines. "People are willing to pay for premiumisation through the consumer financing schemes, which is a good sign for the industry. My expectation is that we should be doing about a minimum of 30-35 per cent growth in terms of value growth," he said.

Turkiye's measures on polyester staple fibres impact exports: India seeks compensation

PTI ■ NEW DELHI

India has sought compensation from Turkiye as Ankara's decision to extend safeguard measures on polyester staple fibres has impacted the product's exports, an official said. India flagged concerns and impact from these measures during a recent bilateral consultations with Turkiye under the WTO's safeguard agreement. On October 14, India sought consultations with Turkiye under the agreement to extend safeguard measures on polyester staple fibres. "We have sought compensation as we have a loss of trade. India has the option to propose retaliatory customs duties equivalent to the value of export loss if the issue will not be resolved through consultations," the official said. India has exported these fibres worth USD 22.18 million during 2023-24. It was USD 23.55 million in 2022-23. In September, Turkiye decided to extend safeguard measures against imports of polyester staple fibres. "As a member having a substantial trade interest in the export of products concerned, India had requested for consultations with Turkiye on the extension of the measures," the official added. As per a provision of the Agreement on Safeguards, a WTO member country proposing to apply safeguard measures shall provide adequate opportunity for prior consultations with those members having a substantial interest as exporters of the product concerned, with a view to reviewing the information provided, exchanging views on the measure, and reaching an understanding on ways to achieve the objective set out in the agreement. India's overall exports to Turkiye stood at USD 6.65 billion in 2023-24, while imports were USD 3.78 billion. An expert said that India has been "very proactive" in the recent past about trade remedy measures and is seeking consultations with its trading partners if its trade is getting affected. Last month, India proposed the imposition of retaliatory customs duties, under the WTO (World Trade Organisation) norms, on certain value of goods imported from the EU, as the two sides have failed to reach a consensus on the European Union's safeguard measures on some steel products. The EU has extended safeguard duties on imports of certain steel product categories with an out-of-quota duty of 25 per cent, for another two years till 2026. In 2022, India had also proposed to impose retaliatory customs duties under the WTO norms on about USD 250 million worth of goods imported from the UK against Britain's move to extend safeguard duty and quota restrictions on the import of certain steel products till 2024.

Brewers oppose Karnataka beer tax hike

PNS ■ NEW DELHI

The Brewers Association of India (BAI) on Sunday requested the Karnataka Government to not go ahead with proposed amendments to reclassification of beer and restructuring of taxes, saying these would work against both the Government and the industry. BAI's submission is in response to a draft notification issued by the Karnataka government seeking stakeholders opinion on matters related to regulation of beer. In the draft notification the Government has sought to mandate declaration of malt and sugar content on the label of beer products, increase taxes on the strong beer, and raise the minimum price of beer in the state. The draft notification introduces a new definition of beer which, amongst others, limits the addition of sugar to 25% in beer and makes it mandatory for the beer products to display the content of malt and sugar on the label. Brewers in the state have objected to these proposals. Commenting on the matter, Vinod Giri, the Director general of the BAI said, "Beer has no sugar in it. There is a definition of beer set by the FSSAI which are followed by all states and we don't see the need to change them by one state. Having said that, our larger concern is regarding putting it up on the label. Beer labels are already cluttered with so much statutory information and warnings. Adding more

information, especially when it is not even relevant, will just make them more cluttered and unappealing." The draft notification also proposes to increase the excise duty on strong beer by 100% to Rs 20 per bulk litre, increases the minimum billing price for beer in the state to Rs 300 per case and increases Additional Excise Duty (AED) to 195% of the billing price or Rs 130 per bulk litre whichever is higher. On the proposed hike in minimum beer price of beer, Mr Giri said: "If implemented, it would be the third increase in tax on beer in the last 15 months. That's unheard of! It almost seems the direction of the policy is to make beer prices uncompetitive compared to hard liquor so as to shift consumers from a milder form of alcohol like beer to hard spirit like IMFL. That is something that health bodies such as the WHO do not recommend for public policy. Governments should not do that consciously." BAI has objected to these, saying that these proposals will hit the beer industry in the state very hard. BAI, in its letter to the Government states that the taxes on beer have already been increased twice in the last one year and one more tax increase will push the beer price amongst the highest in the country.

BAI has said that such increase may lead to drop in sales of beer in the state and encourage cross border unlawful imports, eventually leading to fall in tax collection of the Government. Vinod Giri added, "The proposed tax increases are going to hit consumers two ways. One, the price of strong beer, which accounts for 90% of beer sold in the state, will go up by Rs 10-15 per bottle making it amongst the most expensive in the country, and raise the minimum price of the beer from current Rs 95 per bottle to Rs 140 per bottle. Such a rapid and massive increase in tax on beer is surprising as it is third time in less than a year. Further, the Government is at the same time reducing taxes on liquor. Increasing beer prices and holding or reducing liquor prices will only encourage consumers to switch from mild form of alcohol to hard liquor, which is not what the World Health Organization recommends." The letter states: "Karnataka is recognized for its strong beer culture. It has 11 breweries with thousands of crores of investment, providing employment to 7500 people. It is home to two of India's largest beer makers. All this has been made possible by supportive and progressive policies by the Government. However, we are concerned that some proposed changes could hinder the growth of the industry, diminish the state's investment appeal, or drive future investments elsewhere."

ONGC head should be chairman of subsidiary HPCL, says synergy panel

PTI ■ NEW DELHI

The oil and Natural Gas Corporation Chairman and Managing Director should also be the chair of the firm's subsidiary Hindustan Petroleum Corporation in line with the universal practice of a corporate group having only one chairman, a panel appointed to work out synergies between the two firms said in its report. India's top oil and gas producer Oil and Natural Gas Corporation (ONGC) had, in January 2018, bought the government's entire 51.11 per cent stake in HPCL for Rs 36,915 crore. The nation's third-biggest oil refining and fuel marketing company thereafter became a subsidiary of ONGC. But Hindustan Petroleum Corporation Ltd (HPCL), which initially did not even recognise the new owner, continues to be headed by a chairman and managing director, who does not report to parent firm ONGC or its board. ONGC has got just one board position on HPCL following the acquisition. On a prod from the Ministry of Petroleum and Natural Gas, ONGC appointed a three-member panel to work out synergies between ONGC and HPCL. The panel, which comprised former oil secretary GC Chaturvedi, former ONGC chairman Dinesh Kumar Sarraf, and former HPCL head MB Lal, a couple of months back submitted its report to ONGC, which forwarded it to the ministry for further action, two

sources with direct knowledge of the matter said. The panel in the report said the ONGC chairman and managing director should be the chair of the board of not just ONGC but also all its subsidiaries - ONGC Videsh Ltd, HPCL, Mangalore Refinery and Petrochemicals Ltd, and ONGC Petro additions Limited (OPAL). The subsidiaries should be headed by the CEO and Managing Directors, who would report to the ONGC chairman, they said citing the report. Except for HPCL, all other subsidiaries - OVL, MRPL and OPAL - are headed by CEO and Managing Director. The ONGC chairman heads the board of OVL, MRPL and OPAL. "ONGC and all its direct subsidiaries should have one chairman and the different units be run by a board and MD/CEO," a source aware of the report said. "The board of step-down subsidiaries should be headed by the MD/CEO of the immediate parent firm." The panel was formed to work out synergies between ONGC and HPCL and optimise processes and businesses.

Mukesh Kumar Surana, who was the chairman and managing director of HPCL when ONGC bought out the government stake in January 2018, retired on April 30, 2022. His successor, Pushp Kumar Joshi superannuated on August 31 this year. No one has so far been appointed as HPCL chairman till now. Another source said the government should use this opportunity to implement the panel report. It should appoint an MD and CEO of HPCL and make the ONGC chairman the head of its board. Even after the Union Cabinet approval and ONGC buying out the entire government stake, HPCL for over one and half years refused to recognise ONGC as its promoter. It listed ONGC's shareholding of 51.11 per cent as a 'public shareholder' in as many as six quarterly shareholding filings with stock exchanges post-January 2018. HPCL listed the President of India with nil shareholding as its promoter in those filings. This is despite the oil ministry's explicit advice, sources said, adding that HPCL delayed the eventual by seeking "clarifications" from various authorities.

INBRIEF

INDIAN CHEMICAL SOCIETY RECOGNIZES PROFESSOR
AMRITSAR: Professor Narpinder Singh, Vice Chancellor of Graphic Era Deemed to be University, has been selected for the prestigious Prof. Priyadarshan Ray Memorial Award 2023 by the Indian Chemical Society, founded in 1924, is India's premier professional organization dedicated to promoting chemical sciences through research, education, and industry collaboration.

MORE FESTIVE SPECIAL TRAINS BY NFR
MALIGAON: In a bid to clear the additional rush of passengers during this ongoing festive season of 2024, it has been decided to operate six additional pairs of festive special trains.

GURUGRAM: TPower Grid Corporation of India Limited (POWERGRID) - a Maharatna CPSU under Ministry of Power, celebrated its 35th raising day across the country with great zeal and enthusiasm.

DELHI'S AIR POLLUTION CRISIS

LASTING SOLUTIONS FOR HEALTH AND GREENERY

Keep the windows closed, avoiding indoor burning of wood, and using a wet mop for cleaning can reduce dust exposure in this high AQI writes GUFRAAN BEIG

With the air quality in the national capital already in the "poor" category ahead of Diwali, the Delhi government has swung into action, coinciding with the Centre's directive to implement GRAP Stage 1 and other related initiatives. City residents are bracing themselves for, yet another long winter of air pollution and the health hazards it causes. Air Quality Index (AQI) is a measure of the quantum of harmful particles, fumes, chemicals, and oxides in the air. It gauges levels on a scale from 0 to 500 and plays a crucial role in understanding the scale of the air pollution crisis. While the AQI under 50 is ideal and under 100 is liveable, once it crosses this level, it progressively indicates that the air we breathe is getting more harmful. AQI levels (100-200) can lead to eye and throat irritation, while higher levels can have several serious health impacts. During the winter months, Delhi's AQI levels become hazardous, exceeding 200 resulting in prolonged exposure to unhealthy levels of PM2.5. Several medical studies show that such exposure can lead to a range of serious health issues, including reduced lung function and development, cancer, premature mortality, cardiovascular symptoms such as unusual chest pain, and hematological abnormalities like anemia, leukemia, thrombocytosis, and venous thromboembolism. To mitigate exposure, people are advised to limit outdoor activities, especially in the early morning and after sunset to

TO MITIGATE EXPOSURE, PEOPLE ARE ADVISED TO LIMIT OUTDOOR ACTIVITIES, IN THE EARLY MORNING AND AFTER SUNSET. TO AVOID HEAVY EXERTION OPT FOR SHORT WALKS, AVOID JOGGING, AND TAKE FREQUENT BREAKS. IF UNUSUAL SYMPTOMS ARISE, SUCH AS COUGHING OR CHEST DISCOMFORT, STOP ALL ACTIVITIES

avoid heavy exertion. You can opt for short walks, avoid jogging, and take frequent breaks. If unusual symptoms arise, such as coughing or chest discomfort, stop all activities. Keeping windows closed, avoiding indoor burning of wood or candles, and using wet mopping for cleaning can further reduce dust exposure. N95 or P100 masks may provide some protection when outside. Also, the reality is that the transportation sector is growing rapidly, fuelled by increased vehicle ownership and the need to modernise outdated engine technology. The Government is proactively promoting electric mobility, recognising its immense potential to transform air quality. While it can upscale its efforts with more

incentives and better infrastructure, citizens must also collaborate in this transition by embracing EVs more actively and making them their primary mode of personal transport. With the Delhi Metro and Delhi Transport Corporation already committed to using zero emission electric power trains for their trains and buses, it's time for residents of the Capital too to follow their lead and make a stronger collective effort to eliminate dangerous exhaust pollutants, significantly improving air quality and public health. We must create a cleaner and healthier future for Delhi residents. Controlling tailpipe emissions is critical for this. Mandating vehicle electrification, curtailing emissions from vehicles running on petrol and diesel, and retiring highly polluting older models where the emissions can't be reduced must be considered. While this will not be easy, the time for action is now or it may get too late. Concerns about the environmental impact of increased electricity demand for EVs will be addressed by transitioning to renewable energy sources. As India makes more strides in this direction, the growth of clean energy can mitigate the reliance on coal, ultimately benefiting the environment.

ARE WE ON THE PATH TO END AIDS BY 2030?

BY SHOBHA SHUKLA

The reality is a mix of yes and no while the facts shared in the latest report by UNAIDS reveal that as a world we are not already on the path, they do show that we can be there if world leaders take bold actions ensuring that the HIV response has the resources it needs. Progress made in the past decade notwithstanding, there is still a huge gap between the targets set up to end the AIDS epidemic by 2030. The UNAIDS report- The Urgency of Now: AIDS at a Crossroads- shows that globally, of the 39.9 million people living with HIV, nearly 25% (9.3 million), are not receiving life-saving treatment, including 660,000 children living with HIV. Globally, 4,000 young women and girls will become infected with HIV every week in 2022.

DEVELOP NEW HIV PREVENTION OPTIONS AND DELIVER THEM EQUITABLY

"We have to fill the product introduction gap - accelerate time to regulatory approvals of product introduction to impact; demand creation and programme platforms for prevention; and differentiated and integrated service delivery for people. We must also fill the product development gap - long acting and event driven; user-friendly and developed with users; dual purpose and multi-purpose methods must be our top priority," says Mitchell Warren, Executive Director of AVAC. PrEP is one of the new HIV prevention options for HIV-negative people who can reduce the risk of HIV acquisition by taking an antiretroviral medication and the latest addition is the long acting injectable lenacapavir that has been found to be highly effective in preventing HIV in cisgender women as well as in gay, bisexual and transgender people.

CHOICE MATTERS ON MULTIPLE LEVELS

Studies have proved that expanding testing and treating and then introducing PrEP has lowered the incidence of HIV in communities that had access to it. In Warren's opinion, "We should not forget that biomedical products- whether for prevention or for treatment- exist in behavioural and structural contexts. None of these methods can help if we do not address access and equity. While we develop biomedical products around the pathogen-around the HIV virus- we need to design the programmes around the people. That is what matters and that is how you get to impact.

ROLLOUT OF NEW TOOLS

The deadly delays between developing path breaking health technologies and benefiting those for whom these were developed must end. We have to ensure vaccines convert into vaccinations of the 'last person in queue' first - without any delay. Same holds true for the full range of disease prevention, diagnostics, and treatments we have today. The 5th HIVR4P Conference to be convened in Lima, Peru will bring together around 1500 participants including representatives of key and affected populations in the HIV response to advance scientific knowledge, and enhance scientific and community collaborations to address the challenges and opportunities in HIV prevention. *The author is the award-winning founding Managing Editor and Executive Director of CNS (Citizen News Service)*

IMPACTING ACADEMIC SUCCESS

Effect of Improper Sleep, Mental Health on Students' Performance

BY ARCHANA PADHYE

As an educator, one tends to observe that sleep patterns are strongly linked to psychological well-being and academic performance. In today's fast-paced society, students are always undergoing pressure to maintain their social life, balance extracurricular activities, and be academically fit. Unfortunately, sleep is the most crucial component that is sometimes forgotten. In this article we will look at the connections between healthy sleep patterns, mental wellbeing, and academic success and discuss ways to support our students' general wellbeing. **The Role of Sleep in Academic Success** Rest is necessary for cognitive and emotional regulation. While asleep, the brain processes information learned during the day through consolidation of learning and memory. Thus, students learn better and pay better attention, leading to higher levels of academic performance when they are well rested. On the other hand, sleep deprivation leads to lack of focus and irritability. It can be much tougher for students to sit in class and complete tasks in hand when they are sleep deprived. Sleep timings can vary by age, when it comes to students. **Mental Health and Its Impact on Learning** Mental wellbeing contributes much to students' academic performance. Stress, anxiety, and even depression are increasing in school-going children. It

isn't self induced, it is normally facilitated by pressure related to academics. This leads to distraction, low motivation, and poor time management. The following suggestions have been

put into practice to help foster healthier sleeping habits and mental well-being for students so they can best be prepared: **Create a Consistent Sleep Schedule** - Encouraging students to go to bed and

wake up at the same time every day—even on weekends—helps regulate their internal body clock. This makes it easier to fall asleep and wake up refreshed. **Limit Screen Time Right Before**

Sleep - Radiation emitting through mobile phones, tablets, and computers interferes with the production of melatonin, the sleep hormone. Regulating the screens before bed time has to be a ritual.

Promoting Relaxing Methods - Engaging in relaxing activities such as deep breathing, meditation, listening to soulful music or reading a book before bed may ease the student into the spirit of sleeping. These methods also reduce levels of anxiety and stress, thus enhancing mental well-being. **Time Management** - Students often end up feeling extremely overwhelmed by the tasks in hand, exams, and extracurricular activities. Breaking down tasks into different elements, as well as a prioritisation of workloads, can actually ease the burden and reduce the stress associated with it. **Advocating Physical Activity** - Physical activities tire the body, thus improving the quality of sleep. In addition to that, regular physical activity reduces anxiety and depression, hence encouraging mental health. Balancing sleep, mental health, and academic performance can really impact the overall success of the student. So, educators and counselors should reinforce the importance of sleep in healthy mental habits and provide students with the tools to succeed not only in the classroom but also in their personal space. Together, schools can create this kind of school environment that works to make students shine in academics and emotionally as well.

INDIAN BATTERS WERE EXPOSED BY SANTNER; KOHLI'S FORM NOT A CONCERN: SIMON DOULL

PTI ■ PUNE

Former New Zealand pacer Simon Doull attributed India's shocking series defeat to their batsmen's inadequacies against spin bowling but he was not ready to write off underwhelming star batter Virat Kohli.

Left-arm spinner Mitchell Santner grabbed 13 wickets as the Kiwis walloped India by 113 runs in the second Test here on Saturday to take an unassailable 2-0 lead in the three-match series.

"There's a misconception that Indian players are better players of spin. I think they've had better spinners and they've been able to expose the opposition batters. But in this Test (at Pune), their batters were exposed a little bit by a very, very good performance from Mitchell Santner," Doull told PTI Videos.

Even though Doull said negating spin is no longer a forte of many teams, he conceded that Indian batters' capitulation against "not a world-class spin bowling attack" of New Zealand offered some worrying signals.

"I think you get used to playing on such good wickets. And when it does turn, techniques get exposed a little bit. For a long time, when

India played on turning surfaces, they still had the best spinners in the world in Jadeja and Ashwin.

"So, they've been able to undo other sides. In this Test match, they were undone by a New Zealand side that, with all due respect, is not a world-class spin bowling attack. So, that will be a concern of some sort," he detailed.

Kohli's modest run in the ongoing series was one of the talking points, as the veteran batter succumbed to spin three times in four innings.

But Doull did not read too much into the former Indian captain's dismal form, and said it would not have an effect in the upcoming five-match Test series against Australia.

"There're issues against spin but he's not the only one. You're not going to find those (spin-friendly) conditions in Australia. He (Kohli) had a great series Down Under."

"He plays quick bowling as well as he has for the last four or five years. So, I don't think it's a concern," he noted.

The 55-year-old also defended Indian skipper Rohit Sharma for his defensive approach and placed veteran bowlers in the side as culpable for the series defeat.

"I think winning the toss is crucial. For Rohit, the wrong decision at Bangalore was crucial. He's admitted to that as well. New Zealand seamers took advantage of that," he said.

Rohit elected to bat first in the opening Test under overcast conditions and his side got

bowled out for a pathetic 46, which eventually transpired into an eight-wicket defeat.

The second Test saw a different scenario as New Zealand skipper Tom Latham won the toss and smartly elected to bat first, realising that batting fourth on Pune pitch would be a tough task.

"Winning the toss in this Test (at Pune), when you knew, pitch was going to turn...it might not have looked like a big score, 259 in the (NZ) first innings.

"But it was made to look like a really big score because the ball was turning. So, I think Tom Latham's captaincy was outstanding for the most part."

Doull, who took 98 wickets from 32 Tests, said senior bowlers too should have taken more responsibility. "People say Rohit might have been a touch defensive, but that comes down to the bowlers. There're very, very senior spin bowlers in that side.

"If you can't trust an Ashwin or a Jadeja to set his own field, you can't blame Rohit for that all the time. I think the bowlers have to have some part to play in that as well," he explained.

Moving over to the upcoming Border-Gavaskar Trophy, Doull said winning the third Test at Mumbai against the Kiwis will do a world of good

to their morale ahead of the marquee clash starting next month.

"They have to forget about this series. They could go out and win the third Test in Wankhede and go to Australia with a little bit more confidence. In Australia, quick bowlers will be required. India batters, I think, will be a lot better off on good surfaces. That's what you tend to get in Australia."

Doull said India have good enough players to tackle the Australian challenge.

"It'll come down to how they play the quick bowlers from Australia - the tall, slightly bouncier bowlers. But they've got the batters to do the job, I think, in good conditions.

"And if later on in the Test matches, whether it be in Perth or whether it be in Sydney, it starts to turn and bounce a little bit, then their spinners will come into play." New Zealand also became the first visiting side to win a Test series in India after 12 years, and Doull termed it remarkable.

Shami's absence big loss for India, but won't underestimate reserve pacers: McDonald

PTI ■ SYDNEY

Australia head coach Andrew McDonald feels the absence of Mohammed Shami during the marquee Border Gavaskar Trophy next month is a huge loss for India, but stressed that the hosts won't underestimate the quicks stepping in for the seasoned pacer.

Shami, who had played a significant role in India's successful 2018 tour of Australia, has not played since the ODI World Cup final last November due to an ankle injury. He underwent surgery and was subsequently rehabilitating at the National Cricket Academy (NCA) but developed swelling in his knees which affected his rehabilitation.

"Mohammed Shami is a big loss," McDonald was quoted as saying by ESPNcricinfo on ABC's Offsiders.

"The way our batters speak about his relentless nature, his line and lengths, the way he goes about his business, a real good complimenting skill set to Bumrah so think that one-two combo they'll lack a little bit, and they'll miss that."

India have handed maiden call ups to Delhi speedster Harshit Rana and Andhra seam bowling all-rounder Nitish Kumar Reddy while quicks Akash Deep and Prasidh Krishna have also

been selected for the marquee series. Jasprit Bumrah will lead the fast bowling department.

"But needless to say we saw what happened last time, they had reserves that came in and did the job as well so they cannot be underestimated at all," he added.

Australian teenager Sam Konstas, who announced himself with twin Sheffield Shield centuries for New South Wales earlier this month, is in the reckoning to partner Usman Khawaja at the top in the five-match series.

"I think we're picking the best team for here and now, and if that does encompass a younger player, then we'll head down that direction," he said.

McDonald stated that if the selectors believe the 19-year-old is the best option, he will receive a Test debut, regardless of his lack of first-class experience.

"I've heard people commenting 'do you protect the player?' If they're ready, they're ready in our mind, and if Sam's capable and we feel as though is capable to fill that spot I don't think that the opponent should come into the equation."

Australia will host India for the Border Gavaskar Trophy, starting November 22 in Perth.

Sivarajan, Sukant shine as India wins 24 medals at Japan Para Badminton International

PTI ■ TOKYO

Sivarajan Solaimalai and Sukant Kadam delivered standout performances, helping India win an impressive 24 medals at the Japan Para Badminton International on Sunday. India won six gold, nine silver and as many bronze medals in the tournament.

Sivarajan enjoyed a double victory, clinching gold in the men's singles SH6 class and partnering with Sudarsan Saravanakumar Muthusamy to win the top prize in men's

doubles. Sukant also excelled, taking gold in men's singles (SL4) and silver in men's doubles (SL3-SL4) with partner Dinesh Rajaiiah. He triumphed over fellow Indian Tarun in a thrilling singles final, winning 21-12, 21-10, while Naveen Sivakumar and Surya Kant Yadav secured bronze medals.

In the doubles final, Sukant and Dinesh fought valiantly but fell short against compatriots Umesh Vikram Kumar and Surya Kant Yadav, losing 5-21, 22-20, 16-21 to take home silver.

"Winning gold in singles and silver in doubles is incredibly special," Sukant said in a release.

"I thank my coaches, support team, and the entire para-badminton community for their unwavering support.

This victory fuels my motivation to keep pushing boundaries." In other events, reigning Paralympic champion Kumar Nitesh claimed silver after a close match against Japan's Daisuke Fujihara, losing 16-21, 21-18, 19-21 in the SL3 finals.

In women's SU5, Manisha Ramdass captured gold by defeating Japan's Mamiko Toyoda 21-12, 21-18, while Neeraj settled for silver in the women's SL3 category after falling to Coraline Bergeron. Neeraj also finished second

in mixed doubles with Surya Kant Yadav in the SL3-SU5 category. In men's doubles SU5, Hardik Makkar and Ruthick Ragupati won gold, while Dev Rathi and Indonesia's Bartlomiej Mroz secured silver. Hardik and Ruthick also earned silver and bronze in men's singles SU5.

In the men's doubles WH1-WH2 category, Abu Hubaida and Prem Kumar Ale took home bronze, while Alpha James bagged silver in the women's singles WH2 category.

Move over Messi-Ronaldo, new generation of soccer stars lining up to win Ballon d'Or

AP ■ MANCHESTER (ENGLAND)

No Lionel Messi. No Cristiano Ronaldo. When the Ballon d'Or is presented at a gala ceremony in Paris on Monday, it will feel like the start of a new era in soccer. There is also a sense of void now that one of sport's most engrossing rivalries is likely over.

"It's interesting that as it starts to come to an end, we are sort of saying, what's the next equivalent rivalry going to be," soccer author Jonathan Wilson told The Associated Press. "As if that kind of rivalry was a natural state. But, there's never been a rivalry like that before."

Messi and Ronaldo won soccer's most prestigious individual award a combined 13 times over 16 years of unprecedented dominance. Neither has been nominated this year. Instead Real Madrid winger Vinicius Junior is the favourite to be crowned the world's best player and become the first winner born this century. He underlined his credentials this week with a stunning Champions League hat-trick against Borussia Dortmund.

"Vinicius had an incredible

terms of greatness over a protracted period, Messi is the greatest there has ever been by quite some margin.

"I don't think there's anybody in the world now who has anything remotely close to that talent."

Such was the dominance of Messi and Ronaldo, not only would Vinicius Junior become the first winner born this century, but there has never been a recipient born in the '90s.

Vinicius Junior, whose goals helped Madrid to a record-extending 15th European Cup last season, is part of a new generation of stars that are flourishing as Messi and Ronaldo reach the final stages of their careers. Kylian Mbappe, Erling Haaland, Jude Bellingham and Lamine Yamal make up a field of contenders who could challenge for years to come.

Manchester City midfielder Rodri is the second favourite to win this year and would become the first player born in the '90s to take the award. Mbappe, who has long been seen as the heir to Messi and Ronaldo as the world's best player, was born in 1998, meaning it's likely there will eventually be a winner from that decade even if Rodri misses out. The only other winners since Ronaldo won his first Ballon d'Or in 2008 were Luka Modric in 2018 and Karim Benzema in 2022. Both were born in the 1980s. The award was cancelled in 2020 when Robert Lewandowski was widely regarded as the best player that year. He was also born in the '80s. Neymar, born in 1992, came third on two occasions.

Lewandowski and Yamal spoil Mbappé's first clasico as Barcelona routs Real Madrid 4-0

AP ■ BARCELONA

Robert Lewandowski scored twice and Lamine Yamal piled on to ruin Kylian Mbappé's first clasico as Barcelona routed Real Madrid 4-0.

The lopsided victory in Spain's capital ended the host's unbeaten run in La Liga at 42 games, one shy of Barcelona's record streak in 2017-18. Carlo Ancelotti's side suffered its first loss since Sept. 23 last year.

And what a loss it was. Lewandowski got the visitors going from a superb pass by Barcelona's latest youth talent Marc Casadó and rose up to head in a fine header three minutes later to silence Santiago Bernabeu Stadium.

Yamal made it a rout in the 77th when the teenage phenom rifled a shot from an angle over goalkeeper Andriy Lunin. That goal made him the youngest scorer in a clasico at 17 years, 105 days, surpassing teammate Ansu Fati, who was about 250 days older in October 2020. Raphinha then broke free with Madrid completely unhinged and chipped Lunin in the 84th.

The win came three days after Barcelona thumped Bayern Munich 4-1 in the Champions League. It has outscored its last five opponents 21-2. "We came here to do just this," Yamal said. "We had lots of confidence and when we scored the second goal, we wanted to score a third, and then a fourth, as many goals as possible. To win 4-0 at this ground and beat Bayern 4-1, we showed that we are ready

for anything."

It is an understatement that Mbappé had a frustrating first game against Barcelona in a white shirt.

The France star was caught eight times offside by Barcelona's synchronized back four and failed to beat second-choice goalkeeper Iñaki Peña one-on-one with his team down two goals.

"We knew that they played with a high line, and we just couldn't take advantage of it," Ancelotti said. "Sometimes (Mbappé) fell offside, but he had three or four chances to score and needed a better finishing touch."

Hansi Flick, meanwhile, had a night to remember in the first clasico for the German coach. Barcelona still has financial troubles that cast doubt over its future but its youthful team has made huge steps forward since Flick replaced

Barcelona great Xavi Hernández in the summer.

"Today we made a fantastic match and it is all about the team. Everyone gave it 100%," said Flick, who Ancelotti called "a gentleman" for telling his bench to cool it when they effusively celebrated the fourth goal near Madrid's dugout.

After opening a six-point lead over Madrid at the top of La Liga, it is no longer a foregone conclusion that with Mbappé on board Madrid will waltz to a second straight domestic title.

Casadó was one of five homegrown players that Flick put in his starting lineup, the same 11 from the Bayern win. Six players under 22 years old started for Barcelona, led by 17-year-olds Yamal and Pau Cubarsi.

Casadó had flashes of the flawless ball control of a Sergi

Busquets as he helped compensate for Madrid's extra man in the midfield before he cued up the game-changing pass to play Lewandowski clear to slot home.

Mbappé was ruled offside five times in the first half hour, as Barcelona pressed high. Vinicius Júnior, who featured in a fascinating duel with Cubarsi, missed a golden chance in the 21st when he shot past the post from close.

"When they scored those back-to-back goals it took the energy out of us," Ancelotti said. "This is a complicated moment for us. It hurts to lose a game and especially after going 42 games unbeaten, but we shouldn't just throw everything away because this team will play better."

Peña was questioned if he was up to the task of replacing Marc-Andre ter Stegen, out long term with a knee injury. His strong performance, which included two stops to deny Mbappé, was his first great game in goal for Barcelona.

"Our coach said that playing a high defensive line was non-negotiable," Peña said. "It is risky to play with such a high defense line, but the effort and work of the entire team is reflected in the offside traps we are creating." Raphinha's goal confirmed his massive step forward under Flick. The Brazil forward, who acted as Barcelona captain, has 10 goals in this campaign.

Lewandowski's goals 16th and 17th overall for the Poland striker this season, taking his league-best tally to 14. He also hit the post. Mbappé, by comparison, has eight goals in all competitions. Ayoze Pérez scored his seventh goal since joining Villarreal this campaign to help it win 2-1 at Valladolid and lift his team into third place. Rayo Vallecano beat Alaves 1-0 after scoring late despite having played a man down for the 22nd, while Las Palmas beat Girona 1-0.
