KEJRIWAL OFFERS TO QUIT AS DELHI CM

RAJESH KUMAR/ SAUMYA SHUKLA ■
NEW DELHI

In an unexpected move that shook the political circles here, AAP convener and Delhi Chief Minister Arvind Kejriwal on Sunday announced that he would resign after two days and would demand early polls in Delhi while vowing not to sit in Chief Minister's chair till people give him a "certificate of honesty".

According to Kejriwal, he will hold a meeting of AAP MLAs in the next couple of days, and a party Leader will take over as the Chief Minister. The AAP convener also ruled out the possibility of former Deputy Chief Minister Manish Sisodia being named Chief Minister. The announcement came two days after the Supreme Court granted him bail in the corruption case linked to Delhi's now-scrapped liquor policy. The BJP hit back at the AAP supremo, terming his move a "PR exercise" and a "drama".

The AAP national convener, who reached the party headquarters here on Sunday along with his wife Sunita to address party workers, demanded that the Delhi elections be held in November 2024 with Maharashtra, instead of February 2025. I will only sit on Chief Minister's chair after people give me a certificate of honesty. Want to give 'agnipariksha' after coming out of jail," he said. He also requested all the non-BJP State CMs to "not resign in any situation. And run the Government from jail".

Insiders say his resignation caught many by surprise, but the decision may not be as unexpected as it

Delhi Chief Minister Arvind Kejriwal with other AAP leaders wave during a party workers' meeting, in New Delhi on Sunday

Ranjan Dimri/Pioneer

seems because the Supreme Court granted him bail on Friday, but with several conditions which gives more powers to the Lieutenant Governor. The most significant of these is a restriction barring him from entering the Chief Minister's office or signing official documents "unless absolutely necessary to obtain the Lieutenant Governor's sanctions." He has also been barred

from entering the Delhi secretariat. The surprising decision has left everyone wondering who will be the next Chief Minister of Delhi. Party insiders say Sunita Kejriwal, Rakhi Birlan, Atishi, Gopal Rai and Sandeep Pathak are among the top contenders for the CM post if he resigns. The shock announcement may reap poll benefits for the AAP as

Kejriwal framed his recent announcement as a moral stand, suggesting that he will not occupy the CM chair until he receives a "certificate of honesty" from the electorate. Experts said the move is likely aimed at addressing corruption and governance under Kejriwal's leadership and also serves to rally AAP and its supporters around a

narrative of integrity and accountability. Meanwhile, choosing a CM for just a few months has often led to a power tussle and big exits later, as was witnessed in Jharkhand recently between JMM's Hemant Soren and Champai Soren, and in Bihar in 2014 after JD(U) chief Nitish Kumar reclaimed the top seat from Jitan Ram Manjhi.

Terming it as PR stunt, BJP national spokesperson Pradeep Bhandari claimed that Kejriwal has understood that his image among the people of Delhi is not of an honest leader. BJP leader Manjinder Singh Sirsa said that Kejriwal has no option but to resign because of the bail conditions on him by the Supreme Court. Sirsa claimed that Kejriwal sought two days' time to resign from CM's post to convince the party MLAs to make his wife, Sunita Kejriwal the Chief Minister of Delhi. BJP leader Kapil Mishra termed Kejriwal's announcement as the "victory for the people" of Delhi. "In the end, the corrupt Kejriwal will have to resign. This resignation is being forced due to the Supreme Court's strict action. The man who was adamant about running the Government from jail had to announce his resignation today. This is a major victory for the people of Delhi against corruption," he said. BJP's Harish Khurana questioned why the AAP Leader is creating a drama. "Why after 48 hours? He should resign today. In the past too, he has done this. People of Delhi are asking, he can't go to the secretariat, can't sign documents? What is the point then?"

This is not the first time he resigned. The last time Kejriwal resigned, his Government had worked only for 49 days and the decision was hailed as a masterstroke as the AAP returned with mammoth numbers nearly sweeping the polls by winning 67 of the 70 assembly seats in 2015. The BJP won only 3.

"You people might be thinking I have just come out of jail, why is he going to resign. They have raised allegations against me... They are saying that SC has put conditions on bail. After I resign, AAP will hold a high level meeting and decide a name for CM post," Kejriwal said while addressing party workers at his new headquarters. He said, "Despite the court giving us bail, the case will continue. I spoke to my lawyers. Till the case does not end, I will not sit on the CMs seat. After two days, I am going to resign from the post of CM. I will not sit on the CM's seat till the people elect me and send me to the seat again." Kejriwal alleged that the probe agencies sent him to jail to break his spirits, and the party.

"Why did they send me to jail? It was not like I had committed any crime. They also know this. They just want to break my spirit, break my party, poach our Leaders, Ministers... send ED, CBI to torture our Leaders. But our Leaders and workers did not break. But I want to tell you today that they strengthened me by sending me to jail," he said.

AAP convener added, "Both Sisodia and I were also stressing about this. He will also not hold any charge. We both will assume our seats when people will reelect us." The AAP national convener said, "I will become Chief Minister and Manish Sisodia deputy CM only when people say we are honest. Kejriwal said he would hold a meeting of AAP MLAs in the next couple of days and a party Leader would take over as Chief Minister.

Prime Minister Narendra Modi flags-off Tatanagar-Patna Vande Bharat train in Jamshedpur, through Video conferencing, Sunday

PTI

Vande Bharat on Voters' Platter

DEEPAK KUMAR JHA ■
JAMSHEDPUR/RANCHI

With Assembly polls in few States round the corner, fresh spice of Vande Bharat train series are back on the platter of the voters as Prime Minister Narendra Modi on Sunday flagged off six Vande Bharat Trains and also launched various projects worth Rs 660 crore. The PM's schedule to flag off the trains and other projects from the Tatanagar Railway Station had to be modified in the morning due to inclement weather which was not feasible for helicopter service from

Ranchi to Tata. Modi landed at Ranchi and the programme had to be scheduled virtually. PM apologised to the people for not being able to reach Tatanagar as "my chopper could not take off from Ranchi due to bad weather". Later during the day PM reached Jamshedpur by road to attend the political programmes and a Parivartan Maha Rally as per schedule. Modi is on a three-day visit to Jharkhand, Gujarat and Odisha where he will flag off several trains, lay the foundation stones and launch projects worth more than Rs

12,460 crore. Jharkhand goes to polls this November. He flagged off six Vande Bharat trains for Jharkhand, Odisha, Bihar and UP at Ranchi. Union Ministers Shivraj Singh Chouhan, Annappurna Devi and Sanjay Seth and Jharkhand Governor Santosh Kumar Gangwar were present at Tatanagar station. Sources said some of the rail projects for poll bound Maharashtra and Jammu and Kashmir are also in pipeline. "The work of laying railway lines, doubling of these and developing modern facilities at railway stations are

underway at a fast pace in Jharkhand," Modi said. Jharkhand, which was lagging in development, will also see rapid growth with the launch of these projects, he said. "The Centre has increased its investment for the development of Jharkhand. This year, Jharkhand has been given an allocation of Rs 7,000 crore for the development of railway infrastructure. If we compare the budget of the past 10 years, it is 16 times higher. Jharkhand has joined the list of States where 100 per cent electrification of the railway network has been achieved," he said.

Road to justice in Kolkata

SAUGAR SENGUPTA ■
KOLKATA

The Central Bureau of Investigation on Sunday alleged a "larger conspiracy" and "deep nexus" between the hospital authorities and a section of the police in the RG Kar Medical College and Hospital rape and murder case.

A day after arresting Abhijit Mondal the officer-in-charge of the Tala Police Station and re-arresting former RG Kar principal Sandip Ghosh — who is already in jail in custody on charges of corruption — the CBI advocates told the Sealdah Court that the two sides had conspired to destroy evidence and hush up the case. Both Mondal and Ghosh were given three-day CBI remand by the designated court.

Terming the incident an "institutional murder" the CBI pointed out in point 8 of the remand letter how the officer-in-charge showed extra hurry in allowing the cremation of the victim's body. The police "allowed cremation in a hurried manner when the family members demanded second autopsy," the remand letter said questioning the gap of more than 14 hours between the timing when the report

Tala police station officer-in-charge Abhijit Mondal, accused in the doctor rape and murder case, comes out of the Sealdah court after the court sent him to CBI custody till September 17, in Kolkata, Sunday

was beyond his authority, sources quoting the CBI lawyer said.

A postgraduate lady doctor of the RGKMCH was raped and murdered in the wee hours of August 8 explaining the "deep nexus" between a section of the police and the hospital authorities, the CBI said. CBI added that there was evidence to show that on the day of the incident Ghosh and Mondal had multiple telephonic conversations.

Besides, "Mondal allowed the entire crime scene to be crowded by hospital people and outsiders for hours... people came and went and evidence was allowed to be tampered," lawyers said, adding this took place in front of some of the topmost officers of Kolkata Police.

The CBI sources also said that apart from Mondal there were four more police officers who were under their scanner. Among them, there was an Indian Police Services officer.

"Notices would soon be served to some of these officers for interrogation," sources in the central agency said adding however, that there was "nothing between the CBI and the police" and that "all the steps that are being taken are taken in the interest of the investigation."

NEW DELHI/KOLKATA

Nature's fury engulfs India

Heavy rains have wreaked havoc across India, flooding streets, widespread destruction, disrupting traffic, triggering landslides and chaos in multiple states. From north to south and east to west, the monsoon's relentless downpour has left cities grappling with submerged roads, rescue operations, and widespread chaos.

In its bulletin on Sunday, the IMD issued a 'red' alert in West Bengal, Jharkhand, and Odisha, predicting extremely heavy rainfall on Sunday and Monday. An 'orange' alert has also been issued predicting very heavy rainfall in Chhattisgarh, East Madhya Pradesh, Bihar and Tripura in the next two days due to a deep depression over Bangladesh and adjoining

Gangetic West Bengal. The India Meteorological Department (IMD) data showed India, this monsoon has received 857.5 mm rainfall as against the normal of 795.9 mm so far. Notably, Arunachal Pradesh, Nagaland, Punjab and Chandigarh are among the rain deficit States and two weeks left for departure of monsoon this year. Data showed East and North-East sub division has received 1047 mm rainfall as against the normal of 1233.9 mm, a deficit of 15 per cent so far; North-West India including Jammu and Kashmir, Ladakh, has received rainfall of 590.9 mm as against the normal of 552.5 mm, around 7 per cent more this season.

Central India received 1068.5 mm as against normal of 906.8 mm rainfall, which is 18 per cent more so far. South Peninsula received 759.8 mm

rainfall as against the normal of 631.5 mm, around 20 per cent more this year. The torrential downpour across Delhi for the past few

days has surpassed both annual and seasonal average rainfall in September in the national Capital. According to the India

Meteorological Department (IMD) data, the city has already exceeded the 1,000 mm rainfall mark this month, the highest since 2021 and the second highest in at least the last decade, as against the usual 650 mm of rainfall that it receives during the monsoon season. The month has recorded 125.8 mm of rainfall, which is also 55 per cent higher than normal. Moreover, this continuous spell has brought the city to a halt as rain results in severe waterlogging, closure of underpasses, and traffic snarls, along with occasional reductions in visibility in the city. It has also led to the loss of lives due to drowning and electrocution with reportedly about 40 people dying in

Delhi so far. South Peninsula received 759.8 mm rainfall as against the normal of 631.5 mm, around 20 per cent more this year. The IMD has also issued a fishermen warning, advising against venturing into the northern Bay of Bengal and the coasts of Bangladesh, West Bengal, and Odisha until the morning of September 16 due to expected rough sea conditions. Squally winds with speeds of 45-55 km/h, gusting up to 50 km/h, are anticipated over Gangetic West Bengal (including Kolkata) and nearby areas in North Odisha and Jharkhand. Residents and travelers in the affected areas are advised to stay updated on weather

alerts and take necessary precautions to ensure safety during the severe weather conditions.

As many as 200 people died this monsoon so far. Water leakage has been reported at the Taj Mahal after incessant rain in Agra. The death toll in the collapse of a three-storey house in Zakir Nagar in Meerut has risen to 10 while the rescue work at the site is still underway. The local meteorological department issued a 'yellow' alert for thunderstorm and lightning at isolated places in six districts of Himachal Pradesh on Sunday and Wednesday. It also predicted a wet spell in the State till September 21. Over 40 roads were closed in the State and 53 power supply schemes were disrupted on Saturday evening as per the State Emergency Operation Centre (SEOC).

Avantika, the city of Baba Mahakal, is infinite: CM

PNS ■ UJJAIN

Chief Minister Mohan Yadav said that Avantika, the city of Baba Mahakal, is infinite. The city has always been known for its qualities, fame, and glory in every era. India is the world's largest and glorious democracy, among whose three pillars, the judiciary is the main one, which increases our strength manifold like the justice of Maharaja Vikramaditya. Inspired by the justice and equality of Maharaja Vikramaditya, the Madhya Pradesh government is determined for the welfare of all sections. Chief Minister Dr. Yadav was addressing the Samtamurti Alankaran Samaroha organized at Ramanuj Kot Ashram in

Ujjain on Sunday. Dharmacharya of Ramanuj Kot, Sant Swami Gadi Maharaj presented the Samtamurti Alankaran to Chief Minister Mohan Yadav and Supreme Court Judge GK Maheshwari. On this occasion, Peethadhishwar Swami Ranganathacharya Ji

Maharaj of the Ashram and other Sants and Acharyas were present. Chief Minister Yadav said that Sanatan Dharma has taught to worship the Narayan in Nar (Man) itself and has considered 'Nar Seva as Narayan Seva'. Our culture considers serving the poor and needy

as a service to God. Human welfare is part of our moral education and values. God resides in both in Prakriti and Pravratti. **Simhastha celebration is unique** Chief Minister Dr. Yadav said that the Simhastha organized once in every 12 years is unique in itself. With the darshan of the Dharmacharya in the ceremony, one has darshan of God. Swami Ramanuj Ji Maharaj, through his supernatural philosophy, has shown the path of public service by connecting human beings along with preserving Sanatan Dharma. Despite the various challenges faced in society, Swamiji continued to spread the path of devotion. Justice Maheshwari said that

equality is mentioned in our Sanatan culture along with Vedas and Puranas and also in our Constitution. The right to equality is the first human right in the Constitution of India. In the eyes of God, all are equal. A person who occupies an important position cannot be there without divine grace. God himself has chosen him in the public interest. That is why he should always remain engaged in the work of human service. Chief Minister Yadav also honored Peethadhishwar Swami Ranganathacharya Ji Maharaj and other religious leaders by presenting them with garlands and Angavastram. The Chief Minister flagged off an ambulance for citizens in the programme.

Young scientists emerging in remote villages

STAFF REPORTER ■ BHOPAL

With the joint efforts of the Eklavya Foundation and the Madhya Pradesh Council of Science and Technology, steps are being taken to strengthen science education in the Kesla block of the Narmadapuram district. This initiative has received full support from the district administration as well. As a result, what used to be an after-school science activity for the children here, has been integrated into regular school hours this academic session. In 12 villages of Kesla, students from grades 6 to 8 conduct science experiments, investigate scientific questions, and create interesting models and toys with the support of Eklavya team members. Science teachers are also getting involved, and the Eklavya team

provides regular training sessions for them. This hands-on approach to learning science is different from the traditional method of teaching by writing questions and answers on the board. Both students and teachers have embraced this approach, which has also boosted the morale of the teachers. Eklavya has provided sufficient science kits to the schools in these villages so that all students can engage in learning science through experimentation. Additionally, around 100 science-related books have been given to the schools to spark children's interest in the subject. As part of this initiative, science fairs have been organized on school premises for the past few months. The children present their experiments and understanding of scientific concepts at these fairs, which not only boosts their confidence but also strengthens the bond between

the school and the community. Parents are specially invited to attend these fairs, where they can see and appreciate their children's work, raising awareness of science within the community. On September 14, a science fair was organized in the village of Dandiwada in the Kesla block, where children simplified some complex scientific concepts through very easy, low-cost and interesting experiments. Whether explaining digestion, flow of electric current, or fun experiments related to surface tension, adhesion and cohesion forces of water, everyone who attended the fair experienced science firsthand and encouraged the children involved. Special guests at the event included Vikas Shende and Dr. Sunil Garg from the Madhya Pradesh Council of Science and Technology, and Manoj Nigam, a senior member of the Eklavya Foundation.

27-year-old porter killed in mishap

STAFF REPORTER ■ BHOPAL

A 27-year-old porter was killed while his friend escaped the fatal accident with severe injuries after their bike was hit and dragged for over 20 meters near Lily Talkies in the wee hours on Saturday. Two youths on a bike were hit by a car in Jehangirabad police station area. After the collision, the car dragged the young man for 20 meters. After this, the driver fled the spot with the car. One youth died on the spot in the accident, while the other escaped with injuries. The incident took place near Lily Talkies at 4 am on Sunday. The injured youth were admitted to Hamidia Hospital in critical condition where one of them was declared dead. Police said that CCTV footage of the area will be examined, so that the driver who hit the

youths on bike can be identified. On Sunday afternoon, Farid's body was handed over to the family after the postmortem. The deceased was identified as Farid Qureshi (27) was a resident of Jinsi area and used to work as a porter. He went out to have tea with his friends Shamim and Sohail. The three friends were returning from Qazi Camp after having tea at around 4 am in the morning. Farid stopped the car in front of Lily Talkies and he went to the roadside with Sohail to use the toilet. Meanwhile, a speeding car hit both of them. Both friends got stuck in the bumper of the car. After this, the car dragged Farid for 20 meters. He died on the spot. After the accident, the accused car driver fled. Farid got married one and a half years ago and has a one month old daughter from the marriage.

College students to engage in cleaning

STAFF REPORTER ■ BHOPAL

Taking a positive stride, students will clean for two hours every week in MP colleges, from September 18 to October 1, teams of students will clean college campuses, bus stands, railway station, squares, markets and other public places. In this, teams of students will reach to give the message of cleanliness by cleaning rivers, ponds, lakes etc. Students will clean for two hours every week in MP colleges, Higher Education Department gave guidelines to run Swachhta Abhiyan. Swachhta Abhiyan will be run in all the schools of the state. Students will taking cleaning campaign themselves for a hundred hours in a year. Swachhta Abhiyan will be run in the colleges of the state. For

this, students will clean for two hours every week. This campaign will be run till October 2. In this, students will have to clean the college campus as well as public places. Under the Swachhta Pakhwada (Cleanliness Week), students will not only clean for 100 hours in a year, but they will also form a chain in which they will connect 100 people and request to connect with further 100 people encouraging them to take cleanliness measures in their surroundings. The Higher Education Department has issued guidelines in which on September 17, students will be administered the oath to clean for two hours every week. Then the students will administer the oath to 100 other people and will motivate them to also inspire 100 other people to clean. This time the depart-

ment has emphasized on connecting every student to this. For this, different programs of 15 days have been decided. The oath to be administered to the students. Its basis has been kept as Mahatma Gandhi's resolution. In this, the students will take an oath that they will be alert for cleanliness, and will give time. Every year, I will devote two hours a week to cleaning. I will also administer an oath to 100 other people to donate 100 hours of labour, neither will I create dirt nor will I let anyone do so. I will promote the Swachh Bharat Mission in every village, every street. There will be workshops, rallies, discussions, seminars, lectures, paintings, quizzes, poetry recitation competitions on the subject of cleanliness in colleges. Students will be administered the oath of cleanliness in these.

UMA celebrates Onam 2024 with spectacular cultural programme

STAFF REPORTER ■ BHOPAL

The United Malayalee Association (UMA) celebrated Onam 2024 with a variety of events, which took place on Sunday, September 15, 2024, at the S.N. Mission Hall, Subhash Nagar, Bhopal. The festivities provided an exuberant homage to the rich cultural tapestry of the Malayalee community, drawing residents together for an evening filled with exceptional performances and heartfelt camaraderie. The evening unfolded with a vibrant cultural showcase that captivated the audience from start to finish. The event was a testament to the community's artistic flair and commitment to preserving their cultural heritage while embracing contemporary expressions. The festivities began with a dazzling performance by Kalanjali, Bhopal, known for their dynamic integration of traditional and modern dance forms. Their captivating chore-

ography and spirited performances set an electrifying tone for the evening, blending the essence of traditional artistry with the vibrancy of contemporary dance. The audience was enchanted by their creative expression and the energy they brought to the stage. Following this, the Prathibhalaya Arts Academy, Bhopal, took the stage with a series of classical arts performances that brought an air of sophistication and grace to the event. Their meticulous and elegant presentations offered a profound appreciation of classical art forms, demonstrating the depth and cultural significance embedded in these traditional practices. T Natyashri, another esteemed participant, delivered a series of performances that seamlessly blended traditional and modern elements. Their engaging and lively acts resonated deeply with the audience, showcasing the diverse artistic spirit of the community. Natyashri's perfor-

mances were a reflection of the community's ability to innovate while honoring its roots, providing a memorable experience that delighted all in attendance. Musical performances were a central highlight of the evening, showcasing the rich musical heritage of the Malayalee people. The variety of genres and styles presented underscored the musical diversity within the community, with each performance receiving enthusiastic applause. The musical segment of the event was a vibrant celebration of the community's artistic talents, demonstrating their deep connection to their musical traditions. Earlier King Mahabali was accorded a Grand and Traditional welcome with the accompaniment of ChendaMelam alongside girls in Kerala holding Thalappoli (Diya with flower petals), it was truly a majestic reception. This was followed by one of the most cherished moments of the

evening - Thiruvathira Dance, a traditional Onam ritual that holds a special place in the festival's celebrations. Performed with precision and passion, the Thiruvathira Dance illustrated the cultural significance of this beloved tradition, infusing the event with a festive and authentic Onam spirit. The performance was a beautiful representation of the cultural practices that define the Onam festival. At the end a skit vividly brought the importance of caring and sharing in family life, with some emotional scenes. O.D Joseph, President, UMA in his welcome address, emphasized that the true relevance of Onam in today's life lies not only in following traditions but in incorporating the essence of the festival into our daily lives. He said the association recently celebrated its 40th anniversary with a grand Kerala Fest, showcasing the rich cultural tapestry of Kerala, offering the people of Bhopal a deep insight into the state's traditions and heritage.

Rare strangulated rectal prolapse managed at AIIMS Bhopal

STAFF REPORTER ■ BHOPAL

In a remarkable medical case, Dr Krishna Kumar, Assistant Professor from the All-India Institute of Medical Sciences (AIIMS) Bhopal successfully treated a rare case of strangulated complete rectal prolapse in a 39-year-old male. This extraordinary case stands out due to the rarity of such conditions in younger men, marking a significant milestone in medical management. Rectal prolapse, typically seen in elderly women, is an uncommon condition where the rectal wall protrudes through the anus. It affects an estimated 2.5 per 100,000 people, with a female-to-male ratio of 10:1. Cases involving strangulation-where blood supply to the prolapsed tissue is compromised-are even more uncommon, occurring in just 2-3% of cases and requiring immediate surgical intervention. The patient, who had a four-year history of reducible rectal prolapse, presented to AIIMS Bhopal's emergency department with a 12-hour history of an irreducible and strangulated prolapse.

Following a thorough examination, including prior MRI imaging that confirmed a second-degree full-thickness rectal prolapse, an emergency perineal proctosigmoidectomy (Altemeier's procedure) was performed. The surgery successfully resected the prolapsed bowel and restored pelvic floor function through levatorplasty. Under the leadership of Dr. (Prof.) Ajai Singh and with the surgical expertise of Dr. Bharati Pandya, Dr. Manish Swarnkar, and their team, the patient made a swift recovery. He regained full continence by the fourth day and was discharged without complications on the fifth day. A six-month follow-up showed no recurrence, with the patient maintaining full faecal continence. This case highlights the importance of timely intervention in strangulated rectal prolapse and sets a precedent for handling similar emergencies. Dr. Krishna Kumar presented this case at the International Conference in Seoul (September 3-5, 2023), where it received significant recognition for its rarity and successful surgical management.

Residents demand two-lane road

PNS ■ INDORE

Enraged over the tragic deaths of two young girls caused by a road mishap on the Bombay Hospital-Tulsi Nagar road, residents of the locality have demanded the immediate construction of a two-lane road between Tulsi Nagar culvert and Advance Academy, failing which they have threatened to stage a demonstration. The narrow stretch from the Tulsi Nagar culvert to BCM Paradise Junction has become notorious for accidents, with the situation worsening significantly due to the road's poor condition after the monsoon. This route is a crucial connector between Nipaniya and the city's main areas, yet its hazardous state forces thousands to commute under life-threatening conditions daily. Almost nine months ago, the Indore Development Authority (IDA) approved a tender to widen the road and clear encroachments, but the work has not yet begun. Despite the end of the rainy season, the administration's inaction has left the road treacherous, increasing the risk of accidents.

Speeding Beemer kills 2 in Indore, one dead in Bhopal car crash

STAFF REPORTER ■ BHOPAL

Two young women died after a speeding BMW car rammed into their two-wheeler in Indore on Sunday, the driver of the vehicle is absconding. The accident, in the vicinity of Mahalaxmi Maidan, took place when the BMW being driven on the wrong side of the road collided with the scooter the young women were riding. The deceased, identified as Diksha Singh and Lakshmi Singh when a high-speed BMW car, coming from the wrong side, collided with the scooter on which the two girls were riding. The young women, who were on their way home at the time of the crash, were rushed to the hospital where they breathed their last. Eyewitnesses say after ramming into the girls the car swerved and hit an electricity pole before coming to a halt. The Chandigarh registered vehicle has been confiscated and efforts are underway to nab the errant driver. High speed vehicles have become synonymous with crashes

The young women, who were on their way home at the time of the crash, were rushed to the hospital where they breathed their last

since similar accidents have been reported from various parts of the country over the last decade. Meanwhile in a separate incident on Sunday morning, one man died and another was grievously injured when a speeding car rammed into them in the Jahangirabad area of the state capital. The friends, identified as Sohail and Fareed, were in their way home after having tea in the Kaziq Camp area of the city. While Fareed was killed on the spot, Sohail is undergoing treatment at a hospital. Police say they are checking CCTV camera images to identify and nab the driver who fled after dragging the deceased for nearly 20 feet.

United Malayalee Association (UMA) celebrated Onam festival at Swami Narayan Bhawan at Subhash Nagar in Bhopal on Sunday.

Yadav to attend Global Renewable Energy Investors' meet

Bhopal: Prime Minister Narendra Modi will inaugurate the 4th Global Renewable Energy Investors Meet and Expo (RE-INVEST-24) in Gandhinagar, Gujarat on Monday. Chief Minister Mohan Yadav will also attend it. Yadav will share the work being done in the field of clean and green energy in Madhya Pradesh. The states of Madhya Pradesh, Andhra Pradesh, Gujarat, Telangana, Rajasthan, Karnataka and Uttar

Pradesh are actively participating in this summit. This year the major international partners of the summit also include countries like Australia, Denmark, Germany and Norway. RE-INVEST Summit is a flagship programme of the Government of India to showcase India's renewable energy potential to the world and attract investment in the sector by initiating multilateral dialogue. It is a platform to bring together global investors, developers, manufacturers and

innovators in the field of renewable energy. The programme aims to boost the development and deployment of renewable energy in India and connect Indian energy stakeholders with the global investment community. The first RE-Invest India was held in 2015 and the second in 2018 and the third RE-Invest India in 2020. RE-Invest India has been successful in attracting a large number of participants from India and abroad.

Bring an end to appeasement politics: VD to party workers

PNS ■ INDORE

Addressing party conclaves in Mhow and Indore on Sunday, Bharatiya Janata Party state unit chief and Khajuraho MP, Vishnudutt Sharma, exhorted party workers to bring an end to the politics of appeasement. In his address at the party meetings, held as part of the 'Sangathan Parv' organised by the party state unit, Sharma highlighted achievements of the Narendra Modi government at the center and lambasted the Congress for its policies. People have faith in Narendra Modi who works tirelessly to run in an era of prosperity for the country and its people," said Sharma. Launching a frontal attack on the Opposition party, he

minced no words in criticising the Congress and blamed it for 'engaging in politics of deception, falsehood and appeasement.' Listing out objectives of the 'Sangathan Parv', Sharma said that the series of events under the Parv are meant to strengthen the party in areas where it has remained weak. "This is not the time for responding to the politics of appeasement, we must all strive to bring it to an end," he urged while exhorting party workers to devote themselves to membership drive and ensure that Indore division tops the list for inducting new party members. Describing the ongoing Sangathan Parv as the cornerstone of the party structure for years to come, he

motivated partymen and women to focus on booths where the party is weak. Speaking on the program in Indore, organising general secretary of the party state unit, Hitanand Sharma said that workers must strive to earn a top of the table position for the Indore region just as they had during the cleanliness drive. Motivating party members to rise to the occasion, Sharma extolled on the virtues of the party. "Being associated with the BJP contributes to personal development of people," said Sharma. He stressed the need for party workers to heed the call given by Prime Minister Narendra Modi and ensure that young people emulate the example being set else-

where in the country and join the party in large numbers. Expressing pride at being a member of the world's largest political party, Sharma told the gathering of his unflinching faith in party workers of the region. He said he had no doubts that partymen and women in Mhow will leave no stone unturned in ensuring that the party goals were met and a true tribute was paid to Pandit Deendayal on his birth anniversary on September 25. Launching an attack on the Congress, Sharma urged the opposition party to stop indulging in lip-service and appeasement politics. "The political party that ruled the country for decades could not establish a law against triple talaq for

Muslim women," he said. He reiterated that it was Modi who transformed the lives of Muslim women by freeing them from the clutches of patriarchy and ensured the abolition of Article 370 from the erstwhile northern state of Jammu and Kashmir. He credited these actions by the PM for ensuring that a large number of youth joined the party. On Farmer Membership Day, the state BJP chief welcomed a large number of farmers from Dhar and Mhow into the party fold. He highlighted farmer welfare initiatives of the Modi government and said that over 80 lakh farmers in the state receive Rs 6,000 annually through the Prime Minister Kisan Samman Nidhi.

Under Organisation Parv programme in Dhar, State BJP president Vishnu Dutt Sharma reached local Yoga Centre and provided the citizens membership of the party. Pioneer photo

BSc Nursing student found dead at house of her boyfriend

STAFF REPORTER ■ BHOPAL

The body of a BSc Nursing student from Gotegaon in Narsinghpur was found under suspicious circumstances at Narayan Nagar in a rented house of her boyfriend. This rented house belongs to her boyfriend. The girl had left with her boyfriend on August 9 without informing family and later found dead on Friday. The family has alleged that girl was killed. Ankit Chaudhary, (19), was studying BSc Nursing first year from a private college in Jabalpur. Her maternal uncle Ramesh Kumar Chaudhary said that Ankit had left home without informing anyone on 9 August. Two days later, she called her aunt on her mobile and told her that she is with Mayank Parihar

of Gotegaon and wants to stay with him. Both are in Jabalpur. After this, the family kept searching for the student in Jabalpur, but failed to find her. Ankit Chaudhary had left home without informing anyone on August 9 with her boyfriend Mayank. The family had registered the missing report of the student in Gotegaon police station. About 15 days ago, Ankit again messaged her aunt on WhatsApp informing her that she was in Bhopal. After this, whenever she got a chance, she used to message her aunt about her well-being. The student had also mentioned in the message that she wanted to talk to her mother and that she missed her. She had told her aunt that she had no plans for marriage at the moment.

After this, Ankit wrote in her message two days ago that she doesn't want to live with Mayank. This was Ankit's last message to her aunt. After this, the family got the information about the death of the niece on the intervening night of Friday-Saturday. The family reached Bhopal on Saturday morning. The police said that Ankit had a noose around her neck. The body was lying on the ground. The house owner had informed about the incident. There is no information about the student's boyfriend Mayank at the moment. There are also marks of cuts on the body. Police also suspect that Ankit has been murdered. Ankit's mother Geeta Chaudhary said that we were not aware of the relationship between our daughter and Mayank. After her disappear-

ance, we came to know that she was with a boy named Mayank. Both of them had an affair. He is the one who killed my daughter. Her throat was strangulated with a wire. Strict action should be taken against him. Bagh Sewania police station in-charge Amit Soni said that initial investigation suggests a case of suicide. A case has been registered and investigation has been started. Further action will be taken after receiving the detailed statements of the family members and the post-mortem report. The family members of the student took the body of the student from Bhopal to Narsinghpur. Here they blocked the road at Tata Bridge. The officers assured them of action and sent them to Gotegaon. The father of the student, Vinod Chaudhary, has

made serious allegations against the police. He said that after the disappearance of his daughter, he had applied to the Gotegaon police station to file a report against the accused. The police registered the report on their own. He had also given the mobile number of the accused and Ankit to the police station. On repeatedly seeking information, he had to face abuse and caste-based insult. In this case, Chandan Baghel, a policeman posted at Gotegaon police station, has been attached to the protected police station late in the evening. Ankit's missing report was registered at the Gotegaon police station, while after the body was found, the case has been registered in Bhopal. SDOP Monika Tiwari has assured investigation and action on the application of the

Fake vigilance inspector caught at RKMP station

STAFF REPORTER ■ BHOPAL

A fake vigilance inspector has been caught by the railway team at Rani Kamalapati railway station. The accused wanted to stay in the VIP lounge of the railway and avail VIP facilities like free tea, breakfast and food. Due to this, he started to entertain the railway employees by pretending to be a Railway Board Vigilance Inspector, but when the employees got suspicious, they informed the railway officials about the matter. After this, when the youth was questioned and asked for other documents including the ID card, the youth confessed that he was doing this for VIP facilities. GRP has registered a case in this matter. According to railway officials, an ID card of a college in Ahmedabad, Gujarat was also

found from the youth. In which it was written that he was an MBA student. The incident took place late Friday night. Bhopal Railway Division Public Relations Officer Naval Agarwal said that the person directly reached the Chief Ticket Inspection Office and claimed that he was a Vigilance Inspector of the Railway Board. He said that he has to go to Ahmedabad for a secret operation by train number 19484 Barauni-Ahmedabad Express and till then the VIP lounge should be opened for him. After staying in the VIP lodge, the youth demanded facilities like tea, snacks and food from the staff there. In such a situation, the staff of the lodge informed Chief Ticket Inspector Anirudh Soni and other staff. After this, when they questioned the youth, the matter came to light.

Chief Ticket Inspector Anirudh Soni and Ticket Inspector Surya Prakash Sharma became suspicious of his activities. When they asked him for his mobile number, he refused to give the mobile citing confidential tour. They asked his name, secretly took his photo and contacted Railway Board Vigilance Department and Railway Central Ticket Inspection Team to confirm the authenticity of this person. It was confirmed from both the places that this person is not a part of the vigilance department. Immediately, Chief Ticket Inspector Anirudh Soni informed the station manager, Railway Protection Force and senior officials about this matter. RPF Sub Inspector Yogendra Singh called Assistant Sub Inspector Brajmohan Tiwari and interrogated him strictly where he confessed his crime.

AIIMS Bhopal ED Ajai Singh calls on Chief Minister

STAFF REPORTER ■ BHOPAL

Prof Ajai Singh, Executive Director of AIIMS Bhopal, engaged in a crucial dialogue with Mohan Yadav, Chief Minister of Madhya Pradesh. The discussion centered around enhancing health facilities across the state and addressing critical health concerns. Chief Minister Mohan Yadav emphasizing the state government's commitment to improving healthcare infrastructure and services stated, "Our government is dedicated to advancing health facilities and ensuring that every citizen of Madhya Pradesh has access to quality medical care. The insights provided by AIIMS Bhopal are instrumental in guiding our health policies and programs." During the meeting, Chief

Minister Yadav also unveiled the findings of a comprehensive cancer survey conducted by AIIMS Bhopal. This extensive survey engaged 47,837 participants from 41 districts in the state. Of these, 28,077 (58.7%) were from rural areas, while 19,760 (41.3%) were from urban locales. The survey focused on various age groups as outlined by the World Health Organization and also gathered data on oral health issues such as dental caries, periodontal disease, dental malocclusion, and oral mucosal lesions. Professor (Dr) Ajai Singh highlighted the importance of these findings. "The survey's results are crucial for understanding the current health landscape in Madhya Pradesh. Our efforts are aimed at providing data-driven insights to enhance public

health strategies. The development of the 'Oral Health Survey Monitoring Mobile Application' and our special data entry software are steps toward a more systematic and efficient approach to health data management," said Dr Singh. The newly developed mobile application, named 'Oral Health Survey Monitoring Mobile Application', and the accompanying specialized software are designed to streamline data collection and analysis. Additionally, AIIMS Bhopal has created an 'Oral Health Data Bank' to support ongoing and future research efforts. This meeting underscores a collaborative effort between AIIMS Bhopal and the Madhya Pradesh government to address health challenges and improve the well-being of the state's residents.

Man rapes, kills his 8-year-old daughter

STAFF REPORTER ■ BHOPAL

A man has been arrested in connection with the murder of his eight-year-old daughter in Madhya Pradesh's Guna district, with a doctor suspecting that she was raped before being killed, an official said on Sunday. The child's body with a hand and a leg tied to a stone was found in a well on Saturday, three days after she went missing under Chachoda police station limits, some 75 km from the district headquarters, an official said. Chachoda police station in-charge Machal Singh Mandeliya said suspicion arose about the likely involvement of the girl's father as he was not showing any interest in the search for his daughter. Citing the initial probe, he said

the girl was last seen with her father before she went missing. After the girl's body was found, police handed it over to her family after post-mortem, he said. Police detained the girl's father after her last rites on Sunday morning, Mandeliya said. The father told the investigators that he killed the girl and dumped her body in a well after tying her hand and leg to a stone with a towel. Chachoda's Sub Divisional Officer of Police (SDOP) Divya Rajawat said in the preliminary post-mortem report, Dr Ankit Upadhyaya from the local government hospital has expressed suspicion that the girl was raped before being murdered. Listen to the latest songs, only on JioSaavn.com Further investigation is underway, the official added.

New VC inspects Rewa college campus

PNS ■ JABALPUR

Newly appointed Vice-Chancellor of Nanaji Deshmukh Veterinary Science University, Professor Mandep Sharma conducted a two-day inspection of Rewa College. During the visit, the VC reviewed all departments and took stock of their activities. He visited Medicine, Surgery, Gynaecology, and Diagnostics departments at the veterinary clinic complex and instructed for an enhancement of facilities. Professor Sharma also visited the two girls' hostel facilities and listened to student grievances and suggestions. He also had lunch with the students. The VC later issued instructions

to the hostel wardens and the Dean of the college to address issues raised by the students at the earliest. The VC toured various departments, met teachers, and gathered information about the ongoing activities in their respective departments. Acting Dean, Dr. Nitesh Kumar, briefed Prof. Sharma on various academic and research activities at the college and discussed research projects with the VC. Livestock area, including goat farming, poultry farming, pig farming, dairy, fodder production, and milk processing units, were also visited and requisite directives were issued for improvements at these facilities. Addressing students at the culmination of his maiden visit

to the campus, the VC assured students that all complaints would be addressed promptly. He also encouraged students to participate in national and international competitions. He also met all college faculty members and instructed them that each department should have at least one externally funded project. The Vice-Chancellor advised all department and unit heads to maintain discipline, adhere to current regulations, and regularly meet with faculty to develop and implement future work plans. Having assumed office on 16 August, the Vice-Chancellor has already inspected all colleges and units under the university and met with faculty, staff, and students within a month.

Urban bodies collect Rs 80 cr revenue

STAFF REPORTER ■ BHOPAL

The Urban Development and Housing Department organised a special concession camp in the National Lok Adalat in all the urban bodies in the state on Saturday. Revenue collection of Rs 80 crore was made in the National Lok Adalat. Special concessions were given in the taxes levied by the urban bodies in the camps. In these, matters related to property tax, water tax and Swachh Bharat tax were settled. Tax was collected with mutual consent in the National Lok Adalat. The municipal corporations of the state collected an amount of about Rs 65 crore.

At the same time, the municipalities earned a revenue of more than Rs 9 crore. An amount of Rs 6 crore was collected in all the municipal councils of the state. Thus, a total revenue of Rs 80 crore was received by the urban bodies. Indore Municipal Corporation received the highest revenue of Rs 26 crore. Bhopal Municipal Corporation received revenue of Rs 13 crore, Jabalpur Municipal Corporation received revenue of Rs 4 crore and Gwalior Municipal Corporation received revenue of Rs 5 crore 75 lakh. 60 thousand citizens received assistance in the National Lok Adalat and the cases were resolved by mutual consent.

Midnight Blues: online workers face perils of the graveyard shift

AKBAR KHAN ■ BHOPAL

As the city sleeps tonight, a large number of youngsters will log in and tap away at their computers, servicing clients in faraway locations. While they earn a hefty paycheck, professionals say these nocturnal earnings come at a price. Psychiatrists emphasize that missing out on nighttime sleep is detrimental, as sleeping during the day can never match the quality of nighttime sleep, resulting in a disruption of the body's inherent day-night rhythm. Renowned psychiatrist Dr. Ruma Bhattacharya cautions, "I am currently seeing at least three dozen young clients who work online at night. They consistently report issues such as poor sleep quality, mood swings, and a loss of appetite

and libido." In the absence of precise statistics, industry insiders estimate that around 10,000 city youngsters are employed by online companies, with about 2,000 working exclusively night shifts. This number witnessed a considerable surge after the COVID-19 pandemic prompted companies in major cities like Mumbai, Bangalore, Delhi, and Pune to adopt the Work From Home (WFH) model. The new work pattern saw numbers skyrocket, as the figures include those who have returned to Bhopal—their hometown—to live with their families and benefit from the comparatively lower cost of living. Dr Bhattacharya says the lack of nighttime sleep has different effects on different people. According to her, all of these workers have symptoms of cir-

cadian (day-night) rhythm disruption; they are just more severe in some cases. Niharika Bhushal, a senior HR practitioner with the city-based VGroup, concurs: "Industry attrition rates are high at 30 per cent due to the inability of employees to cope with the consequences of nighttime work." She agrees that working 12-hour shifts that conclude early in the morning does affect the physical and emotional health of some employees. Listing reasons that attract young talent to the industry despite the risks, Bhushal says lucrative incentives and future plans to migrate to the U.S. are key motivators for youngsters joining the industry. Divulging details, industry insiders claim that incentives earned by employees in U.S. dollars place them in the higher income bracket by city standards with-

in a few years. They say that earnings from the industry have brought a mini boom to the city economy, as these youngsters splurge on eating out and partying at tony lounges that have sprung up to cater to this clientele. Offering a contrary perspective, Saim Khan, a resident of Idgah Hills, says, "I joined the industry in 2015 and worked at several locations before deciding to give up and move on to an online operation that allows me to work during the day." "I had become irritable, gained weight, was constantly regulating my Vitamin D levels, and felt left out by family and friends as I was only free on weekends," says Khan. If Khan had become a homebody, Bhushal reflects the prevalent mood when she says that COVID altered her perspective on life, and she now tries to live

life to the fullest. "If my work situation doesn't allow me to party through the week, I ensure that I make up for lost time on weekends," she says. "Relationship discord—marital or otherwise, is also common among nighttime workers, as are anger issues, anxiety, and depression," informs Dr. Bhattacharya. While most technology-based organizations refrain from delegating purely nighttime responsibilities, verticals like Recruitment Process Outsourcing require employees to align their work hours with U.S. time zones. Dr. Bhattacharya points out that it is important to remember that those employed by online companies are not the only ones working nights, and adds that the situation is no different for those employed in railways, police, and health services.

Production capacity of Dugdha Sangh to be increased

STAFF REPORTER ■ BHOPAL

Chief Minister Mohan Yadav has said that the capacity of Ujjain Sahkari Dugdha Sangh will be increased. The government is trying to ensure that dairy farmers get maximum benefits through Dugdha Sanghs. At least Rs 50 thousand should be given to every farmer's family as bonus. The production capacity of Ujjain Dugdha Sangh will be increased to 10 lakh tonnes. Besides, the role of the Dugdha Sangh will be made effective at the ground level. Yadav was addressing the employees' interaction programme of the Sahkari Dugdha Sangh in Ujjain on Sunday. Chief Minister Yadav said that Madhya Pradesh is setting new records of development in all areas. The government is deter-

mined to increase farmers income in agriculture-based Madhya Pradesh further. The agricultural growth rate of the state has to be increased further. Animal husbandry and dairy farmers play an important role in this. The government is trying to increase milk production further. Milk cooperatives will play a big role in this. Along with the increase in milk production, work will also be done to increase its consumption. The capacity of

Dugdha Sanghs for milk consumption will be increased through the National Dairy Development Board. Yadav said that along with strengthening the Sahkari Dugdha Sangh, whatever amount is required for farmers will be given. The role of Sahkari Dugdha Sangh will be made effective at the ground level. Chief Minister Yadav said that Ujjain Dugdha Sangh is my own family. At present, a target has been set to increase the capacity of Ujjain Dugdha Sangh from 2.5 lakh tonnes to 10 lakh tonnes. Its profit also has to be increased to Rs 100 crore. Besides, employee interests will also be taken full care of. MLA Shri Anil Jain Kaluhera, public representatives, officials associated with the Dugdha Sangh, and senior officers were present in the programme.

PM Modi flags off Vande Metro, inaugurates four Vande Bharat trains in Bihar

PIONEER NEWS SERVICE ■ NEW DELHI

India's first Vande Metro, which will be virtually flagged off by Prime Minister Narendra Modi today in Gujarat is poised to transform inter-city travel with its advanced medium-distance capabilities. According to Railway Ministry, PM Modi will be in Ahmedabad, the train will start from Bhuj and reach Ahmedabad covering 359 km of distance in 5.45 hours.

For passengers, its regular service will start from September 17 from Ahmedabad and the total journey will cost Rs 455. "While the other metros cover only short distances, Vande Metro trains will connect cities from the heart of the city to the peripheral cities," the ministry said. It added that the word 'metro' gives an impression of urban landscape, however, Vande

Metro was conceptualised by incorporating numerous advancements. Giving a comprehensive overview of the Vande Metro and other Metros being operated in the country, the ministry said. "Vande Metro operates at a maximum speed of 110 km/h, offering faster acceleration and deceleration to passengers. This speed

advantage ensures quicker commutes and improved efficiency." It added, "With ergonomically designed seats, fully air-conditioned cabins and modular interiors, Vande Metro definitely proves to be superior than the other metros." Highlighting its safety aspects, the Railway Ministry

said that Vande Metro is equipped with advanced safety systems like KAVACH for collision avoidance, fire detection, and aerosol-based fire suppression, along with emergency lights. So far it's accessibility is concerned, according to the Ministry, it has been designed with inclusivity in features such as Divyangian-friendly

toilets, a fully sealed flexible gangway and meal service among others. Emphasising its superior technology, the Ministry said that Vande Metro incorporates cutting-edge technology, including under slung propulsion and advanced braking systems, offering a smoother ride. "Featuring 12 coaches with seating for 1,150 passengers, the Vande Metro offers a host of innovative features. It boasts double-leaf automatic sliding doors, similar to those in urban metro trains, and a fully sealed flexible gangway that ensures a dust-free, quiet, and rain-proof interior," the ministry said. A significant upgrade, according to the ministry, from traditional suburban trains and metro coaches is the Vande Metro's modular design that includes ejector-based vacuum evacuation toilets. It stated that the Vande Metro

is designed to connect cities within a 150 km radius, providing efficient and comfortable journeys of approximately 3 to 4 hours. "Vande Metro facilitates smooth end-to-end passenger movement and reduces crowding in individual coaches. The semi-permanent couplers, similar to those on Vande Bharat trains, provide a jerk-free travel experience," the Ministry said. It added, "The train offers faster journeys between mid-distance cities. Its rapid acceleration and deceleration contribute to efficient travel, while driving cabs at both ends eliminates turnaround time." Talking about features that will benefit passengers, it said that Vande Metro has modern amenities, including mobile charging sockets with both type-C and type-A outlets, CCTV surveillance for added security, and route-map indicators above the doors.

PIONEER NEWS SERVICE ■ NEW DELHI

Bihar got four more Vande Bharat Express trains on Sunday with Prime Minister Narendra Modi virtually flagging them off. These trains would operate on the Tatanagar-Patna, Bhagalpur-Howrah and Gaya-Howrah routes, besides the Deogarh-Varanasi Vande Bharat that would pass through Bihar. These were among six Vande Bharat trains flagged off by the PM from Ranchi. Chief Minister Nitish Kumar attended the programme virtually from his official residence at 1, Anne Marg in Patna, a statement issued by his office said. Deputy CMs Samrat Choudhary and Vijay Kumar Sinha, and senior railway officials were present at Kumar's residence during

the programme, it said. MoS for Railway Raveet Singh Bittu was present at the Bhagalpur station when the trains were flagged off. "It's a new chapter in modern rail travel for Bihar... It will provide faster, more comfortable, and efficient connectivity. This state-of-the-art train is a testament to India's growing infrastructure and commitment to enhancing passenger experience," he posted on X.

Amit Shah releases expanded Hindi Kahavat Kosh on Hindi Diwas

PIONEER NEWS SERVICE ■ NEW DELHI

Union Home Minister Amit Shah has released the second edition of 'Hindi Kahavat Kosh', authored by Sharad Agrawal, a renowned physician from Uttar Pradesh's Bareilly. The book is a comprehensive compilation of over 10,000 Hindi proverbs and more than 200 stories explaining their origins, aimed at preserving and promoting Hindi linguistic heritage. The book was released here on Saturday at the fourth Akhil Bharatiya Rajbhasha Sammelan held on the occasion of Hindi Diwas. Addressing the programme, Shah said reading Agrawal's book will greatly improve his speaking abilities in the language. Agrawal, with a passion for language preservation, said the idea for the book came from his grandmother, and it took him 20 years to collect these proverbs from various sources, including books and the internet. The first edition of the book, containing 5,400 proverbs, was released in 2021 by Uttar Pradesh Governor Anandiben Patel. Agrawal said this expanded edition not only increased the collection but also enriched it with stories and pictures, illustrating the objects and origins of the proverbs. "The main objective of this was to preserve these proverbs for the coming generation. I believe that increased awareness of these sayings will further enrich the Hindi language and the vocabulary of the people," he said. In addition to his literary con-

tributions, Agrawal runs the website 'healthhindi.in', which provides valuable information about common diseases and their prevention in simple Hindi, promoting health awareness. Looking ahead, Agrawal said he plans to include folk songs in future editions of the book, continuing his efforts to preserve India's cultural and linguistic heritage. "In Hindi literature, apart from the work done by well known writers, there is a vast area of folk literature contributed by unknown people of society through ages. This was transferred verbally and has accumulated through the generations. This includes proverbs, idioms folklores, folk music and puzzles etc. Due to massive impact of social media, people are forgetting all this legacy of Hindi literature. These invaluable creations are now on the verge of being extinct," Agrawal said. He said to preserve Hindi proverbs and to make them available for the common people, he has authored this book. This book also includes pictures of many things which are mentioned in proverbs but are unknown to the new generations. "This definitely is the largest collection of Hindi proverbs and the stories related to them," he said. The writer said to preserve other precious creations of folk literature, he has also collected a large number of lyrics of folk music, proverbs recited by children, Sanskrit proverbs, common proverbs written on transport vehicles and so many good old puzzles told to "us by our grandparents".

BJP-led NDA to implement one nation, one election

PIONEER NEWS SERVICE ■ NEW DELHI

The BJP-led NDA Government will implement 'one nation, one election' within its current tenure, sources said, exuding confidence that the reform measure would receive support across party lines. As the third term of the NDA government led by Prime Minister Narendra Modi completes 100 days in office, the sources said the cohesion within the ruling alliance will continue for the rest of the tenure. "Definitely, it will be implemented in this tenure itself. It will be a reality," one source said, speaking on condition of anonymity. In his Independence Day address last month, the prime minister made a strong pitch for 'one nation, one election', contending that frequent polls were creating hurdles in the country's progress. "The nation has to come forward for 'one nation, one elec-

tion," Modi had said in his address from the ramparts of the Red Fort. The prime minister urged the political parties "from the Red Fort and with the national tricolour as a witness to ensure the nation's progress". He also asked the parties to ensure that national resources are used for the common person and said, "We have to come forward to realise the dream of 'one nation, one election'." "One nation, one election' is one of the key promises made by the BJP in its manifesto for the Lok Sabha elections. A high-level panel headed by

former president Ram Nath Kovind in March this year recommended simultaneous elections for the Lok Sabha and state assemblies as the first step followed by synchronised local body polls within 100 days. Separately, the Law Commission is likely to recommend holding simultaneous polls for all three tiers of government -- Lok Sabha, state assemblies and local bodies like municipalities and panchayats -- starting with 2029 and a provision for unity government in cases like hung house or no-confidence motion.

Panchayati Raj Ministry to hold national conference on PESA Act implementation

PIONEER NEWS SERVICE ■ NEW DELHI

The Panchayati Raj Ministry has come up with specialized training modules for effective implementation of the Panchayat (Extension to Scheduled Areas) Act and is likely to hold a national conference later this month to discuss and advance the implementation of the law. The PESA Act of 1996 gives special powers to gram sabhas in a state's scheduled areas, especially for the management of natural resources. It is aimed at recognising, empowering and promoting the social, economic, cultural and political way of life of the Scheduled Tribes. The ministry is likely to hold a national conference in Delhi on September 26 that will bring together policymakers, senior officers, panchayat representatives and other key stakeholders from the 10 PESA states to discuss and advance the implementation of the Act, an official said. The 10 states under the PESA

Act are Andhra Pradesh, Chhattisgarh, Gujarat, Himachal Pradesh, Jharkhand, Madhya Pradesh, Maharashtra, Odisha, Rajasthan and Telangana. The fundamental spirit of the legislation for tribal areas under the Fifth Schedule of the Constitution is to devolve rather than delegate power and authority to gram sabhas and panchayats, paving the way for participatory democracy. To strengthen the ground-level institutions in these areas, the Ministry of Panchayati Raj, in partnership with the PESA States and various NGOs, has

developed seven specialized training modules for the Fifth Schedule areas, an official said. With land alienation being one of the major issues faced by tribals living in these areas, the training programme provides a special focus on the matter, the official said. Land disputes and inadequate implementation of land reform policies are persistent issues in scheduled areas. Due to the lack of awareness about land rights, communities often struggle to assert their rights, thus being deprived of their traditional means of livelihood.

Government begins decadal census preparations

PIONEER NEWS SERVICE ■ NEW DELHI

The government has started preparations for conducting the decadal census, but a decision is yet to be taken on including a column on caste as part of the exercise, sources said on Sunday. Speaking on condition of anonymity, one source said that the decadal census will be conducted soon. India has conducted the census every 10 years since 1881. The first phase of this decade's census was expected to begin on April 1, 2020 but had to be postponed due to the Covid-19 pandemic. The implementation of the Women's Reservation Act, enacted by Parliament last year, too is linked to the conduct of the decadal census. The law reserving one-third of seats for women in the Lok Sabha and state assemblies shall come into effect after an exercise of delimitation is undertaken based on the relevant figures of the first census recorded after the Act has come into force. "This is yet to be decided," the source said when asked about inclusion of a column on caste in the decadal census.

The political parties have been making vociferous demands for conducting a caste census. In the absence of fresh data, the government agencies are still formulating policies and allocating subsidies based on the data of the 2011 census. The house listing phase of the census and the exercise to update the National Population Register (NPR) were scheduled to be carried out across the country from April 1 to September 30, 2020 but it was postponed due to the Covid-19 outbreak. The entire census and the NPR exercise is likely to cost the government more than Rs 12,000 crore, the officials said.

SC expresses displeasure over false statements in convict release petitions

PIONEER NEWS SERVICE ■ NEW DELHI

Expressing displeasure over the lawyers repeatedly making false statements before the court as well as in the petitions to secure premature release of the convicts, the Supreme Court has said when it comes across cases like this, "our faith is shaken". A bench of Justices Abhay S Oka and Augustine George Masih in its recent order recorded its anguish and said that it has come across several cases in the last three weeks where false statements have been made in the pleading. "A large number of petitions are

being filed in this court where in a grievance is made about non grant of permanent remission. During the last three weeks, this is the 6th or 7th case which we have come across where blatantly false statements have been made in the pleadings," the bench said in its September 10 order uploaded recently. It pointed out that on a miscellaneous cases hearing day in the apex court, there are 60 to 80 matters listed before every bench and it is not possible for the judges to go through each and every page of each and every case listed before the court, though an endeavour to go through every case very meticulously.

Two Navy women officers to embark on global voyage

PIONEER NEWS SERVICE ■ NEW DELHI

Two Indian Navy women officers — Lt Commander Roopa A and Lt Commander Dilna K — would be embarking on an arduous blue-water voyage around the world soon. The duo will be undertaking the expedition of circumnavigating the globe on board Indian naval sailing vessel (INSV) Tarini, Navy spokesperson Commander Vivek Madhwal said on Sunday. The two women officers have been preparing for the 'Sagar Parikrama' expedition for the last three years, he said. "Sagar Parikrama would be a gruelling voyage requiring extreme skills, physical fitness and mental alertness. The officers have been training rigorously and gained thousands of miles of experience under their belt," Commander Madhwal said. "The two officers are undergoing training under the mentorship of ace circumnavigator, and 'Golden Globe Race' hero, Commander Abhilash Tomy (Retired). The officers, as part of a six member crew, had participated in trans-oceanic expedition from Goa to Rio de Janeiro via Cape Town and back last year. Thereafter, they undertook a sailing expedition from Goa to Port Blair and back in double-handed mode. Further, the duo successfully undertook a sortie from Goa to Port Louis, Mauritius again in dual handed mode early this year.

ICMR formalises MoAs with multiple sponsors under phase one clinical trials network

PIONEER NEWS SERVICE ■ NEW DELHI

Marking a ground-breaking entry into first-in-human clinical trials for four promising molecules, the Indian Council of Medical Research (ICMR) has formalised Memorandum of Agreements (MoAs) with multiple sponsors under its Network of phase 1 clinical trials. These include collaborative research over a small molecule for multiple myeloma with Aurigene Oncology Limited, partnering for Zika vaccine development with Indian Immunologicals Limited, coordinating seasonal influenza virus vaccine trial with Mynvax Private Limited, and CAR-T cell therapy advancement study for a new indication of chronic lymphocytic leukaemia with ImmunoACT. The initiative is a crucial step towards establishing India as

a key component in fostering the development of indigenous molecules and cutting-edge treatments. Our vision is to expand this network further, ensuring that India continues to lead in the development of innovative and affordable healthcare solutions." Dr. Bahl also highlighted the broader impact of ICMR's initiatives, such as the Network for phase 1 clinical trials, INTENT Network, and MedTech Mitra, aligning with the government's vision of a "Viksit Bharat" (Developed India). He cited ICMR's pivotal role in development of Covaxin in collaboration with Bharat Biotech as a testament to the organization's commitment to affordable and accessible healthcare for all citizens. Dr. Rajiv Bahl, secretary, department of health research & director general, ICMR, commented, "This collaboration reflects our commitment to advancing clinical research in India through strategic public-private partnerships. Establishing phase 1 clinical trial infrastructure is

a key component in fostering the development of indigenous molecules and cutting-edge treatments. Our vision is to expand this network further, ensuring that India continues to lead in the development of innovative and affordable healthcare solutions." Dr. Bahl also highlighted the broader impact of ICMR's initiatives, such as the Network for phase 1 clinical trials, INTENT Network, and MedTech Mitra, aligning with the government's vision of a "Viksit Bharat" (Developed India). He cited ICMR's pivotal role in development of Covaxin in collaboration with Bharat Biotech as a testament to the organization's commitment to affordable and accessible healthcare for all citizens. Dr. Rajiv Bahl, secretary, department of health research & director general, ICMR, commented, "This collaboration reflects our commitment to advancing clinical research in India through strategic public-private partnerships. Establishing phase 1 clinical trial infrastructure is

Navi Mumbai; SRM MCH&RC, Kattankulathur; and PGIMER, Chandigarh—supported by a Central Coordinating Unit at ICMR headquarters, New Delhi. This network is designed to build and enhance India's capacity to conduct early-phase clinical trials, supported by robust infrastructure and dedicated manpower at each trial site, ensuring smooth and effective operations. The signing of these agreements reinforces the strong partnerships ICMR has cultivated with key industry players, said the Ministry. Marking a ground-breaking entry into first-in-human clinical trials for four promising molecules, the Indian Council of Medical Research (ICMR) has formalised Memorandum of Agreements (MoAs) with multiple sponsors under its Network of phase 1 clinical trials.

Rahul Gandhi congratulates AIMC leaders on 40th anniversary

PIONEER NEWS SERVICE ■ NEW DELHI

Leader of Opposition in the Lok Sabha Rahul Gandhi on Sunday said the Women's Reservation Act is an opportunity for the Congress to nurture and support both established and aspiring women leaders. In his message on the 40th anniversary of the All India Mahila Congress (AIMC), Rahul said that during the Bharat Jodo Yatra and Bharat Jodo Nyaya Yatra, he met remarkable women across India determined to make a difference. "Many had the passion, perseverance and commitment to drive far reaching changes in society. Some of the fiercest and most fearless voices against injustice were of women," the former Congress chief said. In this day and age, there is no reason whatsoever to deny women meaningful opportunities in public life, he asserted.

Rahul congratulated Mahila Congress leaders and members, both past and present, who built this organisation brick by brick. AIMC has come a long way since the 1984 Bangalore Convention, he said, adding that over the last four decades, the AIMC has been a fearless voice for justice and has firmly established itself as one of the most active front organisations in the Congress party. "On this occasion, I would like to congratulate the AIMC on the launch of the nationwide online membership drive for

the first time," he said. "In a system often stacked against women, it is critical for each one of you to fight for and claim your rightful share of social, economic and political power. I am happy to know that the membership drive will be followed by a pan-India leadership training program," Rahul said. The Women's Reservation Act is an opportunity for the Congress to identify, nurture and support both established and aspiring women leaders, he said. "We have witnessed the radical change ushered in by the 73rd and 74th Amendment. This must inspire us to do more," he said. "I hope the AIMC continues to work towards ensuring greater political participation of women across caste, class and religious lines. Lastly, I salute your dedication to a cause greater than yourself, and wish the AIMC the very best in its future endeavours," Rahul said.

Will stake claim for CM post if BJP returns to power in Haryana: Anil Vij

PTI ■ AMBALA/CHANDIGARH

Senior BJP leader and former Minister Anil Vij on Sunday said he will stake claim for the chief minister's post if the party returns to power in Haryana after the October 5 Assembly polls. The six-time MLA's remarks come at a time when the party has already made it clear that Nayab Singh Saini will be the chief minister if the BJP returns to power. Saini is also the party's chief ministerial face in the polls. "I never sought anything from the party till today... People from Haryana are coming to meet me. Even in Ambala, people tell me that I am senior-most why I did not become CM. On demand of the people, and on the basis of seniority, this time I will stake claim to become chief minister," Vij

said. Whether the party makes me or not, it is up to them. But if they make me CM, I will take Haryana's 'takdeer and tasveer' (destiny and face of Haryana), the Ambala Cantt MLA said. When asked to clarify the remarks he made while interacting with reporters in Ambala, Vij later told PTI over phone, "I am the party's senior-most MLA and have won six elections and am contesting my seventh one. I have never sought anything from my party so far." "But people from across Haryana and people of my own constituency have been meeting me... I will stake claim for the chief minister's post," the 71-year-old Vij said. "It is up to the party high command to take a call," he said. When pointed out the Saini has already been declared chief

ministerial candidate, Vij said, "There is no bar on staking the claim. I will make my claim, let the party take a call." Asked about the timing of his decision with polls only a couple of weeks away, Vij said he took the decision after people came to meet him. "People have been regularly meeting me and asking me about this (that he is senior most and yet not become CM)," Vij said. Notably, in March, Manohar Lal Khattar was replaced by Saini as chief minister. Polling for the 90 assembly seats in Haryana will be held on October 5 and the votes will be counted on October 8. When BJP came to power in Haryana for the first time on its own strength in 2014, Vij along with few other BJP leaders including Ram Bilas Sharma, was frontrunner for the CM's post, but the party

went with Manohar Lal Khattar, a first-time MLA then, as its choice. Recently, BJP has faced resentment from some of its leaders who were denied tickets. BJP leaders including Ranjit Singh Chautala, Laxman Napa, Karan Dev Kamboj and few others quit the party. Former Minister Ram Bilas Sharma was also denied ticket from Mahendragarh this time. In March, Vij was said to be upset with the BJP for not keeping him in the loop when the party decided to replace Manohar Lal Khattar as the chief minister and bring Nayab Singh Saini in his place. He had then said he came to know about it only in the BJP MLAs' meeting here in which Saini's name was announced. Vij later also did not find a place in the cabinet led by Saini. The senior BJP leader had also kept away from Saini's

swearing-in ceremony in March. In April, while addressing a public gathering in Ambala, Vij, without taking any names, had said, some people have made him a stranger in his party. "Mana kuch logo ne mujhe meri party mein he begana bana diya hai, parantu kayee baar begane apno say bhi zyada kaam kar jaate hai, (It may be true that some people have made me a stranger in my party, but sometimes strangers do more work than own people)," Vij had then said. Vij, who held the home portfolio in the Manohar Lal Khattar government, was often at loggerheads with Khattar when he was the CM. Vij, has in the past maintained, that he is a dedicated worker of the Bharatiya Janata Party, but whatever he has to say he says it clearly.

PM Modi accuses JMM-led coalition of patronising Bangladeshi, Rohingya infiltration

PIONEER NEWS SERVICE ■ JAMSHEDPUR

Prime Minister Narendra Modi on Sunday accused the ruling JMM-led coalition in Jharkhand of patronising Bangladeshi and Rohingya infiltration for vote bank politics. He said infiltrators from the neighbouring country are a major threat to Jharkhand as they are changing the demography of the Santhal Parganas and Kolhan regions of the state. "Bangladeshi and Rohingya infiltrators have become a major threat to Santhal Parganas and Kolhan regions. The demography of these regions is changing fast. The tribal population is on the decline. The infiltrators are establishing control of the panchayat system, grabbing land, indulging in atrocities on daughters of the state... Each Jharkhand resident is feeling unsafe," the prime minister said while addressing the 'Parivartan Maharally' of the BJP at Gopal Maidan. He also alleged that the JMM was "supporting infiltrators" and the fact was that "illegal immigrants from the neigh-

bouring country managed to establish influence" over the ruling party in the state. Modi termed the JMM, RJD and the Congress as the "biggest enemies of Jharkhand", asserting that these parties were "power-hungry" and "indulged in vote bank politics". The PM also alleged, "The JMM-led government has been trained by Congress' school of corruption. It is time to bid farewell to the JMM that looted mines, minerals and Army land." Modi, who was scheduled to reach Jamshedpur via a chopper, had to travel to the steel city on the road as his heli-

copter could not take off due to inclement weather conditions. "No obstacles, including heavy rain, could prevent me from reaching you, I am touched by your affection," he said. He also asserted that the BJP is set to come to power in the state after the assembly polls due later this year. "If the BJP comes to power, it will launch a probe into deaths of aspirants during excise constable recruitment drive," he said. Modi accused the JMM-led coalition of targeting BJP leaders and framing false cases against them.

62 candidates in fray for four Assembly seats in Gurugram

PARVESH SHARMA ■ GURUGRAM

Gurugram district is set to witness a crucial political contest as 62 candidates are in the fray for 4 assembly seats in the upcoming assembly elections. District Election Officer and Deputy Commissioner Gurugram Nishant Kumar Yadav said that election symbols will be allotted to the candidates who have filed nominations in all four assembly constituencies of the district namely Pataudi, Badshahpur, Gurgaon and Sohna on Sunday. He said candidates who are willing to withdraw their nomination papers. They can withdraw their nomination papers by September 16 after that the nomination papers will not be considered. Yadav said that to withdraw the nomination, it is very important for the concerned candidate to fill and submit Form 5. If the candidate is not there, then it is mandatory for the candidate, agent and proposer to take written permission from the candidate to fill Form 5. He informed that in the district, 8 candidates have filed their nomination papers in

Pataudi assembly, 15 in Badshahpur, 20 in Gurgaon assembly and 19 in Sohna assembly. The District Election Officer called upon all the candidates to ensure that they follow the instructions issued by the Election Commission. It is mandatory for the candidate to take permission from the administration for rallies, road shows and other programs. If any candidate violates norms, then necessary action will be taken against them under the rules laid down by the Election Commission. He informed that voting for the assembly elections will be held on October 5 and counting will be held on October 8, the result will be declared along with the counting.

Meanwhile, Haryana, is known for its politically charged environment, is expected to see intense competition, with various regional and national parties fielding strong candidates. The two major national parties BJP and the Congress are leaving no stone unturned in its quest to win the elections and cement its influence in the state. The BJP's campaign is led by top national leaders, including Prime Minister Narendra Modi, Home Minister Amit Shah, and Defence Minister Rajnath Singh. The BJP's strategy centres on highlighting development projects, promising better governance, and focusing on national security to appeal to voters in Haryana.

Modi lays foundation stones of road over bridges at Chhota Govindpur, Barigora level crossings

DEEPAK KUMAR JHA ■ JAMSHEDPUR

Falling under the Chakradharpur (CKP) Division of the South Eastern Railway zone, Modi laid the foundation stones of road over bridge (ROB) at Chhota Govindpur and Barigora level crossings and an underpass at the Salgajhari level crossing on February 26, 2024 and all the projects are within three kilometres range of the Tatanagar station. "For years residents waited for the ROB at Barigora, Govindpur and Salgajhari. This would have certainly given much relief to people, particularly the motorists of surrounding areas who take the route to reach the main city. But it was that elections and now this assembly polls ahead not an inch of work you can see. Now we feel all these projects are a poll jumla," said Sanjay Singh, a resident adjacent to Salgajhari Halt when The Pioneer visited to check status of the projects announced PM six months ago. Social and political outfits besides students' groups have been demanding ROB at the

three level crossings for around past one decade as these are crucial for further socio-economic activities as these projects fall on the main Howrah Tata Mumbai railway line that also bifurcates the rural and urban Jamshedpur industrial town. Mahendra Jha, a resident near the Govindpur Halt, also rued the fact that the project was limited only to the Lok Sabha sops announcement and it has remained only on the media clippings. "Even today we laugh when we see the foundation stone laying video clips on YouTube," Jha said. Interestingly after the projects were announced a lot of development activities took place ever since these projects were announced and thereafter foundation stone by PM.

Kerala Me Too allegations has roots in turf war

PNS ■ KOCHI

The Me Too controversy plaguing Malayalam film industry with the disclosures made by a report prepared by the K Hema Committee that probed the professional difficulties of women artists and technicians had its roots in the turf war between various power groups in the Kerala Motion Picture Academy (Kerala Chalachitra Academy), a State Government undertaking. A war of nerves was brewing up in the Academy between the groups led by Ranjit and Bina Paul, the director of International Film Festival of Kerala (IFFK), according to sources in the Academy. Ranjit, who was appointed by the Pinarayi Vijayan dispensation quit as chairman following an allegation made by Sreelekha Mitra, Bengali film actress that the former had misbehaved with her in 2009. The grapevine is that Ranjit, a graduate of the School of Drama in Calicut University tried to usher in changes in the film festivals which was not liked by the cartel controlling the Academy. Ranjit was appointed immediately after the resignation of Kamaluddeen, a controversial character who allegedly molested and abused wannabe artists. But till date no action has been taken against Kamaluddeen, known by his screen name Kamal. Irked by their sidelining from important positions, the group opposed to Ranjit devised a strategy to oust him from the Academy. It all began during the last IFFK held at Thiruvananthapuram when Ranjit, a hardcore SFI and CPI(M) activist despite his roots in a feudal Nair zamindar family, was booed down by a

section of the audience. Interestingly most of them were CPI(M) activists. "A thorough probe into the phone calls made by two persons (including a documentary film maker) to Mitra in the recent past. There were no justification behind the telephone contacts between these persons and Mitra at this juncture," said a film professional with Doordarshan Kendra, Thiruvananthapuram. He is of the view that the unprecedented increase in the number of calls between the actress and Chalachitra Academy officials has no other justification. He also pointed out that though Ranjit was in the industry since 1985 and had his first directorial venture in 2001, this is the first time an accusation of this kind has been made against him. Though Ranjit is known for his arrogance, this scion of a feudal zamindar Nair family despite working with some of the divas have remained aloof from casting couch controversies till Mitra made her allegations. Mitra's allegations prompted many junior artists to come out with "Me Too" charges against many senior artists and they all quit their elected positions in AMMA, an industry body. The Investigation Team probing the a la Mitra issue has been left clueless over the timing of Mitra's charges.

HM Shah to wrap up first round of high voltage campaign in Jammu

PNS ■ JAMMU

To wrap up the first round of the high-voltage election campaign Union Home Minister Amit Shah will be arriving in Jammu on Monday to address three back-to-back election rallies in Ramban and Kishtwar districts on the last day of the campaigning. The voting is scheduled to take place across 24 Assembly segments on September 18. A total number of sixteen (16) Assembly Constituencies of four southern districts of Anantnag, Kulgam, Shopian, and Pulwama districts and eight (8) assembly segments of three districts of Doda, Ramban, and Kishtwar will go to polls in the first phase. Prime Minister Narendra Modi Saturday generated momentum in support of the BJP by addressing an impressive rally in Doda. On the occasion, Modi reiterated his government's promise of restoring statehood to Jammu and Kashmir and cautioned

people against bringing the NC, Congress, and the PDP back to power. "Amit Shah will address 3 rallies at Ramban, Kishtwar, and Padder," BJP Spokesperson & Media Centre Incharge Arun Kumar Gupta said and added, "BJP is getting overwhelming response from the people across J&K and will form a government with the majority". This will be Amit Shah's second visit. Earlier, he made a two-day visit to Jammu, where he not only released the party's

manifesto but also addressed a large convention of party workers in Jammu city on the second day. Out of eight Assembly segments, the BJP is aiming to win the maximum seats and retain at least all four seats it won during the 2014 Assembly polls. On the other hand alliance partners Congress and National Conference are also working hard on the ground to improve their tally and give a tough fight to the BJP in Doda and Ramban.

Rashid springs surprise by allying with banned Jel

PIONEER NEWS SERVICE ■ JAMMU

Awami Ittehad Party (AIP) Supreme and parliamentary Sheikh Abdul Rashid Sunday sprang a surprise by allying with the banned Jamaat-e-Islami (JeI) ahead of the first round of polling on September 18. The alliance was announced by Engineer Rashid during a rally in the Tral area of South Kashmir. According to the agreement reached between the two, AIP would support banned Jel-backed candidates in Kulgam and Pulwama, and similarly, Jel will throw its support behind AIP candidates across Kashmir. In areas where both AIP and banned JeI have fielded candidates, the alliance has agreed to a "friendly contest," particularly in constituencies like Langate, Devsar and Zainapora.

Before making the formal announcement thorough deliberations were held between the two groups. AIP was represented in the joint meeting by Member of Parliament Er Rashid, and AIP Chief Spokesperson Inam Un Nabi, while the banned JeI delegation was led by Ghulam Qadir Wani. Prominent former JeI members were also present in the discussions, AIP spokesperson said. Under the terms of the alliance, in other constituen-

cies, mutual support will be extended to ensure a unified approach to the elections, AIP spokesperson said. He added both parties underscored the importance of unity in resolving the Kashmir issue and promoting a lasting and dignified peace in the region. They highlighted the rapidly evolving political landscape, both regionally and internationally, and stressed that neither the banned JeI nor AIP can afford to remain passive observers.

IAF provides aid to Cambodia, Vietnam

PIONEER NEWS SERVICE ■ NEW DELHI

The Indian Air Force (IAF) has deployed its C-17 Globemaster transport aircraft to provide Humanitarian Assistance and Disaster Relief (HADR) operations in Cambodia (Vientiane, Laos) and Vietnam (Hanoi) following the severe flooding caused by Typhoon Yagi, officials said here on Sunday. Giving details, they said swift and efficient Loading and coordination was carried out by C-17 team at Hindan, Ghaziabad. Nearly 35 tons of aid comprising of water purification items, water containers, blan-

kets, kitchen utensils, solar lanterns is for Vietnam. Ten tons of aid comprising genset, water purification items, hygiene supplies, mosquito nets, blankets and sleeping bags for Cambodia.

These aircraft, known for their large cargo capacity and long-range capabilities, are typically used to transport relief materials, essential supplies, and personnel to disaster-affected areas.

Three including father, son drown during Ganesh idol immersion in Karnataka

PTI ■ TUMAKURU

Three persons including a father and son drowned during immersion of Lord Ganesh idol at Ranganahatti lake in Turuvekere taluk here on Sunday, police said. The deceased have been identified as Revanna (aged about 50), his son Sharath (26), and Dayanand (22). The incident took place when Sharath and Dayanand entered the water body to immerse the Lord Ganesh idol after the procession. They were allegedly unable to swim as their legs were caught in sludge, and

called those on the banks of the lake for help. Revanna immediately jumped into the water, but he too couldn't swim and all the three drowned, police said.

Police and Fire department personnel have reached the spot and a search is on to recover the bodies, officials said, adding that a case has been registered.

PAPER WITH PASSION

India inundated

The unprecedented rains have wreaked havoc across the country, serving as a stark wake-up call for urban planning

India's major cities, including Mumbai, Delhi, and Bengaluru, are reeling from the aftermath of unprecedented rainfall, leading to widespread flooding, loss of life, property damage, and severe disruptions to daily life. As heavy monsoon showers continue to batter these urban hubs, residents are grappling with submerged streets, gridlocked traffic, and power outages, exposing critical flaws in the country's urban infrastructure. This year's torrential downpour has been particularly devastating. In Mumbai, water levels have risen to waist height in low-lying areas, while Bengaluru's once-bustling tech corridors resemble rivers. Over 100 lives have been lost in flood-related incidents across the country, with thousands displaced from their homes. Many families have seen their life savings washed away in a matter of hours as homes and vehicles succumb to rising waters. Besides, the northern cities like Meerut, which hardly ever reported water-logging, have been partially submerged. The economic toll is equally staggering. Shops, offices, and industries have faced forced shutdowns. Public infrastructure has borne the brunt of the floods.

Urban centres in India are no strangers to traffic congestion, but the flooding has exacerbated an already dire situation. In Delhi, where rainwater has clogged major arterial roads, commute times has increased manifold.

The inconvenience is compounded for those who rely on daily wages for their livelihood, as the disruptions prevent them from working. The scale and intensity of these floods underscore the urgent need for India to rethink its urban planning. Many problems are rooted in poor drainage systems, encroachment on natural water bodies, and unregulated urban sprawl. In cities like Mumbai and Chennai, where floods have become an annual menace, experts have long warned of the consequences of unchecked development in flood-prone areas. Indeed the rains have been unprecedented but they have exposed the slackness of urban planning which is ill-equipped to deal with heavy downpours in the monsoon season. Drainage are clogged, necessary equipment is either unavailable or non-functional, and poor planning in executing operations only exacerbates the situation. City drainage across the country are either outdated or inadequate to handle the massive volumes of rainwater. Local governments must invest in upgrading this critical infrastructure, ensuring that water can be efficiently channelled away from residential and commercial areas. Besides the builder-bureaucrat nexus has stolen away the water bodies. Many lakes, rivers, and wetlands that once absorbed rainwater have been lost to unplanned illegal development. It goes without saying that urban planning should incorporate green spaces, permeable surfaces, and sustainable construction practices that allow water to seep into the ground rather than accumulate on the surface. This includes promoting rainwater harvesting and stormwater management solutions. Cities must build climate resilience into their long-term plans.

The art of problem solving

Those in decision-making roles must be equipped with the necessary skills, attitudes, and awareness to meet the demands of their tasks

VINAYSHIL GAUTAM

Problem-solving is more than an art. It is a matter of resources, teamwork, and timing. Behavioral interventions in problem-solving need to keep this in mind. This applies equally to training programs on problem-solving. Many training programs tend to believe that if their techniques are right the results will surely follow. This is a palpably comforting approach but with limited truth in reality. Amongst the foremost requirements of problem-solving is the need for all the people involved in the process to have the necessary skills to handle the job. The job itself has to be neatly reduced to manageable levels of skill clusters, and the persons allotted the responsibility for it must have the necessary attitude, skills, and approaches to handle the job. Unfortunately, not all in key decision-making situations have the competence to embrace this simple truth.

They seem to have arrived in that position either through regular promotion, seniority, hierarchy, or indeed, simply by chance. While the logic that brought them there is understandable, it does not meet the requirements for getting the tasks done. The result is therefore all to see. Not only do accidents take place, but delays and ineptness also become the hallmarks of a situation. It is important to remember this while planning an activity. It is important to build this into training programs, and above all, it is important to remind those who control the resources to be conscious of this requirement. Even when all the skill columns and more are regularly accounted for, it stands to reason that the resources of the supply chain must be intact and in position. As it happens in organizational setups, the supply chain side and the engineering side need effective dialogue, communication, or exchanges with the human resources side, the skill formation side, and control and monitoring methodologies. Thus, it is that ineptness becomes an inevitable part of the scene in organizations not so well linked together on these dimensions. It

is therefore necessary to create a culture of effectiveness and an appreciation of the requirements to deliver. To deliver requires, to the extent possible, objective and manageable resource mobilization, skill availability, sensitive monitoring, and linking up with the results in the time set. If this is not done, effectiveness is impaired, and others who can organize themselves will surge forward, and then the institutional returns of the defaulting group will continue to diminish. It may ultimately reach a point where there may be no surpluses to distribute even for salaries or to administer. This is a point of view to which no exceptions can be made. Considering this in the current and growing crescendo on reservations is something that can be avoided only at the grave risk of creating further problems for oneself. Struggle for the decision-making process is often termed as 'politics' and political processes in a country like India are often determined by numbers. Hence, the push to enhance the numbers of one's following and pander to political rising waves, even though it may not be sustainable in the long run. This is such an obvious warning and caution that it cannot be over-emphasized. The tragedy is, not only that so many people seem to

GRADUALLY, THROUGH POLITICAL COMPULSIONS AND OTHERWISE, THE FOCUS OF RESERVATION-AFFECTED COMMUNITIES WAS EXPANDED TILL THE SUPREME COURT HAD TO STEP IN AND SAY THAT NOT MORE THAN 50% OF POSITIONS COULD BE MADE IN THE RESERVED CATEGORY.

overlook this point. It appears, at times, that many otherwise knowledgeable people do it purposefully to gain political advantage. Little do they realize that what they gain on the swing, they will lose on the round. In this context, two observations need to be made, one concerning the constitution and the other concerning the practices of reservation for social equity in other parts of the world. The constitution in its initial draft was very clear and forthright on the reservation as a policy only for a limited period, even the period for which was indicated. Gradually, through political compulsions and otherwise, the focus of reservation-affected communities was expanded till the Supreme Court had to step in and say that not more than 50% of positions could be made in the reserved category. Pressure has been on for a while, in political terms, to loosen this limit. Should this happen, it could have implications, not just politically but also in terms of perhaps affecting the results of performance. This could jeopardize the total volume of resources, then, available for distribution. To consider the issue of social equity in other communities and countries beyond India may be worthwhile. Limited examples may be found across

the world where the total availability of jobs is parcelled off in reserved blocks. Some nations have a parallel stream for reserved categories and a definite stream where only talent could be a criterion for selection. This amalgam seems to have worked for both productivity and distributive justice. There is a clear case of streaming of jobs in India, being examined from this point of view also. Not to look at this option would be limiting the possibilities of growth with equity. That may be risky and unwise. The logic of preferential treatment has many caveats, and one of them is that preferential treatment could become a matter of habit and expectations, and when not granted, it could be seen as akin to 'rights' being violated. The time has come to seriously ask whether the slogan-mongering of several political groups may not be tantamount to throwing the baby out with the water. Every approach can be considered for and against, but the ultimate solution should preferably incorporate requirements of universal equity, and sustainability amongst various criteria of performance and results. (The writer is an internationally acclaimed management consultant. The views expressed are personal)

LETTERS TO THE EDITOR

BAIL IS THE RULE, NOT EXCEPTION

Madam — It is indeed a welcome move on the part of the SC to quote Article 21 of the Indian Constitution which enables an Indian citizen protection of life and personal liberty and orders bail to the leaders with the often quoted words of SC "bail is a rule and jail is an exception. While one would not disagree with this ruling the SC may be reminded of the pending cases where several political leader's cases have been pending for more than two or three decades. These leaders use the powers they wield and resources in their command and with the aid of the top most lawyers frustrate the system and ensure the trial is delayed for some decades. The pending DA cases of TN ministers and the verdict in the case of Jagdish tytler will vouch for this fact. SC should also lay guide lines for speedy trial in cases such as these while ordering bail.

Gopalaswamy J | Chennai

PORT BLAIR IS NOW SRI VIJAYA PURAM

Madam — Reference: "Centre renames Port Blair as Sri Vijaya Puram" (the pioneer September,14). Centre's decision to change the name of Port Blair to Sri Vijaya Puram showcases an indication that they want to acknowledge and celebrate the rich historical and cultural past of India. With reference to the former waterborne empire of Sri Vijaya, this plan is meant to laud the maritime heritage as well as regional pride within India. Nonetheless, such a name change trend would evoke some discussions that are wider in scope regarding modifying names with regard to more contemporary backgrounds. Some people would see it as a bidding to claim back lost histories while others think it disturbs ancestral practices and community memory too much. It is therefore important for the government world to balance them so as to keep themselves including everybody in their stories.

Garima Singh | Kanpur

CAGED PARROTS

Madam — The Supreme Court's scathing

India's booming bioeconomy

In reference to 'Indian bioeconomy hits US \$151 billion, contributes 4.25% to GDP' (14 Sept), the remarkable growth in key sectors like biopharma, bio-fuel, and biotechnology could be further accelerated through enhanced government support in the form of funding, tax incentives, and mandatory policies on ethanol-blended petrol and biofuels in agriculture. Tier-II and Tier-III cities offer significant

opportunities for biofuels in the agricultural sector, reducing costs, creating jobs, and fostering local entrepreneurship through dealership networks. A strategic approach could also be applied to biofuel exports, particularly to neighboring countries. Additionally, there is vast potential for bio-based household products, such as cosmetics, provided there is proper standardization. Universities and research institutions should be encouraged to pursue innovative research in areas like marine biology, space, and vaccines. The growth of the bioeconomy is a result of joint efforts by the corporate sector, industry, research institutions, and the government. This progress also aligns with India's goals for COP 28.

Vinod Johri | Delhi

comment on the CBI might as well apply to nearly all of the government's institutions (Ref: Supreme Court again compares CBI to caged parrot, p3, Sept.14). The "caged parrot" remark, now made by Justice Bhuyan, was first made by the Supreme Court way back in 2013, during the investigation of the "Coalgate" scam. A lot of water has flown down the Ganges, but nothing seems to have changed on the ground. The reiteration of this sarcastic and stinging remark affirms that even the highest investigating agency in the country is beholden to the powers that be. The same remark may be extrapolated to other institutions to a greater or lesser degree. Take the police department as just one example. Cases are doctored, expedited, closed, or hushed up, depending on signals that originate from the political leadership in a particular state. The recent RGK hospital crime in Kolkata bears shameful testimony to this. No Investigating Officer dares to rub his political masters the wrong way by insisting upon following the rule book. Justice

is given a short shrift because the department in question, in this case the police department, is a "caged parrot", much like the CBI. Sports and Education are no exceptions. The Brij Bhushan Saran Singh saga bears ample testimony to the fact that political bigwigs run their departments much like their fiefdoms. If sportsmen and sportswomen of repute have to resort to "dharmas" in the country's capital for the redressal of their grievances, the lot of the common man seeking justice can well be imagined. There is nobody to red flag the minister for higher education, M.P, when he rubbishes well established historical facts and claims that we had trade relations with America in the eighth century, even before Columbus discovered America in the fifteenth. The saddest part is, even the fourth estate is playing along, instead of questioning our elected representatives on our behalf. Sad and shameful, to say the least.

Life's unplanned pathways: A journey through coincidences

SANJAY CHANDRA

Sometimes life unfolds in ways that we cannot foresee, shaped by a mix of choices, opportunities, and coincidences

I joined a premier engineering and science institute after my schooling. I quit two years later as I failed to secure an engineering seat. I joined another engineering college and then the prestigious railway services. My entry into the railways could also be attributed to good fortune as the organization increased the number to be inducted. My inability to join the civil services was a sore point with my parents. I would often tease them that I might have done much better had I continued to pursue science. They would retort that I might have been working as a clerk in some obscure government department. Who knows! I might have worked harder to clear the civil services examinations had I continued to pursue science in the premier institute or had I not been selected for the railways. My father often narrates the story of his friend, a civil engineering graduate from his college, who joined the state services. He was afraid that the

bridge that he had designed might collapse. He followed my father's advice to join academics. He is now an internationally recognized geotechnical engineer in America. My father is an electrical engineer who joined the engineering college a year into postgraduation. He had wanted to pursue his MSc and then enter academics if he could not join the prestigious IAS. My father does not regret his choices. He does have one memory that he regrets whenever he remembers about it. This also is from his college days. A few of them decided to indulge themselves with an evening out. My father went to the friend's room to take him along. This young boy appeared cheerful but refused to accompany

them. He had committed suicide by the time they returned. My father still ruminates, "Maybe, we could have saved him had we stayed back or pushed him to accompany us." I know an engineer who joined a famous engineering college. The branch that he had joined was not considered well-placed. He was offered the branch of choice in another college a year later. He left the overnight without consulting anyone. He is extremely successful in his chosen profession. However, he has pangs of regret that his life would have taken a different trajectory had he not taken the impulsive decision and waited the night out to reconsider. The two of us recently bumped into another well-known engineer at Mumbai airport. This gentleman almost quit the structured and disciplined life of the engineering college which was in stark contrast to the relaxed environs of the science graduate course he had completed. He went to his friend's hostel room with

the admission forms for the postgraduate course, to realise that the studies were as structured and disciplined as his engineering course. He completed his engineering, joined the railway services, and successfully headed a leading metro rail organization in India at the time of his retirement. We were walking to our car after a beautiful laser show in Connaught Place in Delhi a few years back. I was approached by a lady requesting if she could use my mobile phone to contact her husband. They had got separated in the crowd. The husband spoke to me to thank me for the courtesy. It turned out that we were together during training in my first job. Douglas Coupland, Canadian novelist and designer, said, "Every single moment is a coincidence." It is up to us to use this joker in the pack to play this game of life. SPORTS BOOST MENTAL HEALTH

Engaging in sports strengthens emotional stability and cognitive growth

SAKSHI SETHI

Sports have since long been celebrated for their physical benefits, but their impact on mental health is equally profound. Engaging in sports activities is more than just a means to maintain physical fitness. It is one of the powerful tools to enhance mental well-being. In an age where mental health challenges are increasingly common, the role of sports in fostering a healthier mind is more relevant than ever. One of the most significant mental health benefits of sports is their ability to reduce stress and anxiety. Engaging in various physical activities increases the production of neurotransmitters like serotonin and dopamine, which play a crucial role in regulating the mood and emotions of an individual and being consistent in sports routine can lead them to a more stable mood, thereby helping them in reducing symptoms of depression and promoting overall emotional well-being. Furthermore, achieving personal goals in sports, such as running a faster mile or mastering a new skill, provides a sense of accomplishment that boosts not only self-esteem but also confidence to a large extent. Sports such as basketball, soccer or tennis that involve strategy, coordination as well as decision-making require quick thinking and concentration can help improve cognitive skills over time. Studies too have shown that regular physical activity can enhance memory, problem-solving abilities as well as attention span, which are all critical components of mental health. By keeping the brain active and engaged, sports help in maintaining cognitive function and prevent age-related decline. Moreover, they also teach individuals how to handle failures, manage stress and push through adversity- skills that are invaluable in everyday life. Whether it is dealing with a loss, overcoming an injury or working hard to achieve a goal, sports challenge individuals to grow stronger

and mentally. This process of overcoming obstacles builds resilience and equips individuals with the mental fortitude to face life's challenges more effectively. Not only this, engaging in team sports, cycling and aerobic activities are particularly effective in reducing anxiety symptoms caused likely due to the combination of physical exertion and social interaction.

When talking about different stages of life, there is no denying the fact that sports play a crucial role in enhancing mental health across various stages of life—whether in school, college or professional settings. Schools can be a stressful environment for children due to academic pressures, social dynamics and extracurricular demands so engaging in sports offers an effective outlet for releasing stress and pent-up energy. Regular participation in the same helps manage stress by releasing endorphins and promoting relaxation, which leads to better focus and productivity in academic pursuits. Sports not only improve physical health but also boost mental acuity. This improved cognitive function can translate into higher productivity and better problem-solving abilities at work. Regardless of age or stage, engaging in sports provides a holistic approach to maintaining and enhancing mental health, making it an invaluable tool for personal well-being and development. Thus, the benefits of sports extend beyond physical fitness thereby contributing significantly to emotional well-being, cognitive development and social integration. By fostering resilience, enhancing emotional regulation and encouraging positive social interactions, sports provide a comprehensive approach to mental health care. In a world where mental health challenges are increasingly prevalent, the importance of sports as a tool for mental well-being cannot be overstated. Encouraging participation in sports at all levels, from casual play to competitive athletics, can be a powerful strategy for improving mental health across all age groups.

Nothing undemocratic about PM's visit to CJI's pooja

GOURAV VALLABH

In a nation where governance and justice work in tandem to uphold the Constitution, such an event signifies the harmony necessary for collective effort

The Prime Minister of India attending a Ganesh Pooja at the residence of the Chief Justice of India (CJI) is an act that should be seen as a symbol of respect and unity rather than an event warranting criticism. In the complex structure of Indian governance, where the judiciary and the executive function as distinct but interdependent pillars, such gestures are appropriate and reflective of the harmony essential for the nation's progress. To criticise this act would be to adopt a narrow-minded approach, ignoring the more profound significance of the occasion. The judiciary and the executive are two of the most important pillars of Indian democracy. While they are distinct in their functions, they share a common purpose: the preservation of the Constitution and the welfare of the people. The Prime Minister, as the head of the executive, and the Chief Justice of India, as the head of the judiciary, embody the leadership of two vital branches of government. Their personal or religious event participation reflects mutual respect and understanding of their respective roles in the country's governance. The Ganesh Pooja, a significant religious event in India, represents the invocation of wisdom, prosperity, and the removal of obstacles. By attending such an event together, the two leaders are sending a message that they are united in their goals for the nation, seeking divine blessings for the common good. To view this act as inappropriate would be to overlook the fact that it is not merely a personal gathering but a reflection of shared responsibility in upholding the constitutional fabric of India. Critics of the Prime Minister's participation in the Ganesh Pooja at the Chief Justice of India's residence should remember that performing the Ganapati Pooja is not a crime, but a deeply ingrained part of India's cultural and historical heritage. The significance of Ganesh Pooja, especially when viewed through the lens of its revival by the great freedom fighter Bal Gangadhar Tilak, is a reminder of its deeper objectives—unity, nationalism, and collective strength. In this context, the Ganesh Pooja is not just a religious ceremony but a powerful cultural symbol that has historically promoted social

BY COMING TOGETHER AT A RELIGIOUS EVENT, THEY DEMONSTRATE THAT DESPITE THEIR INSTITUTIONAL SEPARATION, THEY WORK TOWARDS THE SAME LARGER AND GREATER GOAL—THE WELFARE OF THE PEOPLE AND THE STRENGTHENING OF INDIAN DEMOCRACY

cohesion, unity, and nationalism. By criticizing such an event, the critics undermine the values that Tilak sought to instil through this festival. In Indian tradition, the term "Karta" refers to the head or manager of a family, responsible for the well-being of the entire household. Similarly, the Prime Minister and the Chief Justice act as the 'Kartas' of their respective domains: the executive and the judiciary. While their roles are different, their objectives often align, especially concerning matters of national interest, law and justice. By coming together at a religious event, they demonstrate that despite their institutional separation, they work towards the same larger and greater goal—the welfare of the people and the strengthening of Indian democracy. As the Karta of the executive, the Prime Minister is responsible for running the government, implementing laws, and ensuring the country's development. The Chief Justice, as the Karta of the judiciary, ensures that justice is upheld and that the laws are interpreted and applied in a fair and just manner. These roles complement each other, and public gestures of respect and unity, such as attending a religious event together, only strengthen the understanding and coordination between these two pillars of governance. Only a narrow-minded perspective would find fault in the Prime Minister's attendance at the Ganesh Pooja. Such criticism is often rooted in a limited understanding of the executive and judiciary's roles in the country's broader governance. Criticizing such gestures of goodwill and unity overlooks the significance of collaboration between these branches, which is essential for a well-functioning democracy. By attending the Ganesh Pooja, the Prime Minister and the CJI are reinforcing their commitment to work together for

the nation's greater good. It is well-known that Congress, during its tenure in power, had multiple instances where it was accused of attempting to influence or interfere with the independence of the judiciary. One such example that comes to the mind of every informed citizen is when Chief Justice S.M. Sikri retired on April 25, 1973, the day after the Supreme Court's landmark Kesavananda Bharati judgment, which ruled that Parliament could not alter the "basic structure" of the Constitution. Displeased by this limitation on her plans for constitutional amendments, Indira Gandhi swiftly responded by superseding three senior judges—Justices K.S. Hegde, J.M. Shelat, and A.N. Grover—on April 26. Justice A.N. Ray, who was less critical of the government's stance, was appointed Chief Justice. This supersession sent a clear message, influencing the Supreme Court's subsequent ruling in the ADM Jabalpur case (also known as the Habeas Corpus case). During the Emergency declared on June 25, 1975, which suspended fundamental rights including the right to life and personal liberty, a Constitution Bench of the Supreme Court heard challenges to the presidential order. Attorney General Niren De argued that no judicial remedy could be sought during the Emergency. Justice Khanna questioned the Attorney General about remedies for severe abuses, like police killings, during the Emergency. The Attorney General admitted there would be no judicial recourse during this period. Despite this troubling admission, the majority ruled that citizens had no right to life or personal liberty during the Emergency. Justice Khanna dissented but was later superseded by Justice M.H. Beg as Chief Justice in January 1977. In November 1976, Congress passed the 42nd

Amendment, aiming to undermine judicial independence and establish a more authoritarian regime. The Prime Minister's participation in Ganesh Pooja at the Chief Justice of India's residence underscores mutual respect and recognition of each other's roles and powers. Unlike Congress, which historically attempted to undermine judicial independence, this gesture reflects a healthy relationship between the executive and judiciary. It demonstrates that both leaders acknowledge and uphold the boundaries of their respective roles, ensuring a collaborative rather than confrontational dynamic in governance and judicial matters. The Prime Minister's attendance at a religious function does not imply interference in the judiciary's functioning or decision-making. There is a significant difference between engaging in respectful cultural or religious participation and attempting to subvert judicial independence for political gains, as seen during the Congress era. To equate the two is to distort history and misrepresent the present. The Prime Minister performing Ganesh Pooja at the Chief Justice's residence is an act that reflects India's values of cultural unity, mutual respect, and inclusiveness. Only those with a narrow-minded view or divisive political motives would criticize such a gesture. This event represents the healthy relationship between the judiciary and executive, reaffirming their shared commitment to upholding the Constitution and promoting the welfare of the nation. Rather than being a cause for criticism, it should be seen as a celebration of the harmony and unity at the heart of India's democratic and cultural ethos.

The hidden toll of climate change: India's struggle with eco-anxiety and mental health

Rising temperatures and erratic weather patterns are not only threatening the nation's economy but also fueling anxiety, depression and trauma

India's diverse landscape is one of its greatest assets, but it also makes the country highly vulnerable to the adverse effects of climate change. The consequences are increasingly evident in events like wildfires, violent storms, unseasonal rainfall, melting glaciers, air pollution, and heatwaves. These phenomena not only damage the environment but also have serious implications for public health. Heatwaves, for instance, have led to a 53.7% increase in heat-related deaths among people aged 65 and above between 2000 and 2017. Additionally, the growing heat stress could result in an estimated 34 million job losses, while air pollution is expected to cause 6.6 million premature deaths by 2050.

VARADA MADGE

Climate change poses a significant threat to India's economic stability as well. Implementing adaptation strategies will come at a staggering cost of ₹85.6 lakh crore (approximately \$1.065 trillion). While these economic challenges are daunting, the mental health implications of climate change are often overlooked. According to the Intergovernmental Panel on Climate Change (IPCC) Sixth

Assessment Report, shifts in economic, social, and food systems triggered by climate change will lead to long-term mental health impacts, including rising levels of anxiety, depression, and stress. One of the most alarming consequences of climate change on mental health is the rise of "eco-anxiety." Defined as a persistent worry about the current environmental crisis and the bleak future it suggests, eco-anxiety is affecting millions globally, especially the younger generation. A study by The Lancet across ten countries, including India, surveyed 10,000 young adults aged 16-25 years. The results were sobering: over half of the participants reported feeling 'sad', 'anxious', 'angry', 'powerless', 'helpless', 'insecure', and

'guilty' about climate change. Furthermore, 45% admitted that these emotions disrupted their daily lives, while 75% expressed serious concerns about their future. Most disturbingly, 83% believed that humanity had failed to take adequate steps to protect the planet. The Lancet Countdown report of 2022 further highlighted the mental health consequences for younger people, including increased levels of phobias, drug dependency, sleep disturbances, emotional dysregulation, and cognitive impairment. Children and adolescents are particularly vulnerable to eco-anxiety, as they are growing up in an era where the effects of climate change are becoming more apparent with each pass-

ing year. India has already witnessed numerous climate-induced disasters that have exacerbated mental health issues. According to the National Institute of Disaster Management, India experienced 1,058 climate-related events, including floods, cyclones, droughts, cold waves, and heatwaves between 1995 and 2020. These disasters often

result in severe psychological consequences. For example, the prevalence of post-traumatic stress disorder (PTSD) in flood-affected populations is estimated to be around 50%. Frequent droughts, for instance, have been linked to high suicide rates among farmers. The National Crime Records Bureau (NCRB) reported over 10,000 farmer suicides in 2019. A study also found that when temperatures rise above 20°C, a 1°C increase in a single day's temperature is linked to approximately 70 additional suicides. Over the past three decades, rising temperatures and droughts have contributed to the suicides of around 59,000 farmers in India, accounting for 6.8% of the overall upward trend in suicides.

The future also appears bleak in terms of water security. A 2018 report by Niti Aayog predicts that 21 Indian cities will run out of water by 2030, affecting 100 million people. By that time, 40% of India's population may lack access to clean drinking water, leaving communities stressed and insecure. The mental health impact of such crises is particularly severe for indigenous communities, whose lives and livelihoods are closely tied to their natural surroundings. Sadly, these communities and their experiences remain underrepresented in mainstream discussions about climate change, calling for more focused research to understand their specific vulnerabilities. Addressing these challenges

will require coordinated efforts across sectors. Communities, climate activists, organizations, policymakers, and mental health professionals must collaborate to develop solutions. Initiatives like planting trees, reforestation, and recycling can empower communities and provide a sense of agency, helping alleviate the psychological burden of eco-anxiety. Policymakers must prioritise the environment by enforcing carbon emission reductions and investing in renewable energy. Mental health surveillance should be integrated into climate policies at every level of governance.

Yemen missile hits Israel, triggers airport sirens

AP ■ JERUSALEM

A missile fired by Yemen's Iran-backed rebels landed in an open area in central Israel early Sunday and triggered air raid sirens at its international airport, in the latest reverberation from the nearly yearlong war in Gaza. There were no reports of casualties or major damage, but Israeli media aired footage showing people racing to shelters in Ben Gurion International Airport. The airport authority said it resumed normal operations shortly thereafter. A fire could be seen in a rural area of central Israel, and local media showed images of what appeared to be a fragment from an interceptor that landed on an escalator in a train station in the central town of Modiin. The Israeli military said it made several attempts to intercept the missile using its multitiered air defenses but had not yet determined whether any had been successful. It said the missile appeared to have fragmented midair, and that the incident is still under review. The military said the sound of explosions in the area came from interceptors.

The Yemeni rebels, known as Houthis, have repeatedly fired drones and missiles toward Israel since the start of the war in Gaza between Israel and the Palestinian militant group Hamas, but nearly all of them have been intercepted over the Red Sea. In July, an Iranian-made drone launched by the Houthis struck Tel Aviv, killing one person and wounding 10 others. Israel responded with a wave of airstrikes on Houthi-held areas of Yemen, including the port

city of Hodeidah, a Houthi stronghold. Israeli Prime Minister Benjamin Netanyahu hinted at a similar response in remarks at a Cabinet meeting after Sunday's attack. "The Houthis should have known by now that we exact a heavy price for any attempt to harm us," he said. "Anyone who needs a reminder is invited to visit the port of Hodeidah." Brig. Gen. Yahya Saree, a military spokesman for the rebels, said they fired a ballistic missile tar-

'3 hostages recovered months ago were likely killed in Nov airstrike'

Jerusalem (AP): The Israeli military says there is a "high probability" that three hostages found dead months ago were killed in an Israeli airstrike. The army on Sunday announced the conclusions of its investigation into the deaths of Cpl. Nik Beizer, Sgt. Ron Sherman and Elia Toledano. It said investigations had determined that the three were likely killed in a November airstrike that also killed a senior Hamas militant, Ahmed Ghandour. All three of the hostages were kidnapped in Hamas' October 7 attack. Their bodies were

recovered in December, but the cause of death was only recently determined. In its report, the army said there was a "high probability" they were killed in the strike, based on where the bodies were recovered, pathological reports and other intelligence. But it said, "it is not possible to definitely determine the circumstances of their deaths." The conclusions could add pressure on the government to strike a deal to bring home the remaining hostages held by Hamas. Critics say it is too difficult and dangerous to try to rescue them.

getting "a military target" in Jaffa, which is part of Tel Aviv. Hashim Sharaf al-Din, a spokesperson for the Houthi-run government, said Yemenis will celebrate the birthday of Islam's Prophet Muhammad while "the Israelis will have to

be in shelters." Another senior Houthi official, Hezam al-Asad, posted a taunting message in Hebrew on the social media platform X. The Houthis have also repeatedly attacked commercial shipping in the Red Sea, in what

the rebels portray as a blockade on Israel in support of the Palestinians. Most of the targeted ships have no connection to Israel.

The war in Gaza, which began with Hamas' October 7 attack into southern Israel, has rippled across the region, with Iran and allied militant groups attacking Israeli and US targets and drawing retaliatory strikes from Israel and its Western allies. On several occasions, the strikes and counterstrikes have threatened to trigger a wider conflict.

International carriers have cancelled flights into and out of Israel on a number of occasions since the start of the war, adding to the war's economic toll on the country. Iran supports militant groups across the region, including Hamas, the Houthis and Lebanon's Hezbollah, its most powerful ally, which has traded fire with Israel on a near-daily basis since the war in Gaza began. Iran and its allies say they are acting in solidarity with the Palestinians.

The military said around 40 projectiles were fired from Lebanon early Sunday, with most intercepted or falling in open areas. The strikes along

the Israel-Lebanon border have displaced tens of thousands of people on both sides. Israel has repeatedly threatened to launch a wider military operation against Hezbollah to ensure its citizens can return to their homes. "The status quo will not continue," Netanyahu said at the Cabinet meeting. "This requires a change in the balance of power on our northern border. We will do everything necessary to return our residents safely to their homes." Hezbollah has said it would halt its attacks if there is a cease-fire in Gaza.

The United States and Arab mediators Egypt and Qatar have spent much of this year trying to broker a truce and the release of scores of hostages held by Hamas, but the talks have repeatedly bogged down. In recent weeks, Prime Minister Benjamin Netanyahu has insisted on lasting Israeli control over the Gaza side of the border with Egypt, which Israeli forces captured in May. He has said Hamas used a network of tunnels beneath the border to import arms, allegations denied by Egypt, which along with Hamas is opposed to any lasting Israeli presence there.

US-China military leaders discuss SCS tensions

Bangkok (AP): Military leaders from the US and China met in Beijing for routine talks that only resumed in January after being suspended for two years as ties between the two countries soured. The meetings ended on Sunday and officials discussed ongoing issues such as Taiwan, the Russia-Ukraine war and clashes in the South China Sea. Michael Chase, deputy assistant secretary of defence for China, Taiwan and Mongolia led a delegation to engage in the bilateral Defence Policy Coordination Talks, which were last held in January. While the talks weren't expected to resolve long-standing differences in stances over issues ranging from South China Sea claims to Taiwan, the US has continued to push for the discussions as a way to avoid conflict. The meetings were held after Chase attended the Xiangshan forum in Beijing, a defence forum that is China's answer to the Shangri-La Dialogue. Communication between the two militaries broke off in 2021, as US-China tensions ratcheted up over widening differences on issues such as Taiwan's sovereignty, the origin of COVID-19 and economic issues. Beijing has ignored US requests to engage in the past, especially over intercepts between US and Chinese aircraft and ships. While communications resumed after US President Joe Biden and Chinese President Xi Jinping met in San Francisco last November, it is unclear whether the talks could continue as the US is poised for a presidential election. In the bilateral talks, the two sides discussed China's support for Russia during the ongoing Ukraine war, as well as China's actions in the South China Sea, said a US senior defence official briefing reporters on the meetings. On Sunday, the Philippine ship at a disputed shoal, BRP Teresa Magbanua, had left in order to resupply and provide medical care to its crew members. The defence official said that they were "watching further developments there very closely."

The United States Air Force Air Demonstration Squadron, the Thunderbirds, fly in formation at the Sound of Speed Airshow in St. Joseph, Mo., on Saturday.

A least 8 die trying to cross English Channel, French authorities say

AP ■ NICE

At least eight people died during a failed attempt to cross the English Channel from northern France, French maritime authorities said on Sunday. The incident occurred Saturday just before midnight when authorities spotted a boat, carrying dozens, in distress near a beach in the northern town of Ambleteuse. A French rescue ship was deployed to the area and rescue services offered medical assistance to 53 migrants on the beach, a statement from the French maritime authorities in charge of the Channel and the North Sea said. "Despite the emergency care provided, eight people have died," the statement said. No people were discovered during the search at sea, it added. Six people were taken to hos-

pital "in relative emergency," including a 10-month-old baby with hypothermia, Jacques Billant, the Pas-de-Calais prefect, told French media on Sunday. He said survivors of the accident come from Eritrea, Sudan, Syria, Afghanistan, Egypt and Iran. Survivors of the tragedy have been taken to the sports hall in Ambleteuse, according to a statement from the prefecture of Pas-de-Calais region. Prosecutor's office in Boulogne-sur-mer has opened an investigation into the accident. The incident Saturday occurred nearly two weeks after a boat carrying migrants ripped apart in the English Channel as they attempted to reach Britain from northern France, plunging dozens into the treacherous waterway and leaving 13 dead, officials said. British officials were quick to

express sadness over another English Channel incident. "It's awful," Foreign Secretary David Lammy told the BBC. "It's a further loss of life." The new Labour Party government has pledged to crack down on criminal gangs plying the channel trade and had discussed with European partners "how we go after those gangs, in co-operation upstream." UK Prime Minister Keir Starmer will be in Italy on Monday for talks with counterpart Giorgia Meloni about her efforts to tackle the problem "and the work they have done, particularly, with Albania." Starmer is interested in the policy, under which Tirana will accept asylum seekers on Italy's behalf while their claims are processed. On Saturday, French coast guard and navy vessels rescued 200 people from the

treacherous waters in the Pas-de-Calais area, according to a report sent by French maritime authorities in charge of the Channel and the North Sea. They said they observed 18 attempts of boat departures from France to Britain on Saturday. Before Saturday's accident, at least 43 migrants had died or gone missing while trying to cross to the UK this year, according to the International Organisation for Migration. In July, four migrants died while attempting the crossing on an inflatable boat that capsized and punctured. Five others, including a child, died in another attempt in April. Five dead were recovered from the sea or found washed up along a beach after a migrant boat ran into difficulties in the dark and winter cold of January.

Venezuela arrests 6 in alleged Maduro assassination plot

AP ■ BOGOTA

Three Americans, two Spaniards and a Czech citizen were arrested Saturday after Venezuelan officials accused them of coming to the South American country to assassinate President Nicolas Maduro. The arrests were announced on state television by Diosdado Cabello, the nation's powerful interior minister. Cabello said the foreign citizens were part of a CIA-led plot to overthrow the Venezuelan government and kill several members of its leadership. In the television program, Cabello showed images of rifles that he said were confiscated from some of the plotters of the alleged plan. The arrest of the American citizens included a member of the Navy, who Cabello identified as Wilbert Joseph Castañeda Gomez. Cabello said that Gomez

was a navy seal who had served in Afghanistan, Iraq and Colombia. Spain's embassy in Venezuela did not reply to a request for comment on the arrests of its citizens. The US State Department late Saturday confirmed the detention of a US military member and said it was aware of "unconfirmed reports of two additional US citizens detained in Venezuela." Any claims of US involvement in a plot to overthrow Maduro are categorically false. The United States continues to support a democratic solution to the political crisis in Venezuela," the statement said. The announcement of the arrests comes just two days after the US Treasury imposed sanctions on 16 allies of Maduro who were accused by the U.S. government of obstructing voting during the disputed July 28 Venezuelan presidential election, and carrying out

human rights abuses. Earlier this week, Spain's parliament recognized opposition candidate Edmundo Gonzalez as the winner of the election, angering Maduro allies who called on the Venezuelan government to suspend commercial and diplomatic relations with Spain. Tensions between Venezuela's government and the US have increased as well following the election, whose result sparked protests within Venezuela in which hundreds of opposition activists were arrested. Venezuela's Electoral Council, which is closely aligned with the Maduro administration, said Maduro won the election with 52 per cent of the vote, but did not provide a detailed breakdown of the results. Opposition activists, however, surprised the government by collecting tally sheets from 80 per cent of the nation's voting

machines. The tally sheets collected by the opposition were published online, and they indicate that Gonzalez won the election with twice as many votes as Maduro. Despite international condemnation over the election's lack of transparency, Venezuela's supreme court, which has long backed Maduro, confirmed his victory in August. Venezuela's attorney general then filed conspiracy charges against Gonzalez, who fled to Spain last week after it became clear he would be arrested. Maduro has dismissed requests from several countries, including the leftist governments of Colombia and Brazil, to provide tally sheets that prove he won the election. Maduro, who has been in power since 2013, has long claimed the US is trying to overthrow him through sanctions and covert operations.

Rising floodwaters trigger evacuations in Czech Republic and Poland

AP ■ PRAGUE

Another night of torrential rains pounded Central Europe forced massive evacuations in the hardest hit areas in the Czech Republic, where floods reached extreme levels on Sunday. Meteorologists have warned the situation still might get worse as waters in most rivers are rising, the flood wave made its way through the country and more heavy rains could return overnight. Authorities declared the highest flood warnings in almost 90 places across the country and in two northeastern regions that recorded the biggest rainfall in recent days, including the Jeseniky mountains near the Polish border. In the city of Opava, up to 10,000 people out of a population of some 56,000 have been asked to leave their homes for higher ground. Rescuers used boats to transport people to safety in a neighbourhood flooded by the raging Opava River. "There's no reason to wait," Mayor Tomas Navratil told the Czech public radio. He said the situation was worse than during

the last devastating floods in 1997, known as the "flood of the century." "We have to focus on saving lives," Prime Minister Petr Fiala told the Czech public television Sunday. His government was to possibly meet Monday to assess the damages. Thousands of others also were evacuated in the towns of Krnov and Cesky Tesin. The Oder River that flows to Poland was expected to reach extreme levels in the city of Ostrava and later in Bohumín. Towns and villages in the Jeseniky mountains, including the local center of Jesenik, were inundated and isolated by raging waters that turned roads into rivers. The military sent a helicopter to help with evacuations. Four people who were swept away by waters were missing, police said. About 260,000 households were without power Sunday morning in the entire country while traffic was halted on many roads, including the major D1 highway. A firefighter dies as Lower Austria declared a disaster zone A firefighter died after "slipping on stairs" while pumping out a flooded basement in the town of

Tulln, the head of the fire department of Lower Austria Dietmar Fahrafellner told reporters on Sunday. Authorities declared the entire state of Lower Austria a disaster zone. The situation remains tense, especially at the water reservoir of Ottenstein, which is expected to reach its maximum capacity on Sunday. Romanian reports another flooding victim Romanian authorities said Sunday that another person had died in the hard-hit eastern county of Galati after four were reported dead there a day before following unprecedented rain. In Poland, one person was presumed dead in floods in the southwest, Prime Minister Donald Tusk said Sunday. Tusk said the situation was "dramatic" around the town of Klodzko, with some 25,000 residents, located in a valley in the Sudetes mountains near the border with the Czech Republic. In Glucholazy, rising waters overflowed a river embankment and flooded streets and houses. Mayor Pawel Szymkowicz said, "we are drowning" and appealed to residents to evacuate to high ground.

Air Canada and pilots union reach tentative pact to avoid shutdown

AP ■ OTTAWA

Air Canada and the union representing its pilots have come to terms on a labor agreement that is likely to prevent a shutdown of Canada's largest airline. Talks between the company and the Air Line Pilots Association produced a tentative, four-year collective agreement, the airline announced in a statement early Sunday. The prospective deal recognises the contributions of the pilots flying for Air Canada and Air Canada Rouge while setting a new framework for company growth. The terms will remain confidential until ratification by union members and approval by the airline's board of directors over the next month, the airline said. The pilots association said

its Air Canada Master Executive Council voted to approve the tentative agreement on behalf of more than 5,400 Air Canada pilots. After review and ratification by a majority of members, the deal is expected to generate an additional \$1.9 billion for the pilots over the period of the agreement, the union said in a statement. "While it has been an exceptionally long road to this agreement, the consistent engagement and unified determination of our pilots have been the catalyst for achieving this contract," Charlene Hudry, the executive council's chair, said in the statement. "After several consecutive weeks of intense round-the-clock negotiations, progress was made on several key issues including compensation, retirement, and work rules." Federal Labor

Minister Steven MacKinnon confirmed the agreement on Sunday and lauded the company and the union. "Thanks to the hard work of the parties and federal mediators, disruptions have been prevented for Canadians," MacKinnon said in a statement. "Negotiated agreements are always the best way forward and yield positive results for companies and workers." The airline and its pilots have been in contract talks for more than a year. The pilots have sought wages competitive with their U.S. counterparts, but Air Canada continues to post record profits while expecting pilots to accept below-market compensation, the union said. The two sides could have issued a 72-hour notice of a strike or lockout beginning Sunday.

UK royal social media accounts offer b'day wishes to Prince Harry

London (AP): Britain's royal social media accounts posted 40th birthday wishes Sunday for Prince Harry, marking the milestone celebration despite longstanding strains following the publication of his explosive memoir, "Spare." The Royal Family site shared an image of a beaming Harry with a birthday cake emoji and the caption "Wishing The Duke of Sussex a very happy 40th birthday today! The Prince and Princess of Wales shared the image, adding their own birthday wishes. The post from the royal family account marked the first public birthday message for Harry since 2021. The Duke and Duchess of Sussex

announced they were giving up royal duties in January, 2020. They moved to America and said they hoped to become financially independent, signing lucrative deals with Netflix and Spotify. Harry famously shared his story in the memoir, "Spare."

Tech billionaire back on Earth after first private spacewalk

Cape Canaveral (AP): A billionaire spacewalker returned to Earth with his crew on Sunday, ending a five-day trip that lifted them higher than anyone has travelled since NASA's moonwalkers. SpaceX's capsule splashed down in the Gulf of Mexico near Florida's Dry Tortugas in the pre-dawn darkness, carrying tech entrepreneur Jared Isaacman, two SpaceX engineers and a former Air Force Thunderbird pilot. They pulled off the first private spacewalk while orbiting nearly 460 miles (740 kilometers) above Earth, higher than the International Space Station and Hubble Space Telescope. Their spacecraft hit a peak altitude of 875 miles (1,408 kilometers) following Tuesday's liftoff. Isaacman became only the 264th person to perform a spacewalk

since the former Soviet Union scored the first in 1965, and SpaceX's Sarah Gillis the 265th. Until now, all spacewalks were done by professional astronauts. During Thursday's commercial spacewalk, the Dragon capsule's hatch was open barely a half-hour. Isaacman emerged only up to his waist to briefly test SpaceX's brand new spacesuit followed by Gillis, who was knee high as she flexed her arms and legs for several minutes. Gillis, a classically trained violinist, also held a performance in orbit earlier in the week. The spacewalk lasted less than two hours, considerably shorter than those at the International Space Station. Most of that time was needed to depressurise the entire capsule and then restore the cabin air. Even SpaceX's Anna Menon and Scott "Kid"

Poteet, who remained strapped in, wore spacesuits. SpaceX considers the brief exercise a starting point to test spacesuit technology for future, longer missions to Mars. This was Isaacman's second chartered flight with SpaceX, with two more still ahead under his personally financed space exploration program named Polaris after the North Star. He paid an undisclosed sum for his first spaceflight in 2021, taking along contest winners and a pediatric cancer survivor while raising more than USD 250 million for St. Jude Children's Research Hospital. For the just completed so-called Polaris Dawn mission, the founder and CEO of the Shift4 credit card-processing company shared the cost with SpaceX.

US to give \$202.25 mn in aid to B'desh

AP ■ DHAKA

The United States will provide USD 202.25 million in aid to Bangladesh to advance development, empower youth, strengthen democracy, improve health and expand trade and economic opportunities to people in the South Asian country, authorities said on Sunday. AKM Shahabuddin, additional secretary of the Economic Relations Division, and Reed J Aeschliman, mission director of USAID, signed the 6th amendment of "The Development Objective Grant Agreement (DOAG)" in Dhaka on behalf of their respective governments, according to a press release from the Ministry of Finance. Under the agreement, USAID will provide a USD 202.25 million grant to Bangladesh for its three sectors namely good governance, social, human and economic opportunity and resilience, the state-owned BSS news agency reported. "Driving greater prosperity: @USAID signed an agreement worth over \$200 million with the Bangladesh interim government to advance development, empower youth, strengthen democracy & governance, improve health and expand trade & economic opportunities to people across the country," the US Agency for International Development (USAID)-Bangladesh said in a post on X. On September 27, 2021, a new DOAG was signed between Bangladesh and USAID for the period of 2021-2026. By implementing the DOAG, USAID is committed to contributing a total of \$954 million. So far up to the 5th amendment, USAID has provided USD 425 million to Bangladesh, the BSS news agency reported. The US provides most of its development assistance through USAID, the United States Department of Agriculture and some other government and non-government organizations, it added. On Sunday, the interim government's Chief Adviser Muhammad Yunus met a high-powered American delegation and sought support from the US to rebuild Bangladesh, carry out vital reforms and bring back stolen assets. He described the challenges that the interim government is facing and said his administration has moved quickly to "reset, reform, and

restart" the economy, initiate reforms in financial sectors, and fix institutions such as the judiciary and police. The US delegation assured him of expanding economic and political ties to create a more equitable and inclusive future for its citizens. The multi-agency US delegation was led by Assistant Secretary for International Finance at the US Department of the Treasury Brent Neiman. Assistant Secretary of State for the Bureau of South and Central Asian Affairs, Donald Lu, who arrived in Dhaka on Saturday from India, also joined the delegation. The meeting came over a month after Yunus, known for his deep relations with Washington, was installed Bangladesh's Chief Advisor following the resignation of Sheikh Hasina who fled the country on August 5 amidst student-led mass protests. "Our (US) delegation met with the Chief Adviser, Professor Muhammad Yunus, affirming our dedication to fostering inclusive growth, institution building and development to benefit the people of Bangladesh," the US embassy in Dhaka said in a statement after the meeting. The statement added that the United States stood ready to support Dhaka's efforts as "Bangladesh looks to chart a more equitable and inclusive future". Earlier in the day, the US delegation met Foreign Adviser Md Touhid Hossain at the state guest house Padma. "We are committed to helping expand economic opportunities, build institutional capacity, uphold human rights, and mitigate climate risks with our partner, Bangladesh," the US Embassy in Dhaka posted on X after the meeting. "Great to meet the foreign affairs adviser at Padma House," said the embassy said. "We support Bangladesh's path towards renewed dynamism and growth. Our engagement with top economic policymakers centred on the authorities' efforts to propel economic growth, job creation, and sustainability, including through engaging with international financial institutions."

Attempt to murder case filed against Hasina, 58 others

Dhaka (PTI): A fresh case has been filed against Bangladesh's ousted prime minister Sheikh Hasina and 58 others on the charges of attempting to murder a student during the violent clashes that led to the fall of her government last month, a media report said on Sunday. It was the latest in the slew of cases filed against the 76-year-old former premier, who resigned and fled to India on August 5 following a massive protest by students against a controversial quota system in government jobs. The case was filed on Friday by 22-year-old Fahim Faisal, who claimed he was shot and injured during an anti-government protest in Dinajpur on August 4, a day before the fall of the Hasina-led

Awami League government, The Daily Star newspaper reported. With this, the tally of cases against Hasina has reached 155, including 136 for murder, seven for crimes against humanity and genocide, three for abduction, eight for attempted murder and one for

the attack on a Bangladesh Nationalist Party procession, the report said. According to the case statement, protesters were assaulted with firearms and local weapons, resulting in multiple injuries to Faisal, who was treated at Dinajpur Medical College Hospital and recovered partially. The case accuses 59 people, including Hasina, former whip Iqbalur Rahim and Dinajpur Sadar Upazila Chairman Imdad Sarkar. Over 230 people were killed in the incidents of violence that erupted across the country following the fall of the Hasina-led government, taking the death toll to more than 600 since the massive protest by students first started in mid-July.

US pledges support for equitable future

Dhaka5 (PTI): The US on Sunday assured Bangladesh of expanding economic and political ties to create a more equitable and inclusive future for its citizens, as the head of the interim government Muhammad Yunus sought support from Washington to rebuild the country and implement key reforms. The multi-agency US delegation was led by Assistant Secretary for International Finance at the US Department of the Treasury Brent Neiman. Assistant Secretary of State for the Bureau of South and Central Asian Affairs, Donald Lu, who arrived in Dhaka on Saturday from India, also joined the delegation. The meeting came over a month after Yunus, known for his deep relations with Washington, was installed Bangladesh's Chief Advisor following the resignation of Sheikh Hasina who fled the country on August 5 amidst student-led mass protests. "Our (US) delegation met with the Chief Adviser, Professor Muhammad Yunus, affirming our dedication to fostering inclusive growth, institution building and development to benefit the people of Bangladesh," the US embassy in Dhaka said in a statement after the meeting. The statement added that the United States stood ready to support Dhaka's efforts as "Bangladesh looks to chart a more equitable and inclusive future". Yunus outlined the urgent challenges his interim government faces, stressing the need to "reset, reform, and restart" the economy, The Daily Star newspaper reported. "This is a very important time for us and a significant moment in our history," Yunus said, referring to the student-led revolution that culminated in the toppling of the Awami League government. He said his government was committed to getting back

the stolen assets siphoned off by corrupt individuals linked with the previous autocratic regime. He described ongoing reforms in the financial sector, judiciary, and police, which have been initiated to strengthen national institutions and address systemic corruption. Officials familiar with the meeting said the chief adviser's special envoy on International Affairs Lutefy Siddiqui also joined the talks. Earlier in the day, the US delegation met Foreign Adviser Md Touhid Hossain at the state guest house Padma. "We are committed to helping expand economic opportunities, build institutional capacity, uphold human rights, and mitigate climate risks with our partner, Bangladesh," the US Embassy in Dhaka posted on X after the meeting. "Great to meet the foreign affairs adviser at Padma House," said the embassy. Neiman also met Finance Adviser Salehuddin Ahmed. After the meeting, the embassy said: "We support Bangladesh's path towards renewed dynamism and growth. Our engagement with top economic policymakers centred on the authorities' efforts to propel economic growth, job creation, and sustainability, including through engaging with international financial institutions." The six-member delegation reached Dhaka on Saturday. The US was one of the first countries to welcome Yunus's installation while this is the first delegation from Washington to visit Bangladesh following the formation of his interim government on August 8. The US-Bangladesh ties deteriorated and saw its lowest ebb in recent months when Hasina in public alleged that the US was out to see her ouster as she declined to serve its strategic interest compromising Bangladesh's sovereignty.

Iran launches satellite amid western fears

Tehran (AP): Iran launched a satellite into space Saturday with a rocket built by the country's paramilitary Revolutionary Guard, state-run media reported, the latest for a program the West fears helps Tehran advance its ballistic missile program. Iran described the launch as the second such launch to put a satellite into orbit with the rocket. Independent scientists later confirmed the launch and that the satellite reached orbit. Footage later released by Iranian media showed the rocket blast off from a mobile launcher. An Associated Press analysis of the video and other imagery later released suggested the launch happened at the Guard's launch pad on the outskirts of the city of Shahroud, some 350 kilometres (215 miles) east of the capital, Tehran. The launch comes amid heightened tensions gripping the wider Middle East over the ongoing Israel-Hamas war in the Gaza Strip, during which Tehran launched an unprecedented direct missile-and-drone attack on Israel. Meanwhile, Iran continues to enrich uranium to nearly weapons-grade levels, raising concerns among nonproliferation experts about Tehran's programme. Iran identified the satellite-carrying rocket as the Qaem-100, which the Guard used in January for another suc-

cessful launch. Qaem means "upright" in Iran's Farsi language. The solid-fuel, three-stage rocket put the Chamran-1 satellite, weighing 60 kilograms (132 pounds), into a 550-kilometer (340-mile) orbit, state media reported. The rocket bore a Quranic verse: "That which is left by Allah is better for you, if you are believers." A state-owned subsidiary of Iran's Defense Ministry and experts at the Aerospace Research Institute built the satellite with others to "test hardware and software systems for orbital maneuver technology validation," state media said, without elaborating. Gen. Hossein Salami, the head of the Guard, praised the launch in a statement and said scientists successfully overcame "the atmosphere of extensive and oppressive international sanctions." Responding to questions from The Associated Press, the US State Department said it has "long made clear our concern that Iran's space launch vehicle programmes provide a pathway to expand its longer-range missile systems." "We continue to use a variety of nonproliferation tools, in coordination with our allies and partners, to counter the further advancement of Iran's ballistic missile programme and its ability to proliferate missiles and related technology," it added.

Shanghai cancels flights as Typhoon Bebinca draws near

Bangkok (AP): Shanghai's airports are cancelling hundreds of flights Sunday as they brace for impact from Typhoon Bebinca, which is due to make landfall in the early hours of Monday morning, the authorities said. Flights past 8 pm local time will be cancelled at Hongqiao and Pudong airports in the city, the airport officials said in a statement, affecting more than six hundred flights. The city also announced that it was suspending travel on some bridges while restricting that on other highways. Typhoon Bebinca is currently a few hundred kilometers away from the coast. The typhoon's winds are expected to reach 151 km per hour by Sunday night, according to the China Meteorological Administration, which has categorised it as a strong typhoon. State media reported that 9,318 people had been evacuated from one district in Shanghai. Meanwhile, in the nearby city of Zhoushan, restaurants, supermarkets and shops shut down early for the day, and public transportation services were halted.

ADB asks Pakistan to adopt Indian plan on education

Islamabad (PTI): The Asian Development Bank (ADB) has advised Pakistan to adopt India's scheme ULLAS to fix its dysfunctional education system and impart quality training to its citizens, according to a media report. The Manila-based lender's recommendation came in response to Pakistan's request for financial support to improve its education system and impart education to all out-of-school children, The Express Tribune newspaper said. The Understanding of Lifelong Learning for All in Society (ULLAS) was launched by the Government of India in July last year to help non-literates and adults who missed out on formal schooling. The ADB recommends that the government adopt a strategic and multi-stakeholder consultative approach, drawing on international best practices, such as the government of India's new centrally sponsored scheme "ULLAS", according to the lender. The ADB emphasised that the ULLAS scheme emphasises the need for both federal and provincial governments to collaborate urgently to enhance access to quality

education and can offer insightful lessons of success and challenges when considering a similar vertical scheme in Pakistan. Prime Minister Narendra Modi approved the new centrally-sponsored scheme ULLAS for the five-year period to cover all the aspects of "Education for All". The objective of the Indian scheme is to impart not only foundational literacy and numeracy but also to cover other components which are necessary for a citizen of the 21st century such as critical life skills including financial literacy, digital literacy, commercial skills, health care and awareness, child care and education and family welfare. The ADB's recommendation came just days before a scheduled visit of ADB President Masatsugu Asakawa to Pakistan. The ADB president will meet with Pakistani stakeholders on Monday. A Planning Commission's report revealed that Pakistan's education delivery system had become dysfunctional and all the 134 districts, barring Islamabad, were lagging on indicators ranging from learning outcomes to public financing.

Two die in Ukraine's Odesa after drone, missile attacks

Kyiv (AP): Two people died in a missile attack on the Ukrainian Black Sea port city of Odesa, local officials said, as Moscow and Kyiv exchanged drone and missile attacks. The Ukrainian air force said Sunday it shot down 10 of the 14 drones and one of the three missiles Russia launched overnight, while the rest hit the suburbs of Odesa. Oleh Kiper, Odesa's regional governor, said the two who died Saturday night were a married couple, and that another person was wounded in the attack. Meanwhile, the Russian Defence Ministry said it downed 29 Ukrainian drones overnight into Sunday over western and southwestern regions, with no damage caused by the falling debris. It also said another Ukrainian drone was shot down Sunday morning over the western Ryzan region. While Ukraine and Russia regularly launch

overnight drone raids on each other's territory, Ukrainian officials generally do not confirm or deny attacks within Russia's borders. The latest attacks came after Ukraine made a new call Saturday on the West to allow it to use the long-range missiles they have provided to strike targets deep inside Russia, as Ukrainian forces

struggle to hold back Russian advances in eastern Ukraine. So far, the US has allowed Kyiv to use American-provided weapons only in a limited area inside Russia's border with Ukraine. Kyiv officials argue the weapons are vital to weaken Russia's ability to strike Ukraine and force it to move its strike capabilities further from the border.

Lebanese novelist Elias Khoury dies at 76

Beirut (AP): Lebanese novelist Elias Khoury who dedicated much of his writings to the Palestinian cause and taught at universities around the world, making him one of Lebanon's most prominent intellectuals, has died. He was 76. Khoury, a leading voice of Arab literature, had been ill for months and admitted and discharged from hospital several times over the past year until his death early Sunday, Al-Quds Al-Arabi daily that he worked for said. The Lebanese writer, born and raised in Beirut, was outspoken in defense of freedom of speech and harsh criticism of dictatorships in the Middle East. In addition to his novels, Khoury wrote articles in different Arab media outlets over the past five decades making him well known throughout the Arab world. Two days after the Israel-Hamas war broke out on October 7, Khoury wrote an article in Al-Quds A-Arab daily titled "It's Palestine." Khoury wrote then that "the biggest open-air prison, the besieged Ghetto of Gaza, has launched a war against Israel, occupied settlements and forced settlers to flee." Born in Beirut on July 12, 1948, Khoury had been known for his political stances from his support of Palestinians to his harsh criticism of Israel and what he called its "brutal" settling policy in Palestinian territories. He studied at the Lebanese University and later at the University of Paris, where he received a PhD in social history. "The Catastrophe began in 1948 and it is still going on," he once wrote referring to Israel's settlement policies in occupied Palestinian territories. The "nakba," or "catastrophe" is a term used by many Arabs to describe the displacement of hundreds of thousands of Palestinians when Israel was created in 1948.

Imran Khan criticises opponents day after his questioning in jail

PTI ■ ISLAMABAD

A day after he was grilled for a provocative social media post, Pakistan's jailed former prime minister Imran Khan on Sunday launched a scathing attack on his opponents, including the chief justice, the establishment and his rival politicians. The 71-year-old Pakistan Tehreek-e-Insaf (PTI) founder in a message from Rawalpindi's Adiala Jail posted on his X account that the government was reportedly going to introduce a constitutional amendment to rewrite the rules about the top judiciary. The former cricketer-turned-politician lashed out at the government for trying to tweak the laws in order to allegedly control the judiciary. "The occupying mafia and its handlers are fighting only for their survival, regardless of the national interest. The attack on the independence of the judiciary is also a link in this chain. All institutions in the country have been destroyed. There remains a Supreme Court which is the last hope and support of the nation," he said. Khan alleged that an "attempt is being made to destroy this last hope of the nation through constitutional amendment and once again the whole institution and system of the country is being put at stake to grant extension to the person of choice." He said "efforts are being made to bring (Chief Justice) Qazi Faiz Isa through the new constitutional amendments to avoid a transparent investigation into human rights violations and electoral fraud." Khan alleged that the ruling Pakistan Muslim League-Nawaz (PML-N) won less than 20 seats but it was preparing to attack the judiciary in exactly the same way the PML-N government attacked the Supreme Court with batons in 1997. "The only difference is that this time the attack is being carried out by removing the powers of the judiciary. But I want to make one thing clear today that the entire nation stands behind the judiciary," he said. "If they

think that we will sit quietly, then it is their mistake, we will not accept it under any circumstances. Let me make it clear that the Pakistan Tehreek-e-Insaf will stand with the country's judiciary in any case. We will call for massive protests across the country," he said. Khan also talked about the case registered by the Federal Investigation Agency against him for targeting the judiciary and the army in a tweet on Friday. He said that a case was registered against him for highlighting the Hamud-ur-Rehman Commission report, which probed the debacle of 1971. "If the Hamud-ur-Rehman Commission report had been implemented, there would have been no martial laws in the country," he said and then added that even now, undeclared martial law is in force in the country. PML-N and its coalition partner Bilawal Bhutto Zardari's Pakistan Peoples Party (PPP) are not parliamentary parties, but like puppets, they are dancing on the cues of a few individuals. "The boot is being respected by saying that the vote should be respected," he said in a taunt to Nawaz Sharif who had demanded respect for vote after being thrown out of government in 2017. He said that the government and its backers were going to completely

enslave the nation and asked how can people be arrested from Parliament without the will of the speaker. The PTI leader said, "What is happening to us today can happen to them tomorrow. No one has been forcibly removed from Parliament till date." Khan also said that Prime Minister Shabbaz Sharif was going to be punished in the money laundering case during his government and alleged that the then army chief Qamar Javed Bajwa saved him. He said apart from the money laundering case, all the cases against Shabbaz Sharif, Nawaz Sharif and Ishaq Dar were old. Khan also talked about the case of possession of drugs registered against PML-N leader Rana Sanaullah during his government by the Anti-Narcotics Force (ANF), which is controlled by the army. "The head of ANF was a Major General. I called the head of ANF and asked him about the case. He had come and briefed the cabinet and presented the evidence related to the case of Rana Sanaullah. He told us that drugs have been seized from Sanaullah. Before us, no one had the courage to call him and ask the question about his own opponents in front of the cabinet. Why did you make this drug case against them," he asked. Khan also said that

when journalist Matiullah Jan was picked up, he got him released. The former premier also spoke about the planned rally by his party at Lahore on September 21. "Political gathering is our democratic and constitutional right. Whether we get permission or not, we will hold a rally in Lahore on September 21," he said. Khan said barricades were erected in Islamabad for the September 8 rally but his supporters came to attend it. "Has Punjab become a police state that we will not be allowed to hold a rally? We are preparing the party for street movement. I am telling my nation and party to prepare. Whatever happens, the present regime will be responsible," he said. He concluded the message by saying: "When there is a war of freedom, sacrifices have to be made. I have been unjustly imprisoned for one and a quarter year. Is this not a sacrifice? I believe in 'La ilaha illa Allah'. I am ready to sacrifice my life but I will not accept anyone's slavery. I also tell the nation not to accept their slavery." The contents of Khan's statement are not much different from the previous social media posts, as he targeted the head of judiciary, the army and his political opponents, mainly from the PML-N.

China testing stealth fighter jet for its 3rd aircraft carrier: Report

Beijing (PTI): China is testing a new stealth fighter jet called J-35 to be deployed on its third aircraft carrier, the Fujian, which is equipped with an electromagnetic catapult unlike the other two fitted with ski-jump take-off ramps, official media reported on Sunday. A new type of warplane was tested earlier this year on the Chinese People's Liberation Army (PLA) Navy's first aircraft carrier, the Liaoning, state-run Global Times quoted official broadcaster CCTV as saying. It added that the new aircraft could be the long-expected J-35 - China's next-generation carrier-borne stealth fighter jet. China currently has two aircraft carriers, Liaoning, a refit of the Soviet-era ship, and Shandong, an indigenously built 2nd aircraft carrier commissioned in 2019. China's third aircraft carrier, Fujian, is larger than the two carriers, with a displacement of 80,000, and is currently undergo-

ing trials. It is the "first fully domestically developed and constructed" aircraft carrier with an electromagnetic aircraft launch system (EMALS) similar to that of the American aircraft carrier, USS Gerald R. Ford, official media reports said. China's other two aircraft carriers are equipped with ski-jump take-off ramps, while the Fujian features a flat-top flight deck. China operates its indigenously built J-15 aircraft for its carriers. Global Times quoted experts as saying that the CCTV report is an official confirmation that China now has a new-type carrier-borne aircraft ready for service. The report also confirmed that the new warplane is operational not only on China's third aircraft carrier, the Fujian, which is equipped with electromagnetic catapults but also on the previous two carriers, the ramp-

equipped Liaoning and Shandong, experts said, noting that this will significantly boost the capabilities of Chinese aircraft carriers. Hong Kong-based South China Morning Post newspaper reported that the J-35 is being developed by Shenyang Aircraft Corporation as China's second fifth-generation fighter jet, following the J-20. The jet is designed for use on aircraft carriers and is still in the development and prototype phase, but it is touted as the Chinese equivalent of Lockheed Martin's fifth-generation fighter jet, the F-35. Collin Koh, a senior fellow at the S. Rajaratnam School of International Studies in Singapore, told the Post that "one most straightforward assessment is that the Liaoning, which has long been designated as a test bed for PLA carrier capabilities, is conducting experiments on the J-35 as a viable carrier-borne fighter jet."

Bharti Airtel leads the market rally

PTI ■ NEW DELHI

Nine of the top-10 most valued firms together added Rs 2,01,552.69 crore in market valuation last week, with Bharti Airtel stealing the show, amid bullish investors' sentiment in equities.

Last week, the BSE benchmark jumped 1,707.01 points or 2.10 per cent. The 30-share BSE Sensex hit its lifetime high of 83,116.19 on Thursday.

Bharti Airtel's valuation jumped Rs 54,282.62 crore to Rs 9,30,490.20 crore, becoming the biggest gainer among the top-10 firms. The market capitalisation (mcap) of ICICI Bank surged Rs 29,662.44 crore to Rs 8,80,867.09 crore.

Tata Consultancy Services (TCS) added Rs 23,427.12 crore taking its valuation to Rs 16,36,189.63 crore. The mcap of Hindustan

Unilever soared Rs 22,438.6 crore to Rs 6,89,358.33 crore and that of HDFC Bank zoomed Rs 22,093.99 crore to Rs 12,70,035.77 crore.

The market valuation of Infosys climbed Rs 17,480.49 crore to Rs 8,07,299.55 crore and that of ITC rallied Rs 15,194.17 crore to Rs

6,42,531.82 crore. The valuation of Reliance Industries jumped Rs 9,878.19 crore to Rs 19,92,160.61 crore and that of State Bank of India went up by Rs 7,095.07 crore to Rs 7,05,535.20 crore. However, the mcap of Life Insurance Corporation of India (LIC)

declined by Rs 3,004.38 crore to Rs 6,54,004.76 crore. Reliance Industries was leading the chart of the top-10 most valued firms followed by TCS, HDFC Bank, Bharti Airtel, ICICI Bank, Infosys, State Bank of India, Hindustan Unilever, LIC and ITC.

90 per cent of financial firms embrace AI, GenAI: Report

PTI ■ NEW DELHI

Ninety per cent of Indian financial institutions are focusing on artificial intelligence (AI) and GenAI (Generative Artificial Intelligence) as the primary technology enablers of innovation, according to a PwC India report.

As per the PwC India report titled, 'Mapping the FinTech innovation landscape in India' data analytics also continues to emerge prominently across nearly 74 per cent responses, underscoring its integral role in driving insights and decision-making within the financial services (FS) sector. It said that 31 financial institutions consisting of banks, insurance firms and fintechs participated in the

survey. "Artificial Intelligence (AI) and GenAI (Generative Artificial Intelligence) emerged as the focus area for innovation for Indian financial institutions, with 90 per cent of the respondents citing them as the primary technology enablers of innovation," it said.

Further, 84 per cent of respondents stated that customer experience and engagement - acquisition, onboarding and servicing was the key area of focus for innovation initiatives. Additionally, over 50 per cent of the participants highlighted product distribution as a key area of innovation.

It can also be noted that the frequent references to risk management, operations and regulatory compliance across several responses highlight the sector's diligence in maintaining robust governance frameworks amidst ongoing technological advancements, the report said. As the fintech industry continues to evolve, it's clear that growth must be balanced with the critical challenges of digital security and regulatory compliance, Mihir Gandhi, Partner and Payments Transformation Leader, PwC India, said. "Fintech companies need to navigate an ever-changing regulatory landscape while building compliant partnerships to ensure sustainable success.

HDFC Bank to double income of marginal farmers as CSR initiative

PTI ■ VARANASI

The country's biggest private sector lender HDFC Bank looks to increase the income of 5 lakh marginal farmers earning less than Rs 60,000 annually by 2025, as part of its corporate social responsibility (CSR) initiative, Parivartan.

"The bank's focus on rural development reflects our continued commitment to fostering sustainable growth and uplifting vulnerable communities. Since its inception in 2014, Parivartan has grown into one of India's largest CSR programmes, active in 28 states and 8 Union Territories," HDFC Bank Deputy Managing Director Kaizad M Bharucha said.

Launched in 2014, HDFC Bank 'Parivartan' was established with the vision to contribute to the socio-economic development of communities across India.

With a CSR expenditure of over Rs 5,100 crore over the last decade, Parivartan has

consistently aimed to empower individuals by creating sustainable livelihoods, fostering sustainable development, and creating real-life change. Besides, he said, the bank under its CSR initiative, plans to impart skill training for nearly 2 lakh individuals to equip them with capabilities that drive self-sufficiency.

Bringing 2 lakh acres of unirrigated land under irrigation, fostering agricultural productivity and scholarships for 25,000 meritorious underprivileged students to improve access to

education are some other initiatives that the bank intends to undertake. Parivartan has made significant strides in key areas such as education, skill development, healthcare, and financial inclusion, aligning its efforts with nine of the 17 United Nations Sustainable Development Goals (SDGs), he said.

"Economic and financial well-being of society is what every responsible lender should aspire for. Our commitment to this principle is underscored in our CSR programme. Unequivocally,

the business of banking is underpinned by trust and as a responsible lender, and the bank stands committed to contributing to nation-building," he added.

HDFC Bank has reported a CSR spend of Rs 945.31 crore for the financial year 2023-24, an increase of nearly Rs 125 crore from the previous year. As per the Companies Act 2013, every company for which the CSR provisions apply must ensure that the firm spends in every financial year at least 2 per cent of its average net profits made during the immediately preceding three financial years as per its CSR policy.

The bank's net profit increased by 38 per cent to Rs 60,812 crore on FY'24 from Rs 44,109 crore in the previous fiscal. Average net profit of the company for the CSR calculation comes out to Rs 47,294 crore taking into account net profit of Rs 36,961 crore for FY'22. So, the bank should be spending around Rs 950 crore during

the current fiscal.

"With over 65 per cent of India's population residing in rural areas, we strongly believe that inclusive development can only be attained when the prosperity and livelihood in villages keeps pace with the growth. We prioritise rural areas for our programme and currently 70 per cent of our programmes are being implemented in such areas," said Nusrat Pathan, Head CSR, HDFC Bank.

Bharucha further said that the bank is working towards becoming carbon neutral by 2031-32. As part of this initiative, he said, the bank is looking at reducing its emissions, energy, and water consumption. The bank will continue to incorporate and scale up the use of renewable energy in its operations. As part of the green initiative, he said, the bank has raised USD 300 million through its first ever sustainable finance bond issue in February this year.

Tata Power Solar installs rooftop solar systems in Chhattisgarh

PTI ■ RAIPUR

The rooftop solar systems installations by Tata Power Solar Systems Ltd (TPSSL) have reached 600 in Chhattisgarh under an initiative, a company official said on Sunday.

The company, which is a wholly-owned subsidiary of Tata Power Renewable Energy Ltd (TPREL), launched its rooftop solar system installation initiative after its success in Rajasthan, Uttar Pradesh and Kerala, the official said.

Though the installation of rooftop solar systems under the initiative, 'GharGharSolar, Tata Power ke Sang', started in mid-this year in the state, it was officially launched by Tata Power Company Chief Executive Officer and Managing Director Praveer Sinha and TPREL CEO and MD Deepesh Nanda this week, the official said. The initiative intends to make

clean energy available to all households in the state, building on the commitment to promoting sustainable energy solutions throughout India, he said. Chhattisgarh has become a significant hub for TPSSL's activities and initiatives, with a catered portfolio of over 600 installations, equivalent to more than 250 MW capacity across residential, commercial, industrial, and direct projects. The initiative

will cover all 33 districts of the state, he said. In line with the PM Surya Ghar Yojana, residents can receive a central government subsidy of Rs 30,000 for 1kW, Rs 60,000 for 2kW, and Rs 78,000 for a 3-10kW system, he said. These subsidies aimed at making solar energy installations more accessible and affordable, enabling every household to shift to renewable energy without financial burden, he said.

CEA urges banks to adapt changing customer preferences

PTI ■ CHENNAI

Chief Economic Advisor to the Centre, V Anantha Nageswaran has said banks should adapt to changing customer preferences and market dynamics in order to remain competitive.

He highlighted the crucial role of agriculture in driving economic growth at an event organised by public sector Indian Bank here on Saturday. In his remarks on the topic 'Indian Economy and Banking: Growth and Trends', Nageswaran stressed on the

importance of technological advancements in driving growth and innovation in the industry.

The CEA, in a press release issued by the Bank, emphasised the need for banks to adapt to changing

customer preferences and market dynamics to remain competitive.

He hailed the Indian Bank for its efforts to invest in knowledge sharing and excellence and lauded its initiative under the MSME Prerana programme which is aimed at training the entrepreneurs.

In his address, Indian Bank Managing Director and CEO S L Jain said, "We are delighted to have Dr Nageswaran sharing his insights on the Indian economy and its implications on the banking sector."

The interaction would undoubtedly benefit all the participants and help them better understand the challenges and opportunities facing the industry, he added.

India seeks investments from South Korea, Japan for shipbuilding, repair clusters

PTI ■ GOA

India is seeking investments and technology transfer from South Korea and Japan to establish shipbuilding and ship repair clusters to promote the domestic shipping supply chain in the country, according to a senior government official.

Currently, India holds less than 1 per cent of the global shipbuilding market, dominated by China, South Korea, and Japan.

"We are looking at South Korea and Japan for investments and technology transfer for establishing shipbuilding and ship repair clusters in India," TK Ramachandran, Secretary in

Ministry of Ports, Shipping and Waterways (MoPSW), told a group of journalists here.

Ramachandran was in Goa to participate in the 20th Maritime State Development Council (MSDC), where plans for a mega shipbuilding park, spanning multiple

states, were discussed. "We have communicated to them (South Korea and Japan) that you come with your technology and investments, we will provide you land for setting up shipbuilding and ship repair clusters," he said.

Ramachandran also said that

Union Minister of Ports, Shipping and Waterways Sarbananda Sonowal has written to chief ministers of all states to provide land immediately if Japanese or Korean companies express interest in setting up shipbuilding and ship repair clusters in their states.

"At least three states have expressed interest in providing land for establishing shipbuilding and ship repair clusters," he said, without naming the states. According to him, this ambitious initiative aims to consolidate shipbuilding capabilities across regions, fostering greater efficiency and innovation.

proposed Rs 25,000 crore Maritime Development Fund (MDF) which looks at providing long-term, low-cost financial support and push towards indigenous shipbuilding will be basically equity funding.

"The equity funding will come from the Centre, PSUs, pension funds and private sector," he noted. While pointing out that currently, 95 per cent of India's foreign trade happens through foreign-owned and foreign-flagged vessels, which results in an outgo of USD 110 billion annually from India, Ramachandran said almost 60 per cent of the country's ship repair work happens outside the country.

A MAHARATNA PSU

PTI ■ NEW DELHI

An inter-departmental committee with representatives from ED, RBI, tax and consumer affairs departments may be set up to combat the proliferation of online gaming platforms and ensure regulatory compliance, a DGGI report said. The GST intelligence wing of the Central Board of Indirect Taxes and Customs (CBIC) has initiated action against 118 domestic online gaming entities, and Show Cause Notices have been issued to 34 taxpayers involving tax amount of Rs 1,10,531.91 crore. The notices were issued to these gaming companies as they were not paying GST at 28 per cent rate. Furthermore, 658 offshore entities have been identified as non-registered/non-compliant entities and are being investigated by the DGGI. Also, 167 URL/websites have been recommended for blocking.

The Directorate General of GST Intelligence (DGGI) annual report 2023-24 flagged that online money gaming is a "high-risk" industry for tax evasion, money laundering, cyber frauds, juvenile delinquency and various socio-economic evils. Despite the legal clarity with effect from October 1, 2023, bringing the gaming entities under the tax net continues to be an uphill task. Many such firms are set up in offshore tax havens (i.e. Malta, Curacao Islands, British Virgin Islands, Cyprus etc.) known for their opacity, thus making it difficult to ascertain their ultimate ownership. There are online gaming platforms which keep on changing their URL/website/apps to avoid tax compliance. Use of dark web or VPN based platforms for such supply further accentuates the difficulties in DGGI. Also, 167 URL/websites have been recommended for blocking. "Therefore, a multi-

prolonged approach to deal with this sector is need of the hour. An Inter-department committee comprising CBIC, CBDT, ED, MeITY, MCA, MIB, RBI, Department of Consumer Affairs, and the like along with industry bodies may be

set up to develop comprehensive strategies and regulations to combat the proliferation of such platforms, ensuring regulatory compliance, consumer protection and national security," the DGGI said in its report released on

Saturday. In October 2023, the government clarified in the GST law that online gaming attracts a 28 per cent tax on the total sum deposited by the players with the entity. The online gaming industry has grown exponentially in the last few years, at a CAGR of 28 per cent, reaching Rs 16,428 crore in FY23-24 as per an estimate. This boost is largely attributed to factors like widespread smartphone penetration, improved internet connectivity, a growing youth population and the development of local gaming content. Several of show cause notice recipients have approached the court filing Writ Petition against the notices, and the matter is sub-judice before the Hon'ble Supreme Court of India. The notices have essentially contended that games like rummy, poker and others are games of skill and, therefore, cannot be classified as betting/gambling. The terms

'betting' and 'gambling' are not defined in GST law. "Sir William Raynell Anson, a renowned British jurist, has defined a wager or bet as 'a promise to give money or money's worth upon the determination or ascertainment of an uncertain event'. The Hon'ble Supreme Court's verdict on the matter shall have a significant impact on how the concept of online money gaming is understood," the DGGI said. Creating awareness and education among digital nagriks about safe and responsible gaming practices, promoting the use of legitimate platforms registered with MeitY or verified as permissible Real Money Gaming Platforms under the IT Rules, 2021, and entering into reciprocal arrangements with foreign governments for information sharing and tax enforcement may go a long way in effecting regulatory compliance in this industry, the DGGI said.

Chopra finishes second in DL final, misses crown by 1cm

PTI ■ BRUSSELS

Star Indian javelin thrower Neeraj Chopra agonisingly missed the Diamond League crown by just one centimeter as he finished second for the second consecutive year with a throw of 87.86m in the season finale here on Saturday.

The 26-year-old Chopra, who had won the DL trophy in 2022 before finishing second last year, achieved his best throw of the day in his third attempt but that was 1cm short of eventual winner Anderson Peters' 87.87m effort.

Grenada's Peters, a two-time world champion, produced his best throw of the day in his opening attempt. Julian Weber of Germany was third with 85.97m.

Chopra, who added a silver to his Olympic medal tally in Paris following a historic gold at the Tokyo Games, thus ended his season on a high. The Indian javelin throw superstar, who has a personal

best of 89.94m and season's best of 89.49m, had a series of 86.82m, 83.49m, 87.86m, 82.04m, 83.30m and 86.46m. The top three led the seven-

man field in the same order for the whole competition. Peters will collect a Diamond League trophy and USD 30,000 for emerging as the DL

champion this season. Chopra will pocket USD 12,000 for his second-place finish in the grand finale which marked the end of the

prestigious Diamond League series after 14 legs, as well as the end of international athletics season. The Haryana lad remained

consistent throughout the season, though he won just one international event this season -- Paavo Nurmi Games in Turku, Finland on June 18.

He had made the Diamond League final cut after finishing fourth in the overall standings with 14 points from his two second-place finishes in DL one-day meets in Doha and Lausanne on May 10 and August 22.

Chopra has been struggling with his fitness this season and is expected to meet a doctor to rectify a groin injury that has affected him all season and came in the way of his quest to hit the 90m mark.

On Friday, national record-holding 3000m steeplechaser Sable had finished ninth in a 10-man field in his maiden DL final with a mediocre time of 8 minute and 17.09 seconds to end a largely disappointing season. He had finished 11th in the Olympic Games.

It was for the first time that a DL finale featured two Indians.

In-form India clear favourites against Korea in ACT hockey semifinal

PTI ■ DFASFDHULUNBUIR (CHINA)

Maintaining a clean slate, favourites India will fancy their chances when they take on a below-par but unpredictable Korea in the semifinals of the Asian Champions Trophy hockey tournament here on Monday.

Paris Olympics bronze medalist India have been in rollicking form in the tournament so far, registering five wins out of five league matches. The Harmanpreet Singh-led side started their campaign with a 3-0 win over hosts China and then trounced Japan and Malaysia 5-1 and 8-1 respectively.

India then beat Korea 3-1 before eking out a narrow 2-1 win over arch-rivals Pakistan.

It has been a commanding performance from the Indians as they excelled in every department be it forwardline, midfield or defence.

The most promising part of India's performance in the league stages has been the form of the strikers.

Scoring field goals was a major concern in Paris but here the young forwardline comprising Sukhjeet Singh, Abhishek, Uttam Singh, Gurjot Singh, Aranjeet Singh Hundal and others have exceeded expectations.

Young midfielder Raj Kumar Pal, too, has shone bright, scoring some fine field goals. Besides, veteran Manpreet Singh, vice-captain Vivek Sagar Prasad and Nilakanta Sharma has excelled in the midfield. The Indian defence too has performed stoutly, conceding just four goals with goalkeepers Krishan Bahadur Pathak and Suraj Karkera not letting the team feel the void left the retirement of the talismanic PR Sreejesh.

Harmanpreet, one of the best dragflickers in the world currently, has led from the front and has continued his good form of Paris, converting as many as five penalty corners. When India struggled for

field goals, Harmanpreet stood up with his penalty corner conversions.

Harmanpreet also has an able understudy in young Jugraj Singh, who is right now the fastest dragflicker in the world.

But a knockout game is a new beginning for any side and the Indians can ill afford to take Korea lightly as they can spring a surprise on their day, evidence of which was their last-gasp equaliser to draw 3-3 against Malaysia and keep their semifinal hopes alive.

The Indian defence will also have to be cautious about not conceding too many penalty corners as in Jihun Yang, the tournament's leading scorer with seven goals, Korea possesses a potent dragflicker.

In the other semifinal of the day, Pakistan will take on hosts China.

FIFA coach capacity building workshop to be held at AIFF NCE in Kolkata

New Delhi, (PTI) The FIFA coach capacity building workshop, a vital component of the world football governing body's Women's League Development, which falls under the broader FIFA Women's Development Programme, will be held at the AIFF National Centre of Excellence (NCE) in Kolkata from September 16 to 18. The workshop will be conducted by FIFA experts Simon Toselli and Stéphanie Spielmann.

Toselli, a FIFA women's football technical expert, had previously conducted the women's football strategy workshop in New Delhi in June this year. He has been collaborating with 25 countries on different projects and implementation of strategies (AFC, OFC, CAF and UEFA).

Spielmann, a former player, is a UEFA A-License coach and a FIFA and OFC instructor. She has been part of the FIFA coach mentorship programme with the Belgium women's national team.

Argentina reaches Davis Cup Final after tense win over Finland

AP ■ MANCHESTER

Argentina clinched a berth in the eight-team Davis Cup Final with a tense 3-0 win over Finland.

The Argentines have reached the quarterfinals in Malaga, Spain, in November for the first time in five years.

They had to battle in Group D in Manchester after an opening loss to 2022 champion Canada. They beat host Britain on Friday and overcame a gritty Finland, a semifinalist last year but without its best player on Saturday.

Tomas Martin Etcheverry beat 703rd-ranked Ero Vasa 7-6(5) 6-3, then Francisco Cerundolo outlasted Otto Virtanen 6-7(4) 6-1 6-0. Argentina needed the doubles, and Maximo Gonzalez and Andres Molteni delivered against Patrick Kaukovalta and Harri Heliövaara 6-7(3) 6-4 6-3.

The result forces Britain to have to beat Canada 3-0 on Sunday to advance at Canada's expense. In Bologna, Brazil beat Belgium 2-1 after losses to Italy and the Netherlands in Group A.

Three-set wins by Joao Fonseca and Thiago Monteiro followed by a doubles loss took more than six hours to complete on the indoor hard-court. Brazil has a shot at advancing; the Netherlands must lose to unbeaten defending champion Italy 3-0 on Sunday. In Zhuhai, the United States earned a seeding in the Final by beating Germany 2-1 and topping

Group C unbeaten.

Both teams were already qualified for the Final but the US grabbed a seeding awarded to the group winners.

Reilly Opelka saved two match points to beat Henri Squire 6-7(4) 7-6(9) 6-3 and Brandon Nakashima eased past Maximilian Marterer 6-4 6-2. The Americans dropped their first point in nine matches when Austin Krajicek and Rajeev Ram lost to Kevin Krawietz and Tim Puetz 6-1 7-6(4).

"We have a good chance against any team there (in Malaga)," Nakashima said. "There's a bunch of talented Americans playing really well right now."

In Group B in Spain, a tie between teams already out of contention saw 10-time champion France beat three-time champion the Czech Republic 2-1 sealed by a doubles win.

Messi returns and scores twice as Inter Miami defeats Union 3-1

AP ■ FORT LAUDERDALE (US)

Lionel Messi made a successful return after a lengthy absence, scoring two goals and assisting on the third to lead Inter Miami to a 3-1 victory over the Philadelphia Union.

The Argentine star winger and eight-time Ballon d'Or winner had not played with Inter Miami since June 1 because of national team commitments and a right ankle injury sustained in a 1-0 victory over Colombia in the Copa America final on July 14.

"A little bit tired because of the heat and humidity of Miami but I wanted to return so much after such a long time away," Messi said in Spanish on the Apple TV broadcast after the game. "I started training with the group and began to feel better."

Messi, who resumed practicing three weeks ago, showed no rust or ill-effects from the injury with his performance. He scored twice in a four-minute span midway through the first half that negated an early goal by Philadelphia.

"What he did was more typical than other things that happened tonight," Inter Miami coach Gerardo "Tata" Martino said in Spanish. "I am happy that he finished the game and completed the 90 minutes. He felt fine."

Without Messi, Miami went

8-2 and clinched an MLS playoff spot. Miami (19-4-5) also took the lead in the Supporters Shield table with 62 points.

"It's nice to see that his injury has healed and that he's as effective as he was before," Inter Miami midfielder Julian Gressel said.

Luis Suárez had one assist and clinched Miami's win with a strike on Messi's assist during second half stoppage time. It was Suárez's 17th goal of the season.

Messi's first goal in the 26th minute evened it at 1-1. Suárez sent a short pass near the large area, where Messi retrieved it, outmaneuvered Union defender Kai Wagner into the box and converted a

shot that landed inside the left post. Four minutes later, Messi received a crossing pass inside the box and beat Philadelphia goalkeeper Andrew Rick with a 15-yard shot.

Suárez had a goal in the 44th minute overturned after a video review ruled an offside infraction.

"As the game progressed we ran the risk of not controlling the ball," Martino said. "From the last 30 minutes of the first half we managed to handle the ball better."

Messi's mended ankle absorbed a kick by Philadelphia midfielder Quinn Sullivan in the 67th minute as both battled for a loose ball. Messi fell to the

ground and favored the ankle but quickly stood and continued playing. Match referee Sergii Boiko assessed yellow cards to Sullivan and Martino, who argued for a stiffer infraction against Sullivan.

Seeking the equalizer, Philadelphia (7-12-9) pressed repeatedly throughout the second half before Messi centered a pass to Suárez and he converted from 18 yards.

Before his absence, the 37-year-old Messi had 12 goals and 13 assists in 12 league matches this season.

Fans barely settled in when Union forward Mikael Uhre stunned the home crowd with a goal two minutes into the match.

Messi had his first scoring opportunity in the seventh minute with a free kick near the half circle that was cleared by a wall of Philadelphia defenders. For Inter Miami, the victory came with a price. Defender David Martinez left early in the first half because of a groin injury and his replacement Noah Allen was removed after what Martino said was a blow to the head.

"We have to take it day by day and see how they recover and how they feel," Martino said. Both clubs continue league play with road matches on Wednesday. Inter Miami will visit Atlanta on Tuesday while the Union visit New York City FC on Tuesday.

Champions League starts bigger new era with Mbappe at Madrid and rematches of past finals

AP ■ GENEVA

The new Champions League format kicks off Tuesday after more than six years of planning, one failed proposal and one Super League launch fiasco.

In the end, storied clubs who pushed for change from UEFA and created turmoil in European soccer got most of what they wanted: More teams, more games and more of them against strong opponents, more money. Now there are 36 teams instead of 32, each playing eight games instead of six, against eight different opponents instead of three.

Kylian Mbappe starts his quest for a first title with his third club, the record 15-time European champion Real Madrid that hosts Stuttgart. Mbappe reached the semifinals in 2017 with Monaco and was a beaten finalist in 2020 with Paris Saint-Germain. Ultimately, all 36 teams will be ranked from top to bottom in a single league standings that finishes in January instead of traditional four-team groups that would end in December.

UEFA has cleared its midweek schedule to relaunch the marquee club event over back-to-back-to-back nights - six games each through Thursday. The league phase through January

is quite simple. Each team plays a balanced schedule of eight games - four at home, four on the road - earning three points for a win and one for a draw.

Eight different opponents were allocated in the draw last month by a software program picking two teams from each of four seeding pots. Seeding was based on a team's UEFA ranking over five years of results in European competitions.

Recent champions Madrid, Manchester City and Bayern Munich were among the top seeds. Low-ranked pot four included debutants Girona and Brest, and long-time absentees Aston Villa, Bologna and Stuttgart. Advancing to the knockout phase is more complex, and UEFA suggested teams will need eight points from eight games to stay involved.

The top eight in the standings on January 29 go direct to the round of 16 in March seeded Nos. 1-8. Teams placed ninth to 24th in the standings enter a knockout playoffs round in February. Teams 9-16 will be seeded in the draw and play second legs at home against teams who placed from 17-24. The bottom 12 teams in the standings are eliminated. The eight playoff winners advance as unseeded teams in the round of 16, which will be drawn into a set

bracket like a tennis tournament. That replaces the old system of separate draws for the quarterfinals and semifinals. The new era starts with two early kickoffs featuring three European Cup winners from the 1980s - Juventus (1985) hosts PSV Eindhoven (1988) and Aston Villa (1982) travels to Young Boys. Both are first-time fixtures between the teams.

Also playing are the four teams with the most European Cup and Champions League titles in their 70-season history. While Madrid plays Stuttgart, six-time winner Bayern hosts Dinamo Zagreb. The standout pairing is AC Milan against Liverpool at San Siro. Milan won the last of its seven European titles in the 2007 final against Liverpool.

Man City-Inter meet

A more recent rematch of another Istanbul final features the current champions of England and Italy. Manchester City, riding Erling Haaland's hot start to the season, hosts an Inter Milan it beat 1-0 in the 2023 final and is unbeaten in Champions League home games for six years. It is also a night for fresh faces. Girona, which is in the same Abu

Dhabi-backed ownership group as Man City, will make its European debut at Paris Saint-Germain.

Bologna hosts Shakhtar Donetsk in its first game in the competition since a preliminary round exit 60 years ago. Bologna still plays in the Stadio Renato Dall'Ara that has been its home since 1927 and staged games at the 1934 World Cup.

Leverkusen and Atalanta, the Europa League finalists last season, now rise together to the bigger stage.

Bayer Leverkusen's only loss in a remarkable first full season under coach Xabi Alonso was that Europa final against Atalanta. Now Leverkusen returns to the Champions League at Feyenoord, whose coach last season Arne Slot took the job at Liverpool that was first offered to Alonso.

Atalanta hosts Arsenal which has lost captain Martin Odegaard to an ankle injury suffered playing for Norway on Monday. La Liga leader Barcelona with 17-year-old star Lamine Yamal goes to Monaco and the most unlikely fixture of all 18 this week is Brest vs. Sturm Graz.

Brest, founded 121 years ago, has never played a European game and Sturm last played in the

Champions League 23 years ago. The game is being played at Guingamp, 110 kilometers east of Atlantic port city Brest, whose home stadium is not modern enough.

UEFA has put at least 2.5 billion euros (\$2.8 billion) into the prize money fund for the 36 clubs, a 25% raise on last season. The title winner in Munich on May 31 can expect to get more than 160 million euros (\$177 million). Each team gets a basic 18.6 million euros (\$20.6 million), then 2.1 million euros (\$2.3 million) for each league-phase game won and 700,000 euros (\$780,000) per draw.

Each place in the standings is worth more money with shares of 275,000 euros (\$305,000) per place: 36 shares, or 9.9 million euros (\$11 million), goes to the team finishing top in January and a single share to the last-place team.

Bonuses escalate from 11 million euros (\$12.3 million) per team for advancing to each knockout round. Another prize fund of 853 million euros (\$950 million) is allocated based on teams' historical record in UEFA competitions and the value of national and global broadcast deals.

Khawaja relishes his on-field battles with Ashwin

PTI ■ MELBOURNE,

Australian opener Usman Khawaja has over the years relished his on-field battles with star Indian spinner Ravichandran Ashwin, who according to the southpaw is a man who always has a plan up his sleeve.

Ashwin (39 wickets) is the third-highest wicket-taker among Indian bowlers in Test matches in Australia, only behind Anil Kumble (49) and Kapil Dev (51) apart from topping the charts across all bilateral series (home and away) with 114 scalps which also includes seven five-for.

"Ravi is a very good bowler. He is very strategic. He always has a plan," Khawaja told Star Sports.

"He tries to figure it out and stay ahead of the game, which I respect. I respect his cricketing brain. It's always cool to play against him, and I look forward to the challenge," he was all praise for Ashwin's tactical nous.

This will be Ashwin's fifth Test tour of Australia, having been part of the sides that

played in 2011-12, 2014-15, 2018-19 and 2020-21 although on last two tours, he had injury issues.

Don't think India are favourites: Travis Head

Meanwhile, India's current nemesis Travis Head had

asserted that despite visiting team's dominance during last two Test series, he does not feel the visitors will be the

'favourites' this time around. "I don't feel like they're my favourite. I just feel like we play them enough, play them

(a) lot," he told Star Sports. "And, I guess the last couple of years I've been in nice form. So yeah, being able to play well, it's always nice. It's not hard to get up for the contest. It's hugely competitive. Yeah, it's easier to get up for the game. So, I wouldn't say they're my favourite."

However, the 30-year-old warned that Rohit Sharma and Co. Will be a difficult lot to compete against and the Aussies need to be at their best, especially 'in a couple of games'.

"They're extremely difficult but it's been nice to play well in a couple of games and looking forward to preparing well and being ready to go. And hopefully, I can contribute to what's a successful summer for us," he added.

The two teams will lock horns in the upcoming five-Test series in Australia starting November 22, as India defends the Border-Gavaskar Trophy it has won over past four bilateral engagements (home and away).

Ramkumar-Balaji pair loses must win doubles

PTI ■ STOCKHOLM

Ramkumar Ramanathan and N. Sriram Balaji could play well only in patches to lose the do-or-die doubles against Andre Goransson and Filip Bergevi as India succumbed to Sweden in the Davis Cup World Group I tie after conceding an unassailable 0-3 lead, here Sunday.

After losing both the singles on Saturday, India needed to win the third rubber to stay alive in the tie but Ramkumar and Balaji went down 3-6 4-6 in one hour and 19 minutes.

India's dismal record against Sweden in the Davis Cup continued as it was the team's sixth defeat in as many ties. The reverse singles have been rendered inconsequential.

India will now compete next year in Play-offs to keep place in World Group I.

The Indian pair had its first chance in game three in the opening set on Goransson's serve. Balaji and Ramkumar pocketed four straight points to earn a breakpoint but the home team averted the danger.

Ramkumar was, however, broken in the next game and Bergevi held his own to zoom to a commanding 5-2 lead. Balaji served to stay in the set and managed to hold. The home team comfortably sealed the opening set with

Bergevi holding at love. In the second set, Ramkumar had a fiery start, holding at love. Bergevi though surprisingly struggled with his first serve as he committed two double faults to be at 30-all. Sensing a chance, Ramkumar attacked Bergevi's second serve but could respond only with a feeble shot on the Swede's widish cross court return. Standing at the net, it was an easy put away for Goransson.

Balaji was under pressure in the next game. Serving at deuce, he fired an ace but Goransson hit a backhand volley winner on the next point to again make it deuce. The Indians soaked the pressure and eventually saved the game.

Balaji faced the heat again in the seventh game with both Swedish players finding service return winners with attacking shots.

Goransson earned a break chance with a volley winner from the net. Ramkumar hit a powerful forehand return following an exciting rally on that break point and later the Indians saved one more but on the third breakpoint Balaji netted a return. The lead stayed with the home team that served out the match in the 10th game. Ramkumar's causal forehand return landed outside the lines on the match point.

Duleep Trophy: Bhui makes hundred in defeat against India A

PTI ■ ANANTAPUR

Ricky Bhui delayed the inevitable with a stubborn hundred, but spinners Shams Mulani and Tanush Kotian eventually brought India D to their knees as India A walked away with a 186-run win in the Duleep Trophy match here on Sunday.

Bhui, starting from overnight 44, made 113 (195b, 14x4, 3x6) but India D, overnight 62, were bundled out for 301, chasing 488.

The victory enabled India A to stay in contention for the title with 6 points. But they will have to get a favourable result against table-toppers India C (9 points) in their next match here from September 19.

India D, out of title race after two successive defeats, will be up against second-placed India B, who have 7 points.

On a pitch that gave copious assistance to the spinners, the 'D' batters needed to show tremendous application to hang around. But apart from Bhui none really showed the stomach for a fight.

Bhui's second-wicket stand with Yash Dubey (37) was worth 100 runs but Dubey got run out, and in his next over Mulani castled Devdutt Padikkal to push India D to 105 for three.

They managed to stitch two useful stands for two subsequent wickets - a 53 between Bhui and skipper Shreyas Iyer (41, 55b, 8x4) and a 62 between Bhui and Sanju Samson (40, 45b, 3x4, 3x6).

But their stands were more about aggression, and the approach was fraught with danger on a pitch where spinners called the shots.

Both Shreyas and Samson were cleaned up by Mulani, who was later adjudged player of the match. A sharply turned one accounted for Shreyas while Samson failed to connect a pull as the ball disturbed the timber.

While wickets were tumbling at constantly at the other end, Bhui was a picture of confidence and brought up his century in 170 balls.

Then off-spinner Tanush Kotian got into act, and started his demolition job by removing Saransh Jain (5), and six overs later he ousted Bhui, who holed out to Riyan Parag in the deep.

It ended the fight of India D even as Kotian went on to add two more wickets - Saurabh Kumar (22) and Harshit Rana (24).

Brief scores: India A: 290 and 380/3 declared beat India D: 183 and 301 all out in 82.2 overs (Ricky Bhui 113, Shreyas Iyer 41, Sanju Samson 40; Shams Mulani 3/117, Tanush Kotian 4/73) by 186 runs.

Bangladesh arrive in Chennai, Shanto confident of good show

PTI ■ CHENNAI

A confident Bangladesh team arrived in India on Sunday for two Test matches and three T20s with visiting skipper Najmul Hossain Shanto hoping that their historic 2-0 series win in Pakistan recently would hold them in good stead against the formidable hosts in the coming weeks.

The Bangladesh squad landed in Chennai, the venue for the opening Test beginning on September 19, on Sunday afternoon.

"It's definitely going to be a very challenging series for us," Shanto was quoted as saying at the pre-departure press briefing at the Dhaka airport.

"After a good series (vs Pakistan) there is definitely an extra confidence in the team, in the people of the country. Every series is an opportunity.

"We will play to win both matches. The things that matter to win, the process matters... Our aim will be to do the work properly. Good results are possible if we do our job properly," the Bangladesh captain added.

While India is on top of the World Test Championship (WTC) table, the Bangladesh

skipper believed that it will all boil down to how they perform during those five days and the result can come even in the last session.

"If you see the ranking, they are much ahead of us," Shanto noted. "We have been playing well lately. We have had a good series. Our aim will be to play well for five days.

"The result comes in the last session on the last day. If we play good cricket for five days, there is a chance for either team to win

in the last session," the skipper said just before boarding the flight to Chennai.

Adequate security cover for the visitors in Chennai

Usual security protocol was in place for Bangladesh team like it happens for all international teams with two police vans accompanying the team bus to the hotel.

Upon arrival at the hotel, the players were given a warm welcome as staff showered them with rose petals.

The entire team will be put on one of the floors, while armed security personnel will be present on the floor, which is a regular protocol.

The Tigers are visiting India after the tiny neighbours witnessed civil unrest for over a month. Following the students' protests last month that led to the ouster of former Prime Minister Sheikh Hasina, there have been reports of communal clashes, with attacks on minorities, especially Hindus.

Haryana, Karnataka, Punjab win in men National Junior Hockey Championship

PTI ■ JALANDHAR

Haryana, Karnataka and Punjab secured wins on day six of the 14th Hockey India Junior Men's National Championship here on Sunday.

Andhra Pradesh and Delhi played out a 5-5 draw. In the first match, Haryana thrashed Rajasthan 6-1. Rohit Rana (2nd minute), Sunil Maan (11th), Sahil Ruhul (17th) and Ami Khasa (60th) scored one goal each, while Navraj Singh (7th, 37th) struck a brace for Haryana.

Anurag Suthar (50th) scored the consolation goal for Rajasthan. In the second match, Karnataka also notched up a 6-1 win over Kerala

with Aryan Uthappa Mt (6th, 35th) and Sunil P B (8th, 45th) scoring a couple of goals each.

Vivek Ravi Bagade (22nd) and Dhanush Kaveriappa Ma (32nd) too scored one goal each, while in response, Anujith P (47th) scored the only goal for Kerala.

In the last match of the day, Punjab trounced Mizoram 7-1. For Punjab, captain Ujwal Singh (10th) opened the account before Harshdeep Singh (12th), Japnit Singh (15th), Om Rajnesh Saini (36th), Lovenoor Singh (40th), Jarman Singh (48th) and Abhishek Gorkhi (59th) joined him with a goal each.

In response, Akash Yadav (48th) scored the only goal for Mizoram.

Lahiri slips to tied 12th at LIV Golf Individual Championship

PTI ■ CHICAGO

India's Anirban Lahiri went 11-over 71 in the second round and slipped to tied 12th in the 2024 LIV Golf Individual Championship here.

Lahiri carded two birdies but he also had three bogeys on the second day, and now he has a total of 2-under for 36 holes.

Lahiri began the tournament with a fine 3-under 67 that placed him inside the top-5. He had four birdies against one bogey in the opening round.

Jon Rahm entered this week's regular-season finale with a slim points margin over Joaquin Niemann.

The Legion XIII captain increased that advantage with a brilliant bogey-free 6-under 64 that now has him in position to claim two trophies after Sunday's final round at Bolingbrook Golf Club.

Rahm is at 7 under and owns a one-shot lead over Fireballs GC Captain Sergio Garcia on the leaderboard and a three-shot lead over Niemann, the Torque GC captain.

Rahm can still become Individual Champion even if he doesn't win the tournament.

Bryson DeChambeau's Crushers GC, winners last year in Chicago, have already clinched one of the three available seeds along with Rahm's Legion XIII.

The Crushers entered the final round tied for the

tournament lead with Cleeks GC at 10 under and would clinch the No. 1 overall seed with a victory. Niemann's one-shot advantage entering the day was erased in their first eight holes.

Playing in the same group for the second consecutive day, Rahm was 3 under while Niemann was 2 over.

At one point late in the round, Rahm was five

strokes ahead of Niemann. But Niemann fought back down the stretch with birdies in three of the final four holes to shoot a 2-under 68 and stay within striking distance.

Hatton was on the verge of falling out of contention, opening with a 3-over 73 and then playing the first 11 holes on Saturday at even par.

But then he found his game,

playing the last seven holes in 5 under - a stretch that included a hole-in-one at the island green sixth hole.

First-round leader Brooks Koepka followed his opening bogey-free 8-under 62 with a 73 that included five bogeys in his first 12 holes.

But he made two late birdies and finished at 5-under and solo third. Team Cleeks are in the lead.
