## SENSEX IN A TAILSPIN

**PRASANNA SINGH**  
GUEST REPORTER

Stock market downturn, as and when it happens, invariably catches people, and usually these are always retail investors, off guard. We are seeing this play out in India's leading indices over the past three months as well. In a sort of slow motion glide that seems to have suddenly picked up pace this week, provoking this article as well. India's leading stock exchange barometers have all hit new 'lows'. There is a need to qualify that word, because these are corrections when seen from the peaks these indices hit, all in

September. So if the Nifty Mid-cap and small cap indices both hit their peaks early in September, the broader indices comprising the BSE SENSEX and the Nifty 50, comprising larger cap stocks, actually hit their highs in the final week of September, on September 27. Today, while the large caps indices are down 155 points from their peaks, the mid cap and small cap indices are down 21 per cent and 25 per cent respectively. Of course, the correction in many hyped stocks is even worse. For crores of retail investors who had piled into stocks after watching a breathless post-COVID rally that rarely stuttered, it has been agonising, watching their 'wealth' evaporate. Especially when we consider how even at the peak,

many complained that the rise has been driven by a few, select stocks disproportionately. Leaving only index fund holders uniformly happy. **SO WHY DID THE MARKETS CORRECT SO STEEPLY?** The answer lies in the previous rise itself. Like almost all sustained bull markets, the highs the market saw in September was the fag end of a period of sustained growth, a lot of it is not justified anymore by the quarterly results many key sectors and firms showcased between Q2 and Q3. Worse, when compared to global peers, India's markets were once again trading at a premium, at par with, or higher than most global markets bar the still frothy US markets. A premium, most foreign investors seem to have

decided, is not justified in a volatile global environment. And followed it with almost 2 Lakh Crores of sustained selling since. All the anecdotal and actual signals were blinking red, namely, the stamped like rush for IPOs

among firms and investors alike, and perhaps the worst of all, a quiet reducing of stakes in many firms by promoters. As always, among all the reasons trotted out to explain these warning signs, perhaps the most silly, and eventually foolish one as always, was that 'this time it's different'. It never is. India's growth prospects have become almost mythical now, in how there is a bull case for 10 per cent GDP growth, yet, we always find our economy overheating at the first signs of a sustained period of 8 per cent growth or even less. Brought down by rising inflation, corruption scandals, or yet another election or oil price spike. The recent trend towards giveaways without a funding plan has not

helped. The final trigger for the slide in 2025 has largely been the Trump administration and its actions, threatened or otherwise. If there is one thing that the market does not like, it is uncertainty. And the Trump administration has added dollops of it to global trade and markets including India with its tariff threats and actions. For many investors this is their first experience with a correction this sharp and long. And they will seek to find answers in every argument, right from the decision to raise capital gains tax on stock market gains, to the tougher rules for FII investments, or the government's apparent pause on further public sector privatisation. Perhaps all of these make a good

point, or perhaps not. After all, wasn't this the year when domestic investors had all but made foreign investors irrelevant according to many claims, including from the government? Clearly not, as we can see. Quite simply, sentiment has turned, and from a change in direction, taken a complete U-turn it would appear. That is not quite as uncommon or improbable as it seems, as stock markets are prone to going to extremes in either direction. One feels we are quite close to the point where the downturn might have gone well beyond what fundamentals justify. But readers will do well to remember that eventually, one thing that the stocks markets do best consistently is reward performance. So firms that meet their projections for three or more quarters without fail, will eventually find their efforts rewarded.

## 41 trapped in Uttarakhand avalanche

**PIONEER NEWS SERVICE**  
DEHRADUN/NEW DELHI

Heavy snowfall in Uttarakhand resulting in an avalanche led to at least 41 Border Roads Organisation workers (BRO) being buried in the high altitude border village of Mana, Chamoli district on Friday. The workers were clearing snow when they were trapped. The snowslide had initially buried 57 men but 16 were pulled out safely. There was no immediate news of casualties and rescue efforts were on. Later, 32 of total 57 workers were rescued on Friday, sources said. The avalanche has buried a camp of the BRO between Mana and Badrinath and multiple teams battled

Rescue operation underway after BRO labourers got trapped under an avalanche, in Chamoli district of Uttarakhand

tough terrain, heavy snow and rain to rescue the workers, sources said. Mana, three kilometres from Badrinath, is the last village on the India-Tibet border at a height of 3,200 metres. It was also learnt rescue

operations have been halted due to bad weather and the impending danger of more avalanches. It will restart when the weather improves, sources said. Himachal Pradesh and higher reaches of Jammu and Kashmir also saw snowfall and rain. Several northern states including Delhi, Punjab and Haryana received rainfall leading to a dip in temperature. As regards the mishap in Uttarakhand, the avalanche buried a camp of the BRO between Mana and Badrinath, Chamoli District Magistrate Sandeep Tiwari said as multiple teams battled tough terrain, heavy snow and rain to rescue the workers.

## HM directs Delhi Govt, Police to act tough on Bangladeshis

HM Amit Shah with Delhi CM Rekha Gupta chairs a meeting to review law and order situation in Delhi

**RAJESH KUMAR** ■ NEW DELHI

Union Home Minister Amit Shah on Friday reviewed law and order situation in the national Capital with Delhi Chief Minister Rekha Gupta while directing Delhi police to take action against the networks that help illegal Bangladeshis and Rohingyas entering India, to take measures to ensure women safety, and ensure ruthless

action against inter-state gangs. It was the first top level interaction after BJP came to power. The AAP regime did not attend such meetings in its 10-year rule. A key decision taken in the meeting was regarding the expeditious disposal of the 2020 Delhi riots cases. Shah urged the Delhi government to appoint special prosecutors to ensure speedy trials, as per the MHA. Another policy shift was announced regarding construction-related matters, where it was decided that Delhi police permission would no longer be required. The Union Home Minister said strict action should also be taken against police stations and sub-divisions that consistently perform poorly. On traffic congestion, Shah said the Delhi Police should identify the places witnessing traffic jams daily and the Delhi police commissioner and chief secretary should meet and find a quick solution to this.

## Bureaucrat back at SEBI, after stormy Buch era

**PTI** ■ NEW DELHI

Tuhin Kanta Pandey, the government's divestment man who played a key role in sale of Air India as well as listing of the Life Insurance Corporation of India (LIC), has been appointed as head of SEBI, marking return of bureaucrat at the helm of market regulator. Pandey, the top bureaucrat in the Finance Ministry, will replace Madhabi Puri Buch, whose term ends Friday as chairman of the SEBI. Buch, 60, who was the first woman and the only person from the private sector to head SEBI, had a tumultuous three-year term marked with allegations of conflict of interest as well as sweeping overhaul of regulations. Prior to her, the position was mostly held by bureaucrats. A career bureaucrat, Pandey, 59, is currently the finance secretary and is known to be stickler for rules and a clean image. He will have a three-year term. He is the second bureaucrat from the finance ministry to have been appointed to key roles in the financial sector since December. His colleague in charge of the revenue department Sanjay Malhotra was in December appointed as Governor of the Reserve Bank of India (RBI). A 1987-batch Odisha-cadre Indian Administrative Service (IAS) officer, Pandey has been the longest serving divestment secretary, serving for over five years. The role of finance secretary was added to his portfolio in September last year by virtue of him being the senior most among the secretaries in the finance ministry.

## Heatwave days ahead in March

**RAJESH KUMAR** ■ NEW DELHI

### WEATHER

India is likely to witness above-normal maximum temperatures in most parts between March and May. According to the India Meteorological Department (IMD), more heatwave days are also likely to be witnessed across most parts of the country during the months. IMD data shows India also recorded its warmest February in 124 years with an average temperature of more than 22°C. For the first time, the average minimum temperature across the country was recorded at over 15°C, which is the warmest, recorded ever. In terms of the average maximum temperature, February 2025 has been the second warmest, just behind the corresponding month in 2023. In terms of the average maximum temperature, February 2025 has been the second warmest, just behind the corresponding month in 2023. The reverse happened in 2022. April of that year in north India was the hottest on record, while temperatures in Feb were close to normal. The IMD attributed the unusual rise in temperature to a presence of strong easterly winds, which they said were blocking the cool sea breeze. The IMD declares a heatwave

when the maximum is over 40°C in the plains, and also the temperature is 4.5°C or more above normal. The IMD said during the upcoming hot weather season (March to May (MAM)), above-normal maximum temperatures are most likely over most parts of the country, except over southern parts of Peninsular India, and isolated pockets of Northeast India where normal to below-normal maximum temperatures are likely. The above-normal minimum temperatures are likely over most parts of the country except some isolated southernmost regions of Peninsular India where normal minimum temperatures are likely. "Monthly maximum temperatures for March are likely to be above normal over most parts of India, except over some southernmost parts of Peninsular India, where below normal maximum temperatures are likely. During this period the above normal monthly minimum temperatures are likely over

most parts of the country except some parts of Northwest India and South Peninsula, where normal minimum temperatures are most likely," the IMD said. According to IMD, above-normal heatwave days are likely over most parts of central India and adjoining northern parts of South Peninsula and some areas of northwest and east India.. Analysis of IMD's century-long temperature data shows the October-December post-monsoon season is warming at a rate of 1.01°C per century, followed by the January-February winter months at 0.73°C. Pre-monsoon (March-May) and monsoon (June-September) seasons are warming at relatively slower rates of 0.62°C and 0.45°C respectively. Delhi recorded its warmest February night in 74 years, with the minimum temperature at Safdarjung reaching 19.5°C on Thursday — the highest for the month in the period between 1951 to 2025, according to the IMD. Meanwhile, the Commission for Air Quality Management (CAQM) said, "Delhi recorded its lowest AQI in 2025, today, with average AQI clocking 121, as per the daily AQI Bulletin by CPCB. Average AQI of 121 for Delhi on Friday is the lowest during January - February in last three years since 2023."

(Left to right): LoP Atishi interacts with police personnel after allegedly being stopped from entering the state Vidhan Sabha premises on Friday and Delhi Assembly speaker, Vijendra Gupta

## Delhi Speaker, Atishi engage in letter war

**RAJESH KUMAR** ■ NEW DELHI

A letter war erupted between the Delhi Assembly speaker, Vijendra Gupta and the Leader of Opposition (LoP), Atishi on Friday, following the suspension of 21 MLAs from the Vidhan Sabha, with Atishi calling it an "insult to the people's mandate" while Speaker Vijendra Gupta defended the move, citing parliamentary rules and past disruptions. The controversy deepened when the suspended MLAs including former chief minister Atishi were prevented from entering the Assembly premises the next day while attempting to hold a protest at the Mahatma Gandhi statue. The LoP termed the move "unprecedented" and accused the BJP government of "crossing all limits of dictatorship" by stifling the Opposition's voice.

"The Opposition was expelled from the House for chanting 'Jai Bhim' slogans, while BJP MLAs continued raising 'Modi-Modi' slogans without any repercussions. Preventing Opposition MLAs from entering the Assembly premises is a blatant insult to democracy," Atishi asserted. "This is an insult not only to the MLAs but also to the mandate given by the people," she said. Responding to Atishi's claims, the Speaker rejected the allegations of bias and accused the Opposition of disrupting the proceedings of the House. He defended the decision to bar the suspended MLAs from the premises, citing Assembly Rule 277, which states that "A member who has been suspended from the service of the House shall be barred from entering the premises of the House and from taking part in the proceedings of the House

and Committees". Gupta also criticised the Opposition's conduct, stating that disruptions had begun even before the LG's address. Referring to the Speaker's election on February 24, he wrote, "It should have been a dignified process. Unfortunately, the process was marred by sloganeering and disruption by the opposition members. Despite this unbecoming conduct, I exercised restraint and did not take any disciplinary action." Regarding the LG's address on February 25, Gupta pointed to the fifth schedule (code of conduct rules), which mandates that interruptions during the LG's speech be treated as "disrespect towards the Lt Governor and contempt of the House". He said suspending the MLAs was not an arbitrary decision but based on clear parliamentary rules.

## A home preserved to keep identity alive

**PIONEER NEWS SERVICE** ■ ITANAGAR

In a fast-changing world, where traditions are often forgotten, a young woman is ensuring her community's heritage lives on-not in books or behind glass, but within the very walls of her home. Leike Chomu, a 24-year-old from the Monpa community in western Arunachal Pradesh, has turned her 200-year-old ancestral house into a living museum. More than just a collection of artefacts, the museum itself is a piece of history-built using ancient Monpa techniques with mud and stone. "It's about keeping our cultural identity alive," Chomu said. The idea was mooted by WWF India as part of its efforts to safeguard the unique heritage of the Monpa community. However, the transformation of the house into a museum was something she took on personally.

From restoring the structure, conserving artefacts and setting up the space to make it accessible to visitors, Chomu has been actively involved in every step. "For me, this is more than just a project. It is my family's legacy," she added. With modernisation rapidly changing traditional lifestyles, she wanted to safeguard Monpa knowledge and everyday practices before they faded away. Instead of creating a conventional museum with only artefacts, this initiative preserves the house itself, showcasing Monpa architecture, lifestyle, and traditions, Chomu said. Visitors don't just see historical objects. They can experience how the Monpa people lived centuries ago, she added. After months of dedication, the museum was formally launched on October 5 last year. Since then, many tourists and culture enthusiasts have

Artifacts displayed inside the museum that Leike Chomu, a 24-year-old woman from the Monpa community, created after transforming her 200-year-old ancestral home, at Chug Valley in the Dirang area of West Kameng district, Arunachal Pradesh

visited. "They are amazed that the museum isn't just about objects but the house itself, its architecture, the way of life, and the stories it holds. Visitors appreciate the authenticity, often describing it as a rare and immersive experience that feels like stepping back in time," Chomu added. Some have even mentioned that walking through the house gives them a deep sense of connection to the Monpa heritage. Originally from Chug Valley under Dirang in West Kameng district of the northeastern state, Chomu holds a BSc degree in agriculture with a background in agroecology. Her deep connection to the land and traditional knowledge has fueled her passion for heritage preservation. "The museum is my ancestral house. I have worked to preserve and transform it into a living museum," she explained.

## Chess colossus, Boris Spassky dies at 88

**PTI** ■ MOSCOW

Boris Spassky, a Soviet-era world chess champion who lost his title to American Bobby Fischer in a legendary 1972 match that became a proxy for Cold War rivalries, died Thursday in Moscow. He was 88. The death of the one-time chess prodigy was announced by the International Chess Federation, the game's governing body. No cause was given. Spassky was "one of the greatest players of all time," the group said on the social platform X. He "left an indelible mark on the game." The televised 1972 match with Fischer, at the height of the Cold War, became an

international sensation and was known as the "Match of the Century." When Fischer won the international chess crown in Reykjavik, Iceland, the then-29-year-old chess genius from Brooklyn, New York, brought the US its first world chess title. Fischer, known to be testy and difficult, died in 2008. After his victory of Spassky, he later forfeited the title by refusing to defend it. Former world champion Garry Kasparov wrote on X that Spassky "was never above befriending and mentoring the next generation, especially those of us who, like him, didn't fit comfortably into the Soviet machine."

# US temples to hold prayers for Sunita, Wilmore

**KUMAR CHELLAPPAN ■ KOCHI**

Coming 2nd March, all Hindu temples across USA would reverberate with Mrityunjaya Mantra, S h i v a s h t a k a m, Mukundastakam etc rendered by the followers of Sanatana Dharma. Their mission is to ensure the safe and speedy return of the two US astronauts Butch Wilmore and Sunita Williams who have been stranded in the International Space Station since June 2024 due to technical hitch of the Boeing Starliner Commercial Space Vehicle, which took them to the space, both the astronauts are held up in the ISS since then and waiting for the replacement vehicle to be flown to the space craft to bring them back to earth. The stranded period saw the astronauts setting up many records in their space mission. Sunita Williams is all set to join the top league of 12 elite astronauts who have spent maximum time in space missions. The duo is expected to fly back to earth in March 2025 though they were expected to return to NASA after an eight day space sojourn in February 2024. "These two astronauts are

showing the world that one can overcome obstacles and adversities. Their individual faith/dharma plays an important role in keeping them strong. We are inspired by Sunita Williams' strong belief how it is helping her overcome obstacles that came her way in the duration of this ordeal," said Tejal Shah, a lead figure in organising the mass prayer meet. She said in a release that the event is being held to show the strong support as all compatriots, US Hindus are standing by our astronauts. "Hindu Temples across USA have decided to organise a collective prayer for their safe return. Our faith will certainly add positive energy and vibes to bring desired conclusion to the mission they are on," said Shah.

# Cong leaders suspended from Chhattisgarh assembly

**PTI ■ RAIPUR**

Congress legislators were suspended briefly from the Chhattisgarh legislative assembly on Friday after they raised slogans accusing the BJP-led state government of intimidating the Opposition using Central agencies. The proceedings of the House were first adjourned for 10 minutes, following which the Congress MLAs trooped into the well and raised slogans against the government. Congress legislators disrupted the Question Hour and alleged that Central agencies are being misused

to intimidate the Opposition. This led to an uproar in the House, and Speaker Raman Singh had to adjourn the proceedings for 10 minutes. Once the proceedings resumed, the opposition party MLAs continued raising the issue and entered the well of the House, sloganeering against the government and were suspended as per the assembly rules. Congress members walked out of the House after the Speaker announced their suspension, and they boycotted the proceedings for the day. The Speaker later revoked

their suspension. Talking to reporters on the assembly premises, Leader of Opposition Charan Das Mahant accused the BJP of murdering democracy. He claimed Central agencies were conducting a recon of the state Congress president, Deepak Baij. The BJP is trying to intimidate elected zilla panchayat and janpad panchayat members of the Congress (to allegedly influence the election of presidents of these bodies), Mahant said. "We raised the issue in the assembly. We have boycotted the assembly proceedings for the day," he said.

# Pune rape accused arrested

**TN RAGHUNATHA ■ MUMBAI**

After 45-hour-long extensive manhunt that involved use of drones and sniffer dogs, the Pune police on early Friday finally arrested 37-year-old man who allegedly raped a 26-year-old woman inside an empty bus parked at the State Transport (ST) depot at Swargate in Pune. Having learnt that he was hiding in a paddy field native village of Gunat in Shirur taluka of Pune district, the police used drones and sniffer dogs to track down the accused, Dattaray Ramdas Gade. Late on Thursday night, the accused - who was very feeling both hungry and thirsty -- stepped out of the paddy fields and headed to the home of a family member living in the village for food. However, the villagers alerted the police that he was spotted in the village. After that he had gone back to the paddy field to hide. During the search that continued in the paddy fields, the police arrested Gade from the same paddy field at 2 am. They later took him to Pune where he was subjected to medical tests. A high drama preceded Gade's arrest, when the police mistakenly arrested his brother, who is a look-alike of the accused. However, within 15 minutes, the investigators realised that they had arrested a wrong

Police guard at the Swargate Bus Stand after the alleged rape of a 26-year-old woman inside a Maharashtra State Road Transport Corporation in Pune PTI

man. Within the next couple of hours, the police landed the right accused from the nearby paddy field. It may be recalled that in the early hours of Wednesday, the accused — who had led the victim woman inside an empty bus on the false pretext that the bus she wanted to take had on another platform of the sprawling bus depot - fled the scene, after perpetrating sexual assault on her. The incident took place at around 5.30 am on Wednesday at the Swargate bus complex - which houses two bus depots run by the Maharashtra State Road Transport Corporation (MSRTC) and Pune

Mahanagar Parivahan Mahamandal Ltd (PMPML). The victim woman was waiting for a Paithan-bound bus at one of the platforms when the accused approached her and told her the bus had arrived at another platform. The woman trusted him and accompanied him to an empty bus parked at a deserted spot on the Swargate bus depot premises. According to the complaint lodged by the victim woman with the police, it was still dark when she boarded the bus. The accused quietly forced her inside the bus, followed himself on her and raped her. He fled the scene immediately afterwards.

# Sensex in a tailspin

**From page 1**

In India's case, quality managements will always command a premium eventually, as we still grapple with worries on the corporate governance, especially at the end of a bull run that we saw peak in September. So very simply, don't panic, especially if you can wait for the market to turn. Even as we write this, the second advance estimates for GIP growth indicate that the economy grew 6.2 per cent in Q3, and is on course for 6.5 per cent for the full year, After slipping to 5.4 per cent

growth in the second quarter ending in September 2024. This is a time to stick to your high conviction stocks. Quality managements and a strong record have always found backers willing to pay a premium in India. For the rest of you, if the year delivered great profits till September for you, it might be time for some loss harvesting before the financial year closes. And yes, there is every chance that this action, multiplied millions of times over by many investors, will ensure there is no immediate respite in this financial year from falling markets. But in the

new financial year starting April 2025, there is much to look forward to in terms of positive cues, including steps from the government to restore confidence. 'Capitulating' and selling everything at a loss at these lows with vows to never return will not be a good idea unless you really believe a low stock price will actually hurt the prospects of the firm behind it as well. If not, hold tight, the ride might be bumpy, but you can still reach the finish line happy.

— The writer is Market analyst and Group Editor, SaurEnergy.com

# A home preserved to keep identity alive

**From page 1**

"Coming from a family deeply tied to agriculture and local traditions, this project is especially meaningful to me. It's not just about preserving history but about keeping our cultural identity alive for future generations," she claimed. Restoring and maintaining a 200-year-old structure, while keeping it authentic, was not easy, she noted. Preserving artefacts, convincing community elders of the importance of

showcasing their heritage, and attracting tourists and researchers to sustain the museum in the long run are the hurdles, Chomu said. "So far, there has been no financial support from the state government for this project. I hope that in the future, the government will recognise the importance of this heritage and provide assistance for its upkeep and expansion," she said. The initial funding and support came from WWF India, but beyond that, she has been managing the museum

through personal efforts. "Since this museum is still a work in progress, there's a lot more to be done, and I am continuously working on ways to improve and sustain it," she said. Chomu envisions transforming the museum into a cultural hub where visitors can actively engage with Monpa heritage rather than just observe it. She plans to introduce storytelling sessions with community elders to share oral traditions, a small library featuring Monpa history and

folklore, and eco-tourism initiatives such as a rest area near the museum where visitors can relax and experience traditional Monpa hospitality. She also hopes to collaborate with local artisans and researchers to document and promote indigenous craftsmanship and traditions. Additionally, she aims to create employment opportunities for local women by involving them in museum activities such as handicrafts, storytelling, and hospitality services.

# 41 trapped in Uttarakhand avalanche

**From page 1**

Mana, three kilometres from Badrinath, is the last village on the India-Tibet border at a height of 3,200 metres. Defence Minister Rajnath Singh said all efforts were being taken to rescue the trapped personnel by utilising all available resources. Home Minister Amit Shah spoke to Uttarakhand Chief Minister Pushkar Singh Dhama and took stock of the trapped people under an avalanche, saying the government's priority is to safely evacuate all those who are out of reach. According to the district magistrate, the 57 labourers were at the camp when the avalanche struck between Mana and Mana pass in the

morning. Teams of the National Disaster Response Force (NDRF) and SDRF left for the spot, about 300 km from the state capital Dehradun, amid continuing snowfall and rain. "Out of the 57 BRO labourers trapped in the avalanche, 16 have been rescued. Efforts are on to rescue the rest. The help of ITBP and other departments is being taken in the rescue operations. Our disaster management department and the entire administration is fully alert," Dhama informed the media. Officials had been on alert for bad weather and its possible impact. The Defence Geoinformatics Research Establishment (DGRE) in Chandigarh had issued an avalanche warning for a

period of 24 hours at five pm on Thursday for places located above 2,400 metres in Chamoli, Uttarkashi, Rudrapurayag, Pithoragarh and Bageshwar districts. The MeT office in Dehradun also predicted isolated heavy rain and snowfall in locations situated at 3,500 metres and above in these districts on Friday morning. In New Delhi, NDRF said it is rushing four teams to Chamoli. Chief of NDRF Piyush Anand said apart from these teams, another four units have been kept on standby. Rains pounded Jammu and Himachal Pradesh for the third day on Friday, prompting authorities to close schools in several districts. The mercury

dropped in most parts of Punjab and Haryana due to the rain. The strategic 270-km Jammu-Srinagar national highway, which was closed around 7 pm on Thursday, also remained closed due to snow accumulation between Ramsoo and Qazigund, and shooting stones, landslides and mudslides at various places between Nashri and Banihal. Overnight snowfall affected rail, air and road connectivity in Kashmir, according to officials. The Jammu and Kashmir government on Friday extended the winter vacations for schools in the Valley and winter zone areas of the Jammu division by six days in view of the weather conditions.

# Chess colossus, Boris Spassky dies at 88

**From page 1**

Spassky emigrated to France in 1976. On its website, the chess federation called Spassky's match with Fischer "one of the most iconic" in the history of the game. Yugoslav grandmaster Svetozar Gligoric said that Spassky's secret strength "lay in his colossal skill in adapting himself to the different styles of his opponents," the Washington Post reported. The chess federation called Spassky "the first genuinely universal player" who "was not an opening specialist, but he excelled in complex and dynamic

positions where he was in his element." At the time of their famous match, the Soviet Union had compiled an unbroken streak of world chess championships that stretched back decades. After his loss, Spassky went home to a cold reception in the Soviet Union, where he had become a national disappointment, the Post said. He said he was not allowed to leave the country, and his marriage, his second, fell apart. "I feel at home at the chessboard," he was quoted as saying in a recollection of the Reykjavik match published by the World Chess Hall of Fame in 2022, the Post said.

# Delhi Speaker, Atishi engage in letter war

**From page 1**

Responding to AAP's allegations, Speaker Gupta said in the Assembly, "LoP Atishi has written a letter to me and is continuously misleading people. I want to make it clear that the dignity of the House has to be maintained, especially during LG's address. According to the definition of the Delhi Assembly as per rule 277 of the rule book, the whole premises of the building are included. "According to the rule when a member is suspended from the House then that means barred from the whole premises. In the future too, if there will be any misconduct then the same kind of action will be taken," he said. On February 25, 21 AAP MLAs including Atishi were suspended for three days for allegedly disrupting Lieutenant Governor V K Saxena's inaugural address. The AAP members had raised slogans protesting the alleged removal of portraits of B R Ambedkar and Bhagat

Singh from the chief minister's office in the Assembly. The Speaker ordered their suspension through a majority vote and had them marshalled out of the House. Meanwhile, chaos continued outside the Delhi Assembly on Friday. Earlier in the day, AAP MLAs reached outside the Delhi Assembly premises at around 2 pm when the assembly proceedings began. The police stopped everyone by putting up barricades. When Atishi asked why they were being stopped, the police said that they were not even allowed to enter the premises. The former Delhi chief minister has called the incident deliberate targeting of opposition leaders. Atishi expressed concern over the events in the Delhi Assembly, where she claimed that opposition MLAs faced discriminatory treatment for their protests. Atishi also wrote to Secretary Droupadi Murmu, seeking an appointment to discuss what she described as the "murder of democracy" in Delhi.

# Bureaucrat back at SEBI, after stormy Buch era

**From page 1**

As the Secretary in the Department of Investment and Public Asset Management, he oversaw the sale of loss-making national carrier Air India to the Tata Group in October 2021. He also oversaw the listing of India's biggest insurance company LIC in May 2022. Although, Buch in her three-year tenure made significant strides in areas like faster settlements in equities, enhanced FPI disclosures and increasing mutual fund penetration through Rs 250 SIP, the last year of her tenure was marked by heightened controversy, when she battled a series of allegations by Hindenburg Research and the Congress party, while simultaneously dealing with in-house employee protests against alleged "toxic work culture". Against this backdrop, the government opted for a seasoned bureaucrat Pandey,

who had extensive experience in handling government's disinvestment and privatisation programmes, to head the regulatory body. Soft spoken Pandey is known for sticking to the rule book and getting the work done. It was under his tenure as DIPAM secretary, that Air India was privatised after many unsuccessful attempts in the past. Pandey will take over as the head of the SEBI at a time when markets are witnessing bear pressure following a streak of capital withdrawal by foreign institutional investors (FIIs). Foreign portfolio investors (FPIs) have withdrawn more than Rs 1 lakh crore since January. Pandey was the longest-serving secretary in the Department of Investment and Public Asset Management (DIPAM), a department in the finance ministry that manages government equity in public sector companies, as well as the Department of Public

Enterprises (DPE). He assumed the charge of the revenue department on January 9, after his predecessor Sanjay Malhotra moved to the Reserve Bank of India (RBI) as its governor. Pandey played a key role in the framing of the 2025-26 Budget, which gave tax reliefs totalling Rs 1 lakh crore to the middle class. He was also involved in the drafting of the new Income Tax Bill, which seeks to replace the 64-year-old Income Tax Act, 1961. In his over-five-year stint (October 24, 2019 to January 8, 2025) at the DIPAM, Pandey took forward disinvestments of Central Public Sector Enterprises (CPSEs) as he implemented the public sector enterprises (PSE) policy, which intended to minimise the presence of the government in the PSEs across all sectors of the economy. Besides Rs 18,000-crore privatisation of Air India, Pandey also oversaw the

privatisation plans of the IDBI Bank. The bidders are currently undergoing the due-diligence process. Pandey holds an MA in economics from the Panjab University, Chandigarh and an MBA from the University of Birmingham (UK). He has worked in various capacities in the government of Odisha and the Union government. In the early part of his career, Pandey served as the administrative head in the departments of health, general administration, commercial taxes, transport and finance. He also served as the executive director of the Odisha State Finance Corporation and managing director of the Odisha Small Industries Corporation. At the Centre, his previous positions include Joint Secretary, Planning Commission (now NITI Aayog), Joint Secretary, Cabinet Secretariat and Deputy Secretary in the Ministry of Commerce.

# HM directs Delhi Govt, Police to act tough on Bangladeshis

**From page 1**

Besides the top brass of Delhi Police including Commissioner Sanjay Arora, Home Minister Ashish Sood and other senior officials of the Union Ministry of Home Affairs (MHA) and Delhi government, who are responsible for law and order and coordination. Sources said the meeting came a day after Union Home Secretary Govind Mohan and Delhi Chief Secretary Dharmendra reviewed steps to transform the Yamuna's ghats along the line of the Sabarmati river front in Gujarat. Several issues related to policing and the law and order situation in Delhi - from women's safety to tackling traffic congestion - came up for discussion during

the meeting. During the meeting, Amit Shah directed strict action against networks facilitating the entry of Bangladeshi and Rohingya immigrants into the country, assisting them in obtaining documents and enabling their stay. "The issue of illegal intruders is also related to national security and it should be dealt with strictly, and they should be identified and deported," Shah stated. The Home Minister said it should be the Delhi Police's priority to eliminate interstate gangs in the city ruthlessly. Action must be taken with "top to bottom and bottom to top approach" in narcotics cases, and such drug networks should be dismantled, he said. Referring to the BJP winning the Delhi assembly polls this time after a gap of over 26 years, the Union home minister asserted that the double-engine government in Delhi will work with double speed for a developed and safe capital as expected by Prime Minister Narendra Modi. Shah also emphasised the

need for a 'Monsoon Action Plan' to address water-logging issues in the capital, instructing the Delhi Government to identify affected areas and take preventive measures. Further, he directed authorities to take strong action against underperforming police stations and sub-divisions. "Strict action should be taken against Delhi's police stations, sub-divisions which consistently perform poorly," he said. "The Delhi Police should start the recruitment process for additional posts soon. DCP-level officers should visit police stations, organise public hearing camps and solve their problems," he said. The Union home minister said new security committees

should be formed in JJ clusters for the safety of women and children there. Officials privy to the deliberations at the meeting said, the Home Minister asserted that the double engine government of Delhi "will work with double speed for a developed and safe Delhi" in line with the expectations of Prime Minister Narendra Modi. "...Whenever the Government of India sought details on small issues that were causing big problems to Delhi, the then (AAP) government of Delhi never cooperated on it... Detailed discussions were held on where and what things need to be fixed... Primary discussions were held in Delhi from the point of view of women's safety, and soon, work will be done on

making policies on this... Solutions to issues related to PWD were discussed, and national security and international gangs, which are a problem for the security system of Delhi, there was also an in-depth discussion on that...," Delhi Chief Minister Rekha Gupta said after the meeting. Delhi's Home Department's minister Ashish Sood said, several key issues were discussed, including jail reforms, prosecution procedures and improvements in collector offices. He said that one of the main concerns raised during the meeting was "the safety of women, with officials focusing on identifying dark spots and enhancing CCTV coordination to prevent crime in the capital."

# CAG audit reveals grim state of Delhi's healthcare system

STAFF REPORTER ■ NEW DELHI

Days after releasing the Comptroller and Auditor General's (CAG) report on loss due to faulty excise policy, an audit report of the CAG on "Public Health Infrastructure and Management of Health Services," on Delhi's hospitals and Mohalla clinics, on Friday tabled in the Delhi Assembly, has painted a grim picture, crumbling the city's healthcare system.

The CAG report highlights mismanagement, shortage of equipment and healthcare staff in the hospitals of the national capital. The reports also points out poor condition of Mohalla Clinic, one of the most touted healthcare scheme by the previous Aam Aadmi Party (AAP) government in Delhi.

This is the second CAG report which has been tabled in the House, details six years of findings on the Delhi health infrastructure and pointed out that there was a critical shortage of medicines, equipment and staff

affecting the affordability and efficiency of the health services. A report on the Delhi liquor policy was tabled in the assembly last Tuesday. At least reports on the previous AAP government's performance are to be tabled by the Rekha Gupta-led BJP dispensation.

Patients at the Lok Nayak Hospital have had to wait two-three months for general surgeries and six-eight months for burn and plastic surgeries. Chacha Nehru Bal Chikitsalaya Hospital also has a 12-month-long waiting period for pediatric surgeries.

"There was high workload in registration counters in test checked hospitals namely Lok Nayak Hospital, Rajiv Gandhi Super Speciality Hospital, Janakpuri Super Speciality Hospital and Chacha Nehru Bal Chikitsalaya. The average consultation time per patient was less than five minutes in Medicine Department and Gynaecology Department of Lok Nayak Hospital (LNH). Due to shortage of pharmacists, patient load per pharmacist or

Delhi Health Minister Pankaj Kumar Singh with CAG report on the Aam Aadmi Mohalla clinics Ranjan Dimri

counter in LNH was high and medicines were not distributed on the same day. Shortage of essential medicines and equipment was also observed in ICU/ emergency departments of two test checked hospitals (LNH and RGSSH). Waiting time for major surgeries in the Surgery Department and Burn and Plastic Surgery Departments of LNH was two-

three months and six-eight months respectively and at the same time, six out of 12 modular OTs in RGSSH and all the seven modular OTs in JSSH were found lying idle due to shortage of manpower. Many Ambulances of Centralised Accident and Trauma Services (CATS) were running without essential equipment and devices," the CAG report said. The report claimed that out of 27 hospitals in Delhi, 14 lacked ICU facilities, 16 did not have blood banks, eight did not have oxygen supply, 12 did not have ambulance services and a staggering 15 hospitals were operating without a mortuary. On the other hand, at the Rajiv Gandhi and Janakpuri Super Speciality Hospitals infrastructure such as operation theatres, ICU beds and trauma centres have gone unused due to lack of a specialised staff, the report added. The report further stated that Essential Drugs List (EDL), the list of drugs that should be available at all times in Hospitals and other health facilities, was not prepared

annually and was prepared only thrice during the last 10 years. According to report, Central Procurement Agency (CPA) which was entrusted with the duties of procurement of drugs and equipment for GNCTD hospitals was not functioning optimally as hospitals had to procure 33 to 47 per cent of essential drugs from local chemists for meeting their day-to-day requirements during 2016-17 to 2021-22. Out of 86 tenders floated for procurement of equipment by CPA, only 24 (28 per cent) were finally awarded. Audit also noticed procurement of medicines from black-listed and debarred firms by CPA. There was also short supply or shortage of injections for rare and fatal diseases like Haemophilia and Rabies. "Against the proposed addition of 10,000 beds (Budget speech 2016-17) only 1,357 beds were added during 2016-17 to 2020-21. The Department was unable to utilise any of the 15 plots

acquired (June 2007 and December 2015) at a cost of Rs 648.05 Lakh for establishing hospitals and dispensaries, despite having possession for periods ranging between six to 15 years. Out of the eight new hospitals under construction during the audit period, only three were completed. There were delays up to six years in completion of hospital projects," the report said. The report said Delhi government had spent 12.51 per cent of its total expenditure and 0.79 per cent of GSDP on health services during 2021-22 which was more than eight per cent of budget and way below 2.5 per cent of GSDP targeted under National Health Policy 2017. The report stated that a review of 74 Mohalla Clinics found none had the full stock of all 165 essential medicines. The CAG report also highlighted the lack of essential equipment such as pulse oximeters, glucometers, X-ray viewers, thermometers and blood pressure monitors at these facilities.

## CM promises to deliver on BJP manifesto

STAFF REPORTER ■ NEW DELHI

Delhi Chief Minister Rekha Gupta assured the people of the Capital on Friday that her government would fulfil all the promises made in the Bharatiya Janata Party's (BJP) manifesto, despite what she described as financial mismanagement by the previous Aam Aadmi Party (AAP) government.

Speaking in the Assembly during a discussion on the motion of thanks on the lieutenant governor's inaugural address in the House, Gupta took a dig at the AAP, calling it a "dharna party" that continues to protest even after being voted out of power. "Atishi and other AAP MLAs were holding up banners even before we took the oath, asking when will we give Rs 2,500 each to women. They dare to question us when they themselves failed to fulfil the same promise in Punjab. They are a dharna party - when in power, they sat on protests, now they are in the opposition and they are still doing the same," the chief minister said. She also hit out at the AAP for staging protests over the alleged removal of B R Ambedkar's and Bhagat Singh's portraits from the Chief Minister's Office. "They just wanted an excuse to leave the House because they could not face the CAG reports tabled

Rekha Gupta attends the first session of Delhi Assembly Ranjan Dimri

here," she said. On the second CAG report tabled in the House by her, Gupta said, "Fulfilling a promise made to the people of Delhi, the second CAG audit report on the management of public health infrastructure and health services was presented before the House. This report has not only exposed the reality of the (previous) Arvind Kejriwal government, but also exposed those who played with the health of the people of Delhi." She further asked what did the AAP do during its 10-year rule in the capital other than its leaders holding press conferences, giving sound bites and posting

messages on social media. Taking a swipe at AAP supremo Kejriwal over his party's campaign slogan, "Bhai ho toh aisa, Kejriwal jaisa", Gupta said, "He is the only brother who provided free liquor bottles in a buy one, get one offer." She reiterated that the newly-formed BJP government would work with full commitment to honour all the promises made to the people of Delhi in the run-up to the Assembly polls. "We will not rest until we deliver everything we have promised in our Sankalp Patra. Despite the empty coffers left by the AAP, we will ensure that Delhi gets the governance it deserves," Gupta

said. PWD Minister Parvesh Sahib Singh also spoke in the Assembly on the motion of thanks, voicing support to the LG's speech and pledging to accelerate Delhi's development. He asserted that the city's progress would no longer be limited to advertisements but would be visible on its streets. Singh said the government would launch a probe into the fake ration card racket and take action against illegal immigrants. "If any Bangladeshi or Rohingya is found holding a ration card, it will be immediately cancelled and legal action will be taken," he said. "For years, a political conspiracy was at play to settle illegal infiltrators in Delhi but that will end now. We will make Delhi safer. Only genuine beneficiaries will receive ration, not illegal immigrants," he added. Singh said Delhi's problems are not just local but national in nature as it houses institutions like Parliament, the Rashtrapati Bhavan and the Supreme Court. "We will transform Delhi as one of the world's most beautiful and developed capitals," he said. The BJP stormed to power in Delhi after a gap of more than 26 years, winning 48 of the 70 seats in the Assembly polls held in February, while the AAP was reduced to 22 seats.

## MCD clarifies no property tax exemptions granted

STAFF REPORTER ■ NEW DELHI

The Municipal Corporation of Delhi (MCD) on Friday clarified that no exemption has been granted for paying property tax. The civic body said it wishes to clarify recent misinformation circulating across various media platforms regarding the exemption of property tax. All property owners and occupiers are required to pay property tax as per existing laws, and no exemption has been granted, contrary to certain media reports and social media discussions based on house proceedings. MCD has received multiple inquiries from the public regarding whether they are still obligated to pay property tax. MCD reaffirms that property tax remains payable by all occupiers or owners, and no changes have been made to its applicability. Property tax is a major source of revenue for MCD, contributing one-fourth of its total earnings. As part of its annual budgetary process,

MCD determines the levy of taxes and duties each year. The tax structure for fiscal year 2024-25 was finalised in February 2024 when the budget was passed. Similarly, in its meeting on February 13, 2025, MCD decided on taxes and duties for fiscal year 2025-26. MCD is facing financial challenges, with over ₹14,000 Crore in outstanding dues, including pending payments for municipal employees' salaries, retirement benefits, and contractor dues. Without financial stability and accountability, MCD will struggle to maintain essential civic services, such as: sanitation and cleanliness, maintenance of streets, roads, and drainage systems. Given these financial constraints, there is neither a legal nor financial basis to waive property tax payments. MCD urges all property owners or occupiers to file their property tax returns on self-assessment basis on or before March 31, 2025 and ensure payment of their property tax for the current Financial Year without further delay to avoid penal action.

## Court sentences man to death for 2019 rape, murder of minor

STAFF REPORTER ■ NEW DELHI

A court sentenced a man to death on Friday for a rape and murder case of a minor in 2019 saying he was a "menace to the society" and held offence fell in the "rarest of rare" category. Additional sessions judge Babita Puniya also sentenced the man's father Ram Saran to life term imprisonment for participating in the "gruesome murder of an innocent defenceless child to wipe out the evidence of rape committed by his son and convict Rajender". The court said Rajender had "no probability of his reformation" and deserved to be "removed from the society". He was sentenced under the provisions of POCSO Act and IPC. Law prescribes confirmation of death penalties by high courts. Rajender and his father were convicted on February 24 in the case. The minor girl went missing on February 9, 2019 and her body was found dumped two days later in a park with her limbs tied with a plastic rope. "The nature of the crime and society's interest in protecting

vulnerable children from horrendous experiences warrant a severe sentence. In addition to the victim's age and her helplessness, I am particularly cognisant of the fact that the convict Rajender has preyed upon innocent and vulnerable girls to quench his sexual appetite," the verdict said. The court referred to the criminal record of the convict and said he had kidnapped a minor girl previously too. The convict was observed to have "committed penetrative sexual assault" and obtaining bail by pretending to be a juvenile. While on bail, he made the victim "object of his lust and brutally murdered her" with the help of his father, the court added. By granting bail in the first sexual offence, he was given a chance by the court of law to reform himself, the judge said. "However, instead of taking advantage of that opportunity to reform himself and become a good citizen of the country, he committed an even more heinous crime that is he committed anus - penile, vagina-penile penetration and then along with his father, he brutally murdered the innocent child," the judgment added.

## Delhi police arrests two in burglary case using FRS technology

STAFF REPORTER ■ NEW DELHI

Delhi Police has solved a burglary case with the help of the facial recognition system (FRS) technology and arrested two men. Police said that stolen cash amounting to Rs 5.87 lakh along with diamonds and pearls broken from the stolen jewellery has been recovered. A PCR call was received on February 16 reporting a burglary at a house in Mukherjee Nagar in Northwest Delhi, police said. The complainant, Naveen Kumar Chopra, informed that his house had been broken into and gold items were stolen. Following his complaint an FIR was registered and investigation was launched, they said.

A police team analysed CCTV footage and obtained a clear image of the suspect. Using FRS technology, the suspect was identified as Imran (28) from Timarpur, who is a habitual offender with a previous involvement in theft, officials said. The team conducted a raid at the accused's house in his native village, leading to his arrest. During interrogation, he confessed to the crime and revealed that he had sold the stolen jewellery to a goldsmith, Sachin Verma (36), they added. Following Imran's disclosure, the police recovered Rs 5.87 lakh in cash and some stolen articles including diamonds and pearls, Deputy Commissioner of Police (Northwest) Bhisam Singh said.

## Delhi fire deaths drop by 74 per cent

STAFF REPORTER ■ NEW DELHI

Delhi Fire Services (DFS) data showed that fire related deaths in Delhi dropped by 74 per cent this year, with eight fatalities reported till February 24, compared to 31 in the same period last year. According to the data, six people died due to fire in January and two died till February 24, marking a significant decline from last year. A total of 15 people died in January last year and 16 people died till February 24. Moreover, 51 people were saved or injured in fire incidents in January last year while 38 were saved or injured in fire this year in the same month. Till February 24, the data reveals that 34 people were saved or injured in fire incidents last year while 42 were saved or injured in fire incidents this year. While the total fire calls received

by the DFS in January shows a decline this year with a total of 1,204 received last year to 938 received this year, the data for the next month for the first 24 days reveals that 834 fire-related calls were received last year as compared to 932 this year. The total calls received by the DFS also show a decline this year in January. While 2,502 calls were made to the fire department last year, the number was 2,183 this year. However, the data reveals an increase for February when 1,766 calls were received last year as compared to 1,811 received this year for the first 24 days. The fire department saved 182 people in January and 209 in the next month till February 24 last year while it rescued 176 in the first month and 137 in the second in the corresponding period this year, an officer said.

## SC halts construction at Mehrauli archaeological park religious sites

STAFF REPORTER ■ NEW DELHI

The Supreme Court (SC) on Friday stayed any new construction or renovation at the centuries-old religious structures inside the Mehrauli archaeological park in the Capital, including the 13th Century Ashiq Allah Dargah and Chillagah of Baba Farid, the revered Sufi saint. A bench comprising Chief Justice Sanjay Khanna and Justice Sanjay Kumar was hearing a plea filed by one Zameer Ahmed Jumrana seeking protection of the religious structures inside the archaeological park from demolition. Senior advocate Nidhesh Gupta referred to the Archeological Survey of India's (ASI) status report and said a historical monument found there was built around 700 years ago. The CJ said, "people keep

encroaching and putting up shops to earn money" while asking the ASI to prepare a site plan to ensure no further encroachment. Additional solicitor general K M Nataraj said, "Let us find out which are built newly and which are old." A lawyer said these monuments were not declared protected ones and, therefore, there was no problem if they were renovated. The bench said for the renovation, permission under the existing laws would be needed. "The ASI has submitted an interim status report. The original structure as it existed has to be ascertained and verified. List on April 28. The ASI will have to submit further status reports and the parties can file their objections or submissions. There shall not be any construction at the existing site," it said. The ASI previously said two

structures inside the archaeological park bore religious significance as Muslim devotees paid daily visits to the Ashiq Allah Dargah and Chillagah of Sufi saint Baba Farid. An inscription, the ASI said, on the tomb of Shaikh Shahibuddin (Ashiq Allah) says it was constructed in the year 1317 AD. "The structural modifications and alterations for the sake of restoration and conservation have impacted the historicity of the place," it added. The ASI submitted the tomb was close to the citadel of Prithviraj Chauhan and fell within the regulated zone of 200 metre according to the Ancient Monuments and Archaeological Sites and Remains Act. Any repair, renovation or construction work required a prior permission of the competent authority, it added. "Both structures are frequently

visited. Devotees light lamps at the Ashiq Dargah for fulfilment of wishes. They visit Chillagah to get rid of evil spirits and bad omen. The place is also associated with the religious sentiment and faith of a particular religious community," the ASI report said. Jumrana, in his plea, said the Delhi Development Authority (DDA) had planned the demolition of the structures in the name of removing encroachments without assessing their historical significance. He has moved the top court against a February 8 Delhi High Court order which said Delhi Lieutenant Governor Vinai Kumar Saxena-led religious committee could consider the matter. Jumrana contended the committee was not an appropriate forum to decide the antiquity of a structure.

# DDA's annual flower festival 'Palaash' kicks off in Capital

STAFF REPORTER ■ NEW DELHI

After the successful phase one of Delhi Development Authority's (DDA) annual flower festival 'Palaash', the second phase of the grand event commenced on Friday at Smriti Van at Mayur Vihar Phase III in the national capital. The annual festival is celebrated to welcome the onset of spring and bring people of Delhi closer to the nature. Delhi Lieutenant Governor Vinai Kumar Saxena visited 'Palaash' and appreciated the hard work of team DDA in organising the festival. He facilitated the winners of various competitions and urged them to continue working for the beautification of the national capital. "The government is working relentlessly for the sustainable

DDA's annual flower festival 'Palaash' commenced on Friday at Smriti Van at Mayur Vihar Phase III

development of the national capital. I assure the people of Delhi that many such projects will be undertaken in the future to work towards Green Delhi," he said. The flower festival is celebrated

each year since 2023. However, this year for the first time, it is being celebrated at two locations. The first phase of the 'Palaash' festival was celebrated at Dwarka on

February 22 and 23 while the second phase to be organised on February 28, March 1 and 2. The theme of 'Palaash 2025' is "pollution free, healthy living" and is named 'Palaash'

Pioneer Photo

after the flower of butea monosperma, which blooms in the capital during this time. Over 50,000 people are expected to visit 'Palaash' in the two phases.

The three-day event of the second phase will have plethora of activities, which include nature walks, cultural programme, terracotta pot decoration competition, headgear design competition,

flower rangoli competition, among others. Besides, many competitions have been made open to public which include flowering pot plants, foliage pot plant, vegetable pot plant, garden in

containers, flower arrangement for interior decor. This provides platform for nature enthusiasts to showcase their creativity and horticultural skills. Besides, there are all day activities, which include food stalls, pottery, swings and rides. Smriti Van was created on the theme of "Plant a tree in the memory of loved ones" and thereby creating a green area with dense tree cover. Smriti Van, Kondli Gharoli, Mayur Vihar phase three is one of the largest green area of East Delhi spread over an area of approx 58 acres. The park is lush green with a number public amenities like open gym, children play area, shelter, toilet, multi-purpose play field etc. A large water body covering approximately 10 acres is spread in the green.

# India-EU agree to conclude FTA by year end

**PIONEER NEWS SERVICE ■**  
NEW DELHI

Prime Minister Narendra Modi and European Commission President Ursula von der Leyen on Friday agreed to conclude an ambitious India-EU free trade deal by this year amid fears that the Trump administration's threat of higher tariffs could adversely impact the global economy. In their talks, both the leaders also decided to expand two-way defence cooperation, especially in the Indo-Pacific with Von der Leyen announcing that the European Union (EU) was looking at firming up a security and defence pact with India in line with its partnerships with close allies Japan and South Korea. The deadline for concluding the trade deal that would be the largest of its kind globally came over 17 years after the two sides first began negotiations for it. Negotiations for the pact was re-launched in June 2022 after

they were suspended in 2013 due to a gap in ambition. "Today, we have decided to create a bold and ambitious roadmap for the India-EU partnership for the period beyond 2025. It will be launched during the next India-EU summit," Modi said. India is set to host the summit later this year. The negotiations for the deal were not moving forward ostensibly in view of the EU's persistent demands to New Delhi cut tariffs on cars, wine and agricultural products. The EU Commission president, accompanied by the College of Commissioners or senior political leaders of the bloc's member nations began her two-day India visit on Thursday. It is the first such visit after the European parliamentary elections in June last. In his media statement, Modi indicated resolve by the two sides also to move forward on negotiations for an investment protection pact as well as on geographical

Prime Minister Narendra Modi and President of the European Commission Ursula von der Leyen near a bus powered by hydrogen fuel cell technology at the Hyderabad House in New Delhi on Friday  
Ranjan Dimri

indications as part of broader efforts to boost investments. "We have prepared a blueprint for collaboration in the areas of trade, technology, investment, innovation, green growth, security, skilling and mobility," he said. "We have directed our teams to conclude a mutually beneficial bilateral free trade agreement by the end of this year," he said. Echoing Modi, Von der Leyen said, "We have tasked our teams to build on this momentum and finalise our free trade agreement before the end of this year." "We are expecting a lot of our trade negotiators, we told them they should surprise us," she said.

The Prime Minister described the growing India-EU cooperation on defence and security as a symbol of "mutual trust" and that both sides will take forward the engagement in areas of cyber security, maritime security and counter-terrorism. "Both sides agree on the importance of peace, security, stability and prosperity in the Indo-Pacific region," he said, welcoming the EU's decision to join the India-backed Indo Pacific Oceans Initiative. "We will work together on triangular development projects for sustainable and inclusive development in the Indo-Pacific region and Africa," Modi said. Von der Leyen said now is the time to step up India-EU security and defence cooperation on land, sea and in space. She called the Indian Ocean as a "lifeline for global trade" and said ensuring its security is vital, not just for India but for the whole world. The remarks came amid China's increasing

forays into the region. "We should also explore expanding our joint naval exercises, building on our very successful operations in the Gulf of Guinea and the Red Sea," the European Commission chief said. Finally, we should deepen cooperation in protecting the cables that ensure data connectivity between India and the European Union, she said. In his remarks, Modi said the India-EU strategic partnership is "natural and organic" and that it is based on "trust" and shared belief in democratic values. "We welcome the new visa cascade regime of the EU. This will provide better mobility to the abilities of India's talented youth," he said. On connectivity, Modi said concrete steps will be taken to take forward the India-Middle East-Europe Economic Corridor (IMEEC). "I firmly believe that IMEEC shall serve as an engine that drives global commerce, sustainable growth and prosperity in the days to come."

# EU exploring security, defence pact with India

**PIONEER NEWS SERVICE ■**  
NEW DELHI

The European Union (EU) is exploring a security and defence pact with India in line with its similar partnerships with close allies Japan and South Korea. The announcement, seen as significant, was made by European Commission president Ursula von der Leyen ahead of her wide-ranging talks with Prime Minister Narendra Modi. In an address at a think-tank, she pitched for taking the EU-India strategic partnership to the next level to effectively deal with various geopolitical headwinds. Security should be a core part of our new strategic partnership with India, Von der Leyen said. "This is why I can announce that we are exploring a future Security and Defence Partnership with India in the mould of the partnerships we have with Japan and South Korea," she said.

"This will help us step up our work to counter common threats whether on cross-border terrorism, maritime security threats, cyber-attacks or the new phenomenon we see: attacks on our critical infrastructure," she said. The president said there is a lot that both India and the EU can build on. "For instance, the recent collaboration on maritime security. And I am delighted at India's interest in joining defence industrial projects under the EU's Permanent Structured Cooperation," she said. Von der Leyen said India is working hard to diversify its military supply and to access new capabilities and that both sides can help each other to deliver on "our security objectives". "For instance, we can join forces where we have technology and expertise, such as on cyber security, space and drones. This is not only about stability in our respective regions," she said.

# Technology to play pivotal role on combat future: CDS

**PIONEER NEWS SERVICE ■**  
NEW DELHI

With warfare increasingly becoming "networked, digitised and intelligent", technology would play a pivotal role in deciding the outcome of combats in the future, Chief of Defence Staff General (CDS) Anil Chauhan said here on Friday. Addressing the Chanakya Dialogues conclude here on the "Bharat 2047: Atmanirbhar In War" theme, he said data-centric warfare includes looking at network security, redundancy, latency in data flow and the use of artificial intelligence as well as storage, collection and analytics of data. Pitching for developing indigenous capabilities for defence manufacturing, IAF chief Air Chief Marshal AP Singh said the Indian Air Force would prefer a "homegrown" system even if it gives "slightly lesser performance." He made this assertion in his address at the Chanakya Dialogues. Referring to the trends in robotics and automation, General Ghouhan told the gathering that it presents a possibility of combat between humans and machines, and among machines in the future. "We all know that warfare is

increasingly becoming digitised, networked and intelligent. So in future, I think technologies like artificial intelligence, data analytics and supercomputing will play a pivotal role in deciding the outcome of combat," Chauhan said. "The Indian armed forces actually want to transit to data-centric warfare or intelligent warfare." Explaining the concept of Theater Commands, the Chief of Defence staff described it as an attempt to separate force generation from force application. "Till now, both these responsibilities were vested with the service headquarters or the service chiefs. He was responsible for recruitment, training, equipment acquisition and maintenance, among others," the CDS said. "So force generation and force application was one responsibility. Now, we are trying to separate that. We are trying to nominate a theatre commander who would be capable of carrying out multi-domain operation, that means in all the three domains, including support from space and cyber," he said. General Chauhan said, "In future wars, one may be able to use data analytics so that decisions taken during combat are better and faster," adding

that with advances in drone technology, the speed of warfare may also be higher. IAF chief said there is a need for manufacturing at least 35-40 military aircraft in India every year and stressed the target is not impossible to meet. He said the IAF's first priority when it comes to acquisition, is "anything that is home grown". "So I'm very convinced in my mind that even if a home grown system gives me a slightly lesser performance... If it is 90 per cent or 85 per cent of what I get in the world market, we will go for home grown system because that is the only way we can get over with always looking outward to get our systems," he said. "But at the same time, a home grown system cannot just happen overnight. It will take time and it needs to be supported. So for that, Indian Air Force is fully committed to any R&D project," he said. He said India needs to develop capability to produce at least 35-40 fighter aircraft every year to meet the requirements of replacing aging fleets. "If some private industry comes in for a make in India, let's say, we add another maybe 12-18 aircraft per year from their side. So we are reaching that number. So that is possible," he said.

# Systems needed to check suicides in IITs, IIMs: SC

**PIONEER NEWS SERVICE ■**  
NEW DELHI

The Supreme Court on Friday said incidents of suicides in IITs and IIMs were "extremely unfortunate" and assured a robust mechanism to check such cases. A bench of Justices Surya Kant and N Kotiswar Singh was informed by senior advocate Indira Jaising that in past 14 months, 18 suicides took place in Indian Institutes Technology (IITs) and Indian Institutes of Management (IIMs). "It is extremely unfortunate what is happening. We will create a robust mechanism to check this situation. We will take this issue to the logical conclusion," said the Bench. Jaising, appearing for the mothers of students Rohith Vemula and Payal Tadv, who allegedly died by suicide after facing caste-based discrimination, said universities and colleges hadn't given entire data on suicides taking place in their campuses despite a court order. While Vemula, a PhD scholar at Hyderabad Central University died on January 17, 2016, Tadv, a student at TN Topiwala National Medical College, died on May 22, 2019, after she was subjected to purported discrimination by three doctors in her college. Solicitor general Tushar Mehta, appearing for the

Centre, said the University Grants Commission (UGC) had formulated draft regulations, which took care of majority of the concern raised by the petitioners, and were uploaded on its website inviting suggestions and objections from the public. Jaising said 40 per cent of the universities and 80 per cent of the colleges had not created equal opportunity cells in their campuses. The bench asked Jaising and other counsel appearing in the matter to give suggestions on the draft regulations and directed the UGC to look into these suggestions. Jaising urged the court to give a hearing before finalisation of the regulations, but Mehta opposed it saying every other person would seek a personal hearing, if allowed. "If they want to give any suggestions, then they can do so through the website but personal hearing cannot be allowed," he submitted. The bench told Jaising it appreciates the cause raised by the petitioner and assured that court would take it to its logical conclusion. The matter was posted after eight weeks. On January 3, the court called it a sensitive issue and offered to devise an effective mechanism to combat caste-based discrimination in educational institutions in the country.

# New financial laws pave way for investment in India: Birla

**PIONEER NEWS SERVICE ■**  
NEW DELHI

Lok Sabha Speaker Om Birla on Friday stressed that the recent initiatives in simplification and transparency in financial laws have provided an enabling environment for investment in India. Today's India with deeper democratic spirit, stable Government and visionary leadership, is a land of immense opportunities for the investors, he noted. The fastest growing economy in the world is a favourite destination for investment across the world, he added. Birla made these remarks in his inaugural address at the two-day symposium on 'Adoption to Changing Landscape: My Viksit Bharat - 2047' organised by the Northern India Regional Council, Institute of Cost Accountants of India (ICAI) at New Delhi. Members of Parliament Faggan Singh Kulaste, Bansuri Swaraj also spoke on the occasion. Referring to legal reforms in India, Birla noted that for the first time in India, an effort has been made to change colonial laws, to repeal the redundant laws and to make new laws which are in sync with the hopes and aspirations of people of New

LS Speaker Om Birla addresses the inaugural session of a two-day symposium on 'Adoption to Changing Landscape: My Viksit Bharat - 2047' Pioneer photo

India. Mentioning about GST, proposed income tax legislation, changes in labour laws and company laws, Lok Sabha Speaker emphasised that these initiatives reflect the vision of the leadership to take the country on the path of progress and prosperity. New laws are not only simple, transparent and progressive but also inclusive to improve the life of the last person in the society, he observed. Progressive laws always take into consideration the changing requirements of the country and the society and the changing international scenario, he added.

Mentioning that India's financial institutions are its strength, Birla noted that our financial institutions command respect all over the world. Hailing the contributions of the ICAI, Birla opined that this institution not only plays an important role in ensuring transparency in financial system but also for guiding the country on mass production with minimum cost. Playing a vital role in strengthening economic potential of the country, the ICAI, with its management skills, is improving the lives of the people.

# SC relief for Isha Foundation in environment norms violations

**PIONEER NEWS SERVICE ■**  
NEW DELHI

In a relief to Isha Foundation, the Supreme Court refused to interfere with a Madras High Court order quashing notices of the TN pollution body over the alleged violation of environmental norms and ordered no against its yoga and meditation centre. A bench of Justices Surya Kant and N Kotiswar Singh upheld the Madras High Court order quashing notices of the Tamil Nadu Pollution Control Board (TNPCB) against Jaggi Vasudev's Isha Foundation over the construction in the foothills of Velliangiri mountains in Coimbatore without prior environmental clearance. While asking for no coercive action against the yoga and meditation centre, it asked for compliance with all the environmental norms and directions of the TNPCB. The top court, however, said its order was not a precedent

File photo

for regularising illegal construction as it ruled in the peculiar facts and circumstances of the case. Tamil Nadu advocate general PS Raman said the government only wanted the order not to be treated as a "permanent gate pass" and shouldn't inhibit any future inspection of the properties and the centre should comply with environmental norms. The bench said there was no immunity or exemption from compliance with environmental norms. The court's concern only

related to the dismantling of the structure. Senior advocate Mukul Rohatgi, appearing for Isha Foundation, said the state authorities should not be allowed to inspect the centre as the same thing would happen. Raman said the town and country planning authorities should be allowed to carry out the inspection so to prevent the construction of any other building in the area for the area was in the vicinity of a protected forest. The bench said a prior nod of the competent authority

would be required in case of expansion of the centre. On February 14, the bench pulled up the state pollution control board for moving after two years against an order that quashed a showcause notice issued against Isha Foundation for allegedly flouting environmental norms. It termed the petition filed by the TNPCB as a "friendly match" played by bureaucrats wanting the apex court's stamp on the petition's dismissal. The showcause was issued to the foundation for constructing buildings between 2006 and 2014 without reportedly obtaining mandatory environmental clearances but the Madras High Court quashed it. On December 14, 2022, holding that the facilities set up by Isha Foundation in Coimbatore would fall under the education category, the high court set aside the TNPCB notice.

# Storage capacity of 155 reservoirs improved compare to last year: CWC

**PIONEER NEWS SERVICE ■**  
NEW DELHI

The total live storage capacity of the 155 reservoirs monitored by the Central Water Commission (CWC) stands at 180,852 Billion Cubic Meters (BCM), which is approximately 70.15 per cent of the total estimated live storage capacity in the country, according to the latest bulletin of the CWC. While the overall storage has improved compared to the same period last year, significant regional disparities highlight the challenges faced by certain states. As of Thursday, the live storage available in these reservoirs is 93,529 BCM, representing 52 per cent of their total capacity. This is a notable improvement compared to the same period last year when the live storage was 78,633 BCM and the normal storage (average of the last ten years) was 81,497 BCM.

The current storage is 119% of last year's storage and 115% of the normal storage. Water stress continues in the northern region that encompasses the states of Himachal Pradesh, Punjab and Rajasthan. The 11 reservoirs in this region have a total live storage capacity of 19,836 BCM, but only 28 per cent of this capacity is currently filled. This is significantly lower than last year's 37 per cent and the normal storage of 40 per cent. Key reservoirs like Pong Dam and Thein Dam are reporting storage levels as low as 40 per cent and 32 per cent of their capacity, respectively. The eastern states, including Assam, Jharkhand, Odisha, West Bengal, Tripura, Nagaland and Bihar, have 25 reservoirs with a total capacity of 20,798 BCM. The current storage is 51 per cent of capacity, slightly lower than last year's 53 per cent and the normal storage of 55 per cent.

Reservoirs like Chandan Dam in Bihar are critically low, with 0% storage, while others like Maithon Dam in Jharkhand are nearly full. The western states of Gujarat, Maharashtra and Goa are faring better, with 50 reservoirs holding 64 per cent of their total capacity of 37,357 BCM. This is higher than last year's 54 per cent and the normal storage of 49 per cent. Major reservoirs like Sardar Sarovar in Gujarat and Jayakwadi in Maharashtra are reporting healthy storage levels. The central states of Uttar Pradesh, Uttarakhand, Madhya Pradesh and Chhattisgarh have 26 reservoirs with a total capacity of 48,227 BCM. The current storage is 54 per cent of capacity, better than last year's 51 per cent and the normal storage of 48 per cent. However, reservoirs like Omkareshwar in Madhya Pradesh are struggling, with only 32 per cent storage.

# Rajnath releases 'Sashakt Bharat' magazine

**PIONEER NEWS SERVICE ■**  
NEW DELHI

Defence Minister Rajnath Singh released the first edition of Ministry of Defence's bi-annual Hindi magazine 'Sashakt Bharat.' The magazine comprises poems on the valour, patriotism and sacrifices of the Armed Forces personnel as well as articles on the policies of the Government written by the personnel of the Ministry, irrespective of their ranks, showcasing inclusivity and unity in diversity. The defence minister appreciated the efforts of the Ministry of Defence wing of the Department of Official Language towards promoting Hindi. The objective of magazine is to highlight the creative talent of the employees of the defence ministry. The e-version of the magazine will be available on the official MoD website (<https://mod.gov.in/>).

# Wonder how Jaipur becomes 'smart' by damaging Jal Mahal lake?: SC

**PIONEER NEWS SERVICE ■**  
NEW DELHI

The Supreme Court on Friday slammed the Nagar Nigam Jaipur Heritage for damaging Jal Mahal lake and contaminating its water by permitting a night market in the vicinity. A bench of Justices Abhay S Oka and Ujjal Bhuyan said due to the negligence and illegal acts of the Nagar

Nigam Jaipur Heitage, Jal Mahal lake was "completely destroyed". "Today, we see municipal commissioner appearing online with a board of smart city behind him. We wonder how will the city of Jaipur become 'smart' by damaging Jal Mahal lake virtually behind repair. We note that an appeal filed by Nagar Nigam Jaipur Heritage challenging November 3, 2023 order of the

of the lake," it said. The court, therefore, directed the Jaipur civic body to appoint National Environmental Engineering Research Institute to give a comprehensive report on immediate measures to stop pollution and restoration and preservation of the lake. The top court was hearing an appeal filed by Nagar Nigam Jaipur Heritage challenging November 3, 2023 order of the

File photo

National Green Tribunal which banned the night

market and other activities near the lake while directing

the civic body to seek permission from the eco-

sensitive zone (ESZ) monitoring committee. The top court noted the municipal corporation headquarter released dirty sewage water into the lake from time to time. It also examined an affidavit of the civic body's chief executive officer in which he referred to a project report by the tourism department and said the project had nothing to do with restoration and preservation of the lake.

The NGT had found the night market was organised within the eco-sensitive zone of Nahargarh Wildlife Sanctuary without obtaining permission as per eco-sensitive zone and without consent of ESZ monitoring committee. The tribunal's order came on a plea filed by RTI activist Rajendra Tiwari against the night market and discharge of untreated water into the water body.

# Bihar Governor addresses joint session of Assembly

PNS ■ PATNA

Bihar Governor Arif Mohammad Khan on Friday asserted that "rule of law" and "sustained development" have been taking place in the state since November 24, 2005, the date on which Nitish Kumar won his first floor test. Khan's customary address to the joint session of the legislature, marking the beginning of the budget session, prominently referenced this date multiple times in his 30-minute speech. "Ever since the formation of a new government on November 24, 2005, the state has been experiencing rule of law and sustained development. The state government has always emphasised development with justice and good governance, which implies growth of all classes in all spheres", the Governor said in his opening remarks. Khan spoke in the midst of slogan-shouting by legislators of the CPI(M) Liberation, who had reached the Vidhan Sabha premises wearing handcuffs and chains, as a mark of protest against the shabby treatment meted out to Indian nationals sent back by the Donald Trump administration in the United

Bihar Governor Arif Mohammad Khan, CM Nitish Kumar pay tribute to President Rajendra Prasad on his death anniversary PTI

States. Highlighting the extent to which things have looked up since "formation of the new government on November 24, 2005", the Governor claimed that "the state was then being manned by just 42,481 police personnel. The number has now reached 1.10 Lakh. Similarly, the number of police stations has risen from 841 to 1,380. The number of teachers has

grown significantly, 3.22 Lakh were recruited till 2022, another 2.17 Lakh in two subsequent phases. The results of the third phase have been declared, which will pave the way for the appointment of another 66,800 candidates". Kumar, the JD(U) president and the longest serving chief minister who will seek a fifth consecutive term in office in the Assembly polls due later

this year, smiled at the repeated mention of the date. Members of the RJD-Congress combine, blamed for the alleged "jungle raj" before Kumar's tenure, were seen whispering among themselves, wondering if they were being indirectly acknowledged given that Kumar has twice allied with them, albeit briefly. However, the CPI(M) Liberation, which is an

alliance partner of the RJD-Congress, came out with a strongly worded statement later, describing the governor's address as a "bundle of lies" intended to cover up the failures of the JD(U)-BJP government in the state. The Governor also spoke of steps to improve agriculture through detailed five-year "road maps" and enhance healthcare with the establishment of new medical colleges. He also made a mention of the government's commitment to maintaining "social and communal harmony", underscoring steps like "fencing of kabristans (Muslims' places of burial)" and construction of boundary walls for "Hindu temples registered 60 years ago or earlier with the state religious trust board". The Governor's address also spoke of "9.35 Lakh government jobs already created" and promised "the total number will rise to 12 Lakh, not just 10 Lakh, before the assembly elections due later this year". A promise of "10 Lakh government jobs" has been the poll plank of Tejashwi Yadav, the leader of the opposition in the state assembly who served as the deputy CM on the

two occasions when the RJD shared power with JD(U). Women's empowerment, which Nitish Kumar counts on as one of his main achievements in the traditionally patriarchal state, was also mentioned prominently in the speech by the governor who mentioned "50 per cent reservations in civic bodies, announced in 2007", followed by "35 per cent quotas brought in 2013 in police recruitments and in all government departments since 2016". The governor also said financial aid of ₹2 Lakh was being given to "94 Lakh poor families, from all social segments-Dalits, backward classes, upper castes and minorities", which were identified in the ambitious caste survey conducted in 2023. The Governor's address concluded with a word of thanks to the Centre for the "generous help extended to Bihar" in the Union budget presented recently by Finance Minister Nirmala Sitharaman who came up with "announcements like setting up of a Makhana board, new airports, economic assistance for a canal in the flood-prone Kosi region and expansion of IIT, Patna".

Veteran lyricist Javed Akhtar during celebrations of 'Marathi Bhasha Gaurav Diwas' in Mumbai PTI

## Javed, Kangana settle defamation case

PNS ■ MUMBAI

Actress Kangana Ranaut on Friday settled the defamation case filed against her by veteran lyricist Javed Akhtar, which had been ongoing for over four years, through mediation. The BJP MP also apologised for the "inconvenience" caused to the screenwriter. The duo appeared before a special court here on Friday and informed it of their decision to withdraw the complaints they had filed against each other. After the court appearance, the actor also posted a photo on her social media platform along with Akhtar, stating that they have resolved the legal matter. The court will pass a formal order on this later in the day. The actor said she made the statement against Akhtar due to misunderstanding, and apologised for the inconvenience caused to him due to it. Akhtar had filed a complaint against Ranaut in 2020, alleging that she had defamed and damaged his 'immaculate reputation' by dragging his name into actor Sushant Singh Rajput's death in an interview with a news channel in July that year. Ranaut had later filed a cross complaint against Akhtar, alleging criminal intimidation and insult to modesty. She had claimed that during her meeting with Akhtar at his residence in 2016, he criminally intimidated her, demanding that she apologise to a co-star. Ranaut's lawyer Rizwan Siddiquee and Akhtar's advocate Jay Kumar Bhardwaj said the

matter was settled through an hour-long mediation before a special magistrate court in Bandra. Ranaut stated before the mediator that she made the statement due to misunderstanding and she has decided to withdraw it, Bhardwaj said. Ranaut has apologised to Akhtar for inconvenience caused to him due to her statement, he said, adding that she has undertaken not to make such a statement in future. Siddiquee said, "We were looking for mediation for a long time. We had exchanged drafts also. Finally we have resolved the case."

"There were no issues, only the wordings were to be decided, which was done today. We prepared the draft, signed it and both the cases were withdrawn today," he added. The case was initially heard by a magistrate court in Andheri. In 2024, after she was elected as a Member of Parliament (MP) from the Mandi Lok Sabha constituency in Himachal Pradesh, the matter was transferred to a special magistrate court designated for matters involving MPs and MLAs. In his complaint, Akhtar claimed that Ranaut dragged his name during an interview while referring to a 'coterie' existing in Bollywood, following the alleged suicide by actor Sushant Singh Rajput. Ranaut posted a photo with Akhtar on Instagram and said the cinema veteran was "kind and gracious" during the mediation process.

## Manipur extends deadline for surrender of illegal arms

PTI ■ IMPHAL

Manipur Governor Ajay Kumar Bhalla on Friday extended the deadline for the surrender of looted and illegal arms until 4 pm on March 6 following demands by people from both hill and valley areas for additional time, an official statement said. "Upon the expiry of the seven-day deadline for the voluntary surrender of arms, there have been requests from both the valley and hill areas to extend the period. I have considered these requests and decided to extend the deadline until 4 pm on March 6," the statement read. It further assured that no punitive action would be taken against those who surrender their

weapons within this period, emphasising that "this is the last opportunity for everyone concerned to contribute to peace, communal harmony, the future of our youth, and the security of our society." Bhalla had on February 20 urged warring groups to voluntarily surrender weapons robbed from security forces and other illegally held arms within seven days, the deadline of which ended on Thursday. During the seven-day period, more than 300 weapons were surrendered by the public, primarily in the valley districts. More than 250 people have been killed and thousands rendered homeless in ethnic violence between Meiteis and Kuki-Zo groups since May 2023.

## BJP urges Karnataka CM for increased Bengaluru budget

PTI ■ BENGALURU

A delegation of BJP legislators and MPs from Bengaluru on Friday met Chief Minister Siddaramaiah, and sought higher allocation of funds in the upcoming state budget for the city's development. The delegation led by party state BJP President BY Vijayendra and Leader of Opposition in the Legislative Assembly R Ashoka asked for allocation of ₹150 Crore for each Assembly segment in the city. Relook into the Metro fare hike, allocation of funds for constituencies represented by first time MLAs, and holding of Bruhat Bengaluru Mahanagara Palike (BBMP) polls at the earliest are among the issues that were highlighted at the meeting. Siddaramaiah who also holds the finance portfolio is scheduled to

present the budget for 2025-26 on March 7, marking his 16th birthday. "All our MLAs, MPs, MLCs and district unit presidents from Bengaluru met the Chief Minister and requested for more funds in the budget, funds to the legislators for the development of their constituencies, keeping in mind the development of Bengaluru," Vijayendra said. Speaking to reporters here after meeting the CM, he said, when BJP's B S Yediyurappa and Basavaraj Bommai were Chief Ministers earlier ₹6,000-8,000 Crores were given to Bruhat Bengaluru Mahanagara Palike (BBMP) for the development of Bengaluru in every budget. "No such allocations have been made for Bengaluru in the last two years, so we have requested ₹6,000-8,000 Crores for Bengaluru city in the budget," he

said. Noting that infrastructure projects like flyovers and others are going on at a slow pace, the state BJP chief said, priority should be given for completion of such projects by allocating more funds for them. He said, during the meeting, Bengaluru MPs PC Mohan and Tejasvi Surya suggested that the Chief Minister send necessary communication to the fare fixation committee to reduce the metro fare that was hiked recently. "Requests were made to the CM for enhanced allocation in the budget for Bengaluru's development and to the constituencies represented by first time MLAs. We have also requested that the BBMP polls should be held at the earliest," he said, adding that the CM has responded positively and has assured that he will

ensure allocation of funds within limitations. Claiming that never had such a plight come for Bengaluru and ₹6,000-8,000 Crore was allocated to the city in every budget. When BJP was in power allocations were made to the constituencies irrespective of the party of MLAs who represent them, he said. "Keeping in mind Bengaluru's global and national reputation, we have urged the CM to give more funds to the city, and we are hopeful that the Chief Minister will consider it," he added. Vijayendra in response to a question said, the party will discuss the proposal to divide BBMP into multiple corporations. "BBMP polls should not be postponed citing creation of Greater Bengaluru Authority as the reason," he said.

## Gurugram police arrest employee for ₹23 Lakh software hacking fraud

PARVESH SHARMA ■ GURUGRAM

A cyber crime police station (south) of the Gurugram police has arrested a former employee with his accomplice for fraudulently transferring ₹23 Lakh from a company account by hacking the company's software, police said. According to the police, a complaint was registered on Thursday regarding fraudulent transfer of huge amounts from the account of the company to various bank accounts. During prompt action, police seized ₹9 Lakh out of ₹23 Lakh, which was defrauded by transferring in the matter and nabbed the two culprits from the Badshahpur area of Gurugram on Friday. The accused were identified as Rohit Gupta, a resident of Sonia Vihar, Delhi, and Jatin Malik, a resident of New Roshanpura Najafgarh, Delhi. During the probe, it was found that the accused, Rohit, was working in the company till a month ago. Due to his quarrelsome behaviour, the company fired him. In revenge, the accused, along with his other

partner, Jatin, committed the crime of fraudulently transferring money to various bank accounts by hacking the company's software in this case. "One laptop used by the accused to commit fraud by hacking the company's software in the case has also been recovered from the possession of the accused. Further action is being taken by the police to recover the remaining amount," a spokesperson of the Gurugram police said. Senior police officers of Gurugram claimed that the police are closely working with other agencies and organisations to counter cyber fraud. "The cyber fraudsters commit fraud by luring people with good profits, investing in the stock market, task-based fraud, in the name of buying/selling cheap goods online, sextortion through video calls on WhatsApp, morphing, sending links through various means, posing as a customs officer or police officer in the name of implicating false case, in the name of issuing a No-Objection Certificate, digitally arresting people by showing the fear of implicating them in a criminal case, etc," Priyanshu Diwan, ACP (cybercrime), said.

## Cleanliness drive launched in Prayagraj after Maha Kumbh

BISWAJEET BANERJEE ■ PRAYAGRAJ

Following the grand conclusion of Maha Kumbh 2025, Chief Minister Yogi Adityanath has launched a 15-day special cleanliness drive to ensure that the festival grounds remain pristine. The initiative aligns with his vision of a clean and divine Maha Kumbh, reinforcing his commitment to hygiene and environmental sustainability. During the closing ceremony, Chief Minister Yogi honoured sanitation workers for their relentless service and directed officials to maintain the sanctity of the Mela grounds. The clean-up operation is being led by Special Officer Akanksha Rana, with Swachhata Mitras and Ganga Sewa Doots actively engaged in restoring cleanliness. The Sangam ghats, Mela ground roads, and temporary as well as permanent infrastructure are

Worker collects garbage during cleanliness drive after the conclusion of the Maha Kumbh Mela in Prayagraj PTI

being thoroughly cleaned. Over 15,000 sanitation workers and 2,000 Ganga Sewa Doots played a crucial role in maintaining hygiene during Mahakumbh, which saw a record-breaking 66

Crore devotees take a holy dip at the Triveni Sangam. The post-festival drive aims to ensure that pilgrims visiting Prayagraj after Maha Kumbh continue to experience a clean

and sacred environment. On Friday, following the chief minister's directives, Special Officer Akanksha Rana officially flagged off the cleanliness campaign. The focus is on clean-

ing Sangam ghats, Mela grounds, temples, and roads, both permanent and temporary. The drive also includes the removal of 1.5 Lakh temporary toilets, with systematic waste disposal at the Baswar plant in Naini. As part of the clean-up operation, all temporary pipelines installed by the Urban and Rural Water Corporation, streetlights put up by the electricity department, and tents and pavilions used by saints, monks, and Kalpvasis are being dismantled. The Prayagraj Municipal Corporation is also intensifying efforts to enhance greenery and sanitation, ensuring that the city retains its aesthetic and environmental appeal. "The drive underscores the state government's commitment to preserving the sanctity and cleanliness of Mahakumbh, leaving a lasting legacy of hygiene and sustainability in Prayagraj," said Rana.

## Andhra Pradesh budget prioritises welfare of farmers, fishermen

Andhra Pradesh CM N Chandrababu Naidu with Deputy CM Pawan Kalyan and Finance Minister Payyavula Keshav before presentation of the State Budget in the Assembly in Amaravati PTI

The Andhra Pradesh budget for the fiscal 2025-26 tabled on Friday by the TDP-led NDA government accorded top priority to welfare schemes, promising to dole out ₹20,000 per annum for farmers, doubling financial relief for fishermen during a ban period, and ₹15,000 to school going children

up to the intermediate level under "Talliki Vandanam" scheme. The "Talliki Vandanam" scheme is one of the Super Six schemes made by the ruling bloc during the 2024 Assembly polls. Finance Minister Payyavula Keshav tabled the ₹3.22 Lakh Crore budget and proposed ₹20,281 Crore for the Scheduled Caste (SC) component, ₹8,159

crore for the Scheduled Tribes (ST) component, ₹47,456 crore for the Backward Classes (BC) component and ₹5,434 Crore for the welfare of minority communities. "I take pride in announcing that the government is launching the Talliki Vandanam scheme, to provide financial support of ₹15,000 in the academic year 2025-26. The scheme will cover children enrolled in Classes I to XII in both government and private schools," Keshav said. "No matter in what financial situation we are in, our farmers will receive ₹20,000 annually under the Annadata Sukhibhava scheme," he said. Super Six schemes, pledged in the run up to the 2024 polls, include ₹1,500 monthly aid to every woman in the age bracket of 19 to 59 years, 20 Lakh jobs for youth or ₹3,000 monthly unemployment aid and free bus travel for women. Other schemes under 'Super Six' are ₹15,000 to every school-going child per annum (Talliki Vandanam), three free gas cylinders to every household (Deepam - 2) and ₹20,000 annual financial assistance to every

farmer (Annadata Sukhibhava). He also announced doubling of financial relief to ₹20,000 for fishermen during the fishing ban period. Keshav told the House that the TDP-led NDA government is planning to implement insurance-based health coverage of ₹25 Lakh per family in the next fiscal. The budget of over ₹3.22 Lakh Crore encompasses an estimated revenue expenditure of ₹2.51 Lakh Crore and capital expenditure of ₹40,635 Crore. Keshav, while presenting the budget said the estimated revenue deficit is around ₹33,185 Crore (1.82 per cent of the Gross State Domestic Product (GSDP)) and the fiscal deficit is around ₹79,926 Crore (4.38 per cent of the GSDP). The budget proposed an allocation of ₹31,805 Crore for school education and ₹19,264 Crore for the Health, Medical and Family Welfare Department. The Panchayati Raj and Rural Development Department, a portfolio held by deputy Chief Minister Pawan Kalyan, got ₹18,847 Crore. Allocating ₹13,862 Crore to the Municipal Administration and

Urban Development Department, Keshav asserted that the greenfield capital city Amaravati has proved to become a self-financing project without state budget assistance as the financing has been secured through the Centre from the World Bank, Asian Development Bank and HUDCO. For the Energy Department, he proposed a sum of ₹13,600 Crore. According to Keshav, AP's energy sector is undergoing a transformative revival, with the state aiming to emerge as a green hydrogen hub. Other major allocations included ₹8,785 Crore for the Department of Transport, Roads and Buildings and ₹8,570 Crore for the Home Department. For Deepam - two scheme, which offers three free gas cylinders per year to over 90 Lakh eligible beneficiaries, Keshav allocated ₹2,601 Crore. In his speech, Keshav said the government was presenting the budget in the backdrop of the "financial destruction caused by the previous (YSRCP) regime". "It has been a highly complex task, because the previous regime created financial chaos in every department," he alleged.

PTI ■ NAGARKURNOOL

South Central Railway (SCR) has joined the rescue teams that are engaged in locating the eight persons who remain trapped in the partially collapsed Srisailem Left Bank Canal (SLBC) tunnel for the past six days, with necessary equipment, a senior official said on Friday. Railways has the expertise in cutting heavy metals using equipment such as plasma cutter and Brocho cutting machine, SCR Chief Public Relations officer A Sridhar said. "District Collector, Nagar Kurnool sought the help of South Central Railway in rescue operation by clearing iron and steel debris that have been hindering the rescue works at the site," A Sridhar said. He further said that the SCR quickly responded to the call and deployed two teams of metal cutting experts in the rescue mission. The first batch led by S Murali, Divisional Mechanical Engineer, consisting a senior Section Engineer, 13 Welders and two technicians from Secunderabad have reached the site and have

Rescue operation underway to trace workers trapped inside the collapsed tunnel in Nagarkurnool PTI

taken up the required works. The second batch of experts also reached the site to support the first team, last night, he further said. Meanwhile, Nagarkurnool Superintendent of Police Vaibhav Gaikwad said the metal cutting and debris clearing process is continuously going on. "One team went into the tunnel at 7 am. The clearing of debris has been going on since yesterday morning. Dewatering is also going on," he said. Telangana irriga-

tion Minister Uttam Kumar Reddy on Thursday said the rescue and relief operations are in full swing, and that the operation would be completed in two days. The Minister on Wednesday said the Tunnel Boring Machine (TBM) that is struck inside will be cut into pieces by using gas cutters and removed. After this, the Army, Navy, Rat Miners and NDRF teams will make another serious effort to rescue the eight persons who are missing, without compromising their own safety.

## Lawbreakers as lawmakers

### Eradication of the influence of criminality in politics must be taken up on priority

In recent years, the issue of criminalisation in politics has increasingly come under scrutiny. With more politicians facing criminal charges and convictions, questions have arisen about whether the legal framework governing their disqualification from contesting elections is adequate. The ongoing debate, highlighted by a recent Supreme Court case challenging the constitutional validity of limiting disqualification periods, brings to the fore not only legal interpretations but also the broader menace of criminal influences in our political system. A petition filed before the Supreme Court has argued for a lifetime ban on convicted politicians from contesting elections. The petitioner contends that limiting disqualification to a fixed period—currently six years after release for offenses under Section 8 of the Representation of the People Act, 1951—undermines constitutional provisions designed to keep criminals away from power. In response, the Centre has defended the existing provisions, arguing that a lifetime ban is “unduly harsh” and that it would amount to directing Parliament to frame a law in a particular manner—an overreach of judicial power. The government’s counter-affidavit emphasises that there are numerous penal laws that operate within a time-bound framework, ensuring that deterrence is balanced against the need to avoid undue severity.

This legal tussle highlights a crucial policy debate: should convicted politicians face an indefinite prohibition from electoral participation, or is a fixed term of disqualification both constitutional and proportionate? The government argues that the current system, which temporarily excludes convicted individuals,

respects the principles of proportionality and reasonability. In its view, the legislative choice to limit the disqualification period is designed to offer both a punitive and rehabilitative measure while preserving democratic participation. Beyond legal debates, the deeper issue remains the rising tide of criminality within political circles. Criminal elements entering politics not only threaten the integrity of democratic institutions but also erode public trust. Politicians with a history of criminal behaviour may be more likely to engage in corrupt practices, undermining the rule of law. As criminalisation in politics becomes more pronounced, the call for stringent measures intensifies. Addressing the criminalisation of politics requires a multi-pronged approach that extends beyond the question of lifetime bans. Parliament could consider revisiting and potentially tightening the eligibility criteria for political candidates. Whether through a longer ban or additional restrictions for those convicted of certain serious crimes, legislative reforms should aim to disincentivise criminal conduct. There may be strong arguments for and against the life ban of convicted persons becoming lawmakers but one thing all can agree upon is that we do not need them in our parliament or state assemblies. How to do it is not difficult but who will bell the cat?

## Rupee depreciation calls for structural reforms

Despite notable gains such as a reduced trade deficit, emerging challenges including global tariff tensions highlight the urgent need for comprehensive policy reforms

Over the past decade (2014-2024), the compounded annual growth rate (CAGR) of India’s exports of goods and services in USD terms has fallen sharply to about 5 per cent, compared to 17.9 per cent during 2004-2014 and 12.7 per cent in the period 1994-2004. This decline in export growth has coincided with a significant depreciation of the Rupee, which now trades at roughly Rs 86/87 per USD, a stark contrast to the Rs 60.50 per USD seen in 2013-14. In contrast, between 2000 and 2012, the Rupee remained relatively stable with occasional appreciation driven by robust export growth at an impressive 19.5 per cent CAGR in USD terms.

This historical perspective demonstrates that a strong, stable Rupee is not an inherent barrier to export performance. In fact, the key to sustained export growth lies in enhancing overall economic efficiency. This efficiency is shaped by a broad range of policies and regulations that affect factors such as capital, energy, logistics and raw materials. By improving these inputs, India can propel

exports forward while maintaining Rupee stability. A weak Rupee, however, tends to deter global investors. Given that domestic savings alone cannot fulfill India’s vast investment requirements, a steady inflow of global funds remains essential until the country transitions into a “Trade-Surplus Nation.” Recent changes in US leadership have sparked a tariff war, adding another layer of complexity to India’s export environment.

Despite the sluggish export performance in the past decade, the country achieved a notable reduction in its trade deficit—from 4.3 per cent of nominal GDP in 2004-2014 to an average of 2.5 per cent in 2014-2024—primarily due to lower import volumes. In 2024, inward foreign remittances surged to \$129 billion, the highest globally, which

played a crucial role in reducing the current account deficit (CAD) from 1.7 per cent of GDP in 2013-14 to about 0.7 per cent. Consequently, Forex reserves swelled to 18.3 per cent of nominal GDP, underscoring the positive impact of these remittances.

Looking ahead, potential challenges loom. Aggressive deportation policies by the US could discourage migration, thereby diminishing remittance flows. Moreover, if India shifts its oil and gas import sources from Iran, Gulf nations, and Russia to the US, the resulting higher import bill may widen the trade deficit. In response, India must marshal all available policy tools to boost exports, reduce imports, and eventually become a trade-surplus nation. Facilitating legal migration remains crucial until domestic job creation can sustain remittance inflows, which are vital for curbing the CAD.

To further stimulate export growth, targeted export incentives for manufactured and agro-based goods should be implemented, while the untapped potential of service exports—ranging from

tourism and healthcare to education and professional consultancy—must be unlocked through dedicated policies. Additionally, reducing petroleum imports requires massive investments in railway infrastructure and expanded public transportation to lower fuel demand, and increased spending on petroleum exploration is the need of the hour.

Enhancing domestic production of thermal coal and adopting innovative measures to reduce gold imports, such as a revised gold deposit scheme, are also essential steps. Finally, attracting global funds through measures like reducing capital gains tax on foreign portfolio investments (FPIs) and encouraging long-term borrowing via bonds backed by sovereign guarantees will help meet India’s investment needs. Overcoming outdated colonial-era business and taxation laws remains critical. A second wave of structural reforms is needed to stabilise the Rupee, secure higher GDP growth, and elevate India’s stature on the global stage.

## Strengthening public institutions in the digital age

Digital transformation is reshaping public policy, it is imperative that we embrace it without compromising our enduring commitment to integrity

O P SINGH

I am a civil servant passionate about governance, institutional resilience and public policy, exploring how institutions can adapt to the digital age. Imagine a world where policies are debated, revised and reshaped in real time—governance moving as quickly as a trending hashtag. That world isn’t coming; it’s already here. Public institutions, once the reliable backbone of governance, are now transforming rapidly.

Social media, instant communication, and shifting public expectations have redefined how governments interact with citizens. Decision-making, once a structured process guided by expertise and long-term planning, now occurs in an environment where public sentiment can change overnight. This new landscape offers both opportunities and challenges. Increased public engagement promotes transparency and participation but also demands rapid responses. Today’s challenge isn’t just about efficient policy implementation—it’s about balancing speed with thoughtful deliberation and adaptability with established structure.

### A New Era of Governance

Historically, governance followed a deliberate, structured path. Political leaders set broad directions, while institutions provided continuity, expertise, and safeguards. Decision-making

was data-driven and refined through expert consultation with a focus on long-term national interests. Then the digital revolution changed everything. Social media now plays a central role in shaping public discourse, often setting the agenda before formal institutions can respond.

A 2023 Pew Research study noted that nearly two-thirds of adults in democratic nations now rely on social media for political news. This shift has empowered citizens and made governance more transparent and participatory, but it has also heightened expectations and pressured institutions to act swiftly.

### Adapting Without Losing Purpose

The solution is not to resist change but to adapt strategically. Governments worldwide are using digital platforms to improve service delivery and civic engagement. For instance, India’s Digital India initiative has streamlined public services online, while Singapore’s Smart Nation program uses data analytics to enhance urban planning and governance. These examples show that when technology is integrated thoughtfully, it can boost both effectiveness and accessibility. Adaptation goes beyond dig-

DECISION-MAKING, ONCE A STRUCTURED PROCESS GUIDED BY EXPERTISE AND LONG-TERM PLANNING, NOW OCCURS IN AN ENVIRONMENT WHERE PUBLIC SENTIMENT CAN CHANGE OVERNIGHT

ital tools—it requires maintaining the integrity of governance. Institutions must prioritise expert-driven decision-making to ensure that policy shifts are well-considered rather than merely reactive. Preserving institutional memory through thorough documentation and continuous training ensures that experienced civil servants provide continuity, anchoring governance in expertise rather than short-term trends.

### The Importance of Public Trust

At its core, governance depends on public trust. Institutions thrive when they are seen as credible, reliable, and fair. Trust is built through transparency, efficiency, and ethical practices. Governments that openly communicate their policies and decision-making processes foster confidence among citizens. Estonia’s e-Governance model, which gives citizens real-time access to government records, is a prime example. Efficiency is equally critical. Reducing administrative delays, streamlining processes, and making governance accessible are key to maintaining public trust. When institutions deliver results fairly and efficiently, they not only function better—they strengthen democracy.

### Finding the Right Balance

The digital age demands a balance between responsiveness and deliberation. Institutions must embrace innovation without becoming reactionary, listening to public sentiment while ensuring that policies are grounded in data, analysis, and long-term planning. Quick decision-making should never come at the expense of depth and foresight. This balance distinguishes effective governance from mere administration. Institutions that thoughtfully adapt are not just keeping pace with change—they are actively shaping the future of governance.

### Looking Ahead

Public institutions are more than policy enforcers; they are the foundation of national stability and progress. As governance continues to evolve, these institutions must lead through innovation, efficiency, and an unwavering commitment to public trust. The digital age presents both challenges and opportunities. Institutions that adapt wisely will define the future of governance—not solely through speed or efficiency, but with foresight, trust and enduring strength.

## LETTERS TO THE EDITOR

### TRUMP’S GOLD CARD PLAN

Madam — US President Donald Trump has announced a new visa program that will offer a ‘gold card’ with a potential pathway to US citizenship for \$5 million (approx Rs 43 crores), which could significantly benefit Indian graduates and investors. It seems like a sale of citizenship for money. He is not even asking them to start a business, create jobs, or anything. Moreover, why should one spend 5 million dollars to go to the USA? With that money, they can lead a royal life (invest 5 million in India and get 14 per cent annualised ROI compared to 5 per cent in the US) in India itself, with their own thriving business and stay close to near and dear ones, which is a much better place now than the US. This is a simple sale of citizenship. This is nothing, but this Trump statement looks a bit stupid! Because, how many students in India will have 5 million dollars to buy a gold card? And which company will be ready to pay 5 million dollars for hiring an Indian employee in the US on a gold card? Is Trump thinking logically, or is he just high on the dose of fake nationalism? This far-right politics is turning the politicians into real fools. Whatsoever, Golden Visa is very expensive.

### BRUTAL MURDERS SHOCK NATION

Madam — The nation is shocked at the brutal and spine-chilling crime of a 23-year-old man, who killed as many as five people, including his close relatives and girlfriend, within a few hours at various places in a radius of 15 kilometres in Thiruvananthapuram. By using a simple mallet, he has repeatedly hammered and finished the victims and then coolly surrendered at the police station on his own. It was by sheer luck that the sixth victim, his own mother, survived the attack, though she is still in serious condition. Even though the family was reportedly facing financial hardship, what prompted the man to commit such a heinous

## CBSE clarifies language policy

Refers to Editorial ‘Simmering Linguistic Tension’ (February 28), first Tamil Nadu and now Punjab is raising unnecessary controversy over regional languages, that too owing to the CBSE draft norms (not final) for conducting the 10th class board exams. The Punjab government’s hasty decision of imposing the Punjabi language on all 10th class examinations in the state of all

boards, whether Central or State, is uncalled for. This irrational decision has been announced without taking stakeholders—students and teachers—into confidence. It is nothing else but the imposing of the state’s will and Punjabi language on innocent students.

How can a student who has never studied Punjabi suddenly take an examination of the same language in the 10th class? It is impossible and irrational. The CBSE was quick to clarify and assure that all regional languages, including Punjabi, will be included in the class 10 board exam. After this clarification and assurance, the Punjab government should immediately withdraw its decision of making Punjabi a mandatory language in all boards’ examinations in Punjab.

Vinay Kr Malhotra | Ambala Cantt

crime was nothing but the grave impact of drugs. In fact, Kerala has been reeling under the threat of drugs for quite some time now.

All kinds of drugs have been flowing into the state purportedly with the connivance of those in authority. It is a painful truth that a large number of youngsters, including students, are under the influence of drugs. However, the government has not taken any concrete steps to contain this serious menace. The present situation in the state is bound to ruin the young generation completely. As such, the government must take prompt and stern action against the drug mafia.

T T Sakaria | Delhi

AFGHANISTAN STUNS ENGLAND  
Madam — Afghanistan pulled off a historic eight-run victory over England, proving once again that cricket is a game of glorious uncertainties. The hero of the night was 23-year-old Ibrahim Zadran, who played a breathtaking knock of 177 off 146 balls, the highest individual score by any Afghanistan batsman in ODIs. His

fearless stroke play propelled Afghanistan to a challenging total of 325 for 7 despite England’s experienced bowling attack. England’s chase was anchored by Joe Root, who counterattacked with a brilliant 120 off 111 balls, keeping his team in the hunt.

However, Afghanistan’s fiery fast bowler Azmatulla Omarzai turned the game on its head with a sensational 5/58. This is the second time in a row that Afghanistan has beaten England in an ICC tournament. This and Zadran’s pedigree once again advertised Afghanistan’s evolution as a rapid cricketing force. Despite a late fightback, England fell short by eight runs, handing Afghanistan one of their most significant victories in cricket history. This match will be remembered as a testament to Afghanistan’s rising stature and the sheer unpredictability that makes cricket a thrilling spectacle.

## THREE LEVELS OF CONTROL

Beyond our inner self, natural and material limitations shape our behaviour and outcomes

AJIT KUMAR BISHNOI

We, human beings, are under control at three levels. The first one is at the level of self. We have been blessed with faculties such as mind, intelligence, etc. And we have free will to decide what we would like to think, decide and do. However, thinking and deciding are in our control, but being able to do is not. Our actions are limited by circumstances, instruments we have, how much we can apply ourselves and providence of course. Then, there are constraints like limited knowledge, facilities, nature, etc. Knowledge is unlimited, but we can have very limited knowledge only. Even good knowledge of a subject is difficult, never mind of countless subjects. This restricts us greatly. Nature is another limiting factor. The three modes of material nature, which are goodness, passion and darkness, determine how we would act. For example, a man predominantly in the mode of goodness will generally act wisely. The same cannot be said about persons under the control of the modes of passion and darkness. They make many mistakes. And we all generate 'karmas' (deeds) by minds, words and bodies (senses). These actions of ours, both good and bad put us in the control of the Divine Authority, appointed by God; it works under the superintendence of God. (The Bhagavad-Geeta 9.10) Imagine the extent of their work.

They have to be alert to record all our actions 24x7. This is nothing compared to what they have to do to decide our rewards and punishments, their timings, etc. In this, they have to correlate how these will impact others associated with us. Therefore, the Divine Authority may delay the punishment to make its effect on the family a little less harsh.

But the guilty person has no hope of reprieve even if the punishment is to be delayed to the next life. Our 'karmaphalas' (fruits of actions) are carried from life to life. If the job of the Divine Authority is mind-boggling, what God does is simply unimaginable. God has to watch the interest of all His devotees, no matter where they are. Then, He must appropriately respond to our prayers every time. He must also guide us if we sincerely seek it. Additionally, God must help if we deserve to come out of troubles we have gotten into due to our past 'karmas'. This is nothing compared to what God does for the Creation; He has to keep it going for millions of years for us souls. Imagine if there was dissolution every hundred years or so. How will we feel?

Then, God has innumerable galaxies to control. He has many planets where we can go to from the earth planet. There is heaven, where pious acts take us for limited periods. This is like going on a vacation to a dream place. There are many such planets which are higher and higher ending in the 'Vaikuntha' planet, which is the abode of God. Only those, who have been liberated reach there. They get freed from the cycle of birth and death. They remain there for good. Knowing all this, we must become wise, really wise. We must seek the shelter of God beginning now, not later. We must follow dharma to please God. God will guide and help. The divine Authority will be giving us more rewards than punishments, which we can tolerate easily. And we will be our best friends.

(The writer is a spiritual teacher; views are personal)

# Finding money for 'freebies': BJP faces an uphill task

UTTAM GUPTA

The challenge now is not just about delivering on electoral promises but also about balancing an already precarious fiscal equation that could see deficits skyrocket

Having swept the polls in the National Capital Territory (NCT) of Delhi with a clinching 2/3rd majority, Rekha Gupta-led BJP - government faces the daunting challenge of having to find money to fulfil its poll promises. Amongst others, the BJP had promised Rs 2,500 a month to women under Mahila Samridhi Yojana (MSY); Rs 21,000 to pregnant women; LPG cylinders for Rs 500 and free cylinder on Holi and Diwali; a stipend of Rs 1000 a month to SC students pursuing technical and vocational courses; free education for needy students from KG to PG; free travel for students on Delhi Metro; Atal Canteens in Jhuggi Basti clusters providing nutritional meals for Rs 5 only; implementation of Ayushman Bharat scheme and additional cover of Rs 5 lakh for senior citizens. BJP had also vowed to continue all existing schemes such as free electricity and free water (for monthly consumption up to a specified threshold) run by the erstwhile AAP - dispensation under the then Chief Minister, Arvind Kejriwal.

**How much will these freebies cost?**  
Let us look at the Mahila Samridhi Yojana (MSY) under which the party has promised to give cash assistance of Rs 2500 per month to every woman. The number of women above the age of 18 years in Delhi is around 67,00,000. @ Rs 2500 per month or Rs 30,000 annually to each woman, giving cash assistance to them all will require Rs 20,100 crore per annum (0.67x30,000). The assistance to pregnant women @Rs 21,000 per woman, taking a total of about 1,500,000 pregnant women will cost around Rs 3150 crore annually. As for subsidy on LPG, take consumption of 4 cylinders (14 kg each) per household (HH) in a year. The current cost of supplying a cylinder is around Rs 1000. For two cylinders (Holi and Diwali) promised to be given free, the subsidy will be Rs 2000 whereas for the other two to be given @ Rs 500 each, the outgo will be Rs 1000. This gives an annual subsidy of Rs 3000 per HH. The current population of Delhi is 330 lakh. Taking an average of 4 members per HH,

NOW, CONSIDER THE IMPACT OF BJP PROMISES. MODI HAS GUARANTEED THAT EXISTING SCHEMES WON'T BE DISCONTINUED. SO, FREE ELECTRICITY/WATER COSTING RS 11,000 CRORE WILL STAY. ADD TO THIS, THE FRESH GUARANTEES WHICH WOULD BE AT LEAST ABOUT RS 30,000 CRORE

we get a total of over 82.5 lakh HHs. Multiplied by Rs 3000 being the subsidy per HH, the annual outgo comes to Rs 2500 crore. Look at free education for needy students from KG to PG. According to the latest data available, around 10 per cent of Delhi's population was considered below the poverty line in 2011-12. On this basis, the number of poor persons comes to 33 lakh (330x0.1). About one-third of this or 11 lakh would be persons in the studying age 4 - 25 years. Taking the average expense of educating a child in India at the bare minimum of Rs 20,000 per annum, the total annual expense on "needy students" in the city would be about Rs 2200 crore (0.11x20,000). The additional burden of these four promises alone on the Delhi government's budget is Rs 27,950 crore (20,100+3150+2500+2200). Other freebies would bloat this figure by every thousand crore. Let us take the total to be around Rs 30,000 crore.

**What is the current state of Delhi's finances?**

For the current financial year (FY) 2024-25, the total expenditure of the Delhi government is estimated at Rs 76,000 crore. This includes revenue expenditure (RE) of Rs 61,000 crore and capital expenditure (CE) of Rs 15,000 crore. Against this, the total revenue receipts or RR (tax plus non-tax receipts including transfer from the Central government) is estimated at around Rs 58,000 crore. That leaves a revenue deficit or RD (RR - RE) of Rs 3000 crore. This is disconcerting when seen in the backdrop of Delhi's potential to generate substantial surplus given two fundamental factors working to its advantage.

First, due to its special status of being NCT, three major functions namely law and order, police and land

come under the Centre's jurisdiction hence, the latter foots the bill for expenses on those functions. Second, Delhi being a major hub of economic activity, its propensity to garner its tax revenue in terms of higher GST collection besides VAT on petrol and diesel and excise duty and VAT on alcohol (these products are outside the GST regime) is greater.

The RD will increase drastically when we consider the cost of servicing the loans taken by various departments of the Delhi government such as the Delhi Jal Board (DJB); over Rs 70,000 crore and Delhi Transport Corporation (DTC); Rs 60,000 crore (according to the CAG, these are cumulative losses of DTC as at end of FY 2021-22 and would have ballooned further during the following three FYs till end March 2025).

The liability for servicing those debts is vested entirely in the NCT government and should be reflected in its balance sheet. Look at the fiscal deficit (FD) which is the excess of total receipts over total expenditure. For FY 2024-25, it is estimated at Rs 18,000 crore which is 80 per cent higher than the FD during FY 2023-24 at Rs 10,000 crore. The surge is despite a steep reduction of over 30 per cent in CE from the budget estimate (BE) of Rs 22,000 crore for FY 2023-24 to Rs 15,000 crore for FY 2024-25.

If interest payments on loans taken by DJB and DTC (Rs 130,000 crore plus) which are merely adding to the mountain of debt on the books of those departments year after year are also included, the FD would be much higher. The situation had come to such a pass that the then CM Atishi had approached the Centre seeking a loan of Rs 10,000 crore from the National Small Savings Fund (NSSF). The precarious

ness of the state's finances has a lot to do with the galloping freebies and irregularities and mismanagement in running various schemes and overall governance on a monumental scale. During 2024-25, the cost of free electricity and free water alone is estimated to be about Rs 11,000 crore. According to CAG, during 2015-16 and 2021-22, the losses of DTC went up by Rs 35,000 crore and that was due to both free bus rides and misgovernance.

Now, consider the impact of BJP promises. Modi has guaranteed that existing schemes won't be discontinued. So, free electricity/water costing Rs 11,000 crore will stay. Add to this, the fresh guarantees which would be at least about Rs 30,000 crore. This takes the RE from Rs 61,000 crore during FY 2024-25 to Rs 91,000 crore during FY 2025-26 (assuming all other things remain unchanged). The RR is Rs 58,000 crore, we get RD of Rs 33,000 crore - up from Rs 3000 crore budgeted for FY 2024-25.

The incumbent government has also promised to clean Yamuna River, clean the air, renovate/build roads, cleanse the drainage systems, build and renovate hospitals and schools in fact, take up and complete a host of physical and social infrastructure projects needed for ensuring a good quality life for Delhiites. That means even if CE is restored to 2023-24 level Rs 22,000 crore, that won't be enough. Even with this insufficient level, the total expenditure will be Rs 113,000 crore. Minus RR of Rs 58,000 crore, we get FD of Rs 55,000 crore. Put simply, the Centre will have to arrange for at least Rs 55,000 crore to enable the BJP to live up to its promises for Delhi.

# India's solar surge: Powering the journey to net zero 2070

India is charting an ambitious course toward Net Zero 2070, with solar energy emerging as the mainstay of its renewable revolution

India's steadfast commitment to achieving Net Zero by 2070 is catalysing a dramatic shift in its energy sector, with solar power emerging as the principal driver of this transformation. Abundant sunlight, rapidly decreasing technology costs, strong government support, and an expanding skilled workforce have combined to place solar energy at the heart of India's renewable strategy. While the country has celebrated significant milestones in solar adoption, it also faces multifaceted challenges that require innovative policy interventions and strategic foresight to sustain its momentum.

Over the past decade, India has achieved remarkable progress in solar energy. The nation not only met its ambitious renew-

able targets but exceeded them, with solar power now accounting for over 60 per cent of its renewable energy mix. By 2024, India surpassed the 100 GW milestone, establishing itself as a global leader in solar energy. For example, Rajasthan's solar capacity exceeds 24 GW. Rapid expansion is evident in a 19 per cent increase in solar generation from 2023 to 2024, with solar installations making up over two-thirds of new renewable capacity.

India's role in the International Solar Alliance underscores its commitment to global solar collaboration, as the initiative seeks to mobilise over \$1 trillion in investments for developing countries. National agencies, particularly the Solar Energy Corporation of India,

DISHHA SHARMA

have been vital in driving the development and implementation of solar projects under the National Solar Mission. Despite these impressive achievements, significant obstacles remain on the path to full solar integration. One major challenge is the limited connection of solar installations to the national grid, with only 16 per cent of capacity currently integrated. This gap

restricts the country's ability to fully exploit its vast solar potential. Moreover, there are stark regional disparities in solar development. While states like Rajasthan and Gujarat lead the charge, many eastern and northeastern regions lag behind, resulting in an uneven distribution of renewable resources.

Financial hurdles also pose serious challenges. Although government subsidies help reduce costs, the high initial capital required for large-scale installations, coupled with elevated interest rates and delayed payments, discourages private investment. Manufacturers struggle with a shortage of competitively priced solar cells, a problem compounded by strict Domestic Content Requirements that strain pro-

duction capabilities. These financial constraints not only hinder current project deployment but also threaten future expansion in the sector. Another critical issue is India's heavy reliance on imported components. Despite having a domestic module production capacity of around 11 GW, India still depends on global supply chains for essential items such as polysilicon,

wafers, and solar cells. This dependency leaves the country vulnerable to supply chain disruptions, particularly amid geopolitical tensions and trade imbalances, as China continues to dominate global solar manufacturing. Furthermore, the scarcity of critical minerals like cobalt, nickel, and lithium—vital for solar panel production—further complicates efforts to build a self-sufficient solar industry.

Local challenges add another layer of complexity. Land acquisition for solar projects often faces resistance from local communities and farmers, leading to protests, legal disputes, and, in some cases, violent confrontations. In Rajasthan, disputes over land rights have led to project cancellations, highlighting the

need for transparent and inclusive processes that respect local interests and ensure fair compensation. Addressing these local concerns is essential for fostering community support and facilitating smoother project implementation.

To overcome these challenges, India must adopt a multifaceted strategy. Strengthening policy frameworks to provide long-term stability is crucial, as is enhancing inter-state cooperation and ensuring reliable access to energy data for effective monitoring. Public-private partnerships can expand solar adoption in underserved regions by providing risk mitigation instruments to attract investment. Promoting domestic manufacturing of solar panels and key compo-

ponents will reduce import dependency and bolster energy security. Additionally, investing in workforce development to build a skilled labor pool for solar installation, maintenance, and manufacturing will be vital for sustaining industry growth. By focusing on robust policy support, financial innovation, domestic manufacturing, and community engagement, India can significantly unlock the full potential of its solar resources. With sustained government backing and strategic collaboration between public and private sectors, the nation is well-positioned to lead the global solar revolution.

# Israel's army admits failures leading to Oct 7 attack

**PTI ■ TEL AVIV**  
An investigation by the Israeli military has determined that Hamas was able to carry out the deadliest attack in Israeli history on October 7, 2023, because the much more powerful Israeli army misjudged the militant group's intentions and underestimated its capabilities. The findings, released Thursday, could pressure Prime Minister Benjamin Netanyahu to launch a widely demanded broader inquiry to examine the political decision-making that preceded the attack, which triggered the war in Gaza. Many Israelis believe the mistakes of October 7 extend beyond the military, and they blame Netanyahu for what they view as a failed strategy of deterrence and containment in the years leading up to the attack. That strategy included allowing Qatar to send suitcases of cash into Gaza and sidelining Hamas' rival, the internationally recognised Palestinian Authority. The prime minister has not taken responsibility, saying he will answer tough questions only after the war, which has been

paused for nearly six weeks by a tenuous ceasefire. Despite public pressure, including from the families of the roughly 1,200 people killed in the October 7 attack and the 251 taken as hostages into Gaza, Netanyahu has resisted calls for a commission of inquiry. The military's main findings were that the region's most powerful and sophisticated military misread Hamas' intentions, underestimated its capabilities and was wholly unprepared for the surprise attack by thousands of heavily armed militants in the early morning hours of a major Jewish holiday. In comments made to military commanders Monday, and shared with the media on Thursday, the army's chief of staff, Lt. Gen. Herzi Halevi, said he took responsibility for the army's failures. "I was the commander of the military on October 7th, and I have my own responsibility. I also carry the weight of all your responsibility — that, too, I see as mine," said Halevi, who announced his resignation in January and is set to step down next week. The military's findings are in line with past

conclusions reached by officials and analysts. The military released only a summary of the report and military officials outlined its findings. "October 7 was a complete failure," said one military official, who spoke on condition of anonymity in line with regulations. A central misconception was that Hamas, which seized control of Gaza from the Palestinian Authority in 2007, was more interested in governing the territory than fighting Israel, the inquiry found. The military also misjudged the militant group's capabilities. Military planners had envisioned that, at worst, Hamas could stage a ground invasion from up to eight border points, the official said. In fact, Hamas had more than 60 attack routes. Intelligence assessed in the aftermath of the attack has shown Hamas came close to staging the offensive on three earlier occasions but delayed it for unknown reasons, the official said. The official said that in the hours before the attack, there were signs that something was amiss, including when Hamas fighters switched their phones over to the

Israeli network. The perception that Hamas did not want war guided decision makers away from taking action that night that might have thwarted the attack. The Israeli military official said intelligence shows that Yahya Sinwar, a mastermind of the October 7 attack who was killed last October, had begun planning it as early as 2017. With the military off guard on a holiday weekend, Hamas launched a heavy wave

of rockets that allowed thousands of fighters to burst through the security fence or fly over it on hang gliders. They knocked out surveillance cameras and quickly overwhelmed hundreds of soldiers stationed along the border. From there they advanced to key highway intersections and attacked troops dispatched to the area, including some senior officers, disrupting the military's command and control, according to a sec-

ond military official, who also spoke on condition of anonymity. For the first three hours after the attack, Hamas fighters marauded through border communities and a music festival with little resistance. That was when most of the 251 hostages were taken and most people were killed, the official said. The official said the chaos led to friendly fire incidents, although he said there were not many, without disclosing a figure. It took hours for the military to regain control and days until the area was fully cleared of militants. According to the first official, the report blamed the military for being overconfident in its knowledge and not showing enough doubt in its core concepts and beliefs. The summary said a key lesson was that Israel could not let a threat develop on its border. It spelled out several recommendations, including creating special units meant to prepare for such surprise and large-scale events, as well as reform in the military intelligence department that would foster "openness, scepticism, listening, learning." It did not place blame on any individual soldiers or officers, but is likely to pave the way for a reckoning in the military and eventual dismissals. Some high-ranking officers other than Halevi have also resigned, including the former head of military intelligence.

# Israel, Hamas have begun negotiating next phase of Gaza ceasefire, says Egypt

**PTI ■ KHAN YOUNIS (GAZA STRIP)**  
Negotiations between Israel and Hamas on the next phase of the Gaza ceasefire began Thursday, Egypt said, averting a collapse ahead of Saturday's expiration of the agreement's first phase. Officials from Israel, Qatar and the United States started "intensive discussions" on the ceasefire's second phase in Cairo, Egypt's state information service said. "The mediators are also discussing ways to enhance the delivery of humanitarian aid to the Gaza Strip, as part of efforts to alleviate the suffering of the population and support stability in the region," its statement said. Phase 2 talks are meant to negotiate an end to the war, including the return of all remaining hostages in Gaza who are alive, and the withdrawal of all Israeli troops from the territory. Return of remaining deceased hostages would happen in Phase 3. According to Israel, there are 59 remaining hostages — 24 of whom are still believed to be alive. It will be difficult to reconcile a deal with the war objectives of Israeli Prime Minister Benjamin Netanyahu, who has called for dismantling Hamas' governing and military capabilities. After suffering heavy losses in the war, Hamas has nonetheless emerged intact during the ceasefire, and the group says it will not give up its weapons. Hours before talks began, an Israeli official said the country would not withdraw from a strategic corridor in the Gaza Strip as called for under the ceasefire, a refusal that could severely complicate negotiations with Hamas and key mediator Egypt at a sensitive moment for the fragile truce. Overnight, Hamas released the remains

of four hostages in exchange for over 600 Palestinian prisoners, the last planned swap of the ceasefire's first phase. US President Donald Trump's Mideast envoy, Steve Witkoff, was expected in the region in the coming days. **Blatant violation:** An Israeli official, speaking on condition of anonymity in line with regulations, said the army needed to remain in the so-called Philadelphi corridor, on the Gaza side of the border with Egypt, to prevent weapons smuggling. Separately, Defense Minister Israel Katz said at a meeting with local leaders that he had seen tunnels penetrating the border on a recent visit to the corridor, without providing evidence or elaborating on Israel's plans. Egypt says it destroyed the smuggling tunnels from its side years ago and set up a military buffer zone to halt smuggling. Hamas said any Israeli attempt to maintain a buffer zone in the corridor would be a "blatant violation" of the ceasefire agreement. The militant group says that sticking to the agreement is the only way for Israel to secure the release of dozens of hostages still held in Gaza. Israel was supposed to begin withdrawing from the Philadelphi corridor on Saturday, the last day of the first phase, and complete it within eight days. There was no immediate comment about the corridor from Egypt, which is opposed to any Israeli presence on the Gaza side of its border. **Remains of 4 hostages identified:** The remains released Thursday were confirmed to be those of Ohad Yahalomi, Itzhak Elgarat, Shlomo Mantzur and Tachi Idan, according to the Hostages and Missing Families Forum, which represents families of the captives.

# China to send Pak astronaut as first foreign guest to its space station

**PTI ■ BEIJING/ISLAMABAD**  
China plans to send an astronaut from its ally Pakistan as the first foreign guest to its space station Tiangong. China and Pakistan on Friday signed an agreement including bilateral efforts to select and train Pakistani astronauts and then send some of them to Tiangong, currently orbiting 400 kilometres above the earth, China Manned Space Agency (CMSA) said in a news release here. The agreement to send the Pakistani astronaut in space was signed by the China Manned Space Agency (CMSA) and Pakistan's Space and Upper Atmosphere Research Commission (SUPARCO) at a ceremony attended by Pakistani Prime Minister Shehbaz Sharif in Islamabad, state-run China Daily reported. China has been launching satellites for Pakistan for the past few years to help its close ally. The Chinese space station, which has been in orbit for nearly four years, is regarded as a rival to Russia's international space station Mir, currently in orbit. China built Tiangong after the country was reportedly excluded from the International Space Station (ISS) over concerns that China's space programme is manned by its military, the People's Liberation Army (PLA). China's space station is also seen as a new field of competition between China and the US. The two robotic arms of the station, especially the long one which has the ability to grab objects including satellites from space, drew international concerns. China has earlier announced plans for the further development of space programmes, which included launching a manned lunar mission, construction of a lunar space station, exploration of habitable planets and extra-terrestrial life to expand its space programme in the next few decades. Deputy Director of the Chinese Manned Space Agency Lin Xiqiang told media here earlier that China plans to land astronauts on the moon before 2030 while the US plans to put its astronauts back on the lunar surface in 2025.

# Students-led political party to be launched amid unrest in Bangladesh

**PTI ■ DHAKA**  
Bangladesh on Friday is set to witness emergence of a political party led by students who spearheaded the 2024 street campaign that led to the toppling of the then prime minister Sheikh Hasina's Awami League regime. A large stage is ready in central Dhaka's Manik Mia Avenue for the launch of 'Jatiya Nagorik Party' or National Citizen Party (NCP) led by the key-figures of the Anti-Discrimination Student Movement, also called Students Against Discrimination (SAD). The Anti-Discrimination Student Movement led a mass uprising leading to the ouster of Hasina's over 15 years of rule on August 5 last year. Three days later, Muhammad Yunus assumed charge as the Chief Adviser of the Interim government, effectively the prime minister.

NCP leaders said they expected around 3,00,000 people, including students from across the country, at the launch event. "People from all the 64 districts are to join our inauguration alongside the family members of those who gave their lives in the July-August mass uprising," a spokesman of the new party's media cell said. "We have also invited the leaders of major political parties," he added. The new party is being launched with the blessings of Yunus, who took over as the Chief Adviser as the SAD nominee in August 2024. NCP leaders said Yunus was also invited to their launch ceremony. The other high-profile invitees include Bangladesh Nationalist Party (BNP) chairperson and ex-premier Khaleda Zia; her son and acting BNP chairperson Tarique Rahman; BNP secretary general Mirza Fakhrul Islam Alamgir; Jamaat-

e-Islami ameer Shafiqur Rahman, and leaders of several Islamic, rightist and leftwing parties and groups. BNP had earlier expressed scepticism about the neutrality of the Yunus' interim administration ahead of expected general elections in December this year, particularly after he extended his support for the proposed student-led party while three of their representatives were serving as advisers, equivalent to ministers, in his government. One of the advisers, entrusted with the portfolio of information ministry, Nahid Islam, however, resigned earlier this week to head the NCP amid the criticism that the new party was being floated using the advantage of being part of the government. A recent UN fact-finding report suggested politicised actions during the uprising and subsequent violence claimed nearly 1400 lives. Bangladesh witnessed a resurgence of unrest since February 5 this year when protestors burned and demolished the residence of the country's founding father Sheikh Mujibur Rahman, coinciding with her daughter Hasina's previously announced virtual address to students from India. The protestors set on fire or ransacked the houses and business establishments of the Awami League leaders and supporters across the country. Bangladesh's security forces have arrested over 8,600 people in a two-week crackdown named 'Operation Devil Hunt' that targeted gangs allegedly linked with the ousted Hasina government. The arrests came amid growing concerns about rising crime levels, particularly in Dhaka, with police saying the number of robberies had doubled since January last year.

# Quake rattles Kathmandu

**PTI ■ KATHMANDU**  
At least four people were injured in Kathmandu and elsewhere due to a strong earthquake in the neighbouring Sindhupalchowk district early Friday morning. The quake measuring 6.1 magnitude was recorded at 2.51 am with its epicentre at Bhairabkunda, Sindhupalchowk district, 65 km east of Kathmandu, according to the National Earthquake Monitoring and Research Centre. Some houses in Sindhupalchowk district developed cracks after the tremor hit the district. Besides Kathmandu valley, the earthquake was also felt by people in southern and eastern Nepal, according to officials. The earthquake prompted many people in Kathmandu and nearby areas to come out of their houses in panic. Two people were injured in Kathmandu while an inmate of Chautara prison was injured as he tried to escape following the earthquake. An elderly man was injured in a village in Sindhupalchowk district as he tried to exit his house soon after the earthquake, officials said. Nepal lies in one of the most active tectonic zones, making the Himalayan nation extremely vulnerable to earthquakes. The worst quake it has so far witnessed was in April 2015 when a 7.8 magnitude quake killed more than 9,000 people and damaged over 1 million structures.

# 5 killed, 20 hurt in Pak mosque blast

**PTI ■ PESHAWAR**  
A powerful blast killed at least five people and injured 20 others during Friday prayers at a mosque in north-west Pakistan's restive Khyber Pakhtunkhwa province ahead of the fasting month of Ramadan, police said. The blast claimed the life of Hamidul Haq Haqqani, chief of his own faction of the Jamiat Ulema Islam (JUI) and caretaker of the Madrasa-e-Haqqania, located in Akora Khattak town

of Nowshera district, Chief Secretary Shahab Ali Shah confirmed. Born in 1968, Hamidul Haq became chief of his JUI (Sami Group) after the death of his father Maulana Sami ul Haq. IGP, Khyber Pakhtunkhwa, Zulfiqar Hameed said the blast is suspected to be a suicide bombing and Hamidul Haq appeared to be the target. "We had provided six security guards to Hamidul Haq," he said. DPO Nowshera district Abdur Rasheed said the blast occurred during 'Jumma' prayer. The Darul Uloom Haqqania madrasa propagates the Hanafi Deobandi school of Sunni Islam. It was founded by Maulana Abdul Haq along the lines of the Darul Uloom Deoband seminary in India, where he had taught. It has been dubbed the "University of Jihad" due to its methods and content of instruction, along with the future occupations of its alumni. A number of leading members of the Taliban, including

former chief Akhtar Mansour, studied here. Rescue teams rushed to the site and removed the bodies and evacuated the injured to the hospital. An emergency was declared in both Nowshera and Peshawar hospitals. Khyber Pakhtunkhwa Chief Minister Ali Amin Gandapur and Governor Faisal Karim Kundi have condemned the suicide blast. The Jamiat Ulema-e-Islam leaders have appealed for blood donation for the injured.

# Russian, US diplomats meet in Istanbul

**PTI ■ ISTANBUL**  
Russian and US diplomats met in Istanbul on Thursday to discuss normalising the operation of their respective embassies after years expelling each others' diplomats. Kremlin spokesman Dmitry Peskov said the talks followed an understanding reached during President Donald Trump's call with Russian President Vladimir Putin and contact between senior Russian and US diplomats and other officials in Saudi Arabia. Speaking during Thursday's

meeting of the Federal Security Service, Putin hailed the Trump administration's "pragmatism and realistic view" compared with what he described as the "stereotypes and messianic ideological clichés" of its predecessors. "The first contacts with the new US administration encourage certain hopes," Putin said. "There is a mutual readiness to work to restore relations and gradually solve a colossal amount of systemic strategic problems in the global architecture." Putin said that "part of Western elites are still determined to

maintain global instability" and could try to "disrupt or compromise the dialogue that has begun," adding that Russian diplomats and security agencies should focus their efforts on thwarting such attempts. **Return to civilised communication:** In Riyadh, Moscow and Washington agreed to start working toward ending the war in Ukraine and improving their diplomatic and economic ties. That includes restoring staffing at embassies, which in recent years were hit hard by mutual expulsions of large numbers of diplomats, closures of offices, and other

# Panama, Costa Rica turning into 'black hole' for migrants, deportees from US, observers warn

**PTI ■ MIRAMAR (PANAMA)**  
Officials in Costa Rica and Panama are confiscating migrants' passports and cell-phones, denying them access to legal services and moving them between remote outposts as they wrestle with the logistics of a suddenly reversed migration flow. The restrictions and lack of transparency are drawing criticism from human rights observers and generating increasingly testy responses from officials, who say their actions are aimed at protecting the migrants from human traffickers. Both countries have received hundreds of deportees from

various nations sent by the United States as President Donald Trump's administration tries to accelerate deportations. At the same time, thousands of migrants shut out of the US have started moving south through Central America — Panama recorded 2,200 so far in February. "We're a reflection of current United States immigration policy," said Harold Villegas-Román, a political science professor and refugee expert at the University of Costa Rica. "There is no focus on human rights, there is only focus on control and security. Everything is very murky, and not transparent." **Deportations and reversed**

migration: Earlier this month, the US sent 299 deportees from mostly Asian countries to Panama. Those who were willing to return to their countries — about 150 to date — were put on planes with the assistance of United Nations agencies and paid for by the US. Carlos Ruiz-Hernandez, Panama's deputy foreign minister, said Thursday a small number are in contact with international organisations and the UN Refugee Agency as they weigh whether to seek asylum in Panama. "None of them wants to stay in Panama. They want to go to the US," he said in a phone interview from Washington. "We cannot

give them green cards, but we can get them back home and for a short period of time provide them with medical and psychological support as well as housing." Despite Trump's threats to retake control of the Panama Canal, he said Panama had not acted under US pressure. "This is in Panama's national interest. We are a friend of the US and want to work with them to send a signal of deterrence." Ruiz-Hernandez said some of the deportees remaining in Panama would be given the option of staying at a shelter originally set up to handle the large number of migrants moving north through the Darien

Gap. One Chinese deportee currently detained in the camp, who spoke on the condition of anonymity to avoid repercussions, said she wasn't given a choice. She was deported to Panama without knowing where they were being sent, without signing deportation documents in the US and without clarity of how long they would be there. She was among the deportees who were moved from a Panama City hotel where some held up signs to their windows asking for help to a remote camp in the Darien region. Speaking to the AP over messages on a cellphone she kept hidden, she said authorities con-

fiscated others' phones and offered them no legal assistance. Others have said they've been unable to contact their lawyers. "This deprived us of our legal process," she said. Panama President Jose Raul Mulino, asked about the lack of access to legal services on Thursday, questioned the idea that migrants would even have lawyers. "Doesn't it seem like a coincidence that those poor people have lawyers in Panama?" Mulino said. **Black hole for deported migrants:** Costa Rica and Panama have so far denied press access to facilities where they are holding migrants. Panama had initially invited journalists to the Darien this week, but ultimately canceled the visit. "Panama cannot end up becoming a black hole for deported migrants," said Juan Pappier, deputy director of Human Rights Watch in the Americas. "Migrants have the right to communicate with their families, to seek lawyers and Panama must guarantee transparency about the situation in which they find themselves." Costa Rica has faced similar criticisms from the country's independent human rights entity, which has raised alarm over "failures" by authorities to guarantee proper conditions for deportees arriving.

# GDP growth rate 6.2 per cent in Q3

**PTI ■ NEW DELHI**  
India's economic growth rate decelerated to 6.2 per cent in the October-December quarter this fiscal, mainly due to poor performance by mining, manufacturing and all other sectors, with the exception of agriculture. However, on a sequential basis, the economic growth rate in the third quarter showed improvement over 5.6 per cent recorded in the second quarter. The GDP (gross domestic product) growth was 9.5 per cent in the October-December 2023 quarter, according to the data released by the National Statistical Office (NSO) on Friday. It also released the second advance estimate for the current fiscal and pegged the

economic growth at 6.5 per cent against 6.4 per cent estimated in the first advance estimate released in January. The manufacturing sector's output growth, as per the gross value added (GVA), in the third quarter dipped to 3.5 per cent from 14 per cent in the year-ago period. Mining and quarrying production growth slowed to 1.4 per cent in the third quarter from 4.7 per cent a year ago. The construction sector growth too slipped to 7 per cent from 10 per cent a year ago. However, the output of the farm sector increased by an impressive 5.6 per cent during the quarter compared to a growth of 1.5 per cent in the year-ago period. The national accounts data showed that the electricity, gas, water supply, and other

utility services segment grew 5.1 per cent in the third quarter against 10.1 per cent a year earlier. The GVA growth in the services sector – trade, hotel, transport, communication and services related to broadcasting – was 6.7 per cent during the third quarter against 8 per cent. Financial, real estate and professional services grew by 7.2 per cent in the third quarter over 8.4 per cent earlier. Public administration, defence and other services posted 8.8 per cent growth, marginally up from 8.4 per cent in the third quarter of the last fiscal. "Real GDP or GDP at Constant Prices is estimated to attain a level of ₹187.95 Lakh Crore in the financial year 2024-25, against the First Revised Estimate of

GDP for the year 2023-24 of ₹176.51 Lakh Crore. The growth rate in Real GDP during 2024-25 is estimated at 6.5 per cent as compared to 9.2 per cent in 2023-24," the NSO statement said. According to the statement, nominal GDP or GDP at Current Prices is estimated to attain a level of ₹331.03 Lakh Crore in 2024-25 against Rs 301.23 lakh crore in 2023-24, showing a growth rate of 9.9 per cent. The real GDP or GDP at Constant Prices in Q3 of FY 2024-25 is estimated at ₹47.17 Lakh Crore over ₹44.44 Lakh Crore in Q3 of FY 2023-24, showing a growth rate of 6.2 per cent, it added. The nominal GDP or GDP at Current Prices in Q3 of FY 2024-25 is estimated at ₹84.74 Lakh Crore against ₹77.10 Lakh Crore in Q3 of

FY 2023-24, registering a growth rate of 9.9 per cent. The NSO revised upwards the GDP growth for 2023-24 to 9.2 per cent from 8.2 per cent estimated earlier. "Real GDP or GDP at constant (2011-12) prices for the years 2023-24 and 2022-23 stands at ₹176.51 Lakh Crore and ₹161.65 Lakh Crore, respectively, showing a growth of 9.2 per cent during 2023-24 compared to a growth of 7.6 per cent during 2022-23," it said. Per Capita Income i.e. Per Capita Net National Income at current prices is estimated at ₹1,69,145 and ₹1,88,892 respectively for 2022-23 and 2023-24, it noted. The NSO has also revised GDP estimates for the first and second quarters of this fiscal to 6.5 and 5.6 per cent from 6.7 per cent and 5.4 per cent, respectively.

Chief Economic Adviser V Anantha Nageswaran

## Expenditure at Maha Kumbh to push GDP growth in Q4: CEA

**PTI ■ NEW DELHI**  
A significant pick up in the government capex and additional expenditure linked to Maha Kumbh congregation are expected to push the fourth quarter GDP growth to 7.6 per cent, required to achieve an overall economic expansion of 6.5 per cent in the current fiscal, Chief Economic Adviser V Anantha Nageswaran said on Friday. Briefing media on the third quarter GDP number, he said the data released by the National Statistics Office (NSO) augurs well, and the upwardly revised 6.5 per cent GDP estimate for the current financial year is realistic. During the third quarter ended December 2024, India's economic growth rate decelerated to 6.2 per cent against 9.5 per cent a year ago, mainly due to poor performance by mining, manufacturing and all other sectors, except agriculture. NSO also released the second advance estimate for the current fiscal and pegged the economic growth at 6.5 per cent against 6.4 per cent estimated in the first advance estimate released in January. To achieve 6.5 per cent growth, India's GDP has to

grow at 7.6 per cent in the fourth quarter, which, according to experts, is optimistic. Nageswaran noted that 7.6 per cent growth is realistic and can be achieved during the fourth quarter. "There are some good developments, such as a very significant pickup in government capex and the additional expenditure that we are seeing happening because of the foothills in Maha Kumbh... That we have been seeing," he said. Amidst external negative factors, he said, there are incremental positive factors, making a good case for implied growth of 7.6 per cent being attained in the fourth quarter. Asked about the stock market fall, he said looking at the long-term prospects of the Indian economy compared to other places and looking at the historical track record of the Indian market, one shouldn't be over-interpreting the near-term numbers. Benchmark indices Sensex and Nifty tumbled nearly 2 per cent on Friday, mirroring deep losses in global markets as the latest announcement of an additional 10 per cent tariff on Chinese products

rattled investors. He also said that the Indian economy is on the verge of crossing \$4 Trillion in FY25. Nominal GDP or GDP at current prices is estimated to attain a level of ₹331.03 Lakh Crore in the year 2024-25, against ₹301.23 Lakh Crore in 2023-24, showing a growth rate of 9.9 per cent. About inflation, Nageswaran said, it is trending down. He further said that the near-term global economic outlook is influenced by the trade policies of major economies amid a slowing disinflation. Despite the uncertain global outlook, he said, India's economic momentum is expected to be sustained, driven by strong rural demand and a revival in urban consumption. The robust kharif production and better rabi sowing, coupled with higher reservoir levels and seasonal winter correction in vegetable prices, augur well for food inflation going forward, he said. The Union Budget's emphasis on agriculture, MSMEs, investment, and exports is likely to enhance India's medium-term economic prospects, he added.

Union Minister Piyush Goyal during a meeting with EU Trade Commissioner Maros Sefcovic, in New Delhi  
PTI

## India, EU discusses progress of FTA

**PTI ■ NEW DELHI**  
India and the European Union (EU) on Friday discussed the progress of negotiations on the proposed free trade agreement (FTA), aimed at boosting two-way commerce and investments. The agreement was discussed during a meeting between Commerce and industry Minister Piyush Goyal and European Commissioner for Trade and Economic Security Maros Sefcovic here. "Had a candid and insightful discussion with EU Trade Commissioner Maros Sefcovic over breakfast today on the India-EU FTA and the progress of the Trade and Technology Council. Exciting times ahead as we work towards elevating our trade and investment ties to the next level as trusted partners," Goyal said in a post on X. Sefcovic is accompanying European Commission President Ursula von der Leyen, who is here on an official visit with the EU College of Commissioners or senior political leaders of the bloc. The meeting assumes significance as the senior officials of the two sides are scheduled to hold the tenth round of negotiations for the FTA from March 10-14 in Brussels. In January this year, Goyal was in Brussels to meet the European Commissioner for Trade to take stock of the

progress of the talks. Further strengthening of economic ties between the two is crucial in light of the threat from US President Donald Trump to impose higher tariffs. In the current uncertain global economic situation, India is the fastest growing major economy. It is projected to grow at 6.4 per cent in 2024-25. In the ninth round, India and the EU discussed trade issues covering goods, services, investment and government procurement along with necessary rules such as rules of origin, SPS (sanitary and phytosanitary), and technical barriers to trade. In June 2022, India and the 27-nation EU bloc resumed the negotiations after a gap of over eight years. It stalled in 2013 due to differences over the level of opening up of the markets. Besides demanding significant duty cuts in automobiles, the EU wants tax reduction in wines, spirits and a strong intellectual property regime. Indian goods' exports to the EU, such as ready-made garments, pharmaceuticals, steel, petroleum products, and electrical machinery, will become more competitive, if the pact gets concluded successfully. India is also seeking data security status for the IT sector. The lack of this status has prevented the flow of sensitive information to

India, a big deal for its IT industry. India's bilateral trade in goods with the EU was \$137.41 Billion in 2023-24 (exports \$75.92 Billion, imports \$61.48 billion), making it the largest trading partner of India for goods. The EU market accounts for about 17 per cent of India's total exports, while the EU's exports to India make up 9 per cent of its total exports. In addition, the bilateral trade in services, in 2023, between India and the EU was estimated at \$51.45 Billion. The agreement is aimed at further boosting bilateral trade and investments between the two. The two sides are negotiating a free trade agreement, an investment protection agreement and an agreement on geographical indications (GIs). A GI is primarily an agricultural, natural or manufactured product (handicrafts and industrial goods) originating from a definite geographical territory. Typically, such a name conveys an assurance of quality and distinctiveness, which is essentially attributable to the place of its origin. According to the economic think tank GTRI, in FY24, the EU exported \$416 Million worth of wine to India. Its automobile and auto parts exports exceeded \$2 Billion, including \$416 Million in fully built-up (CBU) vehicles.

## RBI conducts forex swap worth \$10 Billion

**PTI ■ MUMBAI**  
The Reserve Bank on Friday conducted US dollar-rupee swap worth \$10 Billion for injecting long-term liquidity in the system, with the auction eliciting robust demand. The settlement of auction will take place on March 4 and March 6. The USD/INR Buy/Sell swap auction for a tenor of 3 years was oversubscribed 1.62 times. The Reserve Bank of India (RBI) said it received 244 bids during the auction and 161 of them were accepted for amount totalling \$10.06 Billion. The auction comes in the backdrop of rupee trading at 87.46 against the US dollar amid global uncertainties. The swap was in the nature of a simple buy/sell foreign exchange swap from the Reserve Bank side. A bank shall sell US dollars to the Reserve Bank and simultaneously agree to buy the same amount of US dollars at the end of the swap period. While announcing the swap auction last week, the RBI had said: "In order to meet the durable liquidity needs of the system, the Reserve Bank has decided to inject Rupee liquidity for longer duration through long-term USD/INR Buy/Sell swap. Accordingly, the Reserve Bank will be conducting a USD/INR Buy/Sell swap auction of \$10 Billion for a tenor of 3 years." In January also, the RBI had announced liquidity injection worth over ₹1.5 Lakh Crore through different instruments, including \$5 Billion forex swap. The rupee declined 28 paise to 87.46 against the US dollar on Friday.

The sector's contribution to the state's non-tax revenue continues to grow, with mining royalties projected to generate 19,300 Crore for FY 2024-25, reflecting a 20 per cent increase compared to the revised estimates from the previous fiscal year," the survey tabled in the Assembly by Jharkhand Finance minister Radhakrishna Kishore said. However, despite Jharkhand's vast mineral wealth, the mining sector directly employs only around 20,000 workers, indicating the need to operationalise inactive mines to expand job opportunities and fully leverage the state's resource potential, it said. The mining sector plays a crucial role not only in revenue generation but also in ensuring the state's industrial growth and employment. "To further optimise revenue and improve the efficiency of

## Jharkhand Economic Survey estimates mining royalties will fetch ₹19,300 Crore

**PTI ■ RANCHI**  
Projecting robust mining growth to be a key driver of the state's economic development, Jharkhand Economic Survey on Friday estimated mining royalties will fetch ₹19,300 Crore in the ongoing fiscal. The total value of mineral production in Jharkhand as of March 2024 stood at approximately ₹75,358 Crore, underscoring the state's rich reserves of coal, iron ore, and bauxite, it said. As a state endowed with approximately 40 per cent of India's total mineral resources, Jharkhand holds significant reserves of coal, iron ore, copper, and uranium, making it a pivotal contributor to the nation's mineral production. "In the fiscal year 2024-25, Jharkhand's mining sector has continued to demonstrate robust growth, solidifying its role as a key driver of the state's economic development.

operations, Jharkhand is actively studying the successful mining models of states like Odisha," the survey said. It said NTPC mining has reported remarkable coal production, exceeding 19 million tonne (MT) in the first half of FY 2024-25, reflecting a 20 per cent year-over-year growth. This significant output has strengthened the energy sector by ensuring fuel security for thermal power plants across the country, further reinforcing Jharkhand's position as a leading coal-producing state. The survey said that in line with its commitment to sustainable development, the Department of Mines and Geology has emphasised the importance of value addition, local processing, and promoting downstream industries to generate employment and boost local economies.

## Centre's fiscal deficit touches 74.5 per cent

**PTI ■ NEW DELHI**  
The Centre's fiscal deficit touched 74.5 per cent of the annual target at the end of January 2025, according to the data released by Controller General of Accounts (CGA) on Friday. In absolute terms, the fiscal deficit for the financial year ending March 2025 is estimated at ₹15.69 Lakh Crore. According to the data, ₹10,74,179 Crore has been transferred to state governments as devolution of share of taxes by Government of India up to January, which is ₹2,53,929 Crore higher than the previous year. Out of the total revenue expenditure (₹28.12 Lakh Crore), ₹8,75,461 Crore was on account of interest payments and ₹3,37,733 Crore on account of major subsidies. Commenting on the CGA data, Aditi Nayar, chief economist, ICRA, said revenue expenditure rose by 5.1 per cent year-on-year in January 2025, whereas capital expenditure surged by about 51 per cent, which would augur well for economic activity in the ongoing quarter.

for 2024-25 has been pegged at 4.8 per cent of GDP (lower than earlier estimate of 4.9 per cent) and at 4.4 per cent for 2025-26. In absolute terms, the fiscal deficit for the financial year ending March 2025 is estimated at ₹15.69 Lakh Crore. According to the data, ₹10,74,179 Crore has been transferred to state governments as devolution of share of taxes by Government of India up to January, which is ₹2,53,929 Crore higher than the previous year. ## KCC as a Financial Identity: The key to transparent a MSP

Binod Anand ■ NEW DELHI

For years, Indian farmers have struggled with inadequate credit access, inefficient procurement systems, and bureaucratic delays in government support. The Kisan Credit Card (KCC), introduced in 1998 under Union Agriculture Minister Sompal Shastri, was a pioneering initiative, however, in today's fast-evolving financial ecosystem, the KCC must evolve into a multi-purpose tool integrating procurement, production planning, and financial empowerment. Under the leadership of Prime Minister Narendra Modi and Home Minister Amit Shah, India is undergoing a

transformation in rural finance through cooperative reforms, digitalisation, and advanced technology like blockchain. KCC is no longer just a borrowing mechanism—it is being envisioned as a financial identity for farmers, ensuring transparent MSP payments, streamlined subsidy disbursements, and efficient procurement planning. Integrating blockchain technology into the KCC system will enable every transaction—from seed purchase to final sale—to be recorded in a tamper-proof ledger. This will provide real-time production data to agencies like the Food Corporation of India (FCI), allowing them to make advance procurement decisions. As a result, market prices will stabilise, middlemen exploitation will reduce, and farmers will receive fair prices. Blockchain-enabled traceability will also enhance food safety, boost export potential, and help policymakers tailor

interventions based on regional crop patterns. With better data analytics, the government can plan input subsidies, allocate irrigation resources, and predict future demand more efficiently. Transforming KCC into an Aadhaar-linked, chip-enabled smart card can turn it into a real-time financial education tool. Farmers will receive SMS alerts, mobile app notifications, and updates through local extension centers about loan eligibility, repayment schedules, interest subsidies, and market trends. Enhancing financial literacy will improve credit discipline and open avenues for new financial products such as savings accounts, pension schemes, and insurance policies. A financially aware farmer is better positioned to handle market risks, invest in technology, and reduce dependence on informal credit sources. Beyond agricultural finance, KCC can serve as a credit card for farmers' daily consumer needs. Currently, small and

marginal farmers lack access to formal credit for personal consumption, forcing them to rely on high-interest informal loans. Expanding KCC's scope within the financial ecosystem will enable farmers to use it for essential purchases, education, healthcare, and household expenses. A chip-enabled KCC with UPI integration will allow digital payments at local stores, ATM withdrawals, and online shopping for agricultural inputs. This will bridge rural-urban financial gaps and give farmers the same financial privileges as urban consumers. Moreover, building credit history through KCC transactions will facilitate higher-value loans for farm expansion, mechanization, and allied activities like dairy and fisheries. A key grievance of farmers regarding MSP is delayed payments, lack of transparency, and middlemen interference. A blockchain-enabled KCC system will directly link MSP procurement with farmers' bank accounts,

ensuring instant payments without deductions. Real-time tracking of procurement will enable farmers to monitor transactions, understand the accepted quantity, and know the payment status, bringing accountability to the system. Additionally, integrating mandi prices with the KCC portal will help farmers make informed selling decisions, choosing between MSP procurement, private buyers, or direct-to-consumer markets based on prevailing rates. Expanding the role of multi-purpose cooperative societies will transform PACS from mere lending institutions into procurement hubs, storage centers, and rural banking service providers. This will reduce reliance on commercial banks and empower farmers through local financial institutions. Furthermore, the increase in collateral-free loan limits to ₹5 Lakh and interest subvention schemes reducing rates to 4 per cent per annum will make credit more accessible and

affordable for small farmers and tenant cultivators. KCC is poised to become the financial backbone of Indian agriculture—integrating banking, credit, procurement, and production planning into a single, seamless platform. A chip-enabled, Aadhaar-linked KCC will provide financial security, transparent MSP payments, seamless subsidy transfers, and direct market access. The integration of blockchain, direct benefit transfers (DBT), and smart financial tools will ensure that no farmer is left behind. The next revolution in Indian agriculture will be driven by technology-powered financial empowerment. India must accelerate this transformation to ensure that all 140 million farmers benefit from this financial revolution. The future of Indian agriculture depends on it—and the time to act is now. (The writer is a Secretary General CNRI and Member, High Power Committee on MSP and Agriculture Reforms, Government of India)

## INBRIEF

### NATIONAL SCIENCE DAY CELEBRATIONS AT VIT-AP

**AMARAVATI:** National Science Day was celebrated grandly at VIT-AP to commemorate the discovery of Raman effect. Chief guest, Mandava Jagadish, Chief Technology Officer of Amara Raja Batteries Ltd graced the event. Hundreds of students from colleges in and around Vijayawada and Guntur visited the campus enthusiastically to participate in various events aimed at promoting scientific zeal and temperament including the expert talks on Li-ion battery industry by Amara Raja Battery scientists.

### PFC SIGNS MOU WITH GOVERNMENT OF MADHYA PRADESH AT GLOBAL INVESTORS SUMMIT 2025

Power Finance Corporation Limited (PFC) has signed a Memorandum of Understanding (MoU) with the Government of Madhya Pradesh to extend financial assistance of ₹26,800 Crores to the State's power utilities. This funding will support capital expenditure projects for entities such as Madhya Pradesh Power Generation Company Limited (MPPGCL), Madhya Pradesh Power Transmission Company Limited (MPPTCL), and MP DISCOMS.

## Chromalogue: Art in Every Shade

BY TEAM VIVA

Colours hold memories, emotions and unspoken stories. At Chromalogue - Colours & Conversations, they take centre stage, shaping a dialogue beyond words. The group exhibition presented by The Art Exchange Project and curated by Aarti Uppal Singla, brings together 15 artists who use colour as their language, creating an immersive experience where shades and textures communicate in their own quiet yet powerful way.

softens the senses, creating a quiet space within. Babita Varma's Aswan, sculpted in clay on wood, and Kripal Mathur's Spring Dance, work with hand-dyed goat's wool, show that colour is not just seen, it is felt.

The exhibition stretches further into digital and graphic precision. Khushroo Kalyanwala's The Blues That Bring Cheer across fine paper, while Sushil Basin's Trance Dance moves with an almost hypnotic rhythm. Pragati Gupta's Paws-1, a pen drawing on textured paper, proves that even in black and white, colour is imagined.

Chromalogue is a celebration of this language, a space where colours speak and those who listen will hear.

The gallery becomes a world of shifting moods and narratives. Neesh's Echoes of Dawn 1 fills the space with deep blues, evoking the quiet beauty of early mornings. Aarti Uppal Singla's Lotus Pond 1 captures resilience in soft yet striking tones.

Silence Speaks in Colour by Madhav Bhardwaj invites viewers to listen beyond the visible, while Portal of Peace by Himani Pasricha offers a sense of stillness. Nikita Gambhir's Smell the Coffee warms the senses, drawing on the simple joys of everyday life. These works do not just exist on the wall, they engage, they invite and they stay with those who witness them.

Beyond paint, mixed media adds depth and dimension. Priya Bery's Poppies: The Intoxicators bursts with life on Waterford paper, while Winnie Singh's Meditative Reveries 9

## Patience in Every Cut

THE EXHIBITION CAPTURES THE HUMAN EXPERIENCE, OUR CONNECTION WITH NATURE, THE PASSAGE OF TIME AND THE PATIENCE REQUIRED TO SHAPE BEAUTY FROM RESISTANCE, MUCH LIKE LIFE ITSELF

Marble has a way of holding stories within its veins, waiting for the right hands to bring them to life. Rhythmic of Marble, the solo exhibition by Amit Singh at Triveni Kala Sangam, was a breathtaking display of patience, devotion and an artist's relentless pursuit of expression.

Amit Singh's work is about preserving the delicate balance between nature and human intervention. When asked about the concept behind his exhibition, he spoke with a quiet intensity. "Nature has always been my priority," he said. "My work is about our connection with it."

Each sculpture told a different story, some reflecting the tranquillity of nature, others capturing its raw beauty. His intricate carvings on marble ranged from smooth, flowing forms that mimicked water's grace to bold, angular pieces that seemed to resist time itself. The detailing was mesmerising, delicate veins running through stone, each mark a reminder of the patience and precision it took to create.

His Nature Series was particularly striking, with sculptures inspired by the elements, wind, water, and earth, translated into marble with astonishing delicacy. The dedication behind the exhibition was staggering. Singh revealed that it took him five years to complete the entire body of work. "Some pieces were done in minutes," he admitted. "A simple idea, a quick execution. But others, some marble works

demanding days, even weeks. Patience is the key."

His favourite piece? He smiled at the question. "That's like asking a parent to choose their favourite child," he said. "Every sculpture is a part of me."

The sculptures seemed to hold an unspoken dialogue with their surroundings. Natural light filtered through, casting shifting shadows on the marble, adding depth and movement to the stillness. The play of light and texture gave each piece a different life depending on the time of day, a quiet reminder of the ever-changing nature of art and perception.

Beyond the aesthetic, Singh's work carried an undeniable emotional weight. Some pieces felt serene, almost meditative. Others had a raw intensity, as though the stone itself resisted the chisel before surrendering to form. His ability to extract such depth from a material as unyielding as marble was nothing short of extraordinary.

At a time when mass production dominates, Singh's art stands as a craftsmanship that cannot be rushed. His exhibition was an experience, a moment of stillness in a world that rarely pauses. As I left, I couldn't help but glance back one last time. The sculptures stood there, unmoving yet alive, each a quiet reminder of the hands that

MARBLE, BOTH FRAGILE AND ENDURING, MIRRORS HUMAN EXISTENCE, SHAPED BY TIME, PATIENCE AND THE ARTIST'S SKILLED HANDS

had shaped them, the time they had endured and the stories they would continue to tell long after the exhibition ended.

## Experience the evolution of art

At India Design 2025 in New Delhi, Masha Art reinterprets artistic heritage through bold experimentation, transforming tradition into a dynamic, sensorial experience, says SAKSHI PRIYA

Art has always been a reflection of time, culture and identity. At India Design 2025, an exhibition brings this idea to life in a way that feels both rooted in tradition and open to reinvention. Walking through the space, the artworks create a sense of connection between past and present, between intricate craftsmanship and bold contemporary expression. It is a meeting point of heritage and innovation, where stories unfold through colour, form and texture.

The collection, curated with a thoughtful eye, features works by 21 artists including Seema Kohli, Chandrashekar Morkondo and Sanjay Chakraborty. Every piece feels like a conversation, one that speaks of history, personal narratives and the evolving artistic language of the sub-continent. Some paintings draw from mythology, their golds and deep blue's reminiscent of temple murals, while others break away from convention with striking abstraction. The sculptures add another dimension, their forms shifting between realism and imagination, inviting the viewer to explore beyond the surface.

There is an undeniable energy in the way these works come together.

A painting depicting a celestial dance, its intricate lines almost breathing on canvas, sits beside an abstract piece where colour dominates form, challenging perception. A sculptural installation nearby, crafted from repurposed materials, transforms discarded objects into something unexpected and powerful. The juxtaposition of mediums and styles creates a dynamic interplay, one that encourages curiosity and dialogue.

Some pieces invite stillness, their subtle shade and delicate strokes evoking a quiet reverence for nature and tradition. Others disrupt

this calm with bold, unrestrained strokes of pigment, where movement and emotion take precedence over precision. The diversity in expression makes the exhibition feels alive, constantly shifting in meaning depending on who is viewing it.

Samarth Mathur, the mind behind this showcase, describes art as an investment in culture and creativity. His approach moves beyond traditional curation, treating each

piece as part of a larger dialogue. This is not art placed on walls to be admired from a distance, it is art meant to be lived with, engaged with and understood.

The exhibition respects artistic heritage but does not hesitate to push boundaries. It does not try to define what Indian art should be, instead offering a glimpse into what it can become.

A DYNAMIC INTERPLAY OF TRADITION AND INNOVATION, WHERE 21 ARTISTS REDEFINE ARTISTIC BOUNDARIES THROUGH COLOR, FORM AND TEXTURE

DESIGN IS NOT ONLY ABOUT AESTHETICS, IT IS ABOUT CREATING MEANING. THIS EXHIBITION BRINGS ART TO LIFE

# Hockey India unveils performance-based system for national championship

PTI ■ NEW DELHI

Hockey India on Friday unveiled a new format with a promotion and relegation system for the Senior Women's National Championship to be held in Panchkula from March 1 to 12. The competition will feature 28 teams divided into three divisions titled 'A', 'B' and 'C'. The new format aims to enhance competition but also provides intends to provide a pathway for teams to ascend to higher divisions or risk relegation based on their performances.

"The introduction of the promotion and relegation system is a significant step in raising the standard of hockey across the country," Hockey India President Dilip Tirkey said.

"It ensures that every match in the Championship holds importance, whether it's a battle for the title or to avoid relegation. We look forward to an exciting tournament where teams can showcase their skills and aim for the top."

The top 12 teams will compete in Division A which will be further split into four

pools of three teams each and will play in a league format within their respective pools. The top two teams from each pool will advance to the quarterfinals, scheduled for March 9, followed by the semifinals on March 10 and the final and 3rd/4th place play-off on March 12. The bottom two teams will be

relegated to Division B for the next edition. Nine teams will compete in Division B, with the goal of earning promotion to Division A. Here, five teams are in Pool A and four are in Pool B. "The top two teams will earn promotion to Division A for the next season, while the

bottom two will be relegated to Division C. No knockout rounds will be held in Division B; the league standings will determine promotions and relegations," HI said. Seven teams in Division C will vie for promotion to Division B which will have three teams in Pool A and

four in Pool B. Division C will also only play league matches, with the top two teams securing promotion to Division B. During the league stage, teams in all three divisions will earn points based on their performance. Each team will be awarded three points for a win, one point for a draw, and

no points for a loss.

In Division A, the league stage will culminate with the knockout rounds, while Divisions B and C will conclude with final standings determined solely by league matches.

**Division A**

**Pool A:** Hockey Haryana, Hockey Association of Odisha, Hockey Karnataka

**Pool B:** Hockey Maharashtra, Manipur Hockey, Hockey Punjab

**Pool C:** Hockey Jharkhand, Hockey Mizoram, Hockey Unit of Tamil Nadu

**Pool D:** Hockey Madhya Pradesh, Hockey Bengal, Uttar Pradesh Hockey

**Division B**

**Pool A:** Telangana Hockey, Hockey Uttarakhand, Assam Hockey, Hockey Rajasthan, Hockey Association of Bihar

**Pool B:** Delhi Hockey, Chhattisgarh Hockey, Hockey Chandigarh, Hockey Himachal

**Division C**

**Pool A:** Kerala Hockey, Dadra and Nagar Haveli and Daman and Diu Hockey, Hockey Gujarat

**Pool B:** Hockey Andhra Pradesh, Le Puducherry Hockey, Hockey Arunachal, Hockey Jammu and Kashmir.

# Praggnanandhaa draws against Gurel Ediz

PTI ■ PRAGUE

Grandmaster R Praggnanandhaa played out a second straight draw against Turkey's Gurel Ediz while Arvindh Chithambaram crashed through the defences of Germany's Vincent Keymer in the second round of the Prague Masters here. Chithambaram, who has been knocking hard on the doors of elite circles, scored his first victory with black pieces after squeezing himself out of danger zone in his first-round game against Czech Grandmaster Nguyen Thai Dai Van.

The Indian was involved in the sole decisive game of the day in the 10-players round-robin format, while the other matches ended in draws. Dai Van drew his second game on the trot with Sam Shankland of the United States, top seeded Wei Yi from China opened his account after splitting the point with Dutchman Anish Giri, and Quang Leim Le of Vietnam achieved the same result against Navara David from Czech Republic.

With seven rounds to go, Chithambaram joined Shankland in lead on 1.5 points out of two games. They are followed by Giri, Le, Dai Van, David, Keymer and Praggnanandhaa.

Ediz and Wei Yi share the last spot on a half point apiece from their two games. On a day when world champion Boris Spassky breathed his last, Chithambaram's victory had traits of the Russian's style of play to go for the kill at the first opportunity and not let it slip.

The Queen's gambit accepted may have a solid reputation with black pieces but the young Indian cavalry is all out to breakout of that stereotype. How else could one explain Chithambaram's choice of move order that gave white the

luxury of a dynamic centre?

It was an inch-by-inch invasion that won Chithambaram a pawn in the middle game and the trade of queens was later forced by the Indian to harp on the better possibilities for his troupe. Chithambaram was quite unstoppable as he kept increasing the pressure till Keymer walked in to a lost rook and pawns endgame — it took 45 moves in all.

Praggnanandhaa has shown his ability to play all openings with either colour and his choice of French defence turned out to be a good one guaranteeing an equal game. The lone problem was to make something out of an equal position and the 16-year old Turk proved why he is hailed as one of the brightest among young Europeans, as he gave a little away.

The players signed the peace on move 46 when it was evident the rook endgame did not offer chances for either of them.

In the challengers' section which is being held simultaneously, Divya Deshmukh broke out of her shackles to score an impressive victory over Richard Stalmach of Czech Republic.

The adage about the King being a strong piece in the endgame came right for Divya, even though her position oscillated between better and winning.

In the end, Divya had two connected passed pawns in the middle of the board, well aided by her marching king. The game lasted 50 moves.

Results (round 2): Vincent Keymer (GER, 1) lost to Arvindh Chithambaram (IND, 1.5); Wei Yi (CHN, 0.5) drew with Anish Giri (Ned, 1); Nguyen Thai Dai Van (CZE, 1) drew with Sam Shankland (USA, 1.5); Gurel Ediz (TUR, 0.5) drew with R Praggnanandhaa (IND, 1); David Navara (CZE, 1) drew with Le Quang Leim (VIE, 1).

# WPL: RCB looks for victory against DC

PTI ■ BENGALURU

Defending champions Royal Challengers (RCB) Bengaluru will be determined to give their home fans a parting victory over a fatigued Delhi Capitals (DC) outfit here on Saturday, before the Women's Premier League (WPL) moves to Lucknow for its third leg.

RCB had begun the third season of WPL with two wins in Vadodara, but their fortunes have nosedived since the tournament caravan shifted to their home ground M Chinnaswamy here. Three consecutive defeats, including a heartbreaking loss in the Super Over to UP Warriorz, have left them reeling. Placed third on the table and winless at home so far, RCB will be desperate to bounce back against a Delhi Capitals side facing the challenge of playing back-to-back games before the WPL heads to Lucknow.

The Meg Lanning-led Capitals will have little recovery time as they take on Mumbai Indians in a top-of-the-table clash on Friday before locking horns with RCB the very next day. RCB's struggles have been glaring in both batting and bowling. Their batting unit collapsed in the defeat against Gujarat Giants on Thursday, with skipper Smriti Mandhana's form being a major concern. Her 81 against DC remains her only notable

knock in five innings, as spin continues to be her Achilles' heel.

Her opening partner, England's Danni Wyatt-Hodge too has been inconsistent, while Australian veteran Ellyse Perry, despite being in sensational touch, suffered a rare failure with a maiden WPL duck against Gujarat Giants.

The bowling department has been equally underwhelming. Frontline pacers Renuka Singh and Kim Garth have lacked consistency, often erring in line and length. Spinners Georgia Wareham, Ekta Bishoi, and Kanika Ahuja have struggled to exert control in the crucial middle overs, compounding RCB's woes further.

Delhi Capitals, too, have endured an inconsistent campaign, with two losses sandwiched between three wins. Their batting lineup has finally started firing with Shafali Verma and Jess Jonassen finding form. However, skipper Lanning continues to struggle at the top. Jemimah Rodrigues and Annabel Sutherland have provided occasional fireworks in the middle order, but DC will seek more consistency from their batting unit.

In Shikha Pandey, Marizanne Kapp, young Titas Sadhu, Sutherland, and Minnu Mani, DC boast a formidable bowling attack, making them a dangerous opponent despite their inconsistencies.

# New Zealand excited to play in different conditions: Bracewell

PTI ■ DUBAI

New Zealand off-spinner Michael Bracewell on Friday brushed aside any talks about India getting an unfair advantage in the ongoing Champions Trophy by playing all their games in Dubai, simply saying that his team was "excited to try and play in different conditions". Rohit Sharma's team is playing all its matches in Dubai, and even the final will be held here if India goes the distance.

New Zealand will be playing their first match of the tournament here — against India on Sunday — after their last two games were held in Pakistan.

Some cricketers, including South African top-order batter Rassie van der Dussen and former Australia skipper Pat Cummins, have said India are in an advantageous

position as they have played all their games at one venue while other teams have had to travel to different venues in Pakistan.

India had refused to travel to Pakistan for the tournament citing security reasons.

"Look, it is what it is. It's been decided, and that's the way it is, and there's no point dwelling on that," said Bracewell, when asked if India have unfair advantage in Dubai.

"It's part of what makes it exciting. I personally think it's coming to a different ground and trying to figure out those different conditions. Yeah, not much more to say on that other than we're excited to try and learn and play in different conditions," added the 34-year-old off-spinner.

The New Zealander opined that the pitches here would aid spin and it would be a good idea to train hard before

the game against India.

"The wickets here have looked like they've taken a bit of a spin. So, it'll be good to try and get used to the wickets as quickly as we can. We've obviously enjoyed the pitches in Pakistan.

"And I think we've got a pretty well-balanced side to play in any condition. So hopefully, we can continue to do that and adjust to what's in front of us. I think that's been the strength of our side, adjusting to the surface. So, hopefully, we continue to do that as a side," he added.

He said New Zealand doing consistently well against India in ICC tournaments was because of his players not putting themselves under pressure. New Zealand recently inflicted a humiliating 3-0 Test defeat on India, becoming the first touring side to seal a series win in India in 13 years.

# UTT sixth season to begin from May 29

PTI ■ NEW DELHI

The sixth edition of Ultimate Table Tennis (UTT), the sport's premier league in India, will be held from May 29 to June 15 in Ahmedabad, the organisers announced on Friday.

The state-of-the-art EKA Arena, a venue that has staged the 2016 Kabaddi World Cup and 2019 Intercontinental Cup (football), will be the venue for the event that will be in Ahmedabad for the first time.

As UTT continues to grow, eight teams featuring top Indian and international table tennis stars will battle for the crown, with defending champions Goa Challengers looking to claim a historic

third title. "Ultimate Table Tennis has been instrumental in transforming the table tennis landscape in India, providing our players with an unparalleled platform to compete against top international talent," Table Tennis Federation of India Secretary Kamlesh Mehta said.

The upcoming season will feature eight teams split into two groups of four for the draw, with each team playing five ties in the league stage — facing all three opponents in their group once and two randomly drawn teams from the other group.

The top four teams at the end will advance to the knockout rounds, leading to the grand finale on June 15.

# West Ham beats Leicester in Premier League

PTI ■ LONDON

West Ham handed relegation-threatened Leicester its fourth straight Premier League loss by beating Rued van Nistelrooy's team 2-0.

Leicester failed to score in each of those defeats — and allowed a total of 12 goals — to remain 19th in the standings, five points from safety. The Foxes have lost 11 of their past 12 league games.

Tomas Soucek scored in the 21st minute for the home team at London Stadium and the Hammers doubled the lead when Jarrod Bowen's strike deflected off Jannik Vestergaard for an own goal just before halftime. Leicester shook up its coaching staff after last Friday's 4-0 home loss to

Brentford but kept Van Nistelrooy in charge. In 14 Premier League games under the Dutch manager,

Leicester has two wins, one draw and 11 losses. "We were way too passive," Van Nistelrooy told TNT

Sports. "Of course we're in a situation where we're not winning games and we're in a situation where we are in the bottom three, and the pressure's on. But I think the way to get out of it is to literally move forward — on the pitch as well. We have to take initiative."

West Ham moved past Everton into 15th place and has recorded back-to-back Premier League wins for the first time this season.

Graham Potter, who replaced the fired Julen Lopetegui as manager seven weeks ago, said Thursday's victory was a "professional performance," following up from a 1-0 victory at Arsenal last Saturday.

"For us, we're just delighted with two wins, two clean sheets and six points," he said of the mini-run.

# Champions Trophy: South Africa eyes semifinal spot against England

PTI ■ KARACHI

As the battle for the semifinals intensifies in Group B, top-ranked South Africa will aim to assert their dominance and secure a spot in the final four when they face a struggling England in a high-stakes Champions Trophy (CT) clash here on Saturday.

Unlike Group A wherein two best sides — India and New Zealand — have sailed through with ease into the knockouts, Australia, Afghanistan and South Africa in Group B are locked in for an intense battle over the two days for the remaining two semifinal berths. A crushing loss by eight runs to

Afghanistan not only sent England out of the contention for the semifinals but also kept the Asian team's hopes alive of making to the final four, which has kept both South Africa and Australia on tenterhooks.

Afghanistan will take on Australia on Friday in Lahore riding on the big wave of confidence from their last outing between the two teams in the 50-over format. The Afghans had pushed Australia to the brink in their last meeting in the 2023 ODI World Cup before Glenn Maxwell's sensational 201 not out turned the tables.

While there are possibilities of the contest being affected by rain, a win for Afghanistan will

be enough for them to seal a spot in the semifinal, as Australia's defeat will leave the Steve Smith-led side locked in for a battle with South Africa for the second and final spot from this group.

South Africa (3 points, 2.140 NRR) are likely to progress if Australia (3 points, 0.475 NRR) beat Afghanistan (2 points, -0.990 NRR), even if the Proteas lose to England because of their healthy NRR.

A favourable result should not be too difficult for South Africa who have all their bases covered and more importantly, have their key players in-form compared to a misfiring England, who are overly dependent on Joe Root.

In their only completed contest so far — South Africa split points with Australia after a washout in Rawalpindi — the Proteas had crushed Afghanistan by a massive 107

runs. Ryan Rickelton struck a century while skipper Temba Bavuma, Rassie van der Dussen and Aiden Markram hit a half-century each to power South Africa to a

formidable 315/6 batting first, following which the bowlers produced a unified show to bundle out Afghanistan for a mere 208.

While on-paper, South Africa are a formidable unit and have been the team to beat in recent ICC events, their overall form over the last one year or so doesn't inspire confidence as South Africa have lost eight of their last 12 ODIs and won only four since January 2024.

South Africa had also failed to make the tri-series final in Pakistan also involving New Zealand, prior to the Champions Trophy, and Bavuma's side will be required to find consistency against a hurting England who will be

determined to sign off on a high. Barring Root, England do not inspire much confidence as they are amid a losing streak which began with a 0-3 hammering by India before this tournament.

Root's 120 was the only bright spot for England against Afghanistan as the venerable batter was the only one to convert his start and show the promise to do the job for his side, which ideally should have been completed but the 2019 World Cup winners lacked the gumption.

England, who had begun the tournament with a defeat to Australia, are likely to go through changes in terms of leadership but before all that

unfolds, Jos Buttler would be keen to rally his troops around for one final laugh.

**Teams (from):**

**England:** Jos Buttler (c), Jofra Archer, Gus Atkinson, Tom Banton, Harry Brook, Rehan Ahmed, Ben Duckett, Jamie Overton, Jamie Smith, Liam Livingstone, Adil Rashid, Joe Root, Saqib Mahmood, Phil Salt, Mark Wood.

**South Africa:** Temba Bavuma (c), Tony de Zorzi, Marco Jansen, Heinrich Klaasen, Keshav Maharaj, Aiden Markram, David Miller, Wiaan Mulder, Lungi Ngidi, Kagiso Rabada, Ryan Rickelton, Tabraiz Shamsi, Tristan Stubbs, Rassie van der Dussen, Corbin Bosch.
